TO OUR SHAREHOLDERS

1. Overall Economics Situation

The Thai economy in 2023 grew by 1.9%, a decrease from the 2.5% growth rate in 2022 due to the shrinkage in the export sector despite the increased income from the tourism sector.

The spending in the consumption sector grew by 7.1%, an increase from 6.2% growth in the previous year, due to the recovery of the tourism sector. On the other hand, investment in the private sector, export, and service sector has decelerated compared to the previous year, and both consumption and investment in the government sector have decreased.

Considering by industrial sector, the agricultural and non-agricultural sectors grew by 1.9%, a decrease from a growth rate of 2.5% compared to the previous year. Among the non-agricultural sector, the manufacturing industry shifted from growing by 0.7% to decreasing by 3.2% due to the slowdown in the export sector, which is the result of the decline in the global economy. On the contrary, the service sector grew by 4.3% according to the increased number of foreign tourists, while the construction sector has decreased by 0.6% due to the delay in infrastructure construction, which is the result of the delay in budgeting.

In January, the Ministry of Finance of Thailand forecast that GDP in 2024 will grow by 2.8% compared to the previous year. However, in April, the growth has been adjusted to 2.4% (forecast at 1.9-2.9% growth)

Compared to the previous year, the number of foreign tourists is forecasted to increase by 35.7 million, a 26.7 percent increase from last year, and the related industries are expected to boom, which will enhance the economy’s growth. Furthermore, the outlook for investment in the private sector is to expand by 3.7%, and consumption in the private sector is expected to increase by 3.5%.

However, the growth in the export of goods is expected to slow down, by 2.3% compared to the previous year, as well as manufacturing industry. Furthermore, another factor of the GDP adjustment is the effect of climate variability, such as El Nino, upon the agricultural sector and the long delay in the fiscal year 2024 (October 2023-September 2024) budget.

2. Automotive Industry Outlook

Automobile

According to the Federation of Thai Industries, the automobile production volume in 2023 is at 1,841,663 units, decreasing 2.22% from last year, the first decrease in 3 years.

The production volume is divided into 1,156,035 units for export (11.44% increase) and 685,628 units for domestic distribution (18.99% decrease).

The decrease in production volume for domestic distribution is due to the rise in Thailand’s household debt, causing the financial institutions to be more restrictive on auto loan approval and an increase in imported EV car market share.

Divided by category, there are 648,803 units of passenger cars (8% Increase) and 1,192,860 units of pickup trucks (7% decrease)

Source: The Federation of Thai Industries

The domestic automobile production in Thailand in 2024 is estimated at 1.9 million units, growing by 3.2%, accounting for 1.15 million units of export production, slightly decreasing from last year due to the downturn in global economic and international conflict.

Motorcycle

Domestic motorcycle sales in 2023 are at 2,472,872 units, with a 5.9% consecutive decrease in 3 years.

Divided into Complete Build-up Units (CBU) at 2,120,738 units with a 5.2% increase and Completely Knocked Down (CKD) at 352,134 units with a 42.4% decrease.

Source: The Federation of Thai Industries

The CBU production volume in 2024 is expected at approximately 2,120,000 units, down by 14.2% over last year.

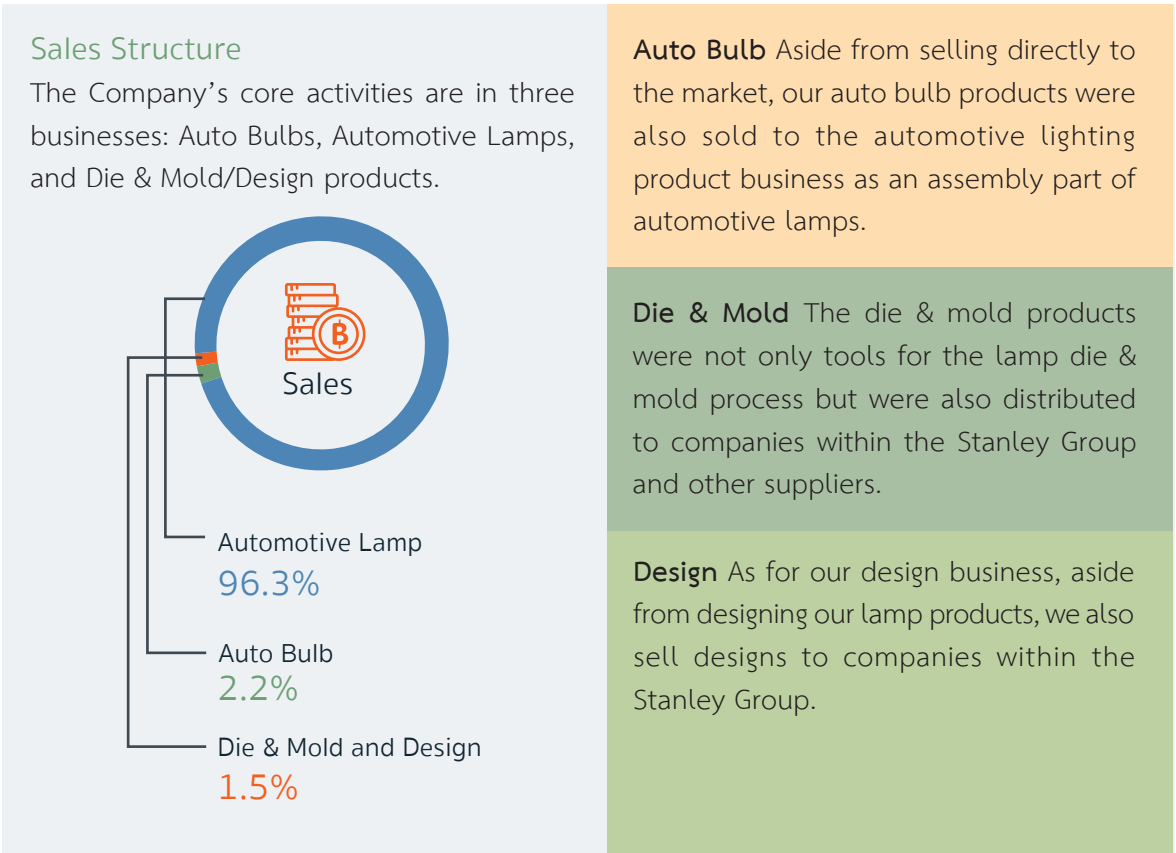

The production volume in 2023 is also down by 5.9% from the previous year, forecasted to be due to the sluggish export resulting from an increase in production volume of neighbor countries.

On the other hand, domestic sales are growing in strength due to the economic recovery, approximately at 1.7 million units, due to the tourism industry and Agricultural recovery that arouse the demand.

3. Company’s Operation

The automobile and motorcycle production volume for export in 2023 has increased. However, the rising household debt caused financial institutions to be more restrictive on loan approval, the production volume of both automobiles and motorcycles for domestic is decreasing, resulting in a decrease in company sales by 0.5% compared to last year.

The Company continues to conduct production efficiency improvements through SNAP (the production reform activities) and quality improvements consecutively, along with the goal of zero waste to deliver safe and reliable products to consumers as the Lamp System Maker and have continuous improvement for better quality of the Company’s performance.

Sale

Amount and proportions of sale structure of each business during 2023 are as follows.

	Fiscal Year 2023 (Apr. 2023 – Mar. 2024)		Fiscal Year 2022 (Apr. 2022 – Mar. 2023)		Change (%)
	Amount	Proportion	Amount	Proportion	
Auto Bulb	310.50	2.16%	394.97	2.73%	(21.39%)
Automotive Lamp	13,846.12	96.29%	13,933.76	96.44%	(0.63%)
Die & Mold and Design	223.31	1.55%	119.12	0.83%	87.47%
Total	14,379.93	100%	14,447.85	100%	(0.47%)

* Automotive Bulb and Die & Mold and Design does not include in internal transfer

Investment

Investment in 2023 are as follows.

	Fiscal Year 2023 (Apr. 2023 – Mar. 2024)	Fiscal Year 2022 (Apr. 2022 – Mar. 2023)	Change (%)
	Amount	Amount	
Land	-	-	-
Buildings	89.44	18.70	378.29%
Machines & Equipment	387.86	385.15	0.69%
Molds & Tools	212.41	266.45	(20.28%)
Others	14.31	-	100%
Total	704.02	670.30	5.03%

Employment

Number of employees in 2023 are as follows.

	Employees as in fiscal year 2023	Employees as in fiscal year 2022	Change (%)
Thai employee (Male)	1,510	1,578	(68)
Thai employee (Female)	1,267	1,334	(67)
Japanese staff	19	18	1
Total	2,796	2,930	(134)

4. Future Outlook

The semiconductor shortage problem in 2023 is settling, and accordingly, sales in the first half of the year have steadily progressed. However, the uncertainty has grown as entering the second half of the year due to the delay in establishing a new government, resulting in a delay in budget approval for FY2024. Furthermore, a countermeasure against high household debt, such as an increase in the down payment rate and tightened loan screening criteria, caused a decrease in sales.

The situation in the second half of 2023 will continue through 2024, and domestic sales volume is expected to fall below the previous year, just as in 2023.

On the other hand, although the production for exports was strong in FY2023, the Asian economy is showing signs of slowing down due to issues such as uncertainties, prolonged international conflicts, and rising energy prices.

The automotive and motorcycle industry is strengthening its domestic development structure, especially for local development of ASEAN models is expected to increase.

The automobile and motorcycle industries are expected to face an even more severe environment this year. Nevertheless, Thailand will continue to be a development and export hub in Asia, and this position will continue to be strengthened.

As a manufacturer of lamp systems, we need to closely monitor customer needs and market needs, in order to enhance competitiveness.

All employees of Thai Stanley and affiliated companies will cooperate to create excellent production through the production improvement activities: SNAP (Stanley New Approach for higher Productivity) to enhance competitiveness under these circumstances of business. We are committed to improving and developing the business by maintaining our production capacity for the future, developing lamp system technology and products, as well as to strengthening our carbon neutralization and building trust with our customers by promoting safe and reliable products for users. We will also strive to strengthen our organizational capabilities by continually maintaining our competitive potential to deliver the value that society needs.

The Company is committed to delivering ongoing profit and happiness in order to grow with all stakeholders.

The Company will make every effort to take action on measures as mentioned above, in order to give appropriate profits based on all stakeholders' satisfaction. We would like to thank you for your continued support of the company.

Report of the Board of Directors' Responsibilities for the Financial Reports

The Board of Directors of Thai Stanley Electric Public Company Limited is responsible for the Financial Statements of the Company which have been prepared in accordance with generally accepted accounting standards in Thailand under the Accounting Act B.E.2543, and the financial reporting requirements of the Securities and Exchange Commission under the Securities and Exchange Act B.E.2535 . The accounting policies adopted are deemed appropriate and applied consistently with completely and adequate disclosure of significant information in the notes to the financial statements and information data that appears in the 2023 annual report and this was to ensure transparency and benefits to the shareholders and investors.

The Board of Directors has appointed an Audit Committee consists of independent directors to review of financial statements and the internal control system to ensure that accounting records are accurate, complete and timely. The views of the Audit Committee are report in the Audit Committee 's report in the Company's annual report.

The company's financial statements were audited by PricewaterhouseCoopers ABAS Co.,Ltd. , the company's auditor. During the audit, the Board of Directors supported the auditor with various information and documents so that the auditor could audit and express its opinions according to the accounting standards. The auditor's opinions appear in the report of auditor in this annual report.

The Board of Directors is confident of the company's internal control system that the financial statements as March 31, 2024 presents the financial position, the results of operation and cash flows accurately in all material respects with generally accepted under financial reporting standards.

Mr. Apichart Lee-issaranukul
Executive Chairman

Mr. Kazunori Nakai
President

Report of the Audit Committee

The Audit Committee consists of three independent directors who are fully qualified with related requirements and possess with experience, knowledge and capability that are beneficial to the Company's business. They include Mr. Krisada Visavateeranon as the chairman of the Audit Committee, Mr. Chokechai Tanpoonsinthana and Mr. Suchart Phisitvanich as members. Mr. Chokechai Tanpoonsinthana vacated from the positions as independent director and Audit Committee (passed away), effective from October 29, 2023 and the Board of Directors' Meeting No. 1/2024 resolved to approved the appointment of Mr. Wiboon Rasmeepaisarn as independent director and Audit Committee effective from January 19, 2024. Mr. Wiboon Rasmeepaisarn is the member with knowledge and experience in accounting and financial sufficient to reviewing the reliability of the Company's financial statements.

In the fiscal year 2023, starting from April 1, 2023 to March 31, 2024, the Audit Committee were held 12 meetings with the auditors, management and internal auditors, which were 4 meetings with the auditors without management. Participation in these meetings by each Audit Committee member is as follows.

Name		Position	No. of participation
1. Mr. Krisada	Visavateeranon	Chairman of the Audit Committee	12/12
2. Mr. Chokechai	Tanpoonsinthana	Member of the Audit Committee	6/12 (retired)
3. Mr. Suchart	Phisitvanich	Member of the Audit Committee	12/12
4. Mr. Wiboon	Rasmeepaisarn	Member of the Audit Committee	6/12 (new appointment)

The Audit Committee fully performed its duty according to the roles, duties and responsibilities as stated in the Charter of the Audit Committee, which was approved by the Board of Directors, with opinions and offers being expressed freely and independently. Summary of the Audit Committee's performance and opinions to the Board of Director meetings in 2023 are as follows.

1. Review the financial report, The Audit Committee reviewed the accuracy and reliability of all quarterly and annual financial statement which reviewed and audited by the auditor. The audit committee reviewed material issues with the external auditors to ensure that the preparation of financial statements and disclosures in the company's financial statements are correct, complete, reliable and in accordance with financial reporting standards. The Audit Committee has opinion that in the year 2023 the Company's financial statements have been prepared in accordance with Thai Financial Reporting Standards (TFRS), accurate disclosure of important information complete and adequate.
2. Review the corporate governance, internal control and risk management system, The Audit Committee has reviewed the company operation to comply with the principles of good corporate governance of the Securities and Exchange Commission, reviewed the internal control assessment results in accordance with the guidelines that set by the SEC and reviewing

the risk management system. The Audit Committee has opinion that the company has good corporate governance, adequate and appropriate internal control and risk management.

3. Reviewed the internal audit system, The Audit Committee has considered the scope of work, duties and responsibilities, independent of the Internal Audit Department and consider to approving the annual internal audit plan. The Audit Committee has opinion that the company has a sufficient and appropriate internal audit system.
4. Review compliance with relevant laws and regulations. The Audit Committee reviewed and supervised company's operations in accordance with the law of securities and exchange, the Stock Exchange of Thailand's regulations and relevant laws related to company's business including rules and regulations of the company. The Audit Committee has opinion that there was not such significant matter of un-compliance transaction with the above laws and regulations.
5. Review related party transaction and conflict of interest. The Audit Committee reviewed related party transaction or transactions with conflict of interest to comply with laws and the Stock Exchange of Thailand's regulations, which the Audit Committee opined that the company entered into related party transactions in accordance with general trading condition and beneficial to the company operation. The company has fully complied with policy and disclosed information pursuant to the Stock Exchange of Thailand.
6. Review the implementation of anti-corruption measure. The Audit Committee has reviewed the company's operations in accordance with the established policy and measures, including receive complaint of corruption or violated the Company's code of conduct. In 2023 the Company did not receive any complaint on fraud or violation of the Company's code of conduct.
7. Consider to selection and nomination of external auditor and auditor's remuneration for 2024. The Audit Committee had considered the external auditors' independence and knowledge as well as their understanding of the Company's business, work quality, auditor qualifications and the audit fee. The Audit Committee resolved to nominate PricewaterhouseCoopers ABAS Ltd. (PwC) for the Board's to consider and propose to the shareholders for approval in 2024.
8. Evaluate the performance of the Audit Committee, which in 2023 the overall of self-assessment of the Audit Committee is "excellent". The Audit Committee carried out their responsibilities delegated by the Board of Directors and in line with best practices guidelines for Audit Committee.

To summarize in 2023, The Audit Committee has performed its duties in accordance with the responsibilities specified in the Audit Committee Charter as approved by the Board of Directors through the exercise of its knowledge, ability, caution, prudence and independent as well as provided opinions and suggestions for the company benefit.

The Audit Committee has opinion that financial statements were prepared in accordance with Thai Financial Reporting Standards and are accurate, complete, reliable and in line with accounting standards, connected party transactions are reasonable and for the best interest of the Company, information is disclosed adequately and reliably, internal control is adequate and effective, and good corporate governance and related laws and regulations are fully complied with, without finding any significant flaws.

(MR. KRISADA VISAVATEERANON)

Chairman of the Audit Committee

INDEPENDENT AUDITOR'S REPORT AND FINANCIAL STATEMENTS

Financial Statement in which the Equity method is
applied and Separate Financial Statement

As at 31 March 2024

Independent Auditor's Report

To the shareholders of Thai Stanley Electric Public Company Limited

My opinion

In my opinion, the financial statements in which the equity method is applied and the separate financial statements present fairly, in all material respects, the financial position in which the equity method is applied and the separate financial position of Thai Stanley Electric Public Company Limited (the Company) as at 31 March 2024, and its financial performance in which the equity method is applied and the separate financial performance and its cash flows in which the equity method is applied and the separate cash flows for the year then ended in accordance with Thai Financial Reporting Standards (TFRS).

What I have audited

The financial statements in which the equity method is applied and the separate financial statements comprise:

- the statement of financial position in which the equity method is applied and the separate statement of financial position as at 31 March 2024;
- the statement of income in which the equity method is applied and the separate statement of income for the year then ended;
- the statement of comprehensive income in which the equity method is applied and the separate statement of comprehensive income for the year then ended;
- the statement of changes in equity in which the equity method is applied and the separate statement of changes in equity for the year then ended;
- the statement of cash flows in which the equity method is applied and the separate statement of cash flows for the year then ended; and
- the notes to the financial statements in which the equity method is applied and the separate financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

I conducted my audit in accordance with Thai Standards on Auditing (TSAs). My responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements in which the equity method is applied and separate financial statements section of my report. I am independent of the Company in accordance with the Code of Ethics for Professional Accountants issued by the Federation of Accounting Professions that are relevant to my audit of the financial statements in which the equity method is applied and separate financial statements, and I have fulfilled my other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key audit matters

Key audit matters are those matters that, in my professional judgment, were of most significance in my audit of the financial statements in which the equity method is applied and separate financial statements of the current period.

I determine one key audit matter: Fair value measurement of an investment in an equity instrument of unlisted equity securities. The matter was addressed in the context of my audit the financial statements in which the equity method is applied and separate financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on the matter.

Key audit matter	How my audit addressed the key audit matter
<p>Fair value measurement of an investment in an equity instrument of unlisted equity securities</p> <p>Refer to Note No. 13 Financial assets measured at fair value through other comprehensive income. As at 31 March 2024, the Company had an investment in an equity instrument of unlisted equity securities of Baht 1,710.78 million, which represents 6.90% and 7.56% of the total assets in the Equity Method and Separate Financial Statement, respectively.</p> <p>The investee engages in the business of manufacturing small bulbs, LED, electronic components, electronic equipment, automotive lighting equipment, molds and plastic products. The Company determined that this is an investment in an equity instrument under the scope of TAS 32 ‘Financial Instruments: Presentation’ and requires subsequent fair value measurement under the scope of TFRS 9 ‘Financial Instruments’. The Company elected to account for the equity investment at fair value through other comprehensive income (FVOCI).</p>	<p>To obtain evidence for the management’s fair value measurement of an investment in an equity instrument of unlisted equity securities, I carried out the following procedures:</p> <ul style="list-style-type: none"> reviewed management’s assessment that the investment should be classified as a financial asset measured at fair value through other comprehensive income. assessed the reasonableness of the methodology used to measure the fair value of the investment in an equity instrument of unlisted equity securities and tested the fair value calculation of such investment. involved my valuation expert to assess the fair value taking into account independently obtained data from publicly available financial information of companies in the same industry. The valuation expert also assessed the discount for lack of marketability rate of the equity instrument to consider

The investment in an equity instrument of unlisted equity securities was appraised for its fair value using valuation techniques of input from unobservable market data (Level 3). The management also made adjustments to reflect the risk and nature of the equity instruments. The measurement indicated that the fair value was more than the carrying value under the cost method. Therefore, the Company recognised a gain of Baht 144.32 million through other comprehensive income in the year ended 31 March 2024 Equity Method and Separate Financial Statement.

I focused on the fair value measurement of the investment in an equity instrument of unlisted equity securities because it had a material impact on the total assets and because of the complexity of its assessment. Using unobservable market data (Level 3) to measure fair value required management's judgment to adjust the data to reflect the risk and nature of the equity instruments.

whether the fair value used by management was within an acceptable range.

As a result of these procedures, I determined that the method and assumptions applied in the fair value measurement of the investment in an equity instrument of unlisted equity securities were reasonable and in line with the accounting for the fair value.

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements in which the equity method is applied and separate financial statements and my auditor's report thereon. The annual report is expected to be made available to me after the date of this auditor's report.

My opinion on the financial statements in which the equity method is applied and separate financial statements does not cover the other information and I will not express any form of assurance conclusion thereon.

In connection with my audit of the financial statements in which the equity method is applied and separate financial statements, my responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements in which the equity method is applied and separate financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

When I read the annual report, if I conclude that there is a material misstatement therein, I am required to communicate the matter to the audit committee.

Responsibilities of the directors for the financial statements in which the equity method is applied and separate financial statements

The directors are responsible for the preparation and fair presentation of the financial statements in which the equity method is applied and separate financial statements in accordance with TFRS, and for such internal control as the directors determine is necessary to enable the preparation of financial statements in which the equity method is applied and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements in which the equity method is applied and separate financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The audit committee assists the directors in discharging their responsibilities for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements in which the equity method is applied and separate financial statements

My objectives are to obtain reasonable assurance about whether the financial statements in which the equity method is applied and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements in which the equity method is applied and separate financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgment and maintain professional scepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements in which the equity method is applied and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements in which the equity method is applied and separate financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements in which the equity method is applied and separate financial statements, including the disclosures, and whether the financial statements in which the equity method is applied and the separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the financial statements in which the equity method is applied and separate financial statements. I am responsible for the direction, supervision and performance of the Company's audit. I remain solely responsible for my audit opinion.

I communicate with the audit committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide the audit committee with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with the audit committee, I determine those matters that were of most significance in the audit of the financial statements in which the equity method is applied and the separate financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that

a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

PricewaterhouseCoopers ABAS Ltd.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

1 General information

Thai Stanley Electric Public Company Limited (the "Company") is a public limited company, incorporated in Thailand. The address of its registered office is 29/3 Moo 1 Bangpoorn-Rungsit Road, Banklang, Amphur Muang, Pathumthanee, Thailand 12000. The Company is listed on the Stock Exchange of Thailand.

The principal business operation of the Company is the manufacture and sales of automotive bulbs, lighting equipment, molds & dies and product designs.

These equity method and separate financial statements have been approved by the Company's Board of directors on 17 May 2024.

2 Basis of preparation

The equity method and separate financial statements have been prepared in accordance with Thai Financial Reporting Standards ("TFRS") and the financial reporting requirements issued under the Securities and Exchange Act.

The equity method and separate financial statements have been prepared under the historical cost convention except certain financial assets and liabilities (including derivative instrument) and employee benefit obligations.

The preparation of financial statements in conformity with TFRS requires management to use certain critical accounting estimates and to exercise its judgement in applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas that are more likely to be materially adjusted due to changes in estimates and assumptions are disclosed in Note 7.

An English version of the equity method and separate financial statements have been prepared from the statutory financial statements that are in the Thai language. In the event of a conflict or a difference in interpretation between the two languages, the Thai language statutory financial statements shall prevail.

3 New and amended financial reporting standards

Commencing from 1 April 2023, the Company adopted the amended financial reporting standards that are effective for accounting period beginning on or after 1 January 2023 and relevant to the Company. The adoption of these standards does not have significant impacts to the Company.

Amended financial reporting standards that are effective for the accounting period beginning on or after 1 January 2024 and have significant impacts on the Company.

The following amended TFRSs were not mandatory for the current reporting period and the Company has not early adopted them.

- a) **Amendment to TAS 1 - Presentation of financial statements** revised the disclosure from '*significant* accounting policies' to '*material* accounting policies'. The amendment also provides guidelines on identifying when the accounting policy information is material. Consequently, immaterial accounting policy information does not need to be disclosed. If it is disclosed, it should not obscure material accounting information.
- b) **Amendment to TAS 8 - Accounting policies, changes in accounting estimates and errors** revised to the definition of 'accounting estimates' to clarify how companies should distinguish between changes in accounting policies and changes in accounting estimates. The distinction is important because changes in accounting estimates are applied prospectively to transactions, other events and conditions from the date of that change. Whereas changes in accounting policies are generally applied retrospectively to past transactions and other past events as well as the current period as if the new accounting policy had always been applied.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

- c) **Amendments to TAS 12 - Income taxes** require companies to recognise deferred tax related to assets and liabilities arising from a single transaction that, on initial recognition, gives rise to equal amounts of taxable and deductible temporary differences. Example transactions are leases and decommissioning obligations.

The amendment should be applied to transactions on or after the beginning of the earliest comparative period presented. In addition, entities should recognise deferred tax assets (to the extent that they can probably be utilised) and deferred tax liabilities at the beginning of the earliest comparative period for all deductible and taxable temporary differences associated with:

- right-of-use assets and lease liabilities, and
- decommissioning, restoration and similar liabilities, and the corresponding amounts recognised as part of the cost of the related assets.

The cumulative effect of recognising these adjustments is recognised at the beginning of retained earnings or another component of equity, as appropriate.

4 Accounting policies

The principal accounting policies adopted in the preparation of these equity method and separate financial statements are set out below.

4.1 Principles of equity accounting

a) Associate

Associate is an entity over which the Company has significant influence but not control or joint control.

In the separate financial statements, investment in an associate is accounted for using cost method.

b) Joint arrangement

An investment in joint arrangement is classified as either joint operation or joint venture depending on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement.

Joint venture

A joint venture is a joint arrangement whereby the Company has a right to the net assets of the arrangement. An interest in a joint venture is accounted for using the equity method.

In the separate financial statements, investments in a joint venture is accounted for using cost method.

c) Equity method

The investment is initially recognised at cost which is consideration paid and directly attributable costs.

The Company's subsequently recognises shares of its associate and joint venture' profits or losses and other comprehensive income in the profit or loss and other comprehensive income, respectively. The subsequent cumulative movements are adjusted against the carrying amount of the investment.

When the Company's share of losses in an associate and a joint venture equals or exceeds its interest in the associate and joint venture, the Company does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate and joint venture.

d) Intercompany transactions on equity method financial statements

Unrealised gains on transactions between the Company and its associate and joint venture are eliminated to the extent of the Company's interest in the associate and joint venture. Unrealised losses are also eliminated in the same manner unless the transaction provides evidence of an impairment of the asset transferred.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

4.2 Foreign currency translation

a) Functional and presentation currency

The financial statements are presented in Thai Baht, which is the Company's functional and presentation currency.

b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or the date of revaluation where items are re-measured.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit or loss.

Any exchange component of gains and losses on a non-monetary item that recognised in profit or loss, or other comprehensive income is recognised following the recognition of a gain or loss on the non-monetary item.

c) Associate and Joint venture

The operational results and financial position of the associate and joint venture (none of which has the currency of a hyper-inflationary economy) that have a different functional currency from the Company's presentation currency are translated into the presentation currency as follows.

- Assets and liabilities are translated at the closing rate at the date of respective statement of financial position;
- Income and expenses for each statement of profit or loss are translated at average exchange rates; and
- All resulting exchange differences are recognised in other comprehensive income.

4.3 Cash and cash equivalents

In the statements of cash flows, cash and cash equivalents includes cash on hand, deposits held at call, short-term highly liquid investments with maturities of three months or less from acquisition date.

4.4 Trade accounts receivable

Trade receivables are amounts due from customers for goods sold or service performed in the ordinary course of business. They are generally due for settlement within 30 to 60 days and therefore are all classified as current.

Trade receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, they are recognised at fair value. The Company holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost.

The impairment of trade receivables are disclosed in Note 4.6 (f).

4.5 Inventories

Inventories are stated at the lower of cost and net realisable value.

Cost of inventories is determined by the moving average method. Cost of raw materials comprise all purchase cost and costs directly attributable to the acquisition of the inventory less all attributable discounts. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and directly attributable costs in bringing the inventories to their present location and condition.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

4.6 Financial asset

a) Classification

The Company classifies its debt instrument financial assets in the following measurement categories depending on i) business model for managing the asset and ii) the cash flow characteristics of the asset whether they represent solely payments of principal and interest (SPPI).

- those to be measured subsequently at fair value (either through other comprehensive income or through profit or loss); and
- those to be measured at amortised cost.

The Company reclassifies debt investments when and only when its business model for managing those assets changes.

For investments in equity instruments, the Company has an irrevocable election at the time of initial recognition to account for the equity investment at fair value through profit or loss (FVPL) or at fair value through other comprehensive income (FVOCI) except those that are held for trading, they are measured at FVPL.

b) Recognition and derecognition

Regular way purchases, acquires and sales of financial assets are recognised on trade-date, the date on which the Company commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership.

c) Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at FVPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether the cash flows are solely payment of principal and interest.

d) Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the financial assets. There are three measurement categories into which the Company classifies its debt instruments:

- **Amortised cost:** Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in other income - interest income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as a separate line item in the statement of comprehensive income.
- **FVOCI:** Financial assets that are held for i) collection of contractual cash flows; and ii) for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through other comprehensive income (OCI), except for the recognition of impairment gains or losses, interest income using the effective interest method, and foreign exchange gains and losses which are recognised in profit or loss. When the financial assets is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income is included in other income - interest income. Impairment expenses are presented separately in the statement of comprehensive income.
- **FVPL:** Financial assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within other gains/(losses) in the period in which it arises.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

e) Equity instruments

The Company measures all equity investments at fair value. Where the Company has elected to present fair value gains and losses on equity instruments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income - dividend income when the right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in other gains/(losses) in the statement of comprehensive income.

Impairment losses (and reversal of impairment losses) on equity investments are reported together with changes in fair value.

f) Impairment

The Company applies the TFRS 9 simplified approach in measuring the impairment of trade receivables, which applies lifetime expected credit loss, from initial recognition, for all trade receivables.

To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due. The expected credit loss rates are based on payment profiles, historical credit losses as well as forward-looking information and factors that may affect the ability of the customers to settle the outstanding balances.

For other financial assets carried at amortised cost and FVOCI, the Company applies TFRS 9 general approach in measuring the impairment of those financial assets. Under the general approach, the 12-month or the lifetime expected credit loss is applied depending on whether there has been a significant increase in credit risk since the initial recognition.

The significant increase in credit risk (from initial recognition) assessment is performed every end of reporting period by comparing i) expected risk of default as of the reporting date and ii) estimated risk of default on the date of initial recognition.

The Company assesses expected credit loss by taking into consideration forward-looking information and past experiences. The expected credit loss is a probability-weighted estimate of credit losses (probability-weighted present value of estimated cash shortfall). The cash shortfall is the difference between all contractual cash flows that are due to the Company and all cash flows expected to receive, discounted at the original effective interest rate.

When measuring expected credit losses, the Company reflects the following:

- probability-weighted estimated uncollectible amounts
- time value of money
- supportable and reasonable information as of the reporting date about past experience, current conditions and forecasts of future situations.

Impairment (and reversal of impairment) losses are presented as net impairment losses within operating profit.

4.7 Property, plant and equipment

All other property, plant and equipment are stated at historical cost less accumulated depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount, only when it is probable that future economic benefits associated with the item will flow to the Company. The carrying amount of the replaced part is derecognised.

All other repairs and maintenance are charged to profit or loss when incurred.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

	<u>Useful life (years)</u>
Land and building improvements	5 - 15
Buildings and other constructions	10 - 40
Machinery, equipment and factory tools	5 - 20
Molds	4
Motor vehicles	5
Furniture, fixtures and office equipment	3 - 5

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Gains or losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in other gains or losses, net.

4.8 Intangible assets

Acquired computer software

Acquired computer software is measured at cost. These costs are amortised over their estimated useful lives 5 years to 10 years.

Cost associated with maintaining computer software are recognised as an expense as incurred.

Product design costs

Research expenditure is recognised as an expense as incurred.

Cost incurred on development projects relating to the design of new products is recognised as an asset when the Company can demonstrate all of the following:

- the product design costs can be measured reliably;
- the Company can demonstrate that it is technically, financially, commercially, and resourcefully feasible; and
- the Company intends to and has the ability to complete the project for the purpose of using for the commercial production.

Product design costs previously recognised as an expense are not recognised as an asset in a subsequent period.

Capitalised product design costs are amortised when the asset is ready to use by applying a straight-line method over the period of its expected benefit, not exceeding 4 years.

4.9 Impairment of assets

Assets that have an indefinite useful life are tested annually for impairment, or more frequently if events or changes in circumstances indicate that it might be impaired. Assets that are subject to amortisation are reviewed for impairment whenever there is an indication of impairment. An impairment loss is recognised for the amount by which the carrying amount of the assets exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use.

Where the reasons for previously recognised impairments no longer exist, the impairment losses on the assets concerned other than goodwill is reversed.

4.10 Leases

Leases - where the Company is the lessor

Rental income under operating leases (net of any incentives given to lessees) is recognised on a straight-line basis over the lease term. Initial direct costs incurred in obtaining an operating lease are added to the carrying amount of the underlying asset and recognised as expense over the lease term on the same basis as lease income. The respective leased assets are included in the statement of financial position based on their nature.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

4.11 Financial liabilities

a) Classification

Financial instruments issued by the Company are classified as either financial liabilities or equity securities by considering contractual obligations.

- Where the Company has an unconditional contractual obligation to deliver cash or another financial asset to another entity, it is considered a financial liability unless there is a predetermined or possible settlement for a fixed amount of cash in exchange of a fixed number of the Company's own equity instruments.
- Where the Company has no contractual obligation or has an unconditional right to avoid delivering cash or another financial asset in settlement of the obligation, it is considered an equity instrument.

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

b) Measurement

Financial liabilities are initially recognised at fair value and are subsequently measured at amortised cost.

c) Derecognition and modification

Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled, or expired.

Where the terms of a financial liability are renegotiated/modified, the Company assesses whether the renegotiation/modification results in the derecognition of that financial liability. Where the modification results in an extinguishment, the new financial liability is recognised based on fair value of its obligation. The remaining carrying amount of financial liability is derecognised. The difference as well as proceed paid is recognised as other gains/(losses) in profit or loss.

Where the modification does not result in the derecognition of the financial liability, the carrying amount of the financial liability is recalculated as the present value of the renegotiated/modified contractual cash flows discounted at its original effective interest rate. The difference is recognised in other gains/(losses) in profit or loss.

4.12 Current and deferred income taxes

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current tax

The current income tax is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax

Deferred income tax is recognised on temporary differences arising from differences between the tax base of assets and liabilities and their carrying amounts in the financial statements. However, deferred income tax is not recognised for temporary differences arise from:

- initial recognition of an asset or liability in a transaction other than a business combination that affects neither accounting nor taxable profit or loss is not recognised
- investments in subsidiaries, associates and joint arrangements where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax is measured using tax rates of the period in which temporary difference is expected to be reversed, based on tax rates and laws that have been enacted or substantially enacted by the end of the reporting period.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

4.13 Employee benefits

a) Short-term employee benefits

Liabilities for short-term employee benefits such as salaries, wages, bonuses, contributions to the social security fund and others, that are expected to be settled wholly within 12 months after the end of the period are recognised in respect of employees' service up to the end of the reporting period. They are measured at the amount expected to be paid.

b) Defined contribution plan

The Company pays contributions to a separate fund (under the Provident Fund Act B.E. 2530). The Company has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due.

c) Defined benefit plans

Amount of retirement benefits is defined by the agreed benefits the employees will receive after the completion of employment. It usually depends on factors such as age, years of service and an employee's latest compensation at retirement.

The defined benefit obligation is calculated by an independent actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using market yield of government bonds that matches the terms and currency of the expected cash outflows.

Remeasurement gains and losses are recognised directly to other comprehensive income in the period in which they arise. They are presented as a separate item in statements of changes in equity.

Past-service costs are recognised immediately in profit or loss.

d) Termination benefits

The Company recognises termination benefits at the earlier of 1) when the Company can no longer withdraw the offer of those benefits; and 2) when the entity recognises costs for the related restructuring. Benefits due more than 12 months are discounted to their present value.

4.14 Provisions

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation. The increase in the provision due to passage of time is recognised as interest expense.

4.15 Share capital

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options (net of tax) are shown as a deduction in equity.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

4.16 Revenue recognition

Revenue include all revenues from ordinary business activities. All ancillary income in connection with the delivery of goods and rendering of services in the course of the Company's ordinary activities is also presented as revenue.

Revenue are recognised in accordance with the provision of goods or services, provided that collectibility of the consideration is probable.

Multiple element arrangements involving delivery or provision of multiple products or services are separated into distinct performance obligations. Total transaction price of the bundled contract is allocated to each performance obligation based on their relative standalone selling prices or estimated standalone selling prices. Each performance obligation is recognised as revenue on fulfillment of the obligation to the customer.

Sales of goods

The Company manufactures and sells products. Sales are recognised when control of the products has transferred, being when the products are delivered, and there is no unfulfilled obligation that could affect the buyer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the buyer, and either the buyer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the Company has objective evidence that all criteria for acceptance have been satisfied.

The product is often sold with retrospective volume discounts based on aggregate sales over a 12 month period. Revenue from these sales is recognised based on the price specified in the contract, net of the estimated volume discounts. Accumulated experience is used to estimate and provide for the discounts, using the expected value method, and revenue is only recognised to the extent that it is highly probable that a significant reversal will not occur. A refund liability (included in accrued expenses) is recognised for expected volume discounts payable to customers in relation to sales made until the end of the reporting period. No significant element of financing is deemed present as the sales are made with a credit term of 30 to 60 days, which is consistent with market practice.

The Company's obligation to repair or replace faulty products under the standard warranty terms is recognised as a provision and cost of sales.

A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

Services

Revenue from rendering services is recognised when services are rendered.

Payments to customers

Payments to customers or on behalf of customers to other parties, including credited or subsequent discounts, are recognised as a reduction in revenue unless the payment constitutes consideration of a distinct goods or service from the customer.

Financing components

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the Company does not adjust any of the transaction prices for the time value of money.

Other income

Other revenue are recognised on the following bases:

- dividend income is recognised when the right to receive payment is established.
- interest income is recognised on a time proportion basis, taking account of the principal outstanding and the effective rate over the period to maturity, when it is determined that such income will accrue to the Company.
- scrap income is recognised when the scrap is actually sold.

4.17 Dividends

Dividend distributed to the Company's shareholders is recognised as a liability when interim dividends are approved by the Board of Directors, and when the annual dividends are approved by the shareholders.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

4.18 Derivatives and hedging activities

Embedded derivative that is separately accounted for and derivatives that do not qualify for hedge accounting is initially recognised at fair value. Changes in the fair value are included in other gains(losses).

Fair value of derivatives is classified as a current or non-current following its remaining maturity.

5 Financial risk management

5.1 Financial risk

The Company exposes to a variety of financial risks: Market risk (foreign exchange risk and interest rate risk), credit risk, and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance. The Company uses derivative to hedge certain exposures.

Risk management is carried out by a central treasury department under policies which included policies for foreign exchange rate risk, interest rate risk, credit risk, and liquidity risk approved by the Board of Directors. The treasury identifies, evaluates and hedges financial risks in close co-operation with the Company's operating units.

The Company's risk management is controlled by a central treasury department under policies approved by the Board of Directors. Company treasury identifies, evaluates and manages financial risks in close co-operation with the Company's operating units. The board provides written principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative and other financial instruments as well as investment of excess liquidity.

5.1.1 Market risk

a) Foreign exchange risk

The Company has exposure to foreign currency exchange fluctuations on raw materials imported in foreign currencies and certain export sales in foreign currencies. The foreign currency exchange rate risk of the Company occurs mostly in Japanese Yen and US Dollar. The Company uses forward contracts to hedge their exposure to foreign currency risk approximately 50% of transactions in foreign currency after net with foreign currency cash and cash equivalents.

The Company has no formal designation and documentation of hedging relationship so that the risk being hedged, the hedged item, the hedging instrument and risk management objectives and strategy for undertaking hedges are not clearly identified. Therefore, the forward contract are not qualifies for hedge accounting.

Disclosures about derivative financial instruments to which the Company is a party are provided as follows and Note 13.

Exposure

The Company's exposure to foreign currency risk at the end of the reporting period, expressed in Baht are as follows:

	31 March 2024			31 March 2023		
	US Dollar Baht	Euro Baht	Japanese Yen Baht	US Dollar Baht	Euro Baht	Japanese Yen Baht
Cash and cash equivalents	125,693,459	-	678,886	147,161,965	-	575,841
Trade and other accounts receivable	359,389,614	-	-	231,031,799	-	-
Trade and other accounts payable	352,540,017	3,087,906	18,283,692	310,662,621	2,554,433	19,547,902
Foreign currency forwards						
- Purchase of foreign currency	-	-	4,818,000	34,680,000	-	5,204,000

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

Sensitivity

As shown in the table above, the Company is primarily exposed to changes in Baht and Japanese Yen, US Dollar, and Euro exchange rates. The sensitivity of profit or loss to changes in the exchange rates arises mainly from financial assets and financial liabilities denominated in Japanese and US Dollar.

	Impact to net profit	
	Year 2024 Baht	Year 2023 Baht
US Dollar to Baht exchange rate		
- increase 7% (2023: 12%) *	9,278,032	4,019,246
Euro to Baht exchange rate		
- increase 6% (2023: 5%) *	(185,274)	(127,722)
JPY to Baht exchange rate		
- increase 6% (2023: 5%) *	(1,346,056)	(1,205,317)
US Dollar to Baht exchange rate		
- decrease 7% (2023: 12%)*	(9,278,032)	(4,019,246)
Euro to Baht exchange rate		
- decrease 6% (2023: 5%)*	185,274	127,722
JPY to Baht exchange rate		
- decrease 6% (2023: 5%)*	1,346,056	1,205,317

* Holding all other variables constant

b) Interest rate risk

The Company's income and operating cash flows are substantially independent of changes in market interest rates. The Company is exposed to interest rate risk relates primarily to its deposits at financial institutions and short-term investments. Most of the Company's financial assets bear floating interest rates or fixed interest rates which are close to the market rate. The Company assesses that the interest rate risk is insignificant as the Company does not rely on the interest income in operating business.

5.1.2 Credit risk

Credit risk arises from cash and cash equivalents and short-term investment and credit exposures to customers, including outstanding receivables.

a) Risk management

Credit risk is managed on a group basis. For banks and financial institutions, only independently rated parties with a minimum rating of 'bbb' are accepted.

If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on the assessments in accordance with limits set by the board. The compliance with credit limits by customers is regularly monitored by line management.

b) Impairment of financial assets

The Company has 2 types of financial assets that are subject to the expected credit loss model:

- Trade and other accounts receivable
- Loans to employees

While cash and cash equivalents and short-term investment are also subject to the impairment requirements of TFRS 9, the identified impairment loss was immaterial.

Trade receivables

The Company applies the TFRS 9 simplified approach to measure expected credit losses which uses a lifetime expected loss allowance for all trade receivables.

To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due.

Disclosures about Trade receivables are provided in Note 11.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

The Company write-off trade receivables when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the Company, and a failure to make contractual payments or cannot be contacted for a long period.

Impairment losses on trade receivables are presented as net impairment losses within operating profit. Subsequent recoveries of amounts previously written off are credited against the same line item.

Loans to employees

Loans to employees measured at amortised cost are considered to have low credit risk, and the loss allowance recognised during the year was therefore limited to 12 months expected losses. Lifetime expected credit losses is recognised for the loans that the credit risk is significantly increased.

Disclosures about Loans to employees are provided in Note 14.

5.1.3 Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. At the end of the reporting period the Company held deposits at call of Baht 2,000,191,282 (2023: Baht 2,084,203,370) that are expected to readily generate cash inflows for managing liquidity risk.

Due to the dynamic nature of the underlying businesses, the Company Treasury maintains flexibility in funding by maintaining availability under committed credit lines.

Management monitors i) rolling forecasts of the Company's liquidity reserve (comprising the undrawn borrowing facilities below); and ii) cash and cash equivalents on the basis of expected cash flows. In addition, the Company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary, monitoring balance sheet liquidity ratios and maintaining financing plans.

Maturity of financial liabilities

The tables below analyse the maturity of financial liabilities grouping based on their contractual maturities. The amounts disclosed are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

The Company's portfolio of derivative instruments with a negative fair value has been included at their fair value of Baht 79,037 (2023: Baht 1,094,303) within the 'On demand' time bucket. This is because the contractual maturities are essential for an understanding the timing of the cash flows. These contracts are managed on a maturity date basis.

Contractual maturity date as at 31 March 2024	On demand Baht	Within 1 year Baht	1 - 5 years Baht	Over 5 years Baht	Total Baht	Book value Baht

5.2 Capital management

Risk management

The objectives when managing capital are to:

- safeguard their ability to continue as a going concern, to provide returns for shareholders and benefits for other stakeholders, and
- maintain an optimal capital structure to reduce the cost of capital

In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

6 Fair value

The following table shows fair values and carrying amounts of financial assets and liabilities by category, excluding those with the carrying amount approximates fair value.

	Fair value through profit or loss (FVPL) Baht	Fair value through other comprehensive income (FVOCI) Baht	Amortised cost Baht	Fair value Baht
As at 31 March 2024

- Foreign exchange forward contracts	1,094,303	-	-	1,094,303
	1,094,303	-	-	1,094,303

The following table presents fair value of financial assets and liabilities recognised and disclosed by their fair value hierarchy.

	Equity method financial statements/ Separate financial statements							
	Level 1		Level 2		Level 3		Total fair value	
	31 March 2024	31 March 2023	31 March 2024	31 March 2023	31 March 2024	31 March 2023	31 March 2024	31 March 2023
Assets								
<i>Financial assets at fair value through other comprehensive income</i>								
Investments in equity instruments	167,860,862	116,367,689	-	-	1,710,783,527	1,566,461,774	1,878,644,389	1,682,829,463
Total assets	167,860,862	116,367,689	-	-	1,710,783,527	1,566,461,774	1,878,644,389	1,682,829,463
Liabilities								
<i>Financial liabilities at fair value through profit or loss</i>								
Trading derivatives - Foreign currency forwards	-	-	79,037	1,094,303	-	-	79,037	1,094,303
Total liabilities	-	-	79,037	1,094,303	-	-	79,037	1,094,303

Fair values are categorised into hierarchy based on inputs used as follows:

- Level 1: The fair value of financial instruments is based on the closing price by reference to the Stock Exchange.
- Level 2: The fair value of financial instruments is determined using significant observable inputs and, as little as possible, entity-specific estimates.
- Level 3: The fair value of financial instruments is not based on observable market data.

Fair values of financial assets and financial liabilities are recognised according to the accounting policies disclosed in Note 4.6 and Note 4.11.

Valuation techniques used to measure fair value level 2

Fair value of debt instruments is determined from contractual cash flows, discounted at the rate derived from observable market price of other quoted debt instruments of the counterparties.

Fair value of foreign exchange forward contracts is determined using forward exchange rate that are quoted in an active market. The effects of discounting are generally insignificant for level 2 derivatives.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

Valuation techniques used to measure fair value level 3

Non-listed equity investments were appraised for its fair value using valuation techniques of input from unobservable market data (Level 3). The management also made adjustments to reflect the risk and nature of the equity instruments.

The following table presents changes in level 3 financial instruments for the year ended 31 March.

	2024 Baht	2023 Baht
Balance as at 1 April	1,566,461,774	1,420,124,751
Gain recognised in other comprehensive income	144,321,753	146,337,023
Balance as at 31 March	1,710,783,527	1,566,461,774

The following table summarises the quantitative information about the significant unobservable inputs used in level 3 fair value measurements.

	Fair value		Unobservable inputs	Range of inputs	
	31 March 2024 Baht	31 March 2023 Baht		31 March 2024	31 March 2023
Non-listed equity investments	1,710,783,527	1,566,461,774	Discount for Lack of Marketability: DLOM	15%	15%

Relationship of unobservable inputs to fair value are shown as follows:

	Unobservable inputs	Movement	Change in fair value	
			Increase in assumptions 2024	Decrease in assumptions 2024
Unquoted equity investments	Discount for Lack of Marketability: DLOM	1.00%	Decrease by 1.18%	Increase by 1.18%

The Company's valuation processes

Chief Financial Officer (CFO), Audit Committee (AC) and a valuation team discuss valuation processes and results at least every quarter.

Significant unobservable input of fair value hierarchy level 3 is Discount for Lack of Marketability. The Company estimates by using the mid-range of information and referred to International Valuation standards.

7 Critical accounting estimates, assumptions and judgments

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

a) Fair value of certain financial assets and derivatives

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques. The Company uses judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period. Details of key assumptions used are included in Note 6.

b) Allowances for obsolete and slow-moving inventories

The Company has estimated the allowances for obsolete and slow-moving inventories to reflect their impairment. The allowances are taken into account inventory aging, recent sales experience and other factors that affecting obsolete and slow-moving inventories.

c) Useful life of plant, equipment and intangible assets

The management estimates useful life for plant, equipment and intangible assets of the Company. The management revises depreciation expense whenever the useful life is different from the estimation in the prior period or there is a disposal or retirement.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

d) Employee benefit obligation

The present value of post-employment benefit obligation is determined based on various assumptions. Assumptions used and effects in any changes in these assumptions are disclosed in Note 21.

e) Provision for product warranty

The Company gives product warranties to customers at the time of sale. The Company partially subsidises expenses for manufacturing defects that become apparent within a defined warranty period. The provision for product warranty is provided based on the historical experience.

f) Impairment of investments in an associate and a joint venture

The Company tests impairment of investment in an associate and a joint venture whenever events or changes in circumstances indicate that the carrying amount of asset is greater than its estimated recoverable amount which calculated by using the higher of the fair value less costs to sell and value-in-use. Value in use and the fair value less costs to sell involves the future operating results of business, projected cash flows, discount rate to be applied to the projected cash flows.

g) Impairment of financial assets

The loss allowances for financial assets are based on assumptions about default risk and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs used in the impairment calculation, based on the Company's past history and existing market conditions, as well as forward-looking estimates at the end of each reporting period.

8 Segment information

The Company's strategic steering committee, consisting of board of directors who are the chief operating decision-maker, examines the Company's performance from a product group and geographic region perspective in the same dimension as presented in the financial statements.

Business segment

The Company manufactures and sells auto bulbs, automotive lighting equipment, molds & dies and product designs. The Company does not prepare segment information of molds & dies and product designs business because the Company's management considers that the revenues, assets and profit of molds & dies and product designs segment do not meet quantitative thresholds of reportable segment. The chief operating decision-maker reviews operating results in the same dimension as presented in the financial statements.

Revenues from sales and services by product group

The Company manufactures and sells auto bulbs, automotive lighting equipment, molds & dies and product designs. During the year ended 31 March, the revenues by product group are as follows:

	2024 Baht	2023 Baht
Auto bulbs and automotive lighting equipment	14,156,613,493	14,328,753,217
Molds & dies and product designs	223,314,090	119,093,218
	14,379,927,583	14,447,846,435

Revenues from sales and services by geographic region

During the year ended 31 March, the revenues by geographic region are as follows:

	2024 Baht	2023 Baht
Domestic	8,965,681,199	9,501,979,086
Export	5,414,246,384	4,945,867,349
	14,379,927,583	14,447,846,435

During the year ended 31 March 2024 and 2023, the revenues from sales and services are recognised at point in time.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

Major customers

During the year ended 31 March 2024, the Company has revenues from auto bulbs and automotive lighting equipment from 3 major customer groups which each of them contributed equal or over 10% of the Company's total revenues (2023: 3 major customer groups).

	2024 Million Baht	2023 Million Baht
Customer group no.1	5,516	5,785
Customer group no.2	3,463	3,496
Customer group no.3	1,602	1,802

The customers under common control are considered as one customer and referred to as the customer group.

9 Cash and cash equivalents

	2024 Baht	2023 Baht
Cash and cheques on hand	605,961	625,910
Current accounts with banks	33,878,281	56,469,785
Savings accounts with banks	137,707,040	150,107,675
Fixed deposits at banks with less than 3-month term	1,828,000,000	1,877,000,000
	2,000,191,282	2,084,203,370

As at 31 March 2024, savings accounts with banks and fixed deposits at banks with less than 3-month term bear interest at the rates of 0.01% - 1.95% per annum (2023: 0.01% - 1.30% per annum).

10 Short-term investments

As at 31 March 2024 and 2023, short-term investments held to maturity represent fixed deposits at banks which have original maturities over 3 months but not over 12 months.

Movements in short-term investments held to maturity are as follows:

	2024 Baht	2023 Baht
Opening book amount	5,891,800,000	3,483,000,000
Additions during the year	13,490,800,000	12,260,800,000
Redemptions during the year	(12,541,800,000)	(9,852,000,000)
Closing book amount	6,840,800,000	5,891,800,000

As at 31 March 2024, short-term investments held to maturity bear interest at the rates of 1.80% - 2.04% per annum (2023: 0.50% - 1.35% per annum).

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

11 Trade and other accounts receivable, net

Trade and other accounts receivable, net as at 31 March are as follows:

	2024 Baht	2023 Baht
Trade accounts receivable - other parties	2,182,150,907	2,353,475,682
<u>Less</u> Loss allowance	(2,009,654)	(20,446,001)
Trade accounts receivable - other parties, net	2,180,141,253	2,333,029,681
Trade accounts receivable - related parties (Note 30 (b))	120,470,440	140,003,977
Other accounts receivable - other parties	4,844,635	7,404,006
Other accounts receivable - related parties (Note 30 (b))	4,947,501	15,253,251
Prepaid expenses	38,805,147	37,033,605
Accrued income, net	41,193,950	20,265,551
	<u>2,390,402,926</u>	<u>2,552,990,072</u>

Impairment

The loss allowance for trade receivables was determined as follows:

	Current Baht	Up to 3 months Baht	3 - 6 months Baht	6 - 12 months Baht	Over 12 months Baht	Total Baht
As 31 March 2024						
Gross carrying amount						
- trade account receivables - other parties	2,033,956,088	148,194,819	-	-	-	2,182,150,907
- trade account receivables - related parties	118,135,218	2,335,222	-	-	-	120,470,440
Loss allowance	-	(2,009,654)	-	-	-	(2,009,654)
As 31 March 2023						
Gross carrying amount						
- trade account receivables - other companies	2,282,950,113	49,772,325	180,532	126,711	20,446,001	2,353,475,682
- trade account receivables - related parties	137,298,561	2,705,416	-	-	-	140,003,977
Loss allowance	-	-	-	-	(20,446,001)	(20,446,001)

The expected loss rates are based on the payment profiles of sales over a period of 108 months before 31 March 2024 and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The Company has identified GDP to be the most relevant factors, and accordingly adjusted the historical loss rates based on expected changes in these factors. However, the expected loss for trade accounts receivable is not significantly increased by the adjustment.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

13.1 Other financial assets at amortised cost

a) Classification of financial assets at amortised cost

The Company classifies its financial assets as at amortised cost only if both of the following criteria are met:

- the asset is held within a business model whose objective is to collect the contractual cash flows; and
- the contractual terms give rise to cash flows that are solely payments of principal and interest

Financial assets at amortised cost include cash and cash equivalents, short-term investments, trade receivables, other receivables, other financial asset and loans to employees:

	Notes	31 March 2024			31 March 2023		
		Current Baht	Non-current Baht	Total Baht	Current Baht	Non-current Baht	Total Baht
Cash and cash equivalents	9	2,000,191,282	-	2,000,191,282	2,084,203,370	-	2,084,203,370
Short-term investments	10	6,840,800,000	-	6,840,800,000	5,891,800,000	-	5,891,800,000
Trade accounts receivable - other parties	11	2,182,150,907	-	2,182,150,907	2,353,475,682	-	2,353,475,682
Trade accounts receivable - related parties	11	120,470,440	-	120,470,440	140,003,977	-	140,003,977
Other accounts receivable - other parties	11	4,844,635	-	4,844,635	7,404,007	-	7,404,006
Other receivables - related parties	11	4,947,501	-	4,947,501	15,253,251	-	15,253,251
Other financial asset measured at amortised cost		-	19,264,319	19,264,319	-	19,040,148	19,040,148
Loans to employees	14	63,005,596	59,795,504	122,801,100	32,711,779	10,541,918	43,253,697
Less: Loss allowance	11	(2,009,654)	-	(2,009,654)	(20,446,001)	-	(20,446,001)
Total		11,214,400,707	79,059,823	11,293,460,530	10,504,406,065	29,582,066	10,533,988,131

b) Fair values of other financial assets at amortised cost

Due to the short-term nature of cash and cash equivalents and short-term investments, their carrying amount are considered to be the same as their fair value.

Due to the short-term nature of the trade receivables and other current receivables, their carrying amount are considered to be the same as their fair value.

Other financial asset measured at amortised cost is a government bond at 20,000 units in par value of Baht 1,000 per unit aggregating to Baht 20 million that carry an interest rate of 1% per annum and mature on 17 June 2027. The government bond are pledged with respect to electricity supply.

For the loans to employee, the fair values are also not significantly different to their carrying amounts.

c) Loss allowance

Information about the impairment of financial assets at amortised cost and the Company's exposure to credit risk is disclosed in Note 5.

13.2 Financial assets at fair value through other comprehensive income

a) Classification of financial assets at fair value through other comprehensive income

Financial assets at fair value through other comprehensive income (FVOCI) comprise:

- equity securities which are not held for trading, and which the Company has irrevocably elected at initial recognition to recognise in this category.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

Financial assets at FVOCI comprise the following investments:

	31 March 2024 Fair value Baht	31 March 2023 Fair value Baht
Non-current assets		
Investments in equity instruments		
- Listed equity securities	167,860,862	116,367,689
- Non-listed equity investments	1,710,783,527	1,566,461,774
Total	1,878,644,389	1,682,829,463

b) Amounts recognised in profit or loss and other comprehensive income

The following gains were recognised in profit or loss and other comprehensive income during the year as follows:

	31 March 2024 Baht	31 March 2023 Baht
Gains recognised in other comprehensive income	195,814,926	197,428,481

The Company did not acquire or dispose significant listed securities during the year

13.3 Financial assets at fair value through profit or loss

a) Classification of financial assets at fair value through profit or loss

The Company classifies derivatives asset and derivatives liabilities as financial assets at fair value through profit or loss (FVPL).

Financial assets measured at FVPL include derivatives asset and derivatives liabilities. Disclosures about derivatives assets and derivatives liabilities are provided in Note 6.

b) Amounts recognised in profit or loss

During the year ended 31 March 2024, the fair value gains of Baht 2,709,766 (2023: Baht 1,915,680) were recognised in the Company's other gain (loss), net in the equity method and separate financial statements.

The Company did not acquire or dispose significant listed securities during the year.

14 Loans to employees

Movements of loans to employees during the year are as follows:

	2024 Baht	2023 Baht
Opening balance	43,253,697	96,448,665
Additions	166,958,000	3,760,482
Received during the year	(87,410,597)	(56,955,450)
Closing balance	122,801,100	43,253,697

Loans to employees bear interest rate at 0 -1.50% per annum (2023: 1.00% per annum). The repayment periods are between 1 month - 3 years (2023: 1 month - 3 years).

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

The analysis of loans to employees is as follows:

	2024 Baht	2023 Baht
Current portion of loans to employees	63,005,596	32,711,779
Non-current portion of loans to employees	59,795,504	10,541,918
	122,801,100	43,253,697

The Company has no reconciliations of loss allowance for loans to employees for the year ended 31 March 2024 and 2023.

15 Investment in an associate

Benefits paid

At 31 March

	2024 Baht	2023 Baht
At 1 April	414,715,556	409,603,994
Current service cost	32,560,837	33,900,386
Interest cost	9,869,319	9,170,114
Past service cost	182,204	36,020
	42,612,360	43,106,520
Remeasurement:		
Gain from change in demographic assumptions	(4,193,153)	(324,201)
Gain from change in financial assumptions	(5,484,133)	(26,514,916)
Experience gain	(11,074,892)	(6,732,459)
	(20,752,178)	(33,571,576)
Benefits paid	(10,575,737)	(4,423,382)
At 31 March	426,000,001	414,715,556

The significant actuarial assumptions used were as follows:

Discount rate

Salary growth rate

Staff turnover rate

	2024	2023
Discount rate	2.64%	2.49%
Salary growth rate	4.00%	4.00%
Staff turnover rate	0.00% - 11.00%	0.00% - 11.00%

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

Sensitivity analysis for each significant assumption used is as follows:

	Change in assumption		Impact on defined benefit obligation			
			Increase in assumption		Decrease in assumption	
	2024 %	2023 %	2024 Baht	2023 Baht	2024 Baht	2023 Baht
Discount rate	1.00	1.00	(33,351,268)	(33,989,616)	38,392,550	39,358,021
Salary growth rate	1.00	1.00	39,056,389	35,767,180	(34,555,996)	(31,620,473)
Staff turnover rate	1.00	1.00	(35,020,767)	(35,615,675)	23,465,185	25,342,024

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method has been applied as when calculating the retirement benefits recognised within the statement of financial position.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous year.

The weighted average duration of the defined benefit obligation is 8.86 years (2023: 9.28 years).

Expected maturity analysis of undiscounted employee benefit obligations are as follows:

	Less than 1 year Baht	Between 1-2 years Baht	Between 2-5 years Baht	Over 5 years Baht	Total Baht
At 31 March 2024					
Retirement benefits	23,253,797	31,705,030	114,964,984	1,513,334,687	1,683,258,498
At 31 March 2023					
Retirement benefits	20,030,961	36,247,142	96,604,073	1,475,101,675	1,627,983,851

22 Share capital and premium on share capital

	Number of shares	Ordinary shares Baht	Premium on share capital Baht	Total Baht
As at 31 March 2024 and 2023	76,625,000	383,125,000	504,250,000	887,375,000

The total authorised number of ordinary shares is 76,625,000 shares with a par value of Baht 5 per share (2023: 76,625,000 shares with a par value of Baht 5 per share). All shares are issued and fully paid.

23 Dividends

At the Annual General Shareholders' meeting of Thai Stanley Electric Public Company Limited held on 23 June 2023, the shareholders unanimously resolved to pay dividends in respect of the operating results for the year ended 31 March 2023 for 76,625,000 shares of Baht 20 per share, totalling Baht 1,532,500,000. However, there were 300 shares that were not entitled to receive the dividends, totalling Baht 6,000 as the depository terms are not in compliance with practices of the Thailand Security Depository Co., Ltd. The Company paid the dividends amounting to Baht 1,532,494,000 to the shareholders on 21 July 2023.

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

24 Legal reserve

Under the Public Company Limited Act B.E. 2535, the Company is required to set aside a legal reserve at least 5% of its net profit after the accumulated deficit brought forward (if any) until the reserve is not less than 10% of the registered capital. The reserve is non-distributable.

25 Other income - others

	2024 Baht	2023 Baht
Scrap sales	60,185,384	80,286,204
Tax rebate income	12,644,212	11,143,257
Royalty income	1,228,782	2,457,465
Gain on disposals of property, plant and equipment, net	4,946,152	3,107,669
Others	15,961,124	7,129,350
	94,965,654	104,123,945

26 Expenses by nature

The following expenditure items have been charged in arriving at operating profit:

	2024 Baht	2023 Baht
Changes in finished goods and work in process	68,678,013	69,675,160
Raw materials and consumables used	7,227,539,280	7,029,035,736
Staff costs	1,506,708,117	1,491,718,127
Depreciation of plant and equipment (Note 17)	1,272,414,305	1,277,826,944
Amortisation of intangible assets (Note 18)	285,349,306	270,396,701
Utility expenses	427,137,336	452,420,890
Subcontract service costs	83,351,722	75,211,933
Repairs and maintenance expenses	269,528,434	328,966,274

27 Income tax expense

Income tax expense for the year comprises the following:

	Equity method financial statements		Separate financial statements	
	2024 Baht	2023 Baht	2024 Baht	2023 Baht
Current tax :				
Current tax on profit for the year	387,870,872	372,584,984	387,870,872	372,584,984
Deferred income tax :				
Increase in deferred tax assets (Note 19)	(6,267,231)	(4,992,862)	(6,267,231)	(4,992,862)
Increase in deferred tax liabilities (Note 19)	40,788,099	40,202,017	8,956,223	12,500,107
Total income tax expense	422,391,740	407,794,139	390,559,864	380,092,229

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

The tax on the Company's profit before tax differs from the theoretical amount that would arise using the basic tax rate as follows:

	Equity method financial statements		Separate financial statements	
	2024 Baht	2023 Baht	2024 Baht	2023 Baht
Profit before tax	2,179,311,347	2,153,469,870	2,020,151,969	2,014,960,318
Tax calculated at a tax rate of 20% (2023: 20%)	435,862,270	430,693,974	404,030,394	402,992,064
Tax effect of :				
Income not subject to tax	(16,244,564)	(15,314,980)	(16,244,564)	(15,314,980)
Expenses not deductible for tax purpose	12,684,086	9,520,367	12,684,086	9,520,367
Additional expenses deductible for tax purpose	(9,910,052)	(17,105,222)	(9,910,052)	(17,105,222)
Tax charge	422,391,740	407,794,139	390,559,864	380,092,229

The average income tax rates were 19.38% and 19.33% for the equity method financial statements and the separate financial statements, respectively (2023: 18.94% and 18.86%, respectively). The 2023 tax rates are higher than last year because the Company had lower of additional expenses deductible for tax purpose.

The tax relating to components of other comprehensive income is as follows:

	Equity method financial statements					
	2024			2023		
	Before tax Baht	Tax credit (charge) Baht	After tax Baht	Before tax Baht	Tax credit (charge) Baht	After tax Baht

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

28 Basic earnings per share

Basic earnings per share is calculated by dividing the net profit for the year attributable to shareholders by the weighted average number of ordinary shares issued and paid up during the year.

	Equity method financial statements		Separate financial statements	
	2024	2023	2024	2023
Net profit attributable to shareholders (Baht)	1,756,919,607	1,745,675,731	1,629,592,105	1,634,868,089
Weighted average number of ordinary share in issue (Shares)	76,625,000	76,625,000	76,625,000	76,625,000
Basic earnings per share (Baht)	22.93	22.78	21.27	21.34

There are no dilutive potential ordinary shares in issue during the year presented, so no diluted earnings per share is presented.

29 Promotional privileges

The Company has received promotional privileges from the Office of the Board of Investment for the production of molds, mold repairs and production of Eco-car lamps. Under these privileges, the Company will be exempted from corporate income tax for a period of 8 years from the date of commencement of earning revenue. As a promoted entity, the Company is required to comply with the terms and conditions as specified in the promotion certificates.

	2024		
	BOI promoted activities Baht	Non-BOI promoted activities Baht	Total Baht
Export sales	2,391,129	5,411,855,255	5,414,246,384
Domestic sales	134,800,000	8,830,881,199	8,965,681,199

Thai Stanley Electric Public Company Limited

Notes to the Equity Method and Separate Financial Statements

For the year ended 31 March 2024

30 Related party transactions

Individuals or enterprises that directly, or indirectly through one or more intermediaries, control, or are controlled by, or are under common control with, the Company, including holding companies, subsidiaries and fellow subsidiaries are related parties of the Company. Associates and individuals owning, directly or indirectly, an interest in the voting power of the Company that gives them significant influence over the Company, key management personnel, including directors and officers of the Company and close members of the family of these individuals and companies associated with these individuals also constitute related parties.

In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

The Company had the significant transactions with its major shareholder, Stanley Electric Group, incorporated in Japan which holds 35.66% interest in the Company's share capital. The Company also had significant transactions with a group of individual shareholders who are members of the Company's management who hold 29.66% interest in the Company's share capital. Stanley Electric Group comprises Stanley Electric Company Limited and related companies.

Purchases from related parties are specific materials or materials which are manufactured on a large scale at one source for cost saving benefits. Sales to related parties mainly represent export sales, and selling price is determined based on manufacturing cost plus a certain margin. A royalty fee is charged at 3% of sales less materials cost imported from a related party in accordance with the agreement. A design and development fee and other fees are charged in normal course of a business and are presented as other accounts payable - related parties.

Business operations and results

1. Structure and operation of the company group

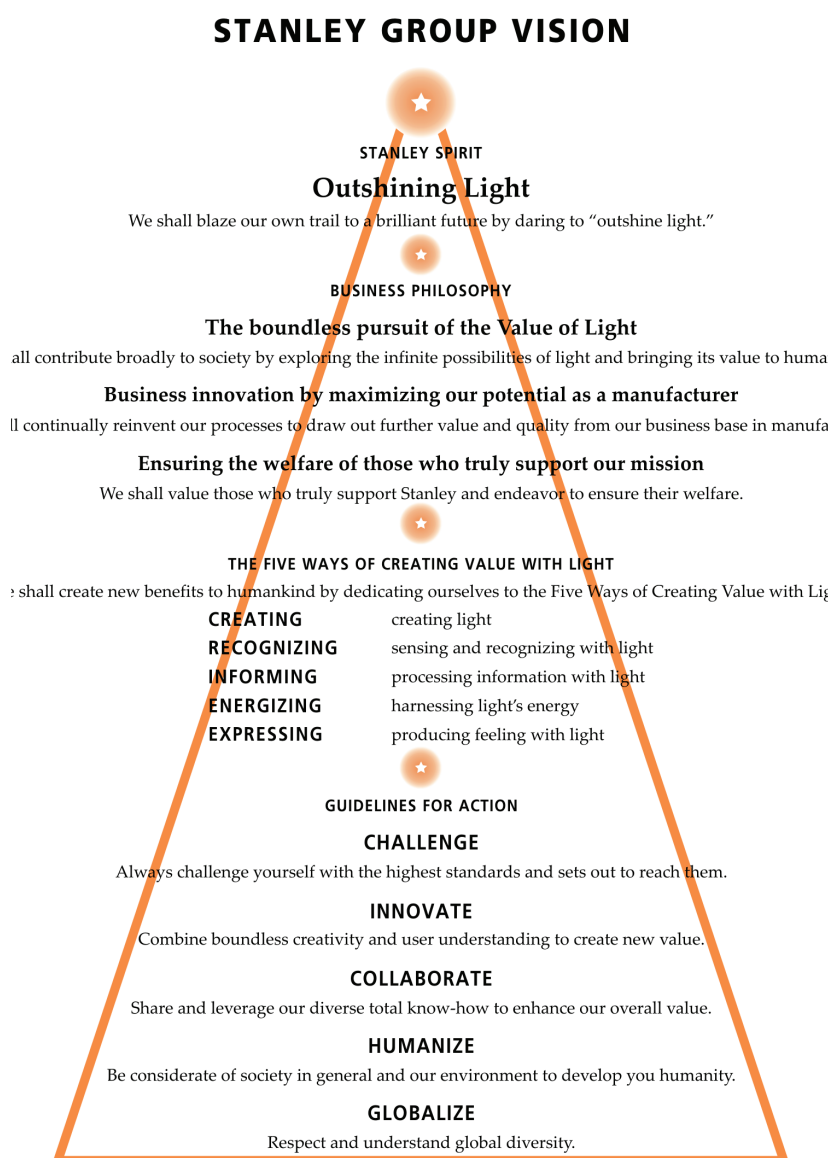

1.1 Policy and business overview

Thai Stanley Electric Public Company Limited is a manufacturer of automotive lighting equipment with international quality. The target is committed to producing quality products and value-added products that the importance and value to all related group with the company sincerely.

Management Policy is to consider customer satisfaction as the priority by improving every function; quality control, costing, delivery, development, safety, and relationship through Planning – Doing – Checking process cycle.

1.1.1 Vision Objective Goal / Business Strategies

The company adheres to the vision of the Stanley Group as a guideline in conducting business as follows:

The company sets business goals and strategies each year in accordance with the Stanley Group business plan by focusing on the operating results, both sales and profits, product quality and production, safety of employees and the environment Including employee development and promoting ethics.

The Board has set a policy for directors, executives and employees, including corporate governance policies, Code of conduct for Directors and Employees which has been published as a document and distributed to directors, executives and employees for acknowledgment and implementation in this regard, the Board of Directors has determined the yearly plan for reviewing the policy, rules and regulations.

1.1.2 Background

The Company was first registered as a limited company on 30 May 1980. It manufactured, imported, and distributed automotive light bulbs and lighting equipment. That was founded by a Thai-Japanese joint venture between Seng Nguan Hong Co., Ltd. (currently known as The Sittipol 1919 Company Limited) and Stanley Electric Co., Ltd. of Japan. The Company operates three separate plants, producing auto bulbs, dies and molds, and auto lamps.

During year 1980 - 1990 the company invested Bulb factory, Lamp1 factory and Die & Mold factory, has been investment promoted from BOI for every plant and has registered capital of 10 million baht to 153 million baht.

During year 1991 – 2001, the Company was listed on the SET, and the Company's shares began being traded on the SET under the abbreviation 'STANLY'. In the same year, the Company founded own research and development center with promotional support from the Board of Investment (BOI). This center is mainly engaged in researching and developing products for the Company. In July 1993, the Company was converted into a public limited company. The company entered into a joint venture in establishing new companies: Asian Stanley International Co.,Ltd , Lao Stanley Co., Ltd. and Vietnam Stanley Electric Co., Ltd. Stanley Electric Engineering India PVT Ltd. PT. Indonesia Stanley Electric, that also took shares in various companies, such as Inoue Rubber (Thailand) Public Company Limited, Sum Hitech Co., Ltd. (in 2015 the company sold shares to major shareholder of Sum Hitech Co.,Ltd. Sirivit Stanley Co., Ltd., Top Hightech (Thailand) Co., Ltd. and Lumax Industries Limited of India. In addition, the Company formed a technical support alliance with Electro Polymers (PVT) Ltd. of Pakistan and Unitech Machines Limited of India. The company has registered capital to 383.125 million baht.

During years 2002 - 2011 the company has invested Lamp4 factory at Nava Nakorn Industrial Estate, Klong Luang, Pathumthani (in 2014, the Company sold land and buildings to the company that in the side area from not any operation and damaged by flooding in 2011) and Lamp 5 in the main area Muang, Pathum Thani. Thailand's auto industry development and growth, respectively, but in the years 2011 have fluctuated dramatically from mega flooding in the central of Thailand impact on the automotive manufacturers and parts suppliers,

During year 2012 – 2016 the production and interruption and in 2012 from the needs of consumers returning to the policy of the government to make the first car sales and auto production record high. The company as a manufacturer of automotive parts has been ordered by customers many car manufacturers. As a result, the company is higher and opening of a new plant (Lamp7) to produced lamps for ECO Car, that selling are affect to growth of the automotive market. The automotive industry fell again after delivery of the car from the first car out. The demand for automotive consumer that was used prior to the year 2012, making the auto industry downturn and the decline continued, Agricultural crops production less so the public revenue less and to spending was less than normal. Only Exports and motorcycle market have continued to grow slightly. The automotive manufacturers including companies as part manufacturers have tried hard to remedy the situation and results of operations.

During year 2017 - 2020, the automotive industry returned to recover. Sales and production of cars and motorcycles constantly increasing which mainly domestic sales, the export market is still at a slow level. To support the increased production and new model of lighting products. The company invested in the expansion of the 7th lamp manufacturing plant and new Mold factory, which will begin production in 2019 and start the construction of the Lamp 8 factory which will be completed and start production in 2020. The company built new buildings, namely, a molding plant and a research and development center (DMT). We also invested in capital-increase shares of Electro Polymers (PVT) Ltd in Pakistan. In late 2019 towards early 2020, the world suffered the outbreak of Covid-19. Automakers who were our customers subsequently suspended some production, which significantly affected our production.

In 2021-2023, the ongoing epidemic situation of the COVID-19 virus affected the industrial sector, resulting in a shortage of semiconductor parts among automotive manufacturers cause the production stop and postpone production affecting the production and performance of the company, however the situation began to improve in late of 2022. Production returns to normal. However, in 2023, the global economy slows down and international conflicts affect the exports. Production in the automotive industry therefore decreased and the Company's situation also is stable.

Management: Since the Company's initial establishment and subsequent listing on the SET, the original management team has continued in office without any significant change in management policy.

1.2.2 Product information

(1) Nature of Products and business innovation development

Nature of Products The Company's core business is to manufacture and sell products in a single sector, both domestic and export, namely lighting equipment for use in motorcars, motorcycles, and other vehicles. There are 2 core products:

Auto Bulb

the company manufactures bulbs for automobiles, such as Bulb T19, G18, RP30, S25 to assemble a collection of various types of automotive lamps are available sales through local dealers and sale export to Stanley group company and dealer

Lighting Equipment Lamp

the company manufacturing in the automotive parts such as Head Lamp, Rear Combination lamp or Tail lamp, Stop lamp, Signal Lamp and Room Lamp that jointly developed with automotive manufacturer in specific models.

In other products in addition to the main products, including

Dies & Molds and Design

in support of the core business and for sale to other industrial operators. The details of the Dies & Molds and Design segment are not identified in this filing because their sales account for only 1.55% of the Company's total sales.

Business innovation development - Stanley Group strives to create values to humanity and the society at large. We practically open to new creativity or business innovations. We have pursued our goals through the following items:

- To set an organization management system are establishment of Satellite division to implement marketing strategies, build good relationship with customers to be a real partnership and to expand the automotive market share in the region by collaborating with the Satellite segment of the Stanley Group, with the goal of becoming the number one electrical system manufacturer in Thailand.
- Product design and development, the company focuses on product design to meet the needs and satisfaction of customers, with a beautiful appearance and have modern technology. As well as upgrading from being an automotive lighting device come to be a lighting system with technology and functions of the Stanley group, which is a safe lighting system suitable for all local automotive users and based on the use of environmentally friendly raw materials.

The company has a product design center including research and development. Almost of the expenses is the compensation for the personnel of the center and has been included in the cost of the product.

- Production management, the company organized improvement activities to increase production efficiency, namely SNAP (Stanley New Approach for higher Productivity) activity, which is an activity that causes improvements in all dimensions and can be measured by reducing concrete costs. It has been a management strategy of the Stanley Group since

1999 and is now elevated to the Stanley Group's global corporate culture. The company's goal of SNAP is to be the primary tool for employees to think about improving every process throughout the organization and expanding to related business partners such as companies in the Stanley Group.

QCC (Quality Control Cycle) Activities, the company encourages employees throughout the organization to do QCC activities as a subgroup of employees by brainstorming to solve problems, increase efficiency, develop work processes, and present to the company. It is organized as a competition for presentations and prizes are given to encourage the activities. However, if the topic of improvement affects the customer's product the company has also submitted the work of these groups to compete at the customer group level further. The company appoints the QCC committee to support, educate and measure activities that for to achieve the objectives and goals of the company. In addition, QCC activities include training to develop skills and knowledge on problem analysis by QCC principles, including the application of QCC tools to group members.

THAI STANLEY PRIZE AND CHALLENGE PRIZE AWARD activities from activities to improve and develop various works that can be taken to a higher level or affect the costs in a concrete way such that department can submit their work to participate in the annual activity. The company set up a committee from Department Manager for consider to selecting projects or activities and propose to the Executive Board for decision. The winning project or activity will receive a cash prize and if eligible at the Stanley group level, the company will continue to participate in the contest as well.

(2) Marketing and Competition

a. Policy and marketing

Because of competition in the automotive lighting industry is relatively low competition. Therefore, the Company's competitive policy or strategy is to try to produce all kinds of products of high quality at reasonable prices. Pricing is based on the cost of production plus standard profit.

In addition, the company has a policy to expand other automotive-related product lines in line with the needs of the automotive market to expand market share.

Distribution channels and customer base

The Company's customers include manufacturers and distributors of motorcycles and motorcars (passenger cars and commercial vehicles). The Sittipol 1919 Co., Ltd. is the Company's dealer in automotive spare parts that The Company has not paid any compensation to dealers.

1. Domestic Sale

- 1.1 Original equipment market: The products are sold directly to local assembly plants in Thailand. Usually, they are used in the manufacturing process or kept as spare parts.
- 1.2 Replacement equipment market: The products are sold through the Company's dealer, The Sittipol 1919 Co., Ltd. In this market, the products are as replacements.

2. International channels

- 2.1 Original equipment market: The products are sold directly to local assembly plants abroad. Usually, they are used for manufacturing or kept as spare parts.
- 2.2 Inter-member market: The products are export sold to each international member of the Stanley Group which engages in automotive assembly. This is to enable those members to assure the availability and quality of their stock.

Generally, the product is sold in a kind of SINGLE SOURCE, with parts being produced at only one company and sent to sell abroad all over the world in order to have a high production scope and can control production costs as well or in terms of raw materials that are used less in some companies with it's not worth ordering directly from the manufacturer so to ordered from Thai Stanley on occasion.

In 2023, the company's domestic sales accounted for 62.35 % of total sales, an decrease of 5.64% from the previous year, and the export sales was 37.65 % of total sales, an increase of 9.47% from the previous year. Part of it is sales to Stanley Group and the other part is sales to customers in the Free Zone*.

** Free Zone is a designated area. For the benefit of customs duties in the industry, commerce, or other businesses that are beneficial to the country's economy In which the person wishing to establish a free zone must obtain a license from the Director-General (source: www.custom.go.th)*

b. Competition situation

The Company's policy in competitive to practice under the rules of the competition will not take any action as a monopoly or reduce competition or limited competition.

In the local automotive lighting equipment industry, the competition is limited with very few market players. Basically, there are only 3 main manufacturers. However, if compare by size of company, the potential for production and competitiveness there is only one company that be like the company, and another are difference size. The company has advantages in terms of diverse customer base, because the Company's business integrates research and development, design, moulding, manufacturing, assembly, and quality control. As regards cost, the Company can take advantage of its being a listed company so can obtain lower cost financing through the Stock Exchange of Thailand. At present, our estimated market share remains high considering that our products are featured in vehicles in this country. We have been rated high by our customers in terms of price, quality, and delivery.

The barriers to entry are high for the following reasons:

- 1) Significant investment is needed to acquire the costly machinery, tools, and devices, including the equipment for quality testing.
- 2) The specialist training for workers is expensive and time-consuming.
- 3) The business naturally relies on specialised technology and must conform strictly to each country's safety standards.

- 4) The Company benefits greatly from the modern technology and valuable experience transferred from its joint venture partner, Stanley Electric Co., Ltd. of Japan, thereby increasing customers' confidence in the Company.

Because there are so few operators in this industry, the Company has the bargaining power over its customers at a particular level. However, the course of business is still based on the facts, especially, the basis of the actual cost of manufacturing plus standard profit.

Despite the limited number of operators in this industry, there are many suppliers. The Company has a non-monopoly policy with suppliers so that it can negotiate for the lowest price possible.

The automotive industry plays an essential role in the country's overall industrial development. Structurally, the automotive industry is linked to a wide range of other industries. That starts with basic materials, such as steel, plastic, rubber, glass and animal hides and the manufacture of automotive parts. The final process ends with assembly.

Over the past decade, Thailand's automotive industry has improved substantially, making Thailand the largest manufacturer of vehicles and component parts in Asian. The growth of the automotive industry over the past decade can be classified by types of vehicles: motorcars and motorcycles, details as follows

Quantity Production of Motorcar

Quantity Sales of Motorcar

Source: The Federation of Thai Industries

Remark: Not shown graph of motorcycle production data because production and sale are same level

From 2020 onwards, situations occurred that affected businesses around the world and the automotive industry in Thailand. Both the outbreak of the COVID-19 virus and the shortage of semiconductor parts, The Russian-Ukrainian War resulting in the economy being stagnant. Most automotive manufacturers are affected, resulting in production postponement and temporary production shutdown from time to time. as well as importing electric cars from China as a result, the current automotive production situation in the country is still in a state of continuous slowdown.

As for the company's situation, that is in the group of auto parts manufacturers at the last level, which produces and distributes most of its products directly to car manufacturers (OEM MARKET) and some parts may be sold to the replacement market, so the growth over the past 10 years has been in the same direction with the domestic automotive industry.

(3) Product and service supplies

a. Manufacturing and raw material

The Company has three manufacturing plants as follows:

1. Automotive bulb plant 1 factory, all production from customers' orders and the other portion supplies the Company's lamp plant. The capacity = 113 million pieces per year
2. Automotive Lamp plant 4 factory, All production from customers' orders. The capacity = 42 million pieces per year.
3. Die and Mold plant 1 factory, All production from customers' orders and the other portion supplies the Company's lamp plant. The capacity = 400 sets per year.

The total capacity utilization of the company in 2023

Raw Material, at present the main raw materials in production are Resin , Printed Wiring Board (PWB), wire harness, etc. Approximately 82% comes from local raw materials and about 18% is imported from abroad. The price has some changes but in a controllable level by our Purchasing Department using the supplier seriously management. At present, there are approximately 130 trading partners for all types of raw materials.

The proportion of raw material purchases domestic and international in the past 3 years are follows:

Sources	31 March 2024		31 March 2023		31 March 2022	
	Amount	%	Amount	%	Amount	%
Local	5,803.99	81.54	5,884.94	85.31	5,536.06	81.78
Foreign	1,314.35	18.46	1,013.39	14.69	1,233.74	18.22
Total	7,118.34	100.00	6,898.33	100.00	6,769.80	100.00

The majority of materials are supplied by Stanley Electric Co.,Ltd. , Japan and other company members in the Stanley Group for the following reasons:

1. The material has characteristic features and can be acquired in large quantities from a single source to save costs. Conversely, it is not cost-effective for the Company itself to manufacture the material in Thailand because of the low demand.
2. A large order is necessary for cost-effectiveness. However, local demand is not large enough. In other words, a small order increases the cost. The Company has therefore opted to buy only essential material locally out of the total quantities obtained from Stanley Electric Co., Ltd., Japan. This is to reduce the cost of procurement and the risk of dead stock.
3. A single source provides the material based on the alliance among the members of the Stanley Group, resulting in economies of scale. The material is distributed to all other members worldwide. The price of material provided by Stanley Electric Co., Ltd. of Japan and the Stanley Group is fixed at a reasonable and favourable level. The pricing formula is the actual cost including operating expenses. If some kinds of general material can be acquired from other suppliers on favourable conditions, the Company has absolute discretion to proceed with that procurement without abiding by any commitments within the Stanley Group.

(4) Assets used in business operations

The importance characteristics of primary fixed assets and intangible assets that the company used in business.

The main fixed assets are land and land improvements, factory buildings and other structures such as buildings, canteen and welfare building, wastewater treatment plant, waste disposal plant and employee car parking.

All assets are located at 29/3 Bang poon-Rangsit Road, Banklang, Muang , Pathum Thani . In which the company is the owner of the title and there are no obligations or guarantees. (Details are disclosed in Attachment 4)

3.2 Impact management for stakeholders in the business's value chain

3.2.1 The business's value chain

As our business is to produce an automotive lamp for sales and distribution to automakers, our value chain starts from product design to meet the needs and the best interest of both automakers, who are our customers, and consumers. When a product is proposed to automakers and they make an order, the production process will start. Quality raw materials are selected, and the production will go through a high-tech process as well as quality control procedures before the products are delivered on time to customers. Besides, when our customers incorporate our products into their cars and deliver to consumers, we continue to guarantee our products with the automakers.

The company has established a specific department to take care of and to sets a policy to operate on the purchase – sale of goods and assets as a guideline. There are management and operations for each group divided by activities as follows:

Main Activities				
Process Stakeholders	Sale Offering and product design	Production	Product delivery	Quality Assurance
	Products that meet customer needs Use environmentally friendly raw materials and a safety system for automotive users	using modern machinery and equipment. Optimize production with SNAP	Following to customer's delivery plan and manage stock	100% quality inspection system
Inside the company	Satellite Division DC Division	Production Department	CD Section	Quality Assurance Department
Outside the company	Customer (Automotive maker)	Sub Maker	Transportation Delivery	Customer (joint guarantee)

Support activity

Process Stakeholder	Technology development systems	Procurement	Infrastructure Management Utilities	Human resource development
	Supports all functions in the company	Provide quality raw materials reasonable price	Supporting production in the areas of electricity, water systems and routes within the company	Supervise and support employees
Inside the Company	Information System Department	Purchasing Department	General Affairs Department	Human Resource Department Safety & Environment Department
Outside the Company	System provider	Supplier	System provider	Outsource

Main Activity

- 1. Import of production inputs** The main stakeholder is supplier of raw materials and various factors to be used to produce the products of the company. There are both domestic and export and the Stanley group companies. The company has arranged the Purchasing Department to be the unit responsible for liaising with raw material suppliers mainly.

The company has a policy to strictly comply with agreements, contracts with suppliers by adhering to conducting business with honesty both for oneself and others under relevant laws and regulations.

The Stanley Group has an environmentally friendly procurement guideline (Green Procurement Guideline) with the concept of “not producing”, “not using” and “not discarding” substances that have an impact on the environment to be friendly. more towards the environment” and reducing the environmental impact associated with the overall product life cycle through purchasing, manufacturing, selling, using, disposing, and recycling. The company has forwarded this idea by disseminating and requesting cooperation to all the company’s trading partners.

The important operations are as follows:

- **Supplier selection** , The Purchasing Department is responsible for selecting suppliers based on the qualifications required by the Executive Board . According to purchasing policy that consider cover to company documents, performance, environmental, employee practical and human rights. At present, the company constantly selects new suppliers for price competition, especially raw materials, and reduce the risk of relying on one supplier too much.
- **Supplier Evaluation**, after selection and business dealing together, our Purchasing Department also has an annual assessment in quality, delivery and price etc.
- **Supplier Development**, The company has extended production improvements to suppliers as well. The company adheres to the policy of quality assurance, by establishing the principle of not buying, not producing, or passing on defect. Therefore, the development of quality to the supplier is beneficial to both the supplier to increase the competitiveness and the company to get quality raw materials on time delivery and the cost is not too high. The company also provides customer support and encourage vendors to be certified to international standards as quality assessment to provide a quality of supply chain.
- **Supplier Meeting** The Company arrange for Meeting with business partner is also held with the purpose to keep partner updated about the company movement and to hear opinions and confer QCD award to the suppliers who delivered the good products and being punctual.

For construction contractor, a separate meeting will be held by occupational health and safety officer and invite the staff who is responsible in the field of repairing, construction, or expansion of the company properties to the meeting to ensure that safety measure is extended to the involved parties.

2. **production practice** The main stakeholders are company employees, started with the design presentation to customers to be selected as a product manufacturer production planning, production, quality inspection until delivery to customers. The company aims to create a production that is suitable and consistent with the orders from the customers. The production process is in accordance with the standards set forth by both the company and the international standards that the company has received, such as the ISO/TS 16949 standard (Quality Management System for the Automotive Industry). Increase work skills for employees on a regular basis. Each step of the performance is monitored by the management. Improvements to improve productivity with SNAP (Stanley New Approach for higher Productivity)
3. **Distribution/Outbound Logistics** The main stakeholders are the company's freight forwarders. At present, the transport system mainly used by transport operators is mainly used. There is a department to take care of the delivery of each factory to coordinate primarily by focusing on delivery to meet the needs of customers.
4. **Marketing and sales** The main related parties are customers. The Company's direct customers are mainly automobile manufacturers in Thailand, and indirect customers are users of vehicles with the Company's products included. The Company has customer relationship

management. The Company has established policies regarding customers as follows:

Management : To meet customer satisfaction first and foremost by improving standards in key areas, including quality, cost, delivery, development, safety, and human relation through the plan – do – check cycle.

Quality : To develop a quality assurance system that meets international standards and to deliver products with confidence in gaining customer satisfaction and trust.

Actions that matter to customers in addition to producing to deliver products to customers The company also communicates, coordinates, attends meetings and participates in activities with customers regularly from various operations lead to being evaluated by customers The company is assessed annually by customers in terms of quality, price, delivery and other aspects. In general, morale rewards are also offered. The company continues to be trusted and receives awards from customers regularly.

5. **After sales service** The key stakeholders are customers and users of the company's products. The company has a Quality Assurance Department responsible for product quality assurance. Giving suggestions about products, giving advice and receive complaints from both the car manufacturer's customers and the car users who have the company's products to be satisfied with the quality of products and services.

Support activities

The main activities that focus on various operations for quality products that mainly meet the needs of customers, the company has also taken other actions to support activities as follows:

The company has issued policies and procedures for controlling customer data to avoid various risks that can be properly applied to customer data. The Company considered the customers' information that is the most important asset.

For commercial competition, the company has policies and practices that promote fair competition. and according to normal business Since starting the business The Company has never had a dispute regarding trade competition.

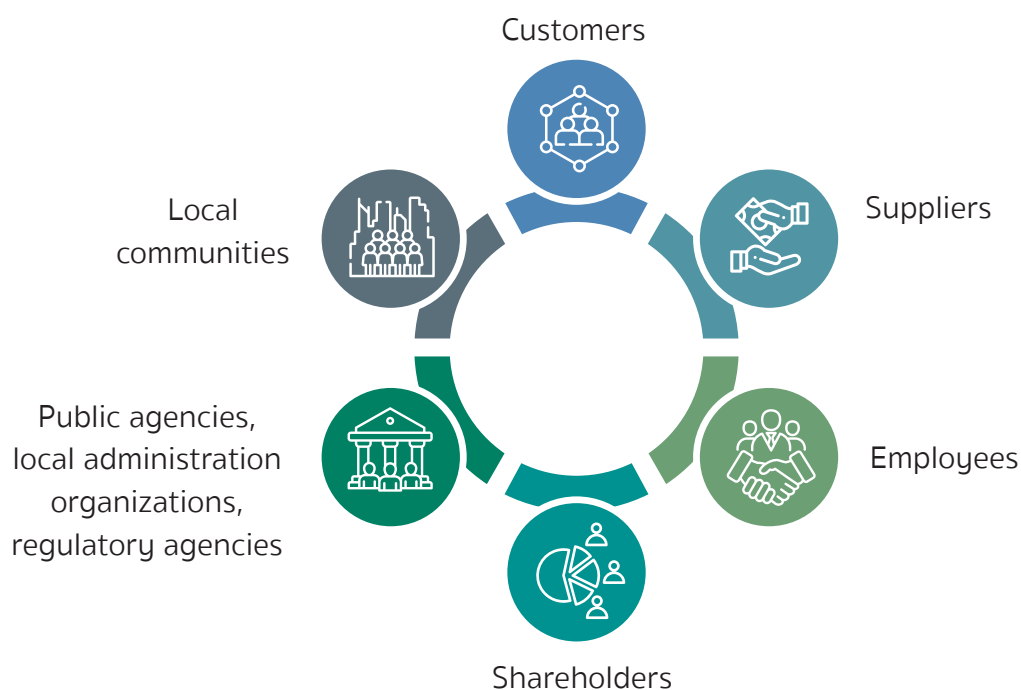

3.2.2 The Stakeholder Analysis in business value chain

In the value chain of the company's business, there are many stakeholder groups. The company gives importance to and recognizes the rights of each group of stakeholders. Setting the policy on the management of the rights of stakeholders in the corporate governance policy and the code of conduct for directors and employees of the company. And provide opportunities for various groups of stakeholders to can communicate or complain to the company via the company's e-mail at companysecretary@thaistanley.com , the company has set specific procedures and units for taking action.

The company divides the stakeholders in the value chain of the company's business into 2 groups to analyze the issues that the groups are interested in, and find out the company's operating guidelines as follows:

1. Directly affect Stakeholders that are customers, suppliers, employees, shareholders, communities. This group that is interested in production issues, operating results, and environmental impacts. The management approach is to set up a group to take care of providing information and communicate regularly. Responding to needs understandably and appropriately.
2. Indirectly affect Stakeholders, that are government agencies local organization regulatory agencies. This is a group that interested in the overview, policies, laws, and regulations. The management approach is cooperation. Provide real news information Comply with laws and regulations.

4. The company promotes activities to provide environmental knowledge and public relations, to make all employees and Stanley Group companies aware of the basic environmental philosophy and environmental policy with striving to convey this to the company's business partners to informed and cooperate.
5. The Company is committed to disseminating basic environmental philosophies and environmental policies to the public, including disclosing information and communicating environmental activities in response to requests from outside the company.
6. The company places importance on participation in environmental conservation activities together with government agencies, local community, and related organizations.
7. The company is committed to managing and conserving energy by complying with the law on energy conservation and various regulations related.
8. The Company considers energy conservation to be the responsibility of executives and employees at all levels who must cooperate in complying with the specified energy conservation measures, including regularly monitoring, inspecting, and reporting to the Energy Conservation Committee. This is to express the intention to continuously improve energy efficiency.
9. The Company allocates resources related to energy conservation and energy management adequately and appropriately, that energy management operations are in accordance with the objectives and goals that have been set.
10. The company drives the production process, including other activities related to energy use for energy conservation and the most efficient use of energy that considered to be part of the company's operations.
11. The company improve the efficiency of the organization's energy use to suit the nature and amount of energy used, to be consistent with the nature of the industry suitable technology. Including applying good practices appropriately and continuously.
12. The Company seeks clean energy to create sustainable energy and environmental conservation and is ready to disclose, transmit, and publicize energy conservation activities to relevant parties and the public.
13. Reduce CO2 emissions according to the 2023 annual indicators.

Environmental Management

The Company has appointed an Environment Committee and ER – Environment Responsibility, consisting of executives and employees from all departments. There are currently 72 persons.

Acts to push, recommend, and environmental management systems which considers the relevance of environmental laws and other requirements and to follow Environmental Management Policy of the Company and the Stanley Group (Japan Stanley Environment Policy) The Safety & Environment Department is responsible for driving various operational activities covering all areas.

Environmental management policy for 2023 is zero environmental disasters, by enhancing environmental potential and complying with regulations.

Environmental slogan

“ Stanley joins together to use resources efficiently using the 3Rs principle

reduce use - reuse - recycle ”

The environmental goals for 2023 are:

1. Reduce water use by 1% from the base year 2022 (company level)
2. Reduce paper use by 1% from the base year 2022 (company level)
3. Waste quantity sent to landfill decreased by 1% from the base year 2022 (company level)

1. Activities to reduce the use of important resources

1.1 Water The company has a need to use water for production and consumption each year in large quantities. The water sources are as follows: tap water from government agencies 81.47%, raw water 0.02% and recycled water 18.51% The company measures the quality of water regularly every month.

Operation

- Recycle water is used in the water curtain system of the workpiece surface coating process in a lamp factory. Lawn watering system and is used in the bathroom (toilet) at the PQC Welfare Building. Currently, recycled water is used, accounting for 71.07 percent of the total wastewater volume.
- The company requires the design of new buildings and utilities to use water-saving sanitary ware. Including the use of sensors all since 2021.

Results

Increase water use by
13.15%

1.2 Paper the work of various departments, both from the office and the production department, uses a lot of paper. The company aims to reduce by finding other tools, such as various computer programs by changing the method of assessing compliance using Excel program, creates a system for processing unused materials using Information System department 's program and creates a campaign to reduce paper use in every department at least one project per department.

Results

Reduce paper use by
3.27%

1.3 Waste disposal the company campaigns for employees to be aware of the worthwhile use of resources. Reduce the use of plastic bags, separate garbage, etc. And the company has reduced the amount of waste sent to landfill for disposal, including the following waste: batteries, packaging contaminated with chemicals, lamp scrap, ink cartridges, pipes, ducts, electronic equipment, graphite, wastewater filter materials and ceiling panels or gypsum walls.

Operation

- Campaign to separate waste and change waste disposal methods. By pushing for disposal in the form of Reuse and Recycling. Organize monitoring activities from the Environmental Committee every quarter to check the waste management of each department. Publicize and create awareness through training on company waste management for employees as well as campaigning for all employee to create projects to reduce waste at least 1 project / person.

Results

The waste quantity decreased by

17.06%

2. Monitoring by management and external agencies

To improve and maintain a good environment always, the company requires top executives to monitor every area monthly. In 2023 The company provides external standards agencies to measure various pollution values within the company, such as noise, wastewater, heat and air quality, the measurement results are within the standard.

3. Environmental training

The company provides regular environmental training such as training for new employees who come to work to raise awareness of employees to be aware of environmental problems, courses, requirements. ISO14001:2015, waste management courses, etc.

4. Environmental campaign activities

To encourage employees to participate in environmental conservation such as organizing the World Environment Day exhibition, activities to reduce the use of plastic bags within the company. Green Factory Project activities where executives and employees join to plant trees to increase green space in the company on the last working day of the year.

5. The Environment and Energy Conservation Learning Center

Since 2021, the company was established Environmental and Energy Conservation Learning Center Under the 3Rs principle (Reduce, Reuse and Recycle) is part of the Good Labor program.

This is a project incorporating the philosophy of sufficiency economy to use the area to benefit employees and create green space within the company. The area for creating an environmental and energy conservation learning center is located at the side of the Lamp7 building, with an area of 196 square meters.

Plans and operations The operation is divided into 2 phases. Phase 1 started on December 12, 2021, consisting of a prototype of reusing waste materials. Reduce CO₂ emissions by using alternative energy. sufficiency economy vegetable plots Sustainable Ecosystem and reduce waste by means of sorting, separating, exchanging money, etc.

Phase 2, start in May 2023, that consist of off-site learning areas. Emphasis on teaching and learning by doing to bring knowledge back to use in daily life to increase income. Reduce expenses and build a network of knowledge transfer.

The company did not find any illegal environmental practices and no environmental accidents. In addition, the Company has no conflicts or complaints on environmental issues from communities and external agencies. The company has been certified with the ISO14001 system since 2002 until the present.

Energy Conservation Management and greenhouse gas

Energy Conservation Management

In business operations and production processes of the company Secondary Energy is used such as electricity, liquefied petroleum gas (LPG). The management guidelines have been established to effectively reduce greenhouse gas emissions (Greenhouse Gas). This starts with quantifying, monitoring, reporting, and verifying GHG emissions and reductions. Including the selection of clean energy (Solar Rooftop), as well as creating a culture of energy and environmental conservation for employees and outsiders to practice. To achieve carbon neutrality at the corporate level (Carbon Neutral Corporate).

Energy conservation slogan for 2023

“ Stanley joins the heart
make the most of
available resources
**Close-Adjust-
Discharge-Change**
to preserve the environment
and sustainable energy ”

Analysis of key issues and approaches to energy management

The main energy that the company uses in its business operations are as follows:

1. Electric power, Currently the company necessary to use electricity for business operations and from production, accounting for 10.22% of the company's total expenses. The energy is consumed by using electricity from the government sector. (Provincial Electricity Authority) about 36.25%, about 62.46% are purchased from the private sector and about 1.29% from clean energy (Solar Rooftop).
2. Fuel, The Company uses fuel in business operation and production as follows: Diesel 21.03% Gasoline 12.23% Natural gas (LPG) used in the production process 49.98% and used in the cooking of the shops 16.76%

In the year 2023, there are goals and plans for managing energy and greenhouse gases as follows:

- Reduce carbon dioxide emissions (CO₂) by 11.5% from the base year of 2019

Currently, the Company has installed Solar Rooftop on the roof of Lamp 7 factory and PQC multi-purpose building roof, which consists of a cafeteria, a library, and a gym. And an area for engineering, production support and trial training for production staff before entering the actual production plant. That has a capacity of 1.2 MW, which can reduce electricity consumption in the year 2023 (Produced Energy): 1,244,798.11 kWh/Year, can reduce CO₂ emissions: 740.65 TonCO₂ / Year and help to reduce electric consumption: 4,755,440.70 baht/year.

The company has a plan to expand Solar Cell production capacity in the future at the Lamp 7 factory building extension, and Lamp 8 factory building, with electricity production scheduled to start within May 2024. Electrical production capacity: 3.8 MW. which can reduce the produced energy use approximately 4,800,000 kWh/Year and reduce CO₂ Emissions by approximately 3,040 TonCO₂ / Year. And have a plan for additional installation in 2025-2026.

reduce the produced
energy use approximately
4,800,000 kWh/Year
reduce CO₂ Emissions by
approximately **3,040**
TonCO₂ /Year

In addition, the company A campaign has been organized to encourage employees to participate in resource utilization worthily as follows:

- Establish a culture of environment and energy conservation Which is conveyed as pictures and text attached to various areas and make it easy for employees to find
- Public relations campaign via voice over the line every day at 11:30 AM.
- Monitoring from the Energy Efficiency Committee in every department, every week to provide conservation activities covering all areas
- Quarterly audits from top management to provide advice on ongoing energy conservation activities.
- Energy Conservation Potential Assessment and energy management status.

3.4 Sustainability management in the social dimension

3.4.1 Social policy and practice

The company divides social management into 3 categories as follows:

1. Labour management and Human Resource development

Labour Management

The Company recognizes that the company's growth is due to the cooperation and unity of all employees. Employees are considered a significant and valuable resource for the company. Therefore, the company has established policies as guidelines for practice as follows:

Thai Labour Standard Policy

1. The company is committed to complying with labour law provisions, Thai labour standards, human rights laws, and other related standards.
2. The company treats everyone equally, without discrimination, segregation by origin, race, religion, gender, age, skin colour, education, lineage, or any other status unrelated to job performance.
3. The company is committed to opposing child labour, forced labour, and human trafficking, which will not lead to modern slavery. The company is determined to ensure that employees are not subjected to exploitation or any form of forced labour.
4. The company does not support businesses that violate human rights principles and does not discriminate against any stakeholders.
5. The company does not ignore or overlook any human rights violations related to the company and employees must report to the supervisor or notify through the designated channels (whistleblowing).
6. The company considers those who violate human rights as committing an ethical and business code of conduct violation, subject to disciplinary action according to company regulations.
7. The company strives to appropriately improve the quality of life of employees, including the environment and welfare at work and will continuously develop and improve.
8. The company will review the adequacy, appropriateness, and effectiveness of the company's policies, operational regulations, and performance results.

The company is committed to complying with the social responsibility policy regarding labor and human rights, communicating, disseminating, and providing support to all relevant agencies on an ongoing basis. The management review the adequacy and appropriateness of this policy every year and has also been extended to include suppliers and subcontractors.

The company take the Certified of Thai Labour Standard (TLS 8001-2010), the complete version from the Ministry of Labour which has been assessed by the Ministry of Labour annually.

The Company has issued its Labour Management Manual, considered an ultimate document of the labour management system according to the Thai Labour Standards explained below:

Human rights issues

Child Labour The Company will never approve, support, or get involved in employing a child labour whose age is under 15 years old. Also, the company has never encouraged the use of child labour in any business activity that may cause an impact on occupational health and safety.

Pregnancy Female employees who are pregnant are not allowed to work in jobs that may jeopardize their health as designated by the laws. Pregnant employees will be offered work in an environment that will not threaten their wellbeing and pregnancy. There won't be any termination, or reduction of job responsibility, rights or benefits because of the pregnancy. The company has arranged a breastfeeding area as welfare for female staffers who return to work after giving birth to their babies.

Issues of inequality and discrimination

Discrimination The Company has expressed its intention not to support any discrimination action on employment, payment of wages and other financial supports, social welfares, training and development opportunities, promotion, employment termination, and retirement, which are due to the difference of nationality, race, religion, language, age, gender, marital status, sexual orientation, disability, HIV infection, preference of a political party, or personal concept and idea.

The company will never hinder, interfere, or conduct any action deemed to have affected the employees' rights and their routine practices without causing any damage to the company.

Hiring of the Disabled The company supported persons with Disabilities Empowerment and Development Act 2007, Section 33 and Section 35, with disabilities being accepted to work in various departments. Currently total 2 people

In addition, the company also offers income-generating opportunities for the disabled by allowing 33 disabled persons to sell goods in the company monthly under the market of the disabled and caregivers of the disabled project (Section 35).

Freedom of Business Association and Negotiation the Company provides its employees with the right to join various committees in the company and fully possess the right of negotiation, selection, or election of corporate representatives. The company will never hinder or interfere with the exercise of employees' rights.

The company has cautiously evaluated this issue with its suppliers to promote the abolition of human rights in the Thai society.

At present, the company has 11 representatives of employees elected to be the Welfare Committee and 16 of the Occupational Safety, Health, and Environment Committee, with elections every 2 years. The company provides measures to facilitate the employees' representatives in performing various duties. Equal to other employees without being harassed, transferred, terminated, or practiced that is not fair. Since the establishment, The Company has never been involved in any labour dispute and there is no labour union existing in the company.

Welfare and enhancement of quality of life The Company strives to improve quality of life of our staff to reflect the current economic condition. We increase salary and welfare annually.

Adequate and appropriate welfare such as –

- Hygienic facilities are clean and sanitary toilets, clean water, first aid necessities, daily healthcare service offered by doctor and a professional nurse available throughout office hours, clean canteen and healthy and inexpensive food are provided and has been assessed by the Pathum Thani Provincial Public Health Office by receiving the Safety Canteen Award.
- Supporting knowledge and interests outside working hours, including library and internet (Library Café), fitness room, yoga room, etc.

Other welfare such as income tax issuance, travel allowance, employee uniform and laundry service, birthday gifts and new year gifts, food allowance in case of overtime work and when working outside the company, Medical expenses are 2 times the salary and cover the employee's family including parents, spouse and children, etc. And from the sluggish economic situation, that has affected a lot of household income. The company provides special loan benefits to help alleviate problems and reduce informal debt among employees' families.

And for organizing activities within the company in the field of health promotion, such as organizing internal sports, competitions group colour sports activities. Recreational activities include organizing tourism for each department. As for the various festival activities to promote the good society and culture of Thailand, such as the arrangement of bathing Buddha images during the Songkran festival. Candle Procession, Dry food offering activity New Year's Ceremony,

THAI STANLEY FARM

by the principle of sufficiency economy

The company organized the THAI STANLEY FARM project - a good breed labour project according to the sufficiency economy way. with the concept of sufficiency economy philosophy as a welfare in terms of improving the quality of life of employees Reduce the burden of expenses in the high cost of living situation, by allocating the land behind the Lamp 7 factory to create a learning center on environment and energy conservation and a vegetable garden area. In the first phase, the company supported the budget for seeds, tools and equipment used for cultivation. As well as providing training courses to educate knowledge on agriculture, plant cultivation. or fertilizing for employees applying for the project and employees who are close to retirement so that employees can apply their knowledge to work after retirement or use the knowledge gained to train employees in the next generation.

Promoting the Use of Technology, In order to promote the use of technology to be in line with the change in the Thailand 4.0 era, the company aims to create a Digital Platform system to reduce the work of all departments, namely the E Learning & E Knowledge Library system to create an E Learning course, such as creating a QR Code, an employee handbook. training manual and other manuals for employees to download and Smart HR system by developing the work of the human resource department by creating the HCM V.11 (Human Resource Management System on Mobile) Used as a communication system between employees and the company, such as displaying employee salary payment documents. (Salary slip), withholding tax certificate according to Section 50 bis, requesting permission to take time off according to the employee's rights with the supervisor's approval through the system, recording attendance in and out including overtime and can review historical data and the system also supports use via mobile phones. In addition to increasing the convenience of use by employees reduce working hours of the Human Resources department which also affects the reduction of paper use in another way.

Preparing various form programs in the Intranet system for employees to use instead of writing, for example, booking the meeting room in the company, booking the company's car, the election of the safety committee. and the Welfare Committee via QR Code

The company have implemented the cashless project in which we encourage employees to use less cash while making payments by relying more on Siam Commercial Bank's mobile application to pay, for example, food in the company's canteen and return of advance to our Finance & Accounting Department. The idea is to reduce the use of cash, increase transaction speed, promote sanitation by having vendors contact fewer banknotes and coins.

Discipline and punishment The company determines the principle of disciplinary action in accordance with the law on labour protection to be paid to employees and will not perform or encourage the use of physical, mental or compulsive punishment methods intimidate. And set preventive measures and solving problems to prevent employees being trespassed. Harassment or sexual harassment expressed by words, gestures, physical contact or by other methods.

In addition to carrying out internal labour activities in the company, for outside the company has always participated in labour activities with government agencies.

In November 2023 the Company received the Outstanding Workplace Award for Labour Relations & Welfares from the Ministry of Labour for the 18th consecutive year.

Human Resources Development

The company has implemented the STARs Plan as a principal system to develop our human resources. The plan covers the capacity-building process and career advancement programs, which can be specified into six systems as follows.

1. Qualification, we determine job qualifications to reflect capacity levels of employees when it comes to their performances. The qualification is also used to determine fair and suitable remunerations.
2. Position, about duties, roles, authority, and responsibility in each position of each department are clearly described. Promotion and qualification system are evaluated based on the criteria set by the Promotion Committee.

3. Rotation, this refers to the practice of rotating employees to work at another department to handle different types of work to create and enhance their capacity, which will finally allow them to be promoted.
4. Evaluation, the evaluation system determines criteria for evaluation, which will be used to support the increase of salary, awarding bonuses, promotion, and career advancement. The system also reflects strengths and weaknesses of employees for further development. The evaluation criteria are based on the principles of fairness, suitability, and acceptability.
5. Wage, The wage structure consists of base salary, competency allowance, title/position allowance and other assistance benefits such as overtime pay, overtime holiday pay, food stipend, attendance allowance and transportation and shift allowance. There will be an annual salary increase, which will be based on the following indexes: the government's increase of minimum wage, an inflation rate that indicates changes of the cost of living, and the industrial situation.
6. Skill Development, we strive through our policy to enhance employees' skill where minimum training hours for each level or position of employees are pre-determined.

The company will review training courses suitable for employees, namely, strategic training, training based on department work and self-development. The training can be internally and externally. Employees may be sent to train and work overseas with Stanley Group companies.

Labor policy for the year 2024, The Company sets personnel development policy; with a target all employees must take training at least one course on knowledge or skills in the job.

In 2023, the company organized 52 internal training courses same as the previous year. There were 2,796 employees attending decreased from the previous year. The average number of training hours was 34.40 hours per person, a increase of 44.63% from the previous year. There were 204 external trainings, an increase of 23% from the previous year. Examples of training courses such as Course on industrial sector adaptation with automation technology and future wage increases. (Executive level), Building relationships with flexibility, Creative thinking to create innovation in work, Project management and communication for effective collaboration.

Thai Stanley Power Up Project

The company has implemented a systematic personnel development reform program called Thai Stanley Power Up to support business growth and customer needs. Starting at the automotive lamp production section (LE's Reform Model), the project period is 4 years from November 2018 - March 2022. There are 6 activities in total, namely.

1. J-CoM (Job Competency Management) is an activity for assessing the job competence of personnel in each role. To look for weaknesses and strengths leading to continuous development in the form of PDCA (Plan-Do-Check-Action).
2. The Smart Manager course is a course to develop personnel to grow into managers in the future. Possess organization-level problem-finding skills and formulation of organizational improvement measures strategies.
3. Expert course is a course for building personnel to have a variety of knowledge from New model to Mass Production.
4. Survey 360° is a 360-degree survey of opinions about each job function and the company's philosophy, that is to support the STARS Plan policy to come true.
5. Quality In House is an activity that works in the form of a committee named 3 Loss Improvement Committee whose mission is to review, analyse, correct and improve problems in the production process.
6. Activity 5S patrol by customer view is a risk detection of Quality, Safety, 5S. in the production process. and exchange views as customers lead to the prevention of problems and has developed production control processes, quality, and continuous safety.

The overall performance is in line with the target. As a result of the project, employees at each level have systematically developed their knowledge and skills. Including the improvement of the production process that results in the reduction of waste in the production process (Defect in process) continuously.

After the Thai Stanley Power Up project closed in March 2022, main activities continue to be carried out until now as follows:

1. **J-CoM (Job Competency Management)** operates in 2 large groups.
 - 1.1 J-CoM with agencies that already have databases and J-CoM Software Application support, including LE Division (Lamp and Die & Mold), Human Resource Dept., Quality Assurance Dept., Purchasing Dept., total 1,556 person. Implemented during April - May 2023, each department has set goals and personnel development plans. Make a report to the manager for approval and explain to relevant people the guidelines for action. After that, during June - October 2023, carry out capacity development activities according to the plans and development methods of each agency. For the period October 2023 - January 2024, conduct an evaluation exam for all employees in the J-CoM system. The exam has been set in 3 steps: 1.) A competency evaluation exam with your own perspective and certified by your direct supervisor. 2.) A written exam. and 3.) interview

1.2 J-CoM Expanding results to divisions that do not yet have a database and the J-CoM Software Application is not yet supported by 8 divisions: Administration Division (AC Dept, SE Dept, GA Dept), Design Control Division, Satellite Division, Cost Planning, Corporate Governance Dept., Sale Support Dept., Information System Dept., Office Corporate Planning, and Office of Productivity Innovation.

The operation is during April - September 2023, the database was prepared, and the J-CoM Software Application developed to support the databases of 8 divisions, including training to understand the activities for relevant employees. During October - December 2023, conduct exams and assess employee ability levels.

The target for the next 3 years: Each division has agreed upon a plan for development. Raise the level of ability in work by the year 2024, all parties will do J-CoM at the same time throughout the company. There will be progress reports every 3 months and monthly progress monitoring meetings by each committee member.

2. **Analytical staff course** is a course for creating personnel with knowledge from New model to Mass Production, focusing on being able to analysed the causes of problems in a comprehensive and logical manner. The study will include 23 theoretical subjects and 3 practical sections. The duration of study will be 1 year, teaching from the end of 2022 - the end of 2023. The total number of course graduates is 29 persons, coming from representatives of each Lamp factory and Quality Assurance department.
3. **Quality In House** is an activity whose mission is to review, analysed, solve and improve problems in the production process. In 2023, there are 6 types of problem management formats:
 - List of high-cost problems Once preventive corrective measures are established, they must not be repeated.
 - A list of high-cost problems for which there are no preventative measures. Corrective and preventive measures must be developed.
 - Monitoring problems that occur during the beginning of mass production of New Model.
 - Controlling significant 4M or Design Change.
 - Controlling loss from adjustments and losses.
 - Loss control during preparation before production.

In operations, before carrying out activities, each department brings an activity plan to a meeting to explain to executives. Each month progress is reported to executives and managers monthly for consideration and advice.

In conclusion, after the completion of the project, the main activities were considered to continue in the form of daily work in continuous personnel development. and expand the results throughout the company. The J-CoM activity is for employees who want to provide rigorous, specialized knowledge for analyzing and managing problems in the production process, analytical staff courses are used to build knowledge and skills. This will be done in conjunction with improving and solving problems in the production process with the Quality In House activity and reporting progress to the executive manager every month in the PDCA format.

2. Safety, Occupational Health and Work Environment

The Company has prioritized safety as the first issue in our management under a concept that

“ **Every employee will leave home**  **for work and be back home safely in all aspects** ”

The company has set policies and operations regarding safety, occupational health and working environment along with the regular duties of the employees as follows.

1. The Company has determined that work safety is the first responsibility in the performance of all employees. All employees must consider their own safety, colleagues and the Company's assets this is important throughout the working time.
2. The company complies with laws, regulations, rules, and standards related to safety occupational health and work environment including strictly customer safety policies and requirements
3. The company supports human resources and budget for safety management occupational health and work environment to achieve the target of zero accidents both during working hours and beyond.
4. The Company requires supervisors at all levels to act as role models, leading, training, coaching, motivating and encouraging employees to work in a safe way.
5. The company supports and promotes the improvement of the environment. and continuous safe working methods by adhering to the 5S principle (Tidying, Convenience, Cleanliness, Sanitation and Nurturing habits) in the working area and within the company in parallel with the search and assessment of hazards (Safety Shop Floor Management) continuously as well as the use of appropriate personal protective equipment to prevent fire , accident at

work sick at work Occupational and communicable diseases including the good health of all employees

6. The Company is committed to supporting and encouraging employees, contractors, and outsiders to participate in the activities of Occupational Health and Safety That will help stimulate the consciousness of employees both during working hours and beyond such as safety culture, training, incentives, public relations, competitions, safety recommendations, etc.
7. The company conducts an assessment based on this policy at least once a year.

Safety Activities

The Safety Committee has been set up to consist of representatives from top management, elected and appointed representatives from our employees. At present we have 35 members Safety Committee to reviews policies and work plans, surveys the way we work as well as consider projects before submitting various operation reports to the Executive Board. The Safety Committee's term of office is 2 years, and it convenes at least once a month. Meanwhile, the Safety and Environment Department, which directly reports to the management, is a main body to help supporting various units to achieve activities based on corporate goals and collects safety statistics to improve and propose a better and safer workplace environment and employees' wellbeing.

The company encourage employees to assess risk from workplace or from work processes where they can file the Hazard Identification and Countermeasure Registration Form (The Hiyarihut Form) to their supervisors or a responsible body to resolve problems with appropriate measures.

Safety Slogan 2023

“ Stanley joins together
Safety labor and
Good health ”

In 2023, the company has set a safety management policy, which is to create a safe and comfortable working environment due to zero accidents/zero accidents, by setting target and results as follows:

Work-related accident

0 (Zero)

Outcome

achieved

Work-related incident

= 0 (Zero)

Outcome

achieved

Accident-free working hours

4,200,000

hours worked or more (Man x Hour)

The results were achieved in

February 2024 and the company

has set a new target of

28,000,000 working hours or more

Promotion of safety knowledge

1. Safety Learning Station (Safety Dojo)

The Company also opened the Safety Dojo Center to strengthen understanding and create safety awareness among our employees and third-party contractors. Not only the center assists us to achieve our zero-accident goal, but it also works as a training premise and a center for comprehensive safety learning. A simulation station at the center shows various risk scenarios that could occur from different situations. In addition, the company organizes training courses for employees at this center monthly. The company provides opportunities for external agencies such as government, educational institutions to visit and study.

2. Safety Training

The company organizes safety training annually. In 2023, it trained on the requirements for using forklifts, working with cranes, working with electricity, safety in chemical storage. And response in the event of an emergency, training for safety officers, supervisors, safety management, and the Stanley project together to create discipline, safe driving on the road, etc.

3. Safety, Environment and Energy Conservation Week Exhibition (SEE Week)

4. SEE to School activities

Safety and Environment Department corporate with Stanley Thailand Foundation to organize activities for promote safety, environment and energy conservation to educational institutions at Wat Boat School and Wat Makam School , Pathum Thani Province. The ORM Meeting is held each month where department manager is obliged to report operation and management results for mutual collaboration and administration so that the organization may fulfil performance goals set by the company and the Stanley Group.

The company has set up the Corporate Governance Department to supervise internal control and risk management. The committee directly reports to the Audit Committee on a quarterly basis. The Audit Committee's chairman also reports auditing results to the Board on a quarterly basis.

9.1.1 The sufficiency and appropriateness of the Company's internal control system

At the Board of Directors Meeting No. 3/2024 on May 17, 2024, all 3 members of the audit committee attended. The Chairman of the Audit Committee reported the operation and audit results from the Corporate Governance Department to the Board of Directors for acknowledgment and approval as follows:

Based on the assessment of our internal control practices using the Securities and Exchange Commission (SEC)'s "evaluation form of the internal control system adequacy," which covers five areas of control environment, risk assessment, control activities, IT and data communication and monitoring and evaluation (M&E) system, major assessment results in 2022 are summarized as follows.

1. Control Environment the Company operates business under the principles of corporate governance and business ethics. There is important management as follows:

- 1.1 The Company has established corporate governance policies and codes of conduct for directors and employees. Written that focuses on the principles of integrity in accordance with good business practices and defined as the duty and responsibility of all directors and employees to comply with the above policies and requirements. In addition, the Company has established policies and guidelines for anti-corruption policies, so that all directors, executives, and employees has participated in the prevention and suppression of corruption and corruption conduct business in accordance with the principles of good corporate governance.
- 1.2 The Board consists of directors with knowledge, abilities, and experiences in various fields. necessary for the business of the company the roles, duties and responsibilities between the Board of Directors and the management are clearly defined. The roles, duties and responsibilities of the Board of Directors are set out in the Board of Directors' Articles of Association and stipulate the powers and duties for approval in the regulations governing the meeting of the board of directors. In the part of the Executive Board, the approval authority has been set in Regulations on the Executive Board Meeting and key documents in the management of business-related activities. The Company is in the process of preparing the Articles of Association of the Executive Committee to define the roles and duties. The responsibilities of the Executive Committee are clearly stated.
- 1.3 The company defines the organizational structure and reporting lines in the company, by considering the appropriateness of the powers and duties responsibility and appropriately limiting the powers, duties and responsibilities between the Directors, Executives Board, executives and employees. The company have written authorizations to approve financial transactions.
- 1.4 The Company has a written human resource management system (STARs Plan), which consists of 6 work systems are hierarchical system, position system, work rotation system. Assessment system, wage system and competency development system. This is an overall human resource management system that is fair, appropriate, and accepted based on the principles of competence to encourage employees to bring out their potential to drive reform of the company's management system as well as expanding results to aim for organizational reform which will create creativity and challenges. The company is in the process of preparing a succession plan for important positions to prepare for the replacement of personnel to be able to respond and support changes effectively.

2. Risk Assessment The company has prepared requirements and risk management manuals to be used as a guideline for risk management. Each department is responsible for assessing risks and preparing a risk management plan by specifying risk factors. There is an assessment, analysis, prioritization of risks. including establishing appropriate management measures

annually by requiring that the risk management and control section being as a coordinator, collecting, giving advice, and summarizing the risk assessment results to present to the Risk Management Committee for consideration and as a follow-up to review the management or control of such risks.

For evaluating the likelihood of fraud, The Company is in the process of improving policies and practices against corruption and establish guidelines for evaluating fraud risks at the activity level.

3. Control Activities The company establishes effective and efficient control activities. To help reduce the risk that the company will not achieve objectives to an acceptable level, The key control measures are as follows:

- 3.1 Establish clear written regulations, manuals, and procedures for working, to define the scope and hierarchy of those with authority to approve. This covers personnel and labor, accounting, marketing, procurement, manufacturing, technology/technical, assets and contracting, etc.
- 3.2 Establish a process to monitor the operations of the company to be consistent with the Company's strategic plans, framework, policies, and practices on a regular basis.
- 3.3 The company has a policy to prevent the exploitation of opportunities or the use of the company's interests for personal use. The use of inside information and conflicts of interest has been stipulated as part of the Code of Conduct for directors and employees. Practices are monitored and reported regularly.
- 3.4 Determine safety control measures of information technology systems by making information security policies and related requirements to control operations related to information systems. Provide a security control of the information technology system including controlling the use of non-piracy software Development and proper maintenance of information technology systems.

4. Information and Communication The company uses information systems to support operations in terms of accounting, finance, and personnel management and production system with continuous development of information systems and data communication. This is an important part that supports the effective operation of internal control by using modern and secure information technology from data collection, processing, storage and monitoring so that the management can use the information to make a complete, accurate decision within an appropriate time and has an effective information system security system. There are guidelines for information and communication management as follows:

- 4.1 There is a confidentiality class set, guidelines for storing important documents and control documents including internal and external operational data to ensure that information is important and relevant to the business of the company are accurate, complete, and sufficient for the performance of work.

- 4.2 There is an appropriate communication to the Board of Directors, executives, employees, and stakeholders. The meeting documents are sent to the Board of Directors in advance of the meeting so that the Board of Directors can adequately analyze the information before deciding. The Board of Directors can request additional information from relevant agencies or persons for consideration.
 - 4.3 There is an emergency backup plan to prevent data security in the event of a catastrophic accident that prevents the system from operating. Including requiring that emergency contingency plans be rehearsed regularly.
 - 4.4 There are various internal communication channels for employees, such as via Intranet, e-mail, posting announcements or distributing documents through Document control system for all personnel to receive information thoroughly and in a timely manner.
 - 4.5 Provide channels for complaints and information or clues about corruption or practices that are inconsistent with the Code of Conduct. They can be notified via telephone or e-mail, which will be protected and go into the process of investigation and corrective action.
5. **Monitoring activities** The company assigns the internal audit department to audit the operations in accordance with the internal control system set out and report the audit results to the Audit Committee. The accounting and finance part is audited by a certified public accountant and presents the results to the Audit Committee for consideration on a quarterly and annually basis. The results of the review from the certified public accountant and the internal audit department did not find any significant flaws in the internal control system.

As for the Company's auditor, Mr. Vichien Khingmontri, PricewaterhouseCoopers ABAS Limited, did not make any significant observations regarding the internal control system.

9.1.2 Defects of the Company's internal control system

The Audit Committee found no material flaws.
