MESSAGE FROM CHAIRMAN

In the year 2023, which marked a significant milestone in the Company's 22-year business journey, there was a pivotal transformation from being a publisher of online games in Southeast Asia to becoming a leading digital technology company targeting the global market. The Company underwent a rebranding, changing its name to "Asphere Innovations Public Company Limited," reflecting the vision of "Serving the Infinite Future" in its endeavor to lead the creation of digital innovations for the rapidly evolving world where technology plays an increasingly significant role in every aspect of business and daily life. In the past year, the Company expanded its investments in businesses related to disruptive technologies such as blockchain and metaverse, which are highly popular future technologies. These endeavors aimed to strengthen the competitive edge of the business group.

For the year 2024, Asphere Innovations has strategized and planned operations to drive each business segment, especially focusing on the online gaming business, which remains the core business of the group's companies. There is a strong emphasis on aggressively focusing on the gaming market in Indonesia and Vietnam through strategic adjustments to capture market opportunities and foster growth. Alongside, there is a strategic shift in game acquisition focusing on acquiring a wider range of games beyond RPG (Role-Playing Game) to diversify and expand the player base. In terms of the Blockchain and Innovation Technologies business group, the Company launched Astronize - a Hybrid Web 3.0 Game Platform and introduced the first game, TSX by Astronize, covering 26 countries worldwide. This marks the first step in providing infrastructure technology services to drive the gaming industry into a new era under the Web 3.0 business model. Additionally, with the growing role of technology in various industries, the Company has shown interest and sought additional opportunities to invest in Marketing Technology (Martech), a technology that will become a key tool in making marketing more efficient. This technology can be leveraged to benefit businesses within the group and strategic partners.

Finally, on behalf of the Company, I would like to express sincere gratitude to all shareholders, customers, as well as business partners, for their trust and support throughout. I also extend my appreciation to the management team and employees who have collectively dedicated their efforts and energy to drive the Company's stable growth. We pledge to conduct our business with transparency, adhere to good corporate governance principles, and prioritize the highest benefits of all stakeholders. We remain committed to advancing Asphere Innovations in every dimension amidst the currents of change and numerous opportunities in the future.

Mr. Pramoth Sudjitporn
Chairman

PART 1

BUSINESS OPERATIONS AND PERFORMANCE

1. STRUCTURE AND OPERATION OF GROUP COMPANIES

1.1 Company Vision Mission and Goals

VISION

“Serving the Infinite Future”

MISSION

- To inspire and connect everyone through transformative immersive experiences.
- To revolutionize technology and unlock new possibilities.
- Seizing limitless opportunities through strategic investments, driving sustainable growth, and shaping the future.

PROMISE

- Delivering exceptional, immersive, and innovative digital lifestyle services that empower connections.
- Transforming the way everyone works, plays, and learns through groundbreaking innovations.
- Unleashing the full potential of promising technologies through strategic and expansive investments.

Objective and Goals

In 2023, the Company changed its name to Asphere Innovations Public Company Limited and restructured its business. The Company expanded its business scope beyond online game services and aims to become a leading digital technology company through various business groups. The online game business remains the core business of the Company group, with the following goals :

Online Game Business Group (PlayPark)

Our vision of Online Game business group for 2024 and forward is “To be the leading gaming Platform in Southeast Asia that connects and empowers a Diverse community of gamers through fun and exciting experiences”. Our Mission is to “Deliver endless Fun and Excitement” to more and more gamers in Southeast Asia.

With a strong portfolio of classic products that performed well in 2023 and with strong support from developers to continue that performance into 2024 we believe it set the foundation to further grow our user base. Mobile games is a winner’s take all especially with the industry matured and costs of investment in new products sky high and product life cycle reduced to months rather than years compared to Online PC games. We will be much more selective in licensing games and will put much more emphasis on other method to acquire more user base, via channeling, co-publishing, and combinations of services that reduce our risks while at the same time, focusing on acquiring products that can be have a good chance to be in the winner’s take all segment of the mobile gaming market.

We will grow our PlayPark platform to become much more inclusive for other developers rather than to just service PlayPark published games only, this way we will expand our reach both to developers as well as gamers. Our strength is in the core gaming segment and we intend to expand outside this limited space where competition and opportunities are much more abundant.

Blockchain and Innovation Technologies Business Group

The goal of the Blockchain and Innovation Technologies business unit is to leverage blockchain technology and innovations to drive existing businesses towards improvement and development into new business models or elevate service offerings to be more efficient and of higher quality. Additionally, it aims to seek investment opportunities in disruptive technology and innovation businesses to enhance the capabilities within the group and its affiliates. This aligns with the vision of “Serving the Infinite Future.”

1.2 Important Changes and Development

Asphere Innovations Public Company Limited (the “Company or AS”) was formerly named Asiasoft Corporation Public Company Limited. The Company was incorporated on 20 September 2001, with a registered capital of Baht 5 million as a distributor of PC games by co-founders of the Company, Mr. Pramoth Sudjitporn, Mr. Tan Tgow Lim and Mr. Lertchai Kanpai, all of whom have extensive experience in the entertainment software business. The Company has expanded its business scope from being an online game publisher to becoming a leading digital technology company.

- In 2003, the Company started to provide online gaming services in Thailand by launching “Ragnarok Online”, an online game licensed from Gravity Company Limited, South Korea. The game was localized into Thai language to serve Thai gamers and was met with enormous success which in turn helped to establish the Company as one of the leading providers of online games in Thailand.
- In 2004 – 2005, a shareholding restructuring of the Company was carried out by purchasing shares in companies held mainly by common shareholders to provide clarity in the operating structure, savings, and effectiveness in management.
- In 2006, the Company expanded its services to include “Audition” casual game which met with astounding success. To date, it still holds the no.1 spot in the dance game category in Thailand. In the same year, the Company established Asiasoft Online Pte. Ltd. in Singapore as its first step to expand the market to cover Southeast Asia.
- In 2007, the Company listed on the Stock Exchange of Thailand on 17 May 2007 with a registered capital of Baht 316 million.
- In 2011, the Company expanded its services above and beyond online games by investing in Thaiware Communication Company Limited, the portal owner of www.thaiware.com known as the hub of IT news and download distribution for both Thai and international software. Truehits ranked the web portal as no.1 in Computer. This portal also serves as a platform for e-commerce selling software, IT equipment and gadgets.
- In 2012, the Company expanded the market to Malaysia by investing in CIB Development Sdn. Bhd.
- In 2014, the Company has continuously grown and expanded the mobile gaming sector to correspond to the increase in consumer usage of smartphones. Combined with the growing popularity in online media and marketing on the digital platform, the Company expanded into online agency business by offering complete digital marketing planning services by investing in Think Plus Digital Company Limited to services its own group of companies and other customers. Within the same year, the Company invested in developing digital content by investing with Mirin Innovation Company Limited to create online PC games and mobile games including applications. In addition, the Company continued to push ahead in Southeast Asia by expanding the market to cover the Philippines by acquiring Level Up! Inc.
- In 2016, the registered capital was increased by Baht 102,469,254, bringing the total registered capital to Baht 409,877,016.
- In 2017, the registered capital was increased for Playpark Co., Ltd. by Baht 110,000,000, bringing the total registered capital to Baht 150,000,000, the Company invested in Skynet Systems Company Limited, a FinTech Startup to develop trading platform applications for trading stocks and securities.
- In 2018, the registered capital was increased for Skynet Systems Company Limited, an associate company in Thailand and for Asiasoft Online Pte. Ltd., a subsidiary company in Singapore and renamed it as Playpark Pte. Ltd. In addition, negotiations with business partners in Indonesia started in preparation for the launch of online gaming services.
- In 2019, The Company expanded its services to Indonesia in collaboration with PT. Wave Wahana Wisesa and signed a business agreement with Krafton Inc., a world-class game developer from South Korea to publish the Ascent: Infinite Realm (A:IR) in Thailand. We also made remarkable in-road into the Mobile gaming platform through the launch of TS Mobile from Taiwan Developer, Chinese Gamers International.
- In 2020, Asiasoft Corporation Public Company Limited was decreased the registered capital and paid up

capital by reduction of par value of the share from Baht 1.00 each to Baht 0.50 each, which makes the Company remaining registered capital Baht 256,173,135 and paid up capital Baht 204,938,596.50. And on 18 August 2020, the Company successfully had the Caution (C) sign lifted on its securities.

- In 2021, The Board of directors had passed a resolution to invest in CONG TY TNHH CHAU A MEM Company Limited which is located in Vietnam for an amount of VND 10,780,000,000 or approximately Baht 15,305,000. After investing, Asiasoft will hold 49% of share capital (issues new capitals), resulting in CONG TY TNHH CHAU A MEM Company Limited becoming a subsidiary under Asiasoft. Besides, CIB Net Station Sdn. Bhd., a subsidiary company in Malaysia has been renamed Playpark Malaysia Sdn. Bhd. With good corporate governance, and procedures in place, CAC announced that Asiasoft Corporation Public Company Limited is certified as a member of CAC since 30 September 2021.
- In 2022, the Company restructured its organization to support its business expansion. The Company is structured into four business groups : Online Gaming business group, Blockchain and Innovation Technologies business group, Media and Marketing business group, and Corporate Venture Capital business group. A joint venture with business partners was also established to strengthen the Company's ability to scale its business.
 - PlayPark Company Limited (Vietnam) was formed as a joint venture with CONG TY TNHH CHAU A MEM to provide online gaming services in Vietnam.
 - Kubplay Entertainment Company Limited was established in Thailand as a joint venture with BitKub Ventures Company Limited. Its purpose is to provide a comprehensive platform for a blockchain ecosystem that transforms the conventional gaming model into a Hybrid GameFi model. This includes the provision of online gaming services within the ecosystem.

The restructuring of the shareholdings of major shareholders was established. SABUY Technology Public Company Limited owned 21.226% of the total shares of Asiasoft Corporation Public Company Limited in December, 2022. SABUY Technology Public Company Limited will propose its representatives to serve on the board of directors of Asiasoft through an ordinary shareholders' meeting to be held in 2023.

- In 2023, the Company made significant changes in various areas as follows :

1.5.2 Products and Services

1.5.2.1 Online Game Business Group (PlayPark)

(1) Nature of the Company's Businesses

The Company initially stepped into the online gaming business in Thailand in 2003, with a successful launch of "Ragnarok Online." Later in 2008, "MapleStory" was launched in Singapore and achieved great recognition from Singaporean gamers. Afterwards, the Company expanded its business in the Philippines and Malaysia and has become a leading online entertainment service provider in Southeast Asia. During 2023, 34 online games have been launched on both PC and mobile platforms.

In the past 3 years, approximately 99% of the overall revenues of the affiliated companies came from online gaming products and services.

The online gaming services offered in each country are operated through companies set up locally in those countries. Each local company owns a dedicated gaming server system to support gamers in that country. Additionally, the Company runs a multi-country server in Singapore to provide support for gamers in the region to ensure that there is adequate gaming server support to efficiently serve a high traffic of multiplayer gaming.

Apart from that, cloud computing technology has been developed and become a lower cost. The companies; hence, started to use a cloud based platform from service providers instead of investing in and managing new server operations. This resulted in more effective IT cost management and better service quality.

PlayPark gained major revenue from online gaming services through both PC and Mobile platforms which offer many payment methods and channels for example @Cash Prepaid E-Pin, E-Payment, E-Wallet System.

For the convenience of gamers in Southeast Asia in topping up the online games of the Company, the Company offers the money top-up system called PlayMall, which is the main centralized e-wallet for payments of all items and services for games under PlayPark brand. The system can accommodate refills that convert into Cash Points for seven currencies namely US dollar (USA), Baht (Thailand), Ringgit (Malaysia), Singapore dollar (Singapore), Dong (Vietnam), Peso (the Philippines) and Rupia (Indonesia).

Moreover, to provide support in servicing gamers, the Company established an online gaming information center to answer technical and how-to-play questions via Call Center, Live Chat, Email, or social media, namely Facebook fan page.

During 2023, the Company was granted the rights to service 34 online games in 6 countries as follows :

*1. *Massive Multiplayer Online Role-Playing Game (MMORPG)* is an online game genre that can accommodate a high number of players with real-time interaction in a virtual world where gamers have the opportunity to compete or interact. Contents of the games are about action adventures which includes battle, monster hunt which aims to develop their own character or warlike environment having the following characteristics :

- Gamers have a choice of playing one or more characters at the same time by using the Multi Character Control System : (MCC). Each character continuously develops and varies in strengths and weaknesses.
- Gamers can earn experience points from their adventure and use those points to increase character's levels; they can also collect, exchange or sell various items acquired during their adventure, for example weapons or points to increase the strengths and differentiation of the characters.
- The character progression is based on real life situations, for example marriage, acceptance of apprentices or masters, grouping to fight opposition.
- There is no end game and there is no definite win or lose as the game continues to progress indefinitely.
- Most gamers are loyal to the game and community due to the nature of the game which promotes competition among gamers as it requires a considerable amount of time to collect the experience and increase their character level.

2. *Casual Game* is an online game genre with colorful and endearing cartoon characters. It is easy to play – not much skill is required. Each game can be completed in a short period of time, and is suitable for relaxation.

3. *First Person Shooting (FPS)* is an online game genre that is action-oriented, using gun type weapons to fight opponents. Players are split into teams and they help each other in various combat modes with time limitation for each session.

The online gaming business is the major source of the Company's revenue, accounting for 99% of the Company's total revenue. The Company provides its comprehensive online gaming services to gamers in Southeast Asia, starting from acquiring game licenses that match its market preference, running efficient game operation, making PR and marketing planning, establishing game information centers for customer, providing convenient payment channels, and Most importantly, choosing appropriate technologies and systems for the best services to customers, including the server system, computer equipment and software, client program, security system. The Company also creates websites and social networking channels to interact with gamers to provide the best gaming experience.

During 2023, the Company provides online game service in total of 34 games in 6 countries as follows :

Note : Some games were served in more than one country.

Additionally, in strengthening online game services, the Company has put up the website “www.playpark.com” to be a gaming portal for all PC and mobile games as well as services such as the member and new ID registration system, problem report system, wallet system, and Item Code system. The website also offers a download service channel for all games provided by the Company and also the news channel for game updates.

The Company has invested in Thaiware, an IT business, that has a website “www.thaiware.com” which provides all kinds of IT services including IT news and updates, IT products and services and free/buy downloads of software of both local and foreign suppliers. Through the website, there is also an online shopping channel that sells gadgets, IT equipment. Thaiware is also an authorized distributor of several applications and software and has become a leading online software distributor in Thailand.

Service fees for online games are charged by Item Sale, allowing gamers to play for free and charging for items used in the games such as weapons, decoration items, pets and accessories. Gamers can decide whether or not to make a purchase. Items sold are considered as service fees for the Company. Item sale depends on the type and popularity of the game in each country, marketing policies at the time, and quantity of items offered for sale - primarily, prices of items are cheaper when purchased in set packages.

At present, the revenue model of online game services around the world has generally changed from the game package sale and airtime sale model to item sale system. Operators believe that by first offering games to play for free, gamers are more persuaded to try out the games; and if satisfied, the opportunity of earning revenue for the Company through item sale exceeds selling in other ways. In addition, the Company gains other income from advertising through Casual Game which offers a free game with in-game advertisements to gamers.

(2) Marketing Activities and Top-up Channels

Marketing Activities

The Company has been operating under the trade name “Asiasoft” from the start of its operation in 2001. The name has become widely recognized among gamers throughout the region as the leading operator in the online gaming market, signifying a good level of quality in the games the Company published, effective marketing activities, and ability to retain its customer base as well as the trust in the Company’s server system for the game services. To further create clarity in marketing representation and to support business expansion into other areas, the Company created a new brand under the name “PlayPark” to market online games and decided to use Asiasoft as the corporate brand.

A marketing activity is an important strategy for effective communication with current and potential customers regarding the services and online games offered by the Company. The objective of these efforts is to create recognition and acknowledgement of online games among potential customers, bringing the promoted game across as an inexpensive and convenient means of daily entertainment. In addition to the launch of new games, marketing activities also aim to strengthen the customer relations, corporate image and social responsibility. The Company also regularly conducts market surveys in order to understand needs and behaviors of gamers, which are the basis for effective marketing strategies and customer satisfaction. Additionally, the Company conducts marketing activities in collaboration with business partners such as activities through payment channels, consumer products to promote and build product recognition, customer retention and brand loyalty.

Top-up Channels

The Company has also partnered up with other service providers to offer other top-up channels. This wallet system has been considered a safe, convenient channel for all customers. Customers can top up to all of the Company’s games using any methods of payment available as follows.

(3) Competitive Strategy

PlayPark aimed to be a leading mobile game publisher in Southeast Asia, with a vision to deliver the best gaming experiences to millions of players. We have been aggressively expanding into the mobile game segment since late 2021, developing new operational capabilities to support our growth.

With our talented and diverse human resources in Thailand, Singapore, Malaysia, Vietnam, the Philippines and Indonesia, we have a strong competitive edge in these markets. We can launch our games simultaneously across countries and languages, leveraging the economy of scale from our large and loyal user base. We also have regional marketing expertise and local community management skills, which enable us to connect with our players and understand their needs and preferences. Moreover, we can acquire high-quality contents at lower costs than a single country model, thanks to our strategic partnerships and industry reputation.

We believe that the combination of strong content and marketing technological tools is the key to our success. We are committed to optimizing every investment we make, whether it is in product development, marketing campaigns, or IT infrastructure. We aim to provide the most engaging and enjoyable mobile games for our customers.

Mobile Games Portfolio

The mobile game market is highly competitive, especially for games with IP that are more attractive and profitable. We are facing fierce competition from other publishers who are vying for this limited pool of titles. This inevitably drives up the costs and risks of acquiring these games. To overcome this challenge, we have established strong relationships and networks with our partners, who give us early access and preferential treatment to these games. We also have the necessary resources to secure these products and launch them successfully.

In addition to acquiring more mobile games to launch, we are also diversifying our revenue streams and user base through channeling and other business models. These models allow us to grow our revenue, users and community without the risks associated with product acquisition. We are also expanding our product portfolio to include more games from other regions, such as Europe and Americas, besides the majority of our games from China developers.

We believe that our strategy of acquiring quality games with IP, diversifying our business models, and expanding our product portfolio will enable us to achieve our goals and create value for our customers and stakeholders.

Investment Diversification to Countries with Online Gaming Business Potential

We are committed to investing and growing our resources in Indonesia and Vietnam, two of the fastest-growing and most promising markets in the region. We have extensive experience and expertise in these markets, which gives us an edge over our competitors.

Unlike PC games, which are mostly published by country, our mobile games have more expansive licensing and can be launched in multiple markets simultaneously. This allows us to reach a wider audience, increase our brand awareness, and generate more revenue. We also have the ability to adapt our games to the local preferences and cultures of each market, ensuring customer satisfaction and loyalty.

We believe that our strategy of investing in Indonesia and Vietnam, launching mobile games in multiple markets, and adapting our games to local needs and tastes will enable us to achieve our goals.

Increasing the Number of Games and Continuously Updating Versions of Existing Games

Our strong operational capability across Southeast Asia increasingly proves to be a major advantage. Developers now believe in single client multi-language and single server for all Southeast Asia. So that they only need 1 team to support us rather than working with many other publishers with different versions, hence substantially reducing their costs and making the launching of new or classic titles much more viable. This is a major advantage which we will exploit much more deeper and wider in 2021 and forward, applicable to both PC and Mobile platforms.

On top of our physical presence in all 6 markets, we will be re-aligning our operations to support multiple

simultaneous launches by any of our operations to all Southeast Asia countries. This will be one of our key competitive areas that allow us to quickly ramp up our launches and across all Southeast Asia.

Continuously Strengthen the Market Position by Embracing a Customer-centric Approach

The Company continuously strengthens the market position by focusing on four strategies to differentiate from competitors and maintain the position as the leading game operator in the region.

- Offering top online games that are well-known and popular in overseas markets : The Company believes that games that are well-known and popular in overseas markets have outstanding features both in terms of design and content, which will increase the chance of the Company's success in marketing to targeted countries.
- Offering online games that were once popular : The Company recognizes that these games still have a large fan base that awaits their return. Updated overall contents and features must be relevant to the current lifestyle and behavior of customers so that marketing strategies can support the chances of increasing revenue and expanding the customer base.
- Marketing activities directly to target customers : The Company has a strong database of gamers and it uses marketing efforts to attract its current user base to its new games, as well as continually expanding the Company's customer base. Such marketing activities include promotion during the launch of new games, retaining current users via in-game competition and special seasonal activities as well as offline marketing activities such as meetings and parties among gamers, sending e-newsletters to introduce new games and supporting CSR activities.
- Expanding the distribution of refill payment channels to increasing coverage : The Company plans to increase regional coverage of payment channels by focusing on expanding new payment channels, hence updating or increasing new options to correspond with the changing lifestyle and behavior of consumers. By having more payment channels, the operational cost for the Company is reduced, gamers gain more convenience, and the Company gains a more competitive edge. Moreover, distribution channels for refilling is a good channel for marketing activities, i.e. promotions or co-promotions, using media support from payment partners to introduce new games to the target gamers.

Marketing Activities to Promote the Sale of In-game Items

As most of the online games service operated by the Company takes a business model of free-to-play games. The Company's revenue is generated through in-game item sales and focuses on efforts to encourage gamers to purchase in-game items regularly. For example, through monthly in-game promotions, Item Shops and Item Mall on websites, refill promotions with payment channel distributors and promoting via media that the Company owns.

Effective Online Game Information Center

An online game information center is an important tool to help gamers play games smoothly and continuously resulting in gaining their trust in using services provided by the Company. Brand loyalty is reflected in the increase in playtime, and item sale. The Company offers information via the following channels.

*Enquiry System

The Company is committed to continually develop and enhance the effectiveness of all services, human resource management and service systems to ensure that they meet the current needs and lifestyles of gamers. The Company strives to fulfill satisfaction to gamers, the Company's key customer group. The Company has created a customer satisfaction survey that is given to customers after services. In 2023, the overall satisfaction result was at 90.08% (Year 2022 : 96.51%, Year 2021 : 95.98%).

IT Infrastructure in Online Gaming Services Development

In online gaming, a connection between a gamer's device and server is crucial. A safe and effective IT infrastructure solution helps optimize a smooth, uninterrupted connection with high-speed performance, which is a key feature of online gaming. Hereby, the Company decided to invest in development of IT infrastructure and security. Moreover, the Company has set up a team to analyze and develop all related systems every year in order to update game features and services to become more user-friendly. And the Company has developed a more effective system and equipment that provides increased services stability. The DR Site system has also been upgraded for better performance while the latest version of software in the IT infrastructure system has also been updated to increase its capacity in working with other new features. In addition, in 2022, firewall security devices were upgraded and equipped with Two-factor Authentication (2FA), the latest method of a two-step verification system and integrate the ZTNA system, which is a concept and model in computer network security, focuses on verifying and authenticating identities and devices before granting access to any part of the network or specific applications within the network to increase internal security and prevent future cyber threats that continue to rise.

The Company has always recognized the importance of the management of IT security management systems, which covers the whole operational process and other service systems. The Company is the first online gaming service operator in Thailand to obtain ISO/IEC 27001:2013 (Information Security Management System : ISMS). ISO/IEC 27001:2013 is the standard defined by the renowned and reliable international ISO (The International Organization for Standardization) and IEC (The International Electrotechnical Commission). These two organizations set up standards for information security management systems that all companies apply in both internal and external operations. These standards can be implemented in all businesses and industries. And the Company has also set up the DDOS Protection Solution, an intrusion prevention system that helps increase capacity of other systems up to 99.99%.

Reasonable and Competitive Online Gaming Service Fee Rates

It is the Company's policy to set up reasonable rates of online game service fee for customers in each country. The Company allows customers to play games for free and charges for its services through the sale of in-game items. This is to increase the competitiveness of the Company against other operators in the same industry and in other entertainment industries. At the same time, such rates must generate a good return for the Company. The Company does not have a policy to set service fee rates lower than competitors, or to engage in price war.

(4) Industry Trends and Competition

(4.1) Overview of Southeast Asia Online Gaming Market

The Company's main target for our online entertainment service is Southeast Asia, comprising Thailand, Singapore, Malaysia, Indonesia, Philippines, and Vietnam. With internet users growing at 2% annually and smartphone penetration reaching 89%, the region presents a thriving gaming landscape with over 100 million gamers with mobile gaming leading the charge at a 7.4% annual growth rate. (reference : Insiderintelligence.com, Statista)

Affordable data plans and advancements in technology further fuel this growth, making mobile gaming the dominant segment with a projected CAGR of 12% between 2021 and 2026.

Leveraging our PlayPark platform and partnerships, we focus on developing mobile games tailored to regional preferences and utilizing trending technologies like Business Intelligence, Customer Data Platform, and Artificial Intelligence. This enables us to engage with this dynamic market and capture its vast potential.

Despite the positive outlook, challenges remain. Each country requires a customized approach due to diverse economic development, infrastructure, regulatory frameworks are still evolving and gamer preferences. Additionally, fostering talent and attracting skilled professionals within the industry is crucial for its long-term success.

(4.2) Overview of the Online Game Industry in Thailand, Singapore, Malaysia, Indonesia, Philippines, and Vietnam.

The region boasts over 143 million mobile online gamers as of 2023 (reference : Statista). While mobile internet usage thrives, 5G services in Malaysia and Vietnam have recently launched (Q4 2023), further fueling mobile gaming growth. A recent Google report indicates at least 35% of smartphone owners play mobile games weekly, and over 85% of the region's urban online population engages in gaming, primarily on mobile devices.

Our challenges and opportunities lie in the success of user acquisition to expand the Company's mobile user base with the high cost. However, with the young and tech-savvy population, rising disposable incomes, and increasing smartphone penetration. Each country within the region offers unique characteristics and opportunities for the Company. Here's the glimpse into the online gaming landscape of Thailand, Singapore, Malaysia, Indonesia, Philippines, and Vietnam :

Industry Trends and Competition in the Online Gaming Market in Thailand

The Thai esports industry grew rapidly in 2023, with a value of over Baht 38 billion. This was supported by the increasing number of Thai people playing games during the COVID-19 pandemic, as well as advertising revenue from various brands and the opening of supporting courses by educational institutions. The number of gamers is expected to increase to 18.7 million by 2027, and there will be over 10.7 million serious esports viewers. This will help drive the growth of businesses related to esports. The majority of the growth comes from the mobile game market. However, there are only 17 online game publishers in Thailand, which is a decrease from the previous year. Three companies have closed down, namely Playwith, Cubinet Interactive and Wargaming, and one new company has opened, namely G Million.

PC Online Games :

Mobile games remain highly popular in the global game industry, including in Thailand. In 2023, the number of PC games available in Thailand decreased to 25, down from 31 in the previous year. However, there is still a group of Thai players who continue to enjoy and demand PC games. This can be seen from the fact that PC games that have been available for a long time still have a large number of players, due to their strong communities. Examples of such games include Audition, Yulgang, Ragnarok, and Black Desert Online.

Mobile Games :

The Thailand mobile game market in 2023 saw high growth and competition. In addition to domestic companies offering games, there were also game developers from various countries entering the market, such as China, South Korea, and the United States. Riot Games, a giant game company from the United States, opened an office in Thailand and revealed insights into penetrating the Thailand and Southeast Asian gaming market. They focused primarily on “Mobile Games” and promoted the Hyper-localization strategy, which may include special content for the Thai market to win over Thai gamers. This is partly due to statistics from Statista, which indicate that in 2023, there were over 5.22 million online gamers in Thailand, and the mobile game market has been a strong and attractive market over the past few years. More than 44% of Thai people play mobile games in their daily lives, which means there are still opportunities for new players to come in and create mobile gaming experiences for Thai mobile phone users and gamers.

Thailand was able to generate USD 750 million in revenue from mobile games in 2023, up 6.7% from 2022. There were many games that were popular in terms of both players and revenue, including RoV, Free Fire, Coin Master, Roblox, and eFootball PES 2021.

It is estimated that the revenue will have a compound annual growth rate (CAGR 2024–2028) of 6.48%, resulting in a projected market value of USD 0.81 billion and 6.9 million users by 2028 (reference : Statista).

Industry Trends and Competition in the Online Gaming Market in Singapore

Singapore's gaming industry is driving the nation's digital economy, growing at a faster rate than eCommerce and online services.

In 2023, the market for online and video games is projected to hit USD 288.49 million, before climbing to USD 531.10 million by 2028. Singaporean Minister of State for Trade and Industry Alvin Tan has said the city-state has the potential to become a hub for gaming and esports in Asia, where 45% of the world's gamers live. Almost a third of Singapore's population class themselves as gamers, making the country a lucrative market for global studios.

Mobile gaming market in Singapore is highly promising, featuring the highest smartphone use and penetration, expected to reach 93% by 2025. In Opensignal's measurement of multiplayer mobile Games Experience, Singapore has the highest rating globally.

Most gamers in Singapore range from the 16–34 age range, but even up to 30% of Singaporeans aged 55 and above identify themselves as gamers too. According to Newzoo's statistics, women aged 36 to 50 years form the largest subset of Singapore's gaming community, accounting for 23 percent of the 3.8 million gamers in the country. This demographic, referred to as 'time fillers,' demonstrates the diverse range of gamers in Singapore. The inclusivity and broad appeal of gaming have contributed to its widespread popularity across various age groups and genders. A study by YouGov showed that gamers aged 25–35 are likely to spend more time gaming, although gaming penetration for the 18–24 year olds is higher, and that around 41% of Singaporeans will spend over 15 hours per week playing video games.

Singapore has developed a stronger, thriving esports scene. In May 2023, Singapore won their first SEA Games Esports Gold Medal in Valorant. Singapore also has prominent successful esports figures, such as EVOS SG team for Mobile Legends, DOTA2 Player Daryl Koh Pei, or professional Street Fighter champion Ho Kun Xian. With governmental support in the scene to promote this direction, like Singapore Games Association (SGGA) supported by government agencies Enterprise Singapore, Media Development Authority and Singapore Tourism Board, Singapore begins to develop itself as an attractive esports venue and location for overseas companies. Visitsingapore's two day guide for esports enthusiasts featuring Ho Kun Xian himself also promotes a potential esports tourism location for local esports to evolve in the near future. (5) Product and Service Procurement

(5.1) Procurement Management for Distribution

The online game business comprises approximately five parties as shown in the chart - Starting with the Game Developer who designs and develops the game, then sells the game license or appoints a Game Publisher who finds the markets and sells the rights of game services to the Game Operator in each area or country. At present, the Company operates as the Game Developer, Game Operator, and Distributor.

The overview of parties in the online game business

The Game Operator prepares a server system for serving the areas under license. In collecting fees, the Game Operator sells prepaid cards to gamers via appointed distributors or agents or via a third-party payment method. The Internet Service Providers (ISPs) rent out internet bandwidths to enable communication and storage of game data among the servers of the Game Operator, internet cafes and gamers.

(5.2) Operating Procedures for Online Game Services

Regarding procedures of online gaming procurement, the Game Management Team of the Company is responsible for procurement and preparation of essential gaming services. The team is divided to take care of an individual game. There are 6 steps in providing online gaming services as follows :

The Operating Procedures for the Provision of Online Game Services

Selecting Online Games

To start, the team selects potential games from different sources, i.e. games that are popular overseas with the underlying policy on suitability of contents for the groups of customers and culture of the countries. The preliminary

selection criteria include :

- Formats and contents that are creative, appropriate for the target customers and contain no extreme violence or sexually explicit contents.
- Interesting online games with contents that are different from contents already available in the market.
- The cost of license for the game is appropriate allowing the Company to profit from providing services.
- Compatibility of the online game system to the target groups' systems.

Negotiating and Licensing an Agreement of an Online Game

At this step, prices as well as terms and conditions are negotiated and discussed. An agreement is drawn with either a game developer or game licensor.

Preparing an Online Gaming Service System

- **Server Infrastructure and Computer Programs :** The Company prepares its server system and computer equipment that meet specifications required by the game developer. In this regard, the number of servers required to support the online game services are estimated by the Company. The Game Developer then installs the online game programs prior to launch.
- **Data Security and Connectivity System :** The Company prepares and sets up basic settings of the data security system of each game. Secured connectivity authorization is managed and set up for gaming only. A test of the data security system is proceeded before the services are launched.
- **Merging of Basic Systems :** The Company prepared basic systems in which merging of the customer's database and game's database is required; for example, customer ID system of the Company to be used in the top-up system of a top-up card, supporting activities developed by the Company, promotion systems to entice purchasing of the Company's games.
- **Client Program :** The game management team modifies and updates the Client Program for installation in the gamers' computers before playing for the first time. The localization is also done at this stage. Contents are checked for errors and appropriateness and adjusted to suit the social context and gamer groups in each country. The gaming programs must be delivered to customers with full readiness and security.
- **Building Websites :** The game management team creates websites for online games as a source of information for gamers providing game play instructions, making payments, and servicing customers. The websites also serve as an advertising channel for the Company.
- **Social Networking :** The Company has created social media and social networking sites to connect gamers together as well as deliver news, updates and promotions. Gamers are reached through digital marketing.
- **Service Management :** The game management team sets up a Game Master team system to monitor the gaming experience, facilitate and solve problems for gamers.

Client Program Distribution

The Company distributes programs to gamers by offering free downloads via game websites as well as the PlayPark EZ program which is developed in an aim to provide a more convenient channel to play the Company's games on a mobile game platform. For mobile gaming platform, gamers may download via App Store for iOS, and via Google Play for Android.

Launching Online Gaming Services

After the preparation has been completed, three phases are conducted at a launching stage.

- **Internal Test :** The game management team and the Company's staff test the online game from the server. Bugs and other problems are fixed before launch.
- **Closed Beta :** The game is released to a restricted number of gamers who register to play via the game websites. This free-of-charge game in the test phase is used to find bugs and other issues to solve.

- Open Beta and/or Commercial : After the testing phases, the games are launched for gamers with cash item shops.

Three phases for a mobile games are as follows :

- Internal Test : The test is carried out through a test server by the team for further improvement before launching.
- Closed Beta : The game is released and available for interested gamers who register to join in. At the testing stage, the game is free of charge as it is carried out to check the stability of its server system and to gain feedback on the game for further improvement to meet customer needs and expectations.
- Commercial Launch : After a game trial phase, games will have their quality check before their official launches in different online stores, e.g., Google Play for Android and App Store for IOS. The Company gains service charges from game items in which customers can purchase in the In-App Purchase via Google Play and App Store.

Advertising and Public Relations

Advertising and public relations are planned and launched to promote and build customer acknowledgment of online game launches with three stages :

- Pre-marketing : This involves an introduction of the games on game portals, online games. They are promoted through social networking sites and social media, with a new fan page or group to communicate and engage potential users before the games are available to public service.
- Launching : This involves advertising on game portals, online game websites, e-newsletters, social media through influencers, casters, net idols, Search Engines Optimization (SEO) , and brand presenters, as well as digital media through various platforms like Google, Facebook and Vungle to introduce the games and acquires its targets to download and install the game.
- Promoting and Maturing : This stage emphasizes on both in-game and out-of-game activities. In-game activities include mini competitions, logging-in activities to get special items, etc. Out-of-game activities include meetings to create gamer engagement and to build good relationships between gamers and the Company's teams. National competitions are organized at premium internet cafes. News and updates are delivered and publicized through different channels include online game websites, social networking and media, promotions from influences, casters, online advertising, or ad networking on different platforms.

(5.3) Licensing Fees for Online Games

In providing online gaming services, the Company acquires game licenses from several game developers or game licensors to provide services as an exclusive distributor for the games in specific territories at the rates agreed by all parties. In general, a licensing agreement has 2 - 4 year terms counting from the commercial launch date, with an agreement for a renewal at the same rate and under the same conditions. In this regard, the game developers/game publishers shall terminate an agreement in case of a breach of the agreement by the Company and/or the Company faces financial difficulty, insolvency, inability to launch online game services on time. The licensing fee of online games are divided into 4 main types as follows :

- Initial Fee : This refers to a fixed fee paid upon the signing of the agreement or within a specified period.
- Monthly Fee : This refers to a fee charged based on the number of cash used of the games within the month.
- Minimum Guarantee : Some agreements may stipulate a minimum fee for the volume of the services provided in each month.
- Success Fee : The fee is charged based on the revenue reaching the agreed target.

It is noted that the types and amounts of licensing fee payable as well as the payment periods depend upon a negotiation between the Company and the game developer or game licensor.

1.5.2.2 Blockchain & Innovation Technologies

(1) Nature of the Company's Businesses

The blockchain and innovation business group focuses on providing services or developing products

related to blockchain technology and future innovations to strengthen and enhance the potential of the business group within the Company. Currently, the Company has invested in leading technology and innovation partners.

No.	Company	Type of Business	Relationship	Shareholding Status
1	Kubplay Entertainment Company Limited	Operates a business focused on developing a comprehensive ecosystem for Blockchain Gaming	Joint Venture	50.00% of registered capital
2	The Big Bang Theory Company Limited	Operates a business focused on developing infrastructure for the Metaverse Platform	Financial Assets Fair Value through OIC	27.00% of registered capital
3	Bitkub Online Company Limited	Operates the digital asset exchange	Financial Assets Fair Value through OIC	9.22% of registered capital

(2) Marketing Activities and Top-up Channels

With the proportion of shareholding in the blockchain and innovation business group, the group currently has a stake in the management of Kubplay Entertainment Company Limited. In 2023, the business group is in the process of preparing various aspects to launch services in early 2024, including :

- Development of the Astronize Hybrid Web 3.0 Gaming Platform : This platform will enable games from the Web 2.0 era to seamlessly integrate with blockchain technology's environment and infrastructure, facilitating a swift and efficient transition to the Web 3.0 gaming model. Game developers will not need to possess expertise in blockchain technology or develop the infrastructure themselves.
- Readiness for the launch of TSX by Astronize Game : This will be the first game to be launched under the Astronize platform, targeting the mobile gaming market with IP that is well-known, especially among Thai gamers. The launch is planned to cover 26 countries worldwide in April 2024.

2. RISK MANAGEMENT

2.1 RISK MANAGEMENT

The Company realizes that risk management is an important part of enhancing the potential of its business operations and is a factor that enables the Company to operate its business sustainability. However, due to the rapidly changing economic, social, and advancement of innovation and technology, the Company is faced with various risks.

The Company aims to provide all managers and employees with knowledge, understanding, and awareness of risk management, as well as developing strategies and mechanisms for jointly auditing and managing risks. To this end, the Company has established a risk governance structure, a risk management culture, and acceptable risk levels, along with risk management processes that enable risk owners to manage risks in a manner consistent with the overall Company.

The Risk Management Oversight Structure

The Company has established a risk oversight structure to ensure that the level of oversight and responsibility is appropriate, as well as to promote effective risk management. This structure outlines the roles and responsibilities within the risk oversight framework as follows:

- **Operational Risk Management:** This involves assigning ultimate responsibility for operational risk management to the highest-ranking personnel within each operational unit, who act as risk owners. They are responsible for managing and accessing risks, as well as reporting on risk management activities to the management level on a regular basis as part of daily operations.
- **Management-level Risk Management:** This involves high-level executives of each department who are responsible for adhering to risk governance frameworks, conducting audits, assessing outcomes, and monitoring risk management across various dimensions. This includes responding to newly arising risks that impact departmental operations. Additionally, they are tasked with reporting audit findings, monitoring new risks, and their implications to the audit committee and the board of directors.
- **Executive-level Risk Management:** This encompasses the Company's Board of Directors, which holds ultimate responsibility for overseeing the Company's risk management. It is an integral part of business operations.

In addition, the Company also stipulates oversight of risk management adequacy within the risk management system by the Audit Committee (AC). Furthermore, it mandates performance reviews of risk management operations by the Company's Board of Directors to ensure confidence in the sufficiency, appropriateness, and effectiveness of the risk management processes.

The Risk Management Culture

The Company promotes and maintains a strong risk management culture by fostering awareness of disciplined risk management practices for all business activities. This culture instills values, knowledge, and behaviors related to risk and control, considering the following key aspects:

- Clear and regular communication from the Company's Board of Directors and senior management regarding risk management.
- Consideration of risk-related information in business decision-making processes.
- Oversight of risk and accountability by risk owners, along with transparent information disclosure.
- Cultivation of skills and abilities in risk management for everyone within the Company.

Acceptable Risk

The Company has established criteria for acceptable risk, considering both qualitative and quantitative aspects, to assist in decision-making and strategy selection that align with business objectives. The board of directors regularly reviews the acceptable risk levels, either annually or when there are changes in the business environment, to ensure that the accepted risk aligns with the Company's strategies and business, as well as regulatory requirements and stakeholders' needs.

Operating Framework

The Company has an appropriate risk management system and has good corporate governance, ethics and anti-corruption policies (see policy and guidelines at <https://investor.asphere.co/th/corporate-governance/corporate-governance-policy>) which ensures that The Company has various measures that are sufficient and suitable for risk management covering the entire Company.

Risk Management Guidelines

The Company provides risk management, covering all activities of the Company with appropriate and timely risk management measures and must report to the Board of Directors for acknowledgment.

2.2 Risk Factors for the Company's Business Operation

2.2.1 Risks from External Factors

Risks from Changes in the Regulations, Laws and Government Control

At present, the online gaming business in Thailand is regulated by various governmental agencies. For example, Ministry of Culture oversees online gaming licensing as well as censoring and rating of the game contents before public release, Ministry of Digital Economy and Society enacted Computer Crime Act B.E. 2550 (2007) and added Computer Crime Act (No. 2) B.E. 2560 (2017) and the Cyber Security Act B.E. 2019 to supervise and prevent computer-related offenses. In addition, the Personal Data Protection Act B.E. 2562 has also been issued to control the collection and use of personal data information. While the controls for online game services businesses in Singapore, Malaysia, Indonesia and the Philippines do not have constraints on the online gaming industry, they have only the Personal Data Protection Act to control the usage of personal data.

In the past year, in 2023, the Ministry of Digital Economy and Society, through the Electronic Transactions Development Agency (ETDA), enforced the enactment of the Royal Decree on Digital Platform Service Business Notification. This resulted in subsidiary companies of various corporations being required to notify and operate digital platform service businesses in compliance with the aforementioned law.

Corruption Risk

The Company places great importance on good corporate governance and stringent internal control processes. It has clear policies against corruption and strictly enforces adherence to these policies. The Company highly emphasizes cultivating a culture where employees at all levels carry out their duties with integrity and transparency. Additionally, it ensures awareness of roles and responsibilities in implementing anti-corruption policies.

The Company refuses to tolerate any form of corruption and collusion in any capacity. It places great importance on taking actions to prevent unauthorized and/or illegal activities that benefit individuals, whether monetary or non-monetary, directly or indirectly. The anti-corruption and anti-collusion policy covers all levels of employees as well as business partners in all forms of relationships with the Company. Additionally, the Company has established guidelines for giving and receiving gifts and entertainment to provide a suitable framework for the Company's personnel. Furthermore, there are channels for reporting and whistleblowing on corruption and collusion directly to the audit committee, with transparent and accountable investigation procedures. Risk management and control measures are in place to address potential corruption and collusion risks, with managers being responsible for risk assessment and regular monitoring to ensure proper and transparent operations and to prevent any potentially

corrupt activities. Channels for communication allow stakeholders to report incidents or complaints directly to the audit committee, and thorough and transparent investigation procedures are conducted to ensure fairness and instill confidence in the process for all parties involved.

In addition, the Company requires reporting of any instances of corruption and collusion (if any) to the audit committee and the board of directors. Furthermore, there must be an adequate review of the appropriateness of anti-corruption policies and measures annually to ensure compliance with the Company's participation and certification as a member of the Thai Private Sector Collective Action Against Corruption (CAC).

Risks from Game Developers' Lower Dependency on Service Operators Opting to Provide Own Services

At present, there are many sizable game developers with their own online game services. They are highly successful with many gamers from various countries in Southeast Asia. They choose to bypass the general practice of partnering with local online game operators.

However, there are many game developers with limitations in providing their own services as having a successful operation requires many factors such as the understanding of local gamers' behavior, marketing and communications, managing gaming community, and direct meeting with customers. In addition, many game developers still want coverage in providing games to countries in Southeast Asia and simultaneously cover every country in the region. To achieve this, they still need to partner with companies that have the knowledge, understanding, experience and expertise in the business with the power to service every country in the region. To these points, Asiasoft stands out strong as there are very few operators who can provide services to as many countries based on the criteria mentioned herein.

2.2.2 Business Risks

Risks from Market Launch Failure of the Licensed Games

In launching any online game, the upfront costs are quite substantial as they primarily consist of license fees, server systems, related computer equipment and marketing expenses. If the Company cannot generate revenue to exceed the amount invested, or in the amount forecasted, impact on the business performance and profitability of the Company in the future is definite. Therefore, if any online game appears to show lower-than-expected sales performance, the Company may consider writing off the license fee in full which in turn will likely have a direct impact on the Company's profit for that accounting period.

To increase the chance of success in providing online and mobile games, it is the Company's policy to consider selecting games with appropriate contents to the market's demand by using experience, the Company's procurement procedures, as well as carefully reviewing the games and gamers' target group before making any investment decision. In addition, the Company has defined a clear policy to diversify its sources of revenue into various online games licensing by launching more than one online game for each country.

During 2023, the Company offers a total 34 online games in 6 countries, 17 games in Thailand, 16 games in Singapore, 17 games in Malaysia, 6 games in Indonesia, 13 games in the Philippines, and 15 games in Vietnam, with plans to continuously release new online games in the future.

Risk of Dependence on Internet and Service and Internet Data Centers Providers

At present, Asiasoft's online-gaming affiliated companies rent the Internet Data Center (IDC) for their server and high-speed internet bandwidth operating systems from external ISPs providers as follows :

- Thailand : IDC and bandwidth services from True Internet Data Center Company Limited, 3BB, and AIS, including the cloud provider such as Huawei cloud
- Singapore and the Philippines : IDC services from Epsilon and bandwidth services from StarHub and SGIX
- Vietnam : IDC services from Viettel-CHT and bandwidth services from Viettel-CHT and CMC

If these ISPs are unable to provide good quality internet connection or discontinue their services, it could impact the online gaming services of the affiliated companies. Moreover, intermittent internet connectivity could

negatively affect customer satisfaction and service experiences resulting in the Company's reputation and business performance in time.

Fortunately, these service providers are leading operators providing high-quality services in their respective countries. They, compared with international standards, have very high performing ISP redundancy and security systems. Additionally, there are more alternatives for such rental services including Cloud services, which provide more backup options for the companies in case of problems.

Risks from not being Copyright Owners and/or Online Game Developers

In providing online game services, the Company receives the right to distribute the games from various copyright owners, developers or overseas distributors for specified territories for a term of 2 - 3 years, from the date of commercial launch at the agreed rates. The copyright owners support services such as providing updates, creating patch files, and solving technical issues and bugs. The risks may occur from these owners terminating the copyright license agreements in case of breach of contract and/or not renewing the agreement at reasonable prices and conditions, and/or copyright owners' inability to provide technical support that may impact the operation, financial, and the future business performance of the Company.

The Company complies strictly to the copyright license agreement to mitigate risks from termination. It is the Company's policy to procure copyright license agreements from various online game developers or distributors whose reputation is widely recognized with the ability to provide support and service throughout the term of agreement. The renewal clause for online games with continuing popularity contains an option to renew with same prices and conditions. Agreements for MMORPG and Casual Games are customarily set for a period of 2 - 3 years.

Risks from Online Game Copyright Infringement

At present, some operators illegally import online games that are rightfully licensed to the Company and install them on their servers using their own network to provide services at lower fees, potentially causing revenue loss for the Company. However, services provided through these illegal operators' servers are of poor quality both in terms of speed and ability to accommodate a large number of players simultaneously. Moreover, players are limited to play the games on the illegal network of servers and cannot access to play on the Company's network, therefore limiting the number of players in the community. In addition, operators infringing copyright cannot solve the bugs or technical problems in the game programs resulting in low acceptance among gamers. As a result, the Company deems that the loss of income from copyright infringement will not implicate the financial position. In order to lessen the risks of encountering these types of problems, the Company has set up a team to investigate and take legal action against operators who infringe copyright.

2.2.3 Sustainability Risk

The Company has continued to focus on sustainability issues by integrating them with the Company's business operations. There is to determine key risk factors related to sustainability such as climate change risk factors, water management, risk factors from the increasing importance of environmental conservation, etc.

Environmental Dimension

Global climate change affects both the natural and human environment in many areas. It causes severe impacts in the economic, social, and environmental dimensions, which are the three main areas of sustainable development. Climate change from global warming (Climate Change) has become more severe, resulting in various risks and affecting the Company's business operations as follows :

Social and Health : Climate change poses both direct and indirect risks to human health and well-being. It may cause severe diseases from minor to death, such as infectious diseases, and various tropical diseases caused by higher temperatures change the disease carrier's life cycle. As a result, there are new strains of diseases.

Economic : Climate change has had an impact on overall economic growth. It possibly affects production

costs, competitiveness, and sustainability in the Company's future business operations.

Major Risk Management Measures : Climate change is another risk that the Company places great emphasis on management. For reducing environmental impact, such as applying IT technology to reduce the paper usage, controlling the cost of electricity, and water, in addition, the Company also collects the relevant information to calculate the emission of greenhouse gas. The information provides a factual perspective for better analysis and strategic planning for execution on a timely basis.

Social Dimension

The risk of personal data breaches or human rights : Personal Data Protection Act B.E 2562 (2019) or PDPA (Personal Data Protection Act), which focuses on protecting data subjects and sets guidelines for personal data controllers or the processor. The Company as a business operator is related to personal data of customers, whether it is name-surname, address, gender, telephone number, e-mail address, ID card number, picture, fingerprint and any information that is considered personal data information. The Company has a duty to comply with the Personal Data Protection Law to prevent infringement of the privacy of others.

In this regard, the Company has prepared to prevent risks that will affect the collection, use or processing of personal data information as follows :

- Appoint a working group and designated person responsible for PDPA to conduct an interview with a PDPA expert advisor to assess the impact of personal data collection or use personal data information.
- Organize training and seminars to educate the working team, responsible persons and employees of the Company.
- Setting the policies related to personal data collection, practices, and forms relating to personal data.
- Establish a communication channel to systematically listen to opinions and complaints from employees and external stakeholders.

2.2.4 Emerging Risk

Technology Crime and Cyber Threats Risk

With the advancement of technology in the present time, the Company is aware of the importance and preparedness to deal with technological crimes and cyber threats which have many forms, such as, network attacks, destruction of data by unauthorized persons or unauthorized access to information or misusing the information which may affect the business and reputation of the Company, or may lose income from the Company being unable to serve customers or loss of confidential or proprietary information of the Company. Therefore, the Company has put in place appropriate measures to maintain cybersecurity to protect and manage the consequences of cyber threats, including :

- Prepare a plan to support ongoing business operations in an emergency to limit the risks of failure of the Company system.
- Improve computer network availability to avoid system failures by backing up the network and the server to work continuously and is least likely to fail. It prevents unauthorized persons from intruding/destroying the Network and use of the Company information.
- There are strict security control measures such as the computer security system (Firewall), countercheck, authorization period, backup, and recovery design from unexpected disasters, including detection of unauthorized network access. And the Company has also set up the DDOS Protection Solution, an intrusion prevention system that helps increase capacity of other systems up to 99.99%.
- The Company is the first online gaming service operator in Thailand to obtain ISO/IEC 27001:2013 (Information Security Management System : ISMS). ISO/IEC 27001:2013 is the standard defined by the renowned and reliable international ISO (The International Organization for Standardization) and IEC (The International Electrotechnical Commission). These two organizations set up standards for information security management systems that all companies apply in both internal and external operations. These standards can be

implemented in all businesses and industries.

2.2.5 Risks from Majority Shareholders' Influence on the Policy and Management of the Company

On 31 December 2023, the Company's major shareholders are divided into 2 groups : Group 1, Mr. Pramote Sudjitporn, holding 30.03% of the total paid-up capital, and group 2, Sabai Technology Public Company Limited, holding 22.63% of the total paid-up capital. By holding such shares, the group of major shareholders has the power to manage and control most of the votes for important resolutions. Moreover, the majority shareholder has the controlling power with one out of six directors holding management positions in the Company.

As such, the Company has appointed three independent directors who are outsiders to oversee the management and to look after the interest of the minority shareholders.

2.2.6 The Investment Risk of Securities Holders

Investors can review the information that may influence investment decisions at the Securities and Exchange Commission Office or via the SEC's Internet network (www.sec.or.th).

2.2.7 Risks from Investing in New Businesses and from Companies Acting as Holding Company

Due to the year 2023, the Company has been involved in holding shares in other companies (Holding Company), as well as having plans to seek additional investments in other businesses to foster growth and enhance competitiveness within the group. However, seeking such suitable businesses entails risks where the revenue and profits may not meet the anticipated targets due to various factors such as economic conditions, rapid technological changes, as well as legal and regulatory changes. The Company cannot guarantee that investments in new businesses will be successful as planned. Furthermore, such investments still rely on expertise and specialized management, as well as the synergy between new and existing businesses, merging important processes and systems, and developing organizational culture to align with the new businesses. All of these risks may lead to lower returns than anticipated and may negatively impact on the Company's financial position and operational performance.

Nevertheless, the Company still maintains a policy of investing in business groups that focus on investing in companies with technology that can support environmental systems and support the long-term growth of the Company's business groups (Synergy). This involves evaluating and monitoring risks, as well as regularly reporting business performance to the Company's Board of Directors, to mitigate risks from investing in new businesses.

3. DRIVING BUSINESS TOWARDS SUSTAINABILITY

In achieving the vision of “Serving the Infinite Future”, one of key driving forces for the Company is customer services. The Company is committed to providing services with high service quality, sincerity, and integrity to meet the highest level of customer satisfaction. Hereby, Asphere continues to improve and raise the customer service standards to ensure that our online entertainment services are perfectly delivered to our regional customers. Besides focusing on the vision achievement, the Company also adheres to sustainability. As a result, sustainability policies and goals have been established to reflect the Company’s intent of growing the business with corporate social responsibilities in educational, environmental, and social concerns, along with good corporate governance practices.

3.1 Sustainable Management Policy and Goals

The Company recognizes the significance of building sustainable business growth under good corporate governance practices, responsibilities towards shareholders’ benefits and accountability to stakeholders, society and environment. The Company is also determined to be an anti-corruption role model for the society.

The Company has established a policy to conduct a business project in adherence to UN sustainability goals (UN SDGs). This commitment has provided guidelines for the Company to operate the business with a clearer direction. Three major goals of SDGs have been taken into account as follows.

- Good Health And Well-Being : The Company has continued to promote health and wellness to people in the society. For example, amid the COVID-19 crisis, the Company donated money to public health agencies to help them increase capacities to help patients. Moreover, the Company also gives priority to building a better workplace environment to ensure occupational health and safety among employees.
- Quality Education : The Company carried out several CSR projects under an education scheme as contribution to the society. Activities included scholarship projects, training programs for knowledge enhancement, donation of refurbished used or old computers to be used as learning tools for schools in need.
- Gender Equality : The Company also identifies equitable and fair treatment of all stakeholders in all sectors as a top priority, especially in terms of gender equality. For example, for customers, a gaming event of Audition Lady Tournament was organized and open for female gamers. For employees, all job positions in the Company were open to everyone without gender discrimination.

- Decent Work And Economic Growth : As a company in digital technology, one of the most important industries at present, the Company creates effective recruitment by hiring employees for positions that suit the Company's business size. This is considered a mechanism of driving economic growth.
- Climate Action : The Company determines guidelines for pollution prevention and mitigation. For example, use of Information Technology in the workplace contributes to reduction of paper usage. Data collection of a greenhouse gas inventory provides more concrete information and can be used in a review and improvement of regulations in response to a situation.

The Company has a policy in operating the business with corporate social responsibility in accordance with 5 major concerns.

- Corporate Governance : The Company adheres to business integrity and fairness. The Company strictly keeps the business compliant with corporate rules and regulations as well as transparency.
- Fair Employment Practices : Employees are considered as the valuable asset of the Company. The Company has a policy of equal opportunities and fair treatment in employment. The policy covers opportunities and treatment without discriminations against gender, religion, race and other aspects in all dimensions, including payment, career opportunities, working environments, and employee development. It is established in an aim to ensure that all employees gain career growth opportunities and a competitive advantage to compete in a continuously changing market environment. Moreover, the Company determines rules and regulations relating to employee care in line with other relevant regulations such as labor laws to ensure that employees of the Company are treated appropriately.
- Customer Responsibility : Customer service is vital to the business. In improving the service standards, the Company has provided different customer contact channels for submission of enquiries, suggestions and complaints. The channels include social network platforms and emails. In addition, customer satisfaction surveys are also arranged, and customers are invited to take the surveys. It is one of the KPIs for measuring the Company's service standards.
- Corporate Social Responsibility (CSR) : The Company provides support for CSR activities and projects as a way to contribute to society. The Company also builds cooperation with other sectors to promote social development, with a focus on educational and technological schemes. This is pursuant to the nature of the business and covers assistance in emergency cases such as the COVID-19 pandemic that has broad effects, especially on the public health dimension.
- Focusing on Environmental Issues : The Company recognizes the importance of adopting eco-friendly business practices. A work system that efficiently helps maximize resource utilization is developed. Reduction of wasteful use of resources is promoted. Moreover, energy conservation measures in terms of work procedures and selections of energy-efficient equipment are determined.

3.2 Managing Stakeholder Impacts in the Business Value Chain

Business Value Chain

Supply chain management is the heart of the Company's business operation. Effective supply chain management, hence, influences the Company's competitiveness.

As a gaming service provider, the Company plays a role in connecting game developers with consumers (gamers). The Company's roles are to provide and select games that are in the market demand and to negotiate with game developers to hold a contract for launching their gaming services. Accordingly, the Company recognizes the importance of business partner relations. In the past, the Company continuously gained positive cooperation and support and had the equitable and fair business partner policies. The Company also determines to provide quality gaming services with constant game content updates to achieve the highest customer satisfaction.

3.3 Sustainable Management in the Environmental Dimension

Environmental Policies and Practices

Even though the nature of the Company's business does not affect the environment directly, however, the Company always takes this matter into consideration as much as emphasizes pollution prevention measures or any other problems which may affect the environment. For example, reducing the energy consumption, energy-saving campaigns, reducing the use of papers by applying IT technology into the work procedure which is a policy continuously adopted by the Company for years.

Goals

- Control the Company's greenhouse gas emissions to increase by no more than 10% from 2022, despite plans to expand office space.
- Support the procurement of products used in the business, which are produced or made from environmentally friendly materials, at least 1 project while still considering suitability in various aspects such as product efficiency or quality and production lead time.
- Continuing the project on internal office waste management.

Performance in 2023

- Greenhouse Gas Mitigation Management : the Company has determined a scope of consumptions of energy and resources that are sources of greenhouse gas emission.
 1. Scope 1 direct greenhouse gas emissions refer to emissions calculated from fuel consumption. This type of emissions is associated with fuel combustion in mobile sources owned and controlled by the Company. The sources consist of 3 cars and 1 motorcycle.
 2. Scope 2 indirect greenhouse gas emissions refer to emissions from the generation of electricity acquired from external services and used by the Company. This type of emissions can be calculated from the electricity consumption in 1 main office, the headquarter of Asphere Innovations Public Company Limited.
 3. Scope 3 indirect greenhouse gas emissions refer to emissions generated within the headquarters of Asphere Innovations Public Company Limited from a water consumption of 115 cubic meters and the usage of 181 A4 reams.

In 2023, the Company emitted 160.74 tons of CO2 equivalent, marking an 11% increase from the previous year. The details of the direct and indirect greenhouse gas emissions are described below.

- The direct greenhouse gas emissions amounted to 67.93 tons of CO2 equivalent, accounting for 42% of the total greenhouse gas emissions. This marked a 10% reduction from the previous year, attributable to the Company's transition to online document delivery systems.

- The indirect greenhouse gas emissions amounted to 92.80 tons of CO2 equivalent, representing 58% of the total greenhouse gas emissions. This marked a 33% increase compared to the emissions in 2022. The rise can be attributed to recent expansions in office space, including the relocation of the Network Operating Center (NOC) team from the Muang Thong Thani office to the headquarters. Consequently, overall electricity usage is expected to increase in proportion to the expanded usable area. Additionally, the Company has implemented measures such as assigning responsible individuals to turn off electricity and air conditioning units 30 minutes before lunch breaks and the end of working hours.

Carbon Footprint (tCO₂e)

Scope 1 Direct GHG Emissions	Scope 2 Indirect GHG Emissions	Scope 3 Indirect GHG Emissions
67.93	91.76	1.04

- The Procurement of Eco-friendly : The Company strives to minimize its environmental footprint in line with practical business practices. As part of this commitment, last year's New Year's gifts for partners reflected the theme of "Go Out & Sustainability." These gifts included travel cases made from natural cellulose fibers or other eco-friendly, renewable materials. Furthermore, the printed colors were produced using non-toxic, soy-based inks derived from soybeans.

- Waste Management in the office : the Company deployed waste sorting bins to 4 categories : General Waste, Paper, Plastic, and Canned. The waste sorting can reduce the amounts of waste and its impact toward the environment. All wastes will be collected by categories and centralized at Major Tower Building, where the Company is located, which also complies with the same waste management protocol.

In addition, the Company has also managed and promoted the paper reuse by providing reused paper stations nearby the printers' location for the convenience of reuse purpose.

4.1 Financial Status and Operating Results

Overview of Past Operating Results

Business Structure 2023

The Group has a core business on online revenue both PC and mobile game whereas PC game still is a core revenue, distribution and payment channels in Thailand, Singapore, Malaysia, Indonesia, the Philippines and Vietnam.

Group Operating Result

Asphere Innovations Public Company Limited, a regional online entertainment service provider in Southeast Asia with a dominating market share in the 6 countries covering Thailand, Singapore, Malaysia, Indonesia, the Philippines and Vietnam.

In 2023, the Company had total revenue of Baht 1,449.2 million, decreased by 8.0% from the year 2022 which was Baht 1,575.7 million. The decline in revenue was from the postponement of new game launching, which will be operated in the Southeast Asia region that the group has provided a service from the 4th quarter of 2023 to 1st quarter of 2024.

Moreover, in the 3rd quarter of 2023 the group sold its subsidiary in Malaysia in; CIB Development Sdn. Bhd. with gains on selling amounting Baht 66.4 million. Although the group sold the subsidiary company in Malaysia, the game services in Malaysia will be operated by the subsidiary company in Singapore. Thus, the group continues to maintain the market share in Malaysia. However, the postponement of new game launching as mentioned earlier, resulted in no operating revenue from Malaysia in the last quarter of 2023. The postponement of new game launching in the 4th quarter of 2023, had led to the amount of new games launching in 2023 less than 2022.

Net profit in 2023 was lower than 2022 due to the increase in a game impairment cost from Baht 1.2 million to Baht 28.9 million and a game write-off expense from Baht 4.3 million to Baht 69.7 million or total Baht 5.4 million to Baht 98.6 million. Despite lower net profit in 2023, the group still had strong operating cash flow and liquidity.

Overview of Performance for 2023

The Total Revenue of the Company comprises of a proportion of online game, distribution, advertisement and other income as follows :

Business	Revenue					
	2023		2022		2021	
	THB M	%	THB M	%	THB M	%
Online Game Service	1,435.5	99.1	1,560.6	99.0	1,850.4	99.4
Distribution	3.2	0.2	3.8	0.3	10.0	0.5
Others	10.4	0.7	11.3	0.7	1.7	0.1
Total	1,449.2	100.0	1,575.7	100.0	1,862.1	100.0

Remark: The above revenue has already eliminated the related parties' transactions.

Liquidity and Capital Adequacy

In 2023, the group had a liquidity ratio of 1.2x, declined from 2022 and 2021, which was 3.3x and 2.6x, respectively. Liquidity ratio declined because of an increase in short-term loans from related parties and the current portion of loan from financial institution, while current assets decreased from cash and cash equivalents, short-term investment and prepaid royalty fee. Although the current ratio was dropped, the group still had strong liquidity.

Debt to Equity ratio in 2023 was 0.8x while in 2022 was 0.4x, however, the group still had low financial risk.

4.2 Factors that Affect Financial Position Significantly in the Future, both Internal and External

The following factors may affect the overall performances, financial position and/or operations of the Group :

1. Risk of Product's Hit Factors : Online game industry in Southeast Asia has become more and more competitive whereby gamers have become more selective in terms of which games they will spend their time and money on. Hence, the Company is committed to publishing hit games and top-notch services that will appeal to our market and will result in positive financial performance for the Company.

2. Operation Schedules : Timing is key in the online game industry whether for launching new titles, new game updates, new types of services, gaming events, as such the Company is carefully scheduling key activities based on consumer's behavior and trend, such as school terms, holiday seasons, key sports events, or competitor's products schedules to ensure optimal timing for any product activities.

3. Changes in Technology and Platforms : Consumer behaviors have changed drastically, due to changes in technology and the games are easier to access and more prevalent. In the last several years, smartphone penetration has grown significantly in the region and as a result, the barrier to entry into a new market has been lowered with many online game service providers entering this business by launching their self-developed games. The Company strives to look out for oncoming changes in behavior and will constantly adapt our business plan to tap into the ever-growing mobile gaming market. Also the Company will continue to focus on PC games with the strategy that lets the players access the games easier and faster as well as launching a new co-publishing business model with potential partners. We will continue to develop new and enhanced systems for both games and other services to serve internet users in Southeast Asia.

4. Privacy Protection : One of the Company's strengths is our massive amount of users from all across Southeast Asia and beyond. Hence, any leak of consumer's data by and to third parties will negatively affect our relationship with our users and our revenue. To this end, the Company has implemented secure systems to store and to protect our user database and information.

5. Diversifying Channel Partners : The Company has been maintaining a good relationship with the channel partners (e.g. for payment, sales, distribution) such as mobile service providers, cyber cafes, convenient shops, gaming shops, and online gaming news portals. Our channel partners have significant influence over the products and services that we offer on their platforms. As such, the Company will maintain to provide an agreement that is beneficial to our channel partners.

6. Talents in the Online Game Industry in Southeast Asia : The Company believes in keeping and nurturing talents as an integral part of the Company's overall growth. As the game industry in the region has grown significantly in the past decade, the demand for and quality of talents in the game industry has increased too. The Company will stay competitive in terms of remuneration and advances in the job environment, as well as maintaining the effort to draw top talents into the Company.

7. Risk in Expanding Business Abroad : The Company has expanded its investment in Southeast Asia since 2012. Works are in progress to ensure that systems and processes improved are implemented across the region.

8. Risk in Copyright Amortization : The Company has risk from copyright cost and for obsolete games that will be considered for termination or impairment and may affect the operation results. However, the Company has tried to revise the terms of the contract and negotiate with the manufacturers or game developers to reduce such risks.

The Company does not issue other types of securities.

- **Dividend Payment Policy**

In general, if the Company has no funding requirement for additional investment or business expansion and has sufficient cash flow, the Company has a policy to pay dividend to shareholders of the Company and its subsidiaries of at least 50.0% of net profit of each company (according to each company's financial statements) after deducting corporate income tax, legal reserves and other necessary reserves on a half basis. The first dividend payment shall be paid as an interim dividend and the second dividend payment shall be paid as an annual dividend. Nevertheless, this dividend payment rate may be changed depending on the necessity and appropriateness, given that this change must provide the highest benefit to the shareholders. A resolution of the Company's Board of Directors regarding the dividend payment must be proposed to the Shareholder Meeting for approval, except for an interim dividend payment, which the Board of Directors may approve and then report to the next Shareholder Meeting.

During the year 2023, the Company has paid dividends as follows :

1. The Annual General Meeting of the Shareholders year 2023 approved dividend payment for the year 2022 at the rate of Baht 0.23 per share, totaling approximately Baht 116,543,763, representing 78% of net profit, with a dividend payment date on 9 May 2023.

All department are responsible by the supervisors in the hierarchy to be responsible and encourage the employees to follow the rules. The full policy and guidelines can be found at <https://investor.asphere.co/en/corporate-governance/corporate-governance-policy>.

6.1 Policies and Guidelines for the Board

6.1.1 Board of Directors

The Company focuses on providing efficient services, developing our personnel to support the services and expanding investment to other high potential countries in the region, under a transparent and accountable management pursuant to the principles of Good Corporate Governance. To realize this vision, the Board strives to maintain the highest ethical standards within the framework of the law, the Company’s objectives and its Charter as well as resolutions adopted at shareholder meetings with commitment, honesty, integrity, and prudence in line with good operating practice so as to deliver highest economic value to the Company and maximum stability to shareholders.

The Company’s Board of Directors comprises people who have knowledge, skills, and experience drawn from a variety of professions in the areas of PC games, online business, finance, marketing, law, management, IT, and other fields beneficial to the Company’s work. The Board is free to decide in the best interests of the Company and its shareholders overall. This Board has played a part in determining (or approving) the Company’s Vision, Mission, Strategies, Targets, Business Plans, and Budgets, as well as supervising the performance of its management to ensure effective implementation of the Business Plans and Budgets for the greatest economic benefit for the Company and maximum stability for the shareholders. Action has also been taken to ensure that there is a process for regular evaluation of the adequacy of internal control, internal audit, risk management, financial reporting, and follow-up of performance.

Currently, the Company’s Board of Directors comprises 6 members, 1 executive and 2 non-executive, and three are non-executive and independent directors which, therefore, exceeds one-third of the Board thereby giving an appropriate balance vis-a-vis executive directors. The Board has set up two sub-committees to help supervise operations of the Company, i.e. the Executive Committee and the Audit Committee which consists of three independent directors with a term of office of up to three years. The duties and responsibilities of those Committees have been expressly defined at previous shareholder meetings.

Portion and Structure of Directors

The Board is aware of the roles, duties, and responsibilities of guiding the operation. Monitor and supervise the work of the management. Perform duties with knowledge, ability, transparency, care, and responsibility in performing duties (Accountability) of the Board of Directors towards the Company and shareholders, independent from the management. There are essential guidelines as follows :

Board of Directors Qualifications

1. Possess the qualifications, and have no prohibited characteristics, according to the Public Limited Companies Act B.E. 2535 or other relevant laws, including the rules and regulations of the SET and the SEC and the Company's article of association.
2. Be qualified, knowledgeable, and capable. Have an experience that is beneficial to the business operations of the Company.
3. Have leadership, vision, and independence in making decisions for the Company's best interest and shareholders as a whole.
4. Have a responsibility to perform director duties and devote their time to serving the duties fully and being responsible to the shareholders regularly (Accountability to Shareholders) and make decisions with caution (Duty of Care) to protect the interests of the Company.
5. Perform duties with integrity and ethics within the law framework and guidelines for good corporate governance and code of business conduct.

The Board of Director is aware of its role and responsibility in guiding the direction of operations, following up on and supervising the work of the management department, and performing duties with knowledge, ability, transparency, caution, and responsibility (Accountability) of the Board of Directors towards the company and shareholders. It operates independently from the management team and adheres to important guidelines as follows

The Chairman of the Board

1. Acts as the Chairman of the board, shareholders, and non-executive meetings.
2. Call the Board of Directors meeting or appoint another person to perform this duty.
3. Encourage all board members to debate issues vigorously during meetings, ask questions, and express opinions.
4. Cast a decisive vote, in case the casting vote in the Board of Directors meeting are equal.

Roles and Duties of the Chairman of the Executive Committee

1. Utilize leadership to ensure the Executive Directors' efficient performance of duties for the best interests of the Company and independent from the management.
2. Consider and approve the agenda of the meeting proposed by the Company Secretary to make the agenda consistent with the duties and responsibilities of the Executive Committee.
3. Supervise the Executive Directors in implementing the Board of Directors' policies to implement them to achieve results.
4. Oversee and encourage the Executive Committee to abide by good corporate governance principles and the Company's code of business conduct.

Term of Office of Directors

1. At every annual general meeting, one-third (1/3) of the number of the directors shall retire from the office. If the number of directors can not be divided exactly into three parts, the number of directors nearest to one-third (1/3) shall retire from office.
2. The directors who retire from office in the first and second years following the registration of the Company shall be drawn by lots. In every subsequent year, the directors who have been longest term in office shall retire. A retired director may be eligible for re-election.

The Director Election/Appointment

1. Election of directors to replace those who are due to retire by rotation must seek approval from the shareholders' meeting.

2. In the event that a position of director becomes vacant for any reason other than the end of his office term, the Board of Directors shall on the next board meeting appoint a qualified person, not having unacceptable qualities under the laws as the replacement, unless the remaining duration of the director's term of office is less than 2 months. The replacement director shall hold office only for the remaining term of office of the director whom he replaces. The resolution of the Board of Directors pursuant to the first paragraph must be approved by the votes of not less than three-fourth (¾) of the number of the remaining directors.

6.1.2 Board Independence from the Management, Guidelines for the Board Independence from the Management

The Board of Directors structure comprised 3 non-executive and independent directors, 1 executive director, and 2 non-executive directors. As of 31 December 2023, the Company had five members of the Board of Directors. The balance of power by non-executive directors was as follows :

- Executive director : 1 person (17%)
- Non-executive and independent directors : 3 persons (50%)
- Non-executive director : 2 persons (33%)

6.1.3 Nomination of the Directors

Currently, the Company has no Nominating Committee for selecting directors. This matter is therefore left to the Board, which will select individuals and propose them to the shareholders based on a variety of factors such as their educational background, competencies and business experience. They must also be qualified under the Public Limited Companies Act, B.E. 2535, Notification of the SEC and other relevant laws. Director selection will be made by majority vote at shareholder meetings in accordance with the following criteria and procedure :

1. A shareholder will be entitled to one vote for each share.
2. The vote to select directors will be done on an individual basis.

3. The person with the most votes will be selected as a director. If there is more than one vacancy, the persons with the most votes in descending order will be selected as directors. Where there is a tie, the Chair of the shareholder meeting has a casting vote.

6.1.4 Board Diversity

The Board of Directors recognizes the interests of the diversity of the Board of Directors. It deems an important factor in enhancing the efficiency of the Board of Directors' performance. Such diversity is not limited to only gender but also ethnicity, age, educational history, professional experience, skills, knowledge, and attitudes. Therefore, the nomination and appointment of the Company's directors will be based on knowledge and capability, including the use of selection criteria, which considers the interests of diversity.

6.1.5 Development of Directors and Executives

The Orientation of New Director

The Board of Directors provided an orientation program for new directors to gain a thorough understanding of the Company's business and management in order to prepare the directors to perform their duties.

Development of Directors and Executives

The Company will support the attendance of its Board and senior executives at training courses which will be beneficial to their performance and will enable them to exchange opinions, on a regular basis, with Board members and senior executives of other organizations. Such courses include those arranged by the Company's employee training unit, units under the State's jurisdiction and independent entities such as Thai Institution of Directors. It is an SEC requirement that directors of listed companies attend at least one of these courses, e.g. Director Certification Program (DCP), Director Accreditation Program (DAP), and Audit Committee Program (ACP) so that knowledge and experience gained can be used for the Company's further development.

In 2023, there were directors and executives to attend training/seminars in the following important courses.

6.1.6 Board Performance Evaluation

To enhance the efficiency of performance by its various Committees, arrangements are made by the Company to have members of each Committee evaluate their own overall performance so that they can together appraise and look at their performance and problems. Following this evaluation, the Board will analyze their performance and determine measures which will improve the Committees' efficacy.

6.1.7 Determination of Remuneration for Directors and Senior Executives

The Company has a policy of determining remuneration for its directors, both in monetary and non-monetary terms, openly and transparently. The remuneration shall be submitted for approval to the annual general meeting of shareholders. Criteria governing remuneration of directors are as follows :

- Appropriate and commensurate with the duties and responsibilities of each director.
- At a level capable of attracting and retaining quality directors with suitable ability and knowledge.
- Clear, transparent, and easily comprehensible.
- Comparable to the remuneration of directors in the same or similar industry(ies).

6.1.8 Determination of Chief Executive Officer Remuneration

The remuneration for executives will be determined by the Board, both in monetary and non-monetary terms, in line with the Company's performance and each executive's performance. They will be set at such rates as are adequately attractive to retain quality senior executives and shall be comparable to rates of other companies in the same grade or operating in the same line of business.

6.1.9 Succession Plan Policy of Chief Executive Officer

The Company has a plan for selecting personnel who will be responsible for all important positions to be appropriate and transparent to ensure that the Company has executives who are professional which is considered by the Board of Directors.

6.1.10 Directorship in Other Listed Companies

The Board of Directors has stipulated that each director can hold a directorship position in other listed companies as deemed appropriate. The director should not serve as a director in other listed companies that cause conflicts of interest with the Company and the performance of director duties.

6.1.11 Investment Policy and Supervision of Subsidiaries and Associated Companies and Guidelines

The Company has an investment and management policy in subsidiaries and associates, which will invest in businesses related or benefit and support the Company's business operations to strengthen the Company's stability and performance. The Company will consider the investment proportion, expected profit, the risk that may arise, and the Company's financial status before deciding to invest in various projects. Such investment approval must be considered at the Board of Directors' meeting and/or the shareholders' meeting under the specified approval authority scope

The representative of the Company who is nominated to be directors of subsidiaries or affiliates has the duty to do for the best benefit of such subsidiaries or affiliates.

In addition, in case the subsidiaries, the representatives of the Company who is nominated to be director of subsidiaries shall manage subsidiaries to keep the information and accounting records in order to the Company can verify and collect such information to prepare the consolidated financial statements in time.

6.1.12 The Supervision of Subsidiaries and Associated Companies Policy

According to the year 2022, Asphere Innovations Public Company Limited has restructured its organizational management structure, divided into 4 business groups, such as, Online game Business Group, Blockchain Technology and Finance (Fintech) Business Group, Media & Marketing Business Group and Corporate Venture Capital Business Group. During the past year, the Company has invested in businesses with considerable growth potential. The aim is to generate stable long-term returns for the Company and its stakeholders, thus transitioning the Company into a Holding Company.

Therefore, with a full commitment to protecting the investment and supervising the operations of its subsidiaries and associates to comply with applicable laws, regulations, and procedures fully, efficiently, and effectively under Company policies, The Board of Directors' Meeting No. 6/2023 has consequently established a policy to oversee the operations of subsidiaries and associated companies. The details are as follows.

1. The Company shall appoint a representative of the Company to serve as a director and/or executive in each subsidiary and/or associated company, according to the significant shareholding proportion.
2. These representatives in subsidiaries and associates shall take full responsibility on the following:
 - 2.1 Ensure that their responsible subsidiary and/or associate operates in line with the direction, strategic objectives and operating plan approved by the Company.
 - 2.2 Attend the meetings and exercise voting rights accordingly in all key meetings of subsidiaries and/or associates.
 - 2.3 Ensure that each subsidiary and/or associate has adequate efficiency and stringency of the internal control system and risk management system.
 - 2.4 Make sure that each subsidiary and/or associate executes all activities in full compliance with regulatory controls and announcements of SET and SEC on transactions, acquisition and disposal of assets, and related-party transactions, as well as disclosure of financial positions, statements, and performance, particularly on increase and decrease of capital, and liquidation of the subsidiary and/or associate.
3. Notify the Company promptly in case each subsidiary and/or associate shall disclose any financial transactions to SET in compliance with the regulatory control.
4. In case the percentage of shareholding is insignificant, the Company will arrange to have a working group to monitor the operating results of subsidiaries and associated companies and report the results at the Board of Directors' meeting every quarter.

In this regard, the Supervision of Subsidiaries and Associated Companies Policy will be effective on

August 11, 2023. The Board of Directors will oversee the implementation of this policy by the subsidiaries and associated companies to ensure compliance with good corporate governance principles and any rules or regulations set by relevant government agencies.

However, the Company may consider investment in potential, valuable and profitable business, which depends on project feasibility, investment risk analysis and possible financial analysis. The Company's investment project shall be approved from the resolution of the Board of Directors meeting or Shareholder's meeting (as the case may be). In addition, the approval shall be in accordance with the relevant laws.

6.2 Policy and Guidelines on Shareholders and Stakeholders

6.2.1 Rights of Shareholders and Equal Treatment of Shareholders

Rights of Shareholders

The rights of shareholders covers a variety of rights such as the right to purchase, sell, or transfer shares, the right to share in the Company's profits, the right to attend shareholder meetings, and the right to express an opinion and to participate in making important decisions in the Company. Such decisions include the selection of directors, approval of major transactions with a potential impact on the Company's direction, and revisions of the Company's Memorandum and Articles of Association.

It is the Company's policy to promote and facilitate the shareholders' exercise of their various rights, by such means as follows :

- Distribute information concerning shareholder meetings on the Company's website before sending out paper documents, and elaborating on the rights of shareholders in attending the meeting and voting.
- Where a shareholder cannot attend the meeting in person, he or she is given the opportunity to appoint an independent director or any individual as his or her proxy at the meeting by using any of the forms of proxy sent by the Company together with the convening notice for the meeting.
- Before a scheduled meeting date, shareholders are given the opportunity to send their opinions, recommendations, and questions by e-mail to the Investment Relations Officer or the Board Secretary.
- The Company will arrange an appropriate time-slot for shareholders to make their comments and recommendation or raise questions freely on any agenda item before a resolution is adopted on that item. Adequate information has already been provided to shareholders for these meetings and the Company will arrange to have available staff who are well informed in each area under question, under the Board's supervision, to respond to any questions or doubts raised from the floor.
- All directors will attend the meeting so that shareholders may ask for further details or information on any relevant issues.

Equal Treatment of Shareholders

It is the Company's policy to treat all shareholders equally and protect their rights in the interest of strengthening equitable treatment particularly for minority shareholders. For instance :

- Shareholders will be given equal opportunities and facilities. No action will be taken that will limit, violate or diminish their rights.
- The right to vote at meetings will be determined by the number of shares held by each shareholder at the rate of one vote for one share.
- Independent directors are assigned to take care of minority shareholders who may make recommendations, comments or complaints to them. These independent directors will give appropriate consideration to each issue. For example, in the case of complaints, they will establish the facts and decide a suitable remedy. In the case that the independent directors consider that the recommendation has significant impact on those with vested interests or on the Company's operations in general, that issue will then be submitted to the shareholder meeting for the shareholders' consideration.
- Shareholders will be encouraged to exercise their rights. For example, minority shareholders will be given

the opportunity to add agenda items before the scheduled meeting date or to nominate directors. The agenda, however, may not be expanded without prior notice to shareholders.

- The Board has taken measures against insider trading by relevant parties including directors, executives, employees, and employees of the Company involved with that information (including the spouses and non sui juris children of those individuals).

Arranging the Shareholders' Meeting

The Company arranges that the Annual General Meeting of Shareholders shall be held once a year within 4 months from the end of the fiscal year, and may call an extraordinary general meeting of shareholders on a case by case basis, if there is a special agenda that affects the shareholders. The Company will arrange the appropriate schedule and venue of the meeting to facilitate and promote the participation of all groups of shareholders.

3. Do not arrange the Shareholders meetings on public holidays and bank holidays.

4. Set the registration time for attending the meeting in advance to allow all groups of shareholders to register or send a proxy form to the Company.

5. Set the meeting format to be in line with the COVID-19 epidemic situation taking into account the health and safety of shareholders. The Company therefore arranges the meeting via electronic media (E-AGM) under the Emergency Decree on Electronic Meetings B.E. 2563.

6. There are explanations and reasons for each agenda as specified in the notice of the 2023 Annual General Meeting of Shareholders and in the attachments.

7. The Company has published a manual for electronic conferencing systems and how to verify their identity for attending the meeting to the shareholders in the meeting invitation letter, including on the Company's website in advance.

8. The Company has prepared a meeting invitation letter and supporting documents in both Thai and English for the convenience of foreign shareholders.

9. Do not add meeting agendas or change important information without notifying shareholders in advance.

10. Provide a communication channel whereby shareholders can request information at weena@asphere.co

The Date of Shareholders' Meeting

1. The meeting was chaired by the Chairman of the Board of Directors. Prior to the discussion of the agenda items, quorum is clearly advised. The Directors of Board, 5 out of 5 (100%), attended the meeting which included certified public accountant of the Company and lawyers from outside attended the meeting as witnesses.

2. Before the meeting and before the start of voting for each agenda explains how to vote and counting votes.

3. Provide opportunities for shareholders to ask questions thoroughly during the meeting before voting and summarizing the resolutions of each agenda.

4. Provide the opportunity for shareholders to vote on the election of directors individually.

After the Shareholders' Meeting

1. The Company announced the resolutions of its shareholders' meeting via the news system of the Stock Exchange of Thailand on the meeting date or within the following business day and also published on the website of the Company, stating the results of voting (approved, disapproved, or abstained) in each agenda.

2. The Company sent the minutes of the shareholders' meeting in Thai and English language to the Stock Exchange of Thailand, within 14 days from the date of shareholders' meeting and published on the Company's website. Shareholders can watch the video which was recorded on the day of the meeting via the Company's website.

3. The Company complies with the criteria under the AGM Checklist Quality Assessment Program of the Thai Investors Association, together with the SEC and Thai Listed Companies Association. This is a guideline that covers the steps. Regarding the shareholders' meeting, the Company was assessed for the quality of the Annual General Meeting of Shareholders at a "Excellent, worthy of being an example" level with a score of 100.

6.2.2 The Use of Inside Information Policy

The Company has introduced a policy and measures to prevent the use of inside information which has not yet been disclosed to the public, for personal gain and securities trading :

Any audit committee member who has a personal interest in any matter or any interest in the matter considered must notify the meeting

and abstain from making comments, voting, and leaving the meeting room. Unless for the meeting, excluding the directors with interests, there is a unanimous resolution for the interested directors to clarify the information at the meeting for prudence in decision-making but has no right to vote or make a decision on that matter. The Audit Committee has the power to invite the management or the auditor or those involved or those who appropriate to attend the meeting or requesting clarification on related matters.

8.5.2 The Audit Committee Performance

In addition to the disclosure of the Audit Committee's report, the Audit Committee has also made further steps to enhance governance in 2023 as follows :

- Consider and review the anti-corruption policy to be able to run business sustainably and manage the organization to grow steadily and be accepted in society on the basis of ethics and good corporate governance principles.

9. INTERNAL CONTROL AND CONNECTED TRANSACTIONS

The Company's Board of Directors and Audit Committee assessed the Company's internal control systems by following the internal control system adequacy assessment form. They concluded that the Company's internal control system is adequate and proper for the Company's business, free from any material defect and can prevent the Company's or the subsidiaries' properties from misuse or unauthorized use of the management. The Board of Directors and the Audit Committee also highlighted the Company's improvement in the practice of good corporate governance in accordance with the SET's 2006 good corporate governance principles for listed companies. Moving forward, the Company will have to strengthen the risk management report to Management.

9.1 Internal Control

The Company has strongly emphasized on the efficiency of its internal control systems at both the management and the operational levels with the aim to prevent or reduce possible risks. In this regard, the Company prepared a compliance manual to specify the duties, responsibilities and powers of staff and management, and to clearly separate the duties of operators, controllers and assessors from one another so as to create a proper system of checks and balances. Additionally, the Company hires Outsourcing Internal Audit to audit and assess the Company's internal control systems and to ensure that the Company's major activities and significant financial activities are performed in accordance with the stipulated rules with maximum efficiency and to check the Company's compliance with related laws and regulations (Compliance Control). To ensure that the Outsourced Internal Audit is independent and able to perform its supervisory duty, the Board of Directors requires that the Outsourced Internal Audit report the audit results directly to the Audit Committee and that the Outsourcing Internal Audit must be assessed its performance by the Audit Committee.

In the Meeting of the Company's Board of Directors No. 1/2021 held on 24 February 2021, attended by all members of the Audit Committee, the Board considered and evaluated the internal control system and approved the Company's internal control system adequacy assessment form that was prepared by Management. After assessing the Company's internal control system in 5 areas which are divided into 17 principles, namely (1) Control Environment which consists of 5 principles, (2) Risk Assessment which consists of 4 principles, (3) Control Activities which consists of 3 principles, (4) Information and Communication which consists of 3 principles, and (5) Monitoring Activities which consists of 2 principles, the Board was informed that the Audit Committee was of the same opinion as the outsourced internal auditor. Both parties have stated that the Company's internal control systems are adequate and proper for its business. So far, the Company has not found any crucial defects in the internal control systems which could materially affect the Company's financial condition or the auditor's opinion of the financial statements. The Company has also designed its internal control systems to conform with those suggested by the SET and with the international internal control framework of the Committee of Sponsoring Organizations of the Treadway Commission or COSO. Summarized details of the Company's internal control system are set out below.

1. Control Environment: The Company has set up control systems for the work of the finance and accounts, operations, organization, and personnel departments based on the good corporate governance principles and policies.

2. Risk Assessment: The Company always takes into consideration the risk factors that are now encountered or expected to be encountered for analyzing and estimating impacts and chances of those risks as well as formulating countermeasures to prevent and manage those risks. The Company then prepares risk management reports to its management and follows up regularly.

3. Control Activities: The Company provides supervisory tools to its management through its development of various systems e.g. management information systems security (ISO: 27001). This supervisory tool emphasizes information reliability, the protection of Company's properties and compliance with internal and external rules and regulations as well as information security.

4. Information and Communication: The Company emphasizes information systems and communication channels both inside and outside the Company by providing an intranet system and a website to serve all-level communication.

5. Monitoring Activities: The Company assesses staff performance twice a year. It also informs its operating results on a quarterly basis at an executive meeting and staff meeting.

9.2 Internal Audit

The Outsourced Internal Audit has been established to bolster the Audit Committee's confidence in the supervision and review of the accuracy of the financial reports, the adequacy of information disclosure, the transparency of information, internal control and risk management. It focuses on having a preventive and creative audit policy and adheres to audit guidelines of international standard and good corporate governance principles. The audit system is developed in consistence with the fast paced environment of the Company's business in order for the Company to have a transparent, auditable and reliable image.

Year 2023, the Audit Committee considers, elects and nominates KPMG Phoomchai Holdings Co., Ltd. as the outsourced internal audit for Playpark Co.,Ltd. which is a subsidiary located in Thailand responsible for the performing of the Company's internal audit in the part of General, Financial Reporting, Revenue, Information technology and Finance and Account cycles.

For the year 2024, the Audit Committee is in the process of selecting the outsourced internal audit for DZOGAME Co., Ltd. which is a subsidiary located in Vietnam. The appointment of outsourced internal audit shall be approved by the Audit Committee.

9.3 Connected Transactions

Procedure for Approval of Connected Transactions of the Company and Subsidiaries

The Company has set up a procedure in accordance with the relevant SEC notifications to control the Connected Transactions between the Company or its subsidiaries and interested persons in the present or in the future. The procedure requires the Audit Committee to comment on the necessity of the transaction and the appropriateness of the transaction price, taking into account that all the conditions must be considered in the ordinary course of business and comparing the price with that offered by third parties. However, if the Audit Committee does not have expertise in the subject matter of the transaction, the Company must provide a comment of independent expert or the Company's auditor on the transaction to support the decision of the Company's Board of Directors, Audit Committee or shareholders, as the case may be. The interested person shall have no right to vote on the transaction. Additionally, the Company shall disclose information on the Connected Transactions and the acquisition or disposal of major assets of the Company and its subsidiaries, in accordance with the rules prescribed by the SEC and SET, including the accounting standard prescribed by the Federation of Accounting Professions under the Royal Patronage of His Majesty the King.

The Company and its subsidiaries had significant business transactions with related parties. Such transactions, which are summarized below, arose in the ordinary course of business and were concluded on commercial terms and bases agreed upon between the Company, subsidiaries associated and those related parties. The Company has disclosed the Related party transactions.

PART 3

FINANCIAL STATEMENTS

ASPHERE INNOVATIONS PUBLIC COMPANY LIMITED
(FORMERLY ASIASOFT CORPORATION PUBLIC COMPANY LIMITED)
CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS
31 DECEMBER 2023

Independent Auditor's Report

To the Shareholders and the Board of Directors of Asphere Innovations Public Company Limited
(Formerly Asiasoft Corporation Public Company Limited)

Opinion

I have audited the accompanying consolidated financial statements of Asphere Innovations Public Company Limited and its subsidiaries ("the Group"), and separate financial statements of Asphere Innovations Public Company Limited ("the Company"). These comprise the consolidated and separate statements of financial position as at 31 December 2023, and the related consolidated and separate statements of comprehensive income, and the related consolidated and separate statement of changes in shareholders' equity, and cash flows for the year then ended, and notes to the consolidated and separate financial statements, including a summary of significant accounting policies.

In my opinion, the accompanying consolidated and the separate financial statements present fairly, in all material respects, the consolidated and separate financial position of the Group and of the Company as at 31 December 2023, and its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with Thai Financial Reporting Standards.

Basis for opinion

I conducted my audit in accordance with Thai Standards on Auditing. My responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated and separate financial statements section of my report. I am independent of the Group and the Company in accordance with the Code of Ethics for Professional Accountants including Independence Standards issued by the Federation of Accounting Professions (Code of Ethics for Professional Accountants) that are relevant to my audit of the consolidated and separate financial statements, and I have fulfilled my other ethical responsibilities in accordance with the Code of Ethics for Professional Accountants. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key audit matters

Key audit matters are those matters that, in my professional judgment, were of most significance in my audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of my audit of the consolidated and separate financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on these matters.

Key audit matters	How the audit addressed key audit matters
<i>Impairment of investments in subsidiaries</i> Refer to Note 4.1 Group Accounting - Investments in subsidiaries and Note 4.8 Accounting policies - Impairment of assets. The Company's financial statements as at 31 December 2023 showed allowance for impairment of Baht 65 million. Management considered allowance for impairment and reversal of impairment of the investments in subsidiaries at the end of reporting period to determine whether there was any indication that the investments may be impaired or reversed. I focused on the recoverable amount and reversal of such impairment because investments in subsidiaries are material to the financial statements and depended on the management judgments and assumptions used in the impairment assessment. The Group's management is required to exercise judgment in determining assumptions that are uncertain when considering discounted future cash flows.	Key audit procedures included: • understanding and assessing each cash generated unit; • understanding the impairment consideration process and related internal control procedures for determining and reversing of impairment of investments in subsidiaries; • evaluating the external and internal sources of information to identify impairment indicators; • examining supporting documents of impairment for management's consideration of impairment indicators for investments in subsidiaries. • evaluating the reasonableness of management's estimate, as well as key assumptions and methodology used by the management in assessing the impairment of investments in subsidiaries; • examining the parameters used to determine the discount rate applied and performing recalculations; and • considering the adequacy of disclosures made in the notes to the financial statements.

Key audit matters	How the audit addressed key audit matters
<i>Revenue recognition from publishing online game services</i> Refer to Note 4.17 Revenue recognition and Note 8 Operating segments. The Group's primary income is from the publishing online games contracts with game developers. The amount received in advance when gamers pay via top-up channels is presented as deferred revenue in the statement of financial position. When gamers purchased an item in a game, it is recognised as revenue in the consolidated statements of comprehensive income. For the year ended 31 December 2023, publishing online game service revenue of Baht 1,436 million was recognised for the Group. I considered revenue recognition from publishing online game services as a key audit matter due to the high volume of transactions, the financial magnitude of this revenue stream in the financial statements, and the complexity of information technology systems relating to publishing online game revenue in reporting information about publishing online game services.	Key audit procedures included: • understanding of and evaluating the design effectiveness of the information technology system and key controls related to revenue recognition; • testing the information technology general controls over the system relating to publishing online game revenue; • testing key internal controls over the revenue cycle for publishing online game services, on a sample basis; • testing, on a sample basis, the information technology system relating to publishing online game revenue of key online games to check the accuracy of processing and reporting information relating to cash refilled and cash used in a game; • recalculating the monthly reconciliations of cash receipts from gamers and cash used in games. For the cash receipts from gamers, I tested a sample of receipt transactions as deferred revenues. For the cash used in game, I agreed with the reports generated by the system relating to publishing online game revenue; • sending out confirmation letters to selected game developers to confirm the accuracy and completeness of the balances of cash refilled and used in a game by gamers of key online games; and • on a sample basis, tested the recording of transactions with the underlying documents related to revenue and deferred revenue.

Key audit matters	How the audit addressed key audit matters
<i>Impairment of game licenses</i> Refer to Note 4.8 Accounting policies - Impairment of assets and Note 19 Intangible assets. The value of game licenses, of which the majority relates to intangible assets, is supported by the value-in-use calculations, which are based on future cash flow forecasts (i.e. “recoverable amount”). I considered this a key audit matter because the impairment assessments of these assets are dependent on complex and subjective judgments by management.	Key audit procedures included: • testing management’s impairment review of game licenses and examining the future cash flow projections prepared by management for each game; • testing the mathematical accuracy of the cash flow projection; • examining the inputs and assumptions on revenue growth rates and discount rates used by management in the model. These inputs and assumptions were agreed on supporting documents or based on reasonable sources, such as historical information or future market plans; • comparing the current year’s actual revenue results of each game to the budget and challenging management to assess the appropriateness of assumptions used; and • evaluating cash flow projections prepared by management and considering whether the chosen scenario appropriately reflected the circumstances of each game.

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report but does not include the consolidated and separate financial statements and my auditor’s report thereon. The annual report is expected to be made available to me after the date of this auditor's report.

My opinion on the consolidated and separate financial statements does not cover the other information and I will not express any form of assurance conclusion thereon.

In connection with my audit of the consolidated and separate financial statements, my responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

When I read the annual report, if I conclude that there is a material misstatement therein, I am required to communicate the matter to the audit committee.

Responsibilities of the directors for the consolidated and separate financial statements

The directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with Thai Financial Reporting Standards, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Group and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and the Company or to cease operations, or has no realistic alternative but to do so.

The audit committee assists the directors in discharging their responsibilities for overseeing the Group and the Company's financial reporting process.

Auditor's responsibilities for the audit of the consolidated and separate financial statements

My objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance but does not a guarantee that an audit conducted in accordance with Thai Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with Thai Standards on Auditing, I exercise professional judgment and maintain professional scepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group and the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. I am responsible for the direction, supervision and performance of the group audit. I remain solely responsible for my audit opinion.

I communicate with the audit committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide the audit committee with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with the audit committee, I determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Asphere Innovations Public Company Limited
(Formerly Asiasoft Corporation Public Company Limited)
Notes to the Consolidated and Separate Financial Statements
For the year ended 31 December 2023

1. General information

Asphere Innovations Public Company Limited (Formerly Asiasoft Corporation Public Company Limited) (“the Company”) is a public company limited incorporated and resident in Thailand. The address of the Company’s registered office is 51 Major Tower Rama 9 - Ramkhamhaeng 18th floor, Room No.3-8, Rama 9 Road, Hua Mak, Bangkapi, Bangkok.

The Company’s ordinary shares are listed on the Stock Exchange of Thailand. For reporting purposes, the Company and its subsidiaries are referred to as “the Group”.

The Group is principally engaged as a provider of publishing online game services.

The consolidated and separate financial statements were authorised for issue by the Board of Directors on 29 February 2024.

2. Basis of preparation

The consolidated and separate financial statements have been prepared in accordance with Thai Generally Accepted Accounting Principles under the Accounting Act B.E. 2543, being those Thai Financial Reporting Standards issued under the Accounting Profession Act B.E. 2547, and the financial reporting requirements of the Securities and Exchange Commission under the Securities and Exchange Act.

The consolidated and separate financial statements are prepared and presented in Thai Baht, rounded in the notes to the financial statements to the nearest thousand.

The preparation of consolidated and separate financial statements in conformity with Thai Generally Accepted Accounting Principles requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated and separate financial statements are disclosed in Note 6.

An English version of the consolidated and separate financial statements have been prepared from the consolidated and separate financial statements that are in the Thai language. In the event of a conflict or a difference in interpretation between the two languages, the Thai language consolidated and separate financial statements shall prevail.

3. New financial reporting standards

3.1 Financial reporting standards that became effective in the current year

During the year, the Group has adopted the revised financial reporting standards which are effective for fiscal years beginning on or after 1 January 2023. These financial reporting standards were aimed at alignment with the corresponding International Financial Reporting Standards with most of the changes directed towards clarifying accounting treatment and providing accounting guidance for users of the standards.

The adoption of these financial reporting standards does not have any significant impact on the Group's financial statements except for the following standard, which involves changes to key principles, as summarised below.

3.2 Financial reporting standards that will become effective for fiscal years beginning on or after 1 January 2024

The Federation of Accounting Professions issued a number of revised financial reporting standards, which are effective for fiscal years beginning on or after 1 January 2024. These financial reporting standards were aimed at alignment with the corresponding International Financial Reporting Standards with most of the changes directed towards clarifying accounting treatment and providing accounting guidance for users of the standards.

The management of the Group believes that adoption of these amendments will not have any significant impact on the Group's financial statements.

4. Accounting policies

The principal accounting policies adopted in the preparation of these consolidated and separate financial statements are set out below:

4.1 Group Accounting - Investments in subsidiaries, associates, and joint venture

4.1.1 Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The Group uses the acquisition method of accounting to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair value of the assets transferred, the liabilities incurred and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement.

4. Accounting policies (Cont'd)

The principal accounting policies adopted in the preparation of these consolidated and separate financial statements are set out below:

4.1 Group Accounting - Investments in subsidiaries, associates, and joint venture (Cont'd)

4.1.1 Subsidiaries (Cont'd)

Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the Group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquirer's net assets.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date; any gains or losses arising from such re-measured are recognised in profit or loss.

Any contingent consideration to be transferred by the Group is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised in profit or loss. Contingent consideration that is classified as equity is not re-measured, and its subsequent settlement is accounted for within equity.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If the total of consideration transferred, non-controlling interest recognised and previously held interest measured is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in profit or loss.

Intercompany transactions, balances and unrealised gains or loss on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

In the separated financial statements, investments in subsidiaries are accounted for at cost less impairment. Cost is adjusted to reflect changes in consideration arising from contingent consideration amendments. Cost also includes direct attributable costs of investment.

4. Accounting policies (Cont'd)

The principal accounting policies adopted in the preparation of these consolidated and separate financial statements are set out below:

4.1 Group Accounting - Investments in subsidiaries, associates, and joint venture (Cont'd)

4.1.2 Associates

Associate are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting. Under the equity method, the investment is initially recognised at cost, and the carrying amount is increased or decreased to recognise the investor's share of the profit or loss of the investee after the date of acquisition. The group's investment in associates includes goodwill identifies on acquisition.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to profit or loss where appropriate.

The Group's share of its associate post-acquisition profits or losses is recognised in the profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equal or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognises the amount adjacent to share of profit or loss of associates in profit or loss.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group. Dilution gains and losses arising in investments in associates are recognised in the profit or loss.

In the separated financial statements, investments in associates are accounted for at cost less impairment. Cost is adjusted to reflect changes in consideration arising from contingent consideration amendments. Cost also includes direct attributable costs of investment.

4. Accounting policies (Cont'd)

The principal accounting policies adopted in the preparation of these consolidated and separate financial statements are set out below:

4.1 Group Accounting - Investments in subsidiaries, associates, and joint venture (Cont'd)

4.1.3 Joint venture

A joint venture is an entity in which 2 or more businesses enter into a contract to joint invest in business operations together in trade or profit under an agreement or a joint venture contract that clearly specifies the objectives and goals of the operation with shareholding percentage responsibilities and the rights of each party, including the allocation of benefits arising from the operation.

For investments in joint ventures, companies are presented in the consolidated financial statements and the separate financial statements using the equity method including share of profit or loss less provision for impairment (if any) and other comprehensive income of jointly controlled entities. If the joint venture's share of losses equals or exceeds the investment value, the investment value will be reduced and does not recognised further losses unless it has incurred legal obligation or a constructive obligation on the joint venture's liabilities or made payments on behalf of the joint venture. The business will recognised additional losses as liabilities.

4.1.4 Equity method

The investment is initially recognised at cost which is consideration paid and directly attributable costs.

The Group's subsequently recognises shares of its associates and joint ventures' profits or losses and other comprehensive income in the profit or loss and other comprehensive income, respectively. The subsequent cumulative movements are adjusted against the carrying amount of the investment.

When the Group's share of losses in associates and joint ventures equals or exceeds its interest in the associates and joint ventures, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associates and joint ventures.

4.1.5 Transactions with non-controlling interests

The Group treats transactions with non-controlling interests as transactions with equity owners of the Group. For purchases from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

4. Accounting policies (Cont'd)

4.1 Group Accounting - Investments in subsidiaries, associates, and joint venture (Cont'd)

4.1.6 Disposal of subsidiaries

When the Group ceases to have control, any retained interest in the entity is re-measured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities.

4.1.7 Intercompany transactions on consolidation

Intra-group transactions, balances and unrealised gains on transactions are eliminated. Unrealised gains on transactions between the Group and its associates and joint ventures are eliminated to the extent of the Group's interest in the associates and joint ventures. Unrealised losses are also eliminated in the same manner unless the transaction provides evidence of an impairment of the asset transferred.

4.2 Foreign currency translation

4.2.1 Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The financial statements are presented in Thai Baht, which is the Company's functional and presentation currency.

4.2.2 Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit or loss.

When a gain or loss on a non-monetary item is recognised in other comprehensive income, any exchange component of that gain or loss is recognised in other comprehensive income. Conversely, when a gain or loss on a non-monetary item is recognised in profit or loss in the statement of comprehensive income, any exchange component of that gain or loss is recognised in profit or loss.

4. Accounting policies (Cont'd)

4.2 Foreign currency translation (Cont'd)

4.2.3 Group companies

The operational results and financial position of all the Group entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;
- Income and expenses for each statement of comprehensive income are translated at average exchange rates; and
- All resulting exchange differences are recognised in other comprehensive income.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

4.3 Cash and cash equivalents

In the statements of cash flows, cash and cash equivalents includes cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less from the date of acquisition and are not pledged as collateral and bank overdrafts. Bank overdrafts are presented as current liabilities in the statement of financial position.

4.4 Trade accounts receivable

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business.

Trade receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, they are recognised at fair value. The Group holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost.

The impairment of trade receivables are disclosed in Note 10.

4.5 Financial asset

4.5.1 Classification

The Group classifies its debt instrument financial assets in the following measurement categories depending on i) business model for managing the asset and ii) the cash flow characteristics of the asset whether they represent solely payments of principal and interest (SPPI).

- those to be measured subsequently at fair value (either through other comprehensive income or through profit or loss); and
- those to be measured at amortised cost.

4. Accounting policies (Cont'd)

4.5 Financial asset (Cont'd)

4.5.1 Classification (Cont'd)

The Group reclassifies debt investments when and only when its business model for managing those assets changes.

For investments in equity instruments, the Group has an irrevocable election at the time of initial recognition to account for the equity investment at fair value through profit or loss (FVPL) or at fair value through other comprehensive income (FVOCI) except those that are held for trading, they are measured at FVPL.

4.5.2 Recognition and derecognition

Regular way purchases, acquires and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

4.5.3 Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at FVPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether the cash flows are solely payment of principal and interest (SPPI).

4.5.4 Debt instruments

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the financial assets. There are three measurement categories into which the Group classifies its debt instruments:

- Amortised cost: Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in other income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as a separate line item in the statement of profit or loss.
- FVOCI: Financial assets that are held for i) collection of contractual cash flows; where the assets' cash flows represent solely payments of principal and interest, and ii) for selling the financial assets are measured at FVOCI. Movements in the carrying amount are taken through other comprehensive income (OCI), except for the recognition of impairment gains or losses, interest income using the effective interest method, and foreign

4. Accounting policies (Cont'd)

4.5 Financial asset (Cont'd)

4.5.4 Debt instruments (Cont'd)

exchange gains and losses which are recognised in profit or loss. When the financial assets are derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income is included in other income. Impairment expenses are presented separately in the statement of profit or loss.

- FVPL: Financial assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within other gains/(losses) in the period in which it arises.

4.5.5 Equity instruments

The Group measures all equity investments at fair value. Where the Group has elected to present fair value gains and losses on equity instruments in other income statement (FVOCI), there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in other gains/losses in the statement of profit or loss.

Impairment losses / (and reversal of impairment losses) on equity investments are reported together with changes in fair value.

4.5.6 Impairment

The Group applies the TFRS 9 simplified approach in measuring the impairment of trade and other receivables, which applies lifetime expected credit loss, from initial recognition, for all trade and other receivables.

To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due. The contract assets relate to unbilled work in progress and have substantially the same risk characteristics as the trade receivables for the same types of contracts. The Group has therefore concluded that the expected loss rates for trade and other receivables are a reasonable approximation of the loss rates for the contract assets. The expected credit loss rates are based on payment profiles, historical credit losses as well as forward-looking information and factors that may affect the ability of the customers to settle the outstanding balances.

4. Accounting policies (Cont'd)

4.5 Financial asset (Cont'd)

4.5.6 Impairment (Cont'd)

For other financial assets carried at amortised cost and FVOCI, the Group applies TFRS 9 general approach in measuring the impairment of those financial assets. Under the general approach, the 12-month or the lifetime expected credit loss is applied depending on whether there has been a significant increase in credit risk since the initial recognition.

The significant increase in credit risk (from initial recognition) assessment is performed every end of reporting period by comparing i) expected risk of default as of the reporting date and ii) estimated risk of default on the date of initial recognition.

The Group assesses expected credit loss by taking into consideration forward-looking information and past experiences. The expected credit loss is a probability-weighted estimate of credit losses (probability-weighted present value of estimated cash shortfall). The cash shortfall is the difference between all contractual cash flows that are due to the Group and all cash flows expected to receive, discounted at the original effective interest rate.

When measuring expected credit losses, the Group reflects the following:

- probability-weighted estimated uncollectible amounts
- time value of money; and
- supportable and reasonable information as of the reporting date about past experience, current conditions and forecasts of future situations.

Impairment (and reversal of impairment) losses are recognised in profit or loss as a separate line item.

4.6 Equipment

Equipment is stated at cost less accumulated depreciation and impairment losses (if any). Historical cost includes expenditure that is directly attributable to the acquisition of items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

4. Accounting policies (Cont'd)

4.6 Equipment (Cont'd)

Depreciation of equipment is calculated to write down the cost of equipment to their residual values on the straight-line basis over estimated useful lives are as follows:

Building improvements	5 years
Server	5 years
Furniture & fixture and equipment	3 and 5 years
Vehicles	5 years

The asset's residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

The asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 4.8).

Gains or losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in profit or loss.

4.7 Intangible assets

Game licenses

Purchased of game licenses are carried at cost less accumulated amortisation. Amortisation of PC games are calculated using straight-line basis over their estimated useful life of 2 - 4 years while Mobile games are calculated using sum of year digit over their estimate useful life of 2 - 4 years.

Computer software

Acquired computer software licenses are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised using straight-line basis over their estimated useful lives of 3 and 5 years. Costs associated with developing or maintaining computer software programmes are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Group are recognised as intangible assets when the criteria are met.

Golf club membership

Golf club membership is carried at cost less impairment losses (if any). Golf club membership is not amortised as it deems to have indefinite useful life.

Customer relationship

Customer relationship acquired in a business combination are recognised at fair value at the acquisition date. Customer relationship have a finite useful life and are carried at cost less accumulated amortisation. Amortisation is calculated using straight-line basis over their estimated useful lives of 3 - 13 years.

4. Accounting policies (Cont'd)

4.7 Intangible assets (Cont'd)

Trademark

Trademark acquired in a business combination are recognised at fair value at the acquisition date. Trademark has a finite useful life and are carried at cost less accumulated amortisation and impairment losses. Amortisation is calculated using straight-line basis over its estimated useful life of 20 years.

4.8 Impairment of assets

Assets that have an indefinite useful life, for example goodwill, are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount of the assets exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest level for which there are separately identifiable cash flows. Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

4.9 Leases - where the Group is the lessee

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate
- amounts expected to be payable by the lessee under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

4. Accounting policies (Cont'd)

4.9 Leases - where the Group is the lessee (Cont'd)

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

The group is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right-of-use asset.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise.

4.10 Financial liabilities

4.10.1 Classification

Financial instruments issued by the Group are classified as either financial liabilities or equity securities by considering contractual obligations.

- Where the Group has an unconditional contractual obligation to deliver cash or another financial asset to another entity, it is considered a financial liability unless there is a predetermined or possible settlement for a fixed amount of cash in exchange of a fixed number of the Group's own equity instruments.
- Where the Group has no contractual obligation or has an unconditional right to avoid delivering cash or another financial asset in settlement of the obligation, it is considered an equity instrument.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

4.10.2 Measurement

Financial liabilities are initially recognised at fair value and are subsequently measured at amortised cost.

4. Accounting policies (Cont'd)

4.10 Financial liabilities (Cont'd)

4.10.3 Derecognition and modification

Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled, or expired.

Where the terms of a financial liability are renegotiated or modified, the Group assesses whether the renegotiation or modification results in the derecognition of that financial liability. Where the modification results in an extinguishment, the new financial liability is recognised based on fair value of its obligation. The remaining carrying amount of financial liability is derecognised. The difference as well as proceed paid is recognised as other gains / (losses) in profit or loss.

Where the modification does not result in the derecognition of the financial liability, the carrying amount of the financial liability is recalculated as the present value of the renegotiated or modified contractual cash flows discounted at its original effective interest rate. The difference is recognised in other gains / (losses) in profit or loss.

4.11 Borrowings

Borrowings are recognised initially at the fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective yield method.

4.12 Current and deferred income taxes

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case the tax is also recognised in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of reporting period in the countries where the company's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognised, using the liability method, on temporary differences arising from differences between the tax base of assets and liabilities and their carrying amounts in the financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit nor loss. Investments in subsidiaries, associates and joint arrangements where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

4. Accounting policies (Cont'd)

4.12 Current and deferred income taxes (Cont'd)

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. Deferred income tax is provided on temporary differences arising from investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

4.13 Employee benefits

4.13.1 Short-term employee benefits

Liabilities for short-term employee benefits such as [wages, salaries, paid annual leave and paid sick leave, profit-sharing and bonuses, and medical care - revise as appropriate] that are expected to be settled wholly within 12 months after the end of the period are recognised in respect of employees' service up to the end of the reporting period. They are measured at the amount expected to be paid.

4.13.2 Defined contribution plan

A defined contribution plan is a post-employment plan which the Group pays fixed contributions into a separate entity and management by fund manager. The fund has received contributions from employees and the Group.

The contributions are recognised as employee benefit expense in statements of comprehensive income when they are due.

4.13.3 Post-employment benefit obligations

The Group provides for post-employment benefits to or retirement indemnity employees under the labor laws applicable in Thailand depends on basis of salary and service year of staff until the future last working day. The Group has recorded the liabilities in respect of employee benefits which are the present value of the defined benefit obligations calculated by an independent actuary in accordance with the actuarial technique, and discounted benefit by the projected unit credit method. The present value of the defined benefit obligations are determined by discounting estimated future cash flows using yields on the government bonds which have terms to maturity approximating the terms of related liability. The estimated future cash flows shall reflect employee salaries, turnover rate, mortality, length of service and other. The Group recorded provision of employee benefit as non-current liabilities. Actuarial gains and losses arising from experience adjustments or changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise. Past-service costs are recognised immediately in profit or loss.

4. Accounting policies (Cont'd)

4.13 Employee benefits (Cont'd)

4.13.4 Termination benefits

The Group recognises termination benefits at the earlier of (a) when the Group can no longer withdraw the offer of those benefits; and (b) when the entity recognises costs for the related restructuring. Benefits due more than 12 months are discounted to their present value.

4.14 Share-based payment

The Group receives services from employees as consideration for equity instruments (options) of the Group companies. The fair value of the options is recognised as an expense over the vesting period, with a corresponding increase in equity. The fair value of the options is determined by:

- including any market performance conditions (e.g. the entity's share price);
- including the impact of any non-vesting conditions (for example, the requirement for employees to save or holdings shares for a specific period of time); and
- excluding the impact of any service and non-market performance vesting conditions (e.g. profitability, sales growth targets and remaining an employee of the entity over a specified time period).

Non-market performance and service conditions are included in assumptions about the number of options that are expected to vest.

At the end of each reporting period, the Group reviews the number of options that are expected to vest. It recognises the impact of the revision, if any, in profit or loss with a corresponding adjustment to equity.

When the options are exercised, the Company issues new shares. The proceeds received net of any directly attributable transaction costs are credited to share capital and share premium.

The option granted by the Company to the employees of the subsidiary(ies) is treated as a capital contribution.

4.15 Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation. The increase in the provision due to passage of time is recognised as interest expense.

4.16 Share capital

Ordinary shares are classified as equity. Other shares including mandatory redeemable preference shares are classified as liabilities.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax from the proceeds.

4. Accounting policies (Cont'd)

4.17 Revenue recognition

Revenue from publishing of the online game after perform follow the obligation in contracts with the game developer comprises the fair value of performance obligation in contracts with the game developer that occur from the ordinary course of the Group's activities. Revenue is shown net of value-added tax, returns, and discounts after eliminating sales within the Group. Revenue is recognised as revenue when the gamers purchased an item in game in the statement of comprehensive income. The amount paid in advance by gamers via the refill channels and did not purchased an item in game is presented as deferred revenue in the statement of financial position.

The revenue from distribution is shown net of value-added tax, returns, and discounts after eliminating sales within the Group. Revenue is recognised as revenue when the gamers paid via the refill channels.

Interest income and other income are recognised on an accrual basis, except if collectability is in doubt.

Dividend income is recognised when the right to receive payment is established.

4.18 Dividend distribution

Dividend distribution to the Company's shareholders is recognised as a liability in the Group's financial statements in the period in which the dividends are approved by the Company's shareholders and Board of Director's approval for interim dividend payment.

4.19 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as Board of Directors that makes strategic decisions.

5. Financial risk management

5.1 Financial risk factors

The principal financial risks faced by the Group are market risk (including currency risk and interest rate risk), credit risk and liquidity risk. Risk management is carried out by Group management. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

5.1.1 Market risk

Foreign exchange risk

The subsidiaries and associates of the Group operate internationally and are exposed to foreign exchange risk arising from various currency exposures, primarily with respect to USD, MYR, SGD and PHP. However, the Group believes that foreign exchange risk will have no significant effect on their operational results.

5. Financial risk management (Cont'd)

5.1 Financial risk factors (Cont'd)

5.1.1 Market risk (Cont'd)

Interest rate risk

The Group's interest rate risk arises from lease liabilities, loan from related parties, and loan from financial institution. Lease liabilities issued at variable rates and loans from director issued at fixed rate. Management considers that interest rate risk is no significant.

Price risk

The exposure to equity securities price risk arises from investments in equity securities which are classified either as at fair value through other comprehensive income (FVOCI) or at fair value through profit or loss (FVPL) (Note 15).

To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Group.

The majority of the Group's equity investments are publicly traded and are included in SET100 Index.

Post-tax profit for the year would increase or decrease as a result of gains/losses on equity securities classified as at FVPL. Other components of equity would increase or decrease as a result of gains/losses on equity securities classified as FVOCI.

5.1.2 Credit risk

Credit risk arises from cash and cash equivalents, contractual cash flows of debt instruments carried at a) amortised cost, b) at fair value through other comprehensive income (FVOCI) and c) at fair value through profit or loss (FVPL), favorable derivative financial instruments and deposits with banks and financial institutions, as well as credit exposures to customers, including outstanding receivables.

Most of the Group's revenues, being publishing of the online revenue, are normally paid by gamers in advance. Therefore, the Group has never experienced significant difficulties in debt collection. Management considers that the Group have no significant effect on credit risk.

Impairment of financial assets

The Group has financial assets that are subject to the expected credit loss model:

- Trade and other receivables
- Loans to related parties carried at amortised cost
- Financial asset measured at fair value through other comprehensive income (FVOCI)
- Financial asset measured at fair value through profit or loss (FVPL)

5. Financial risk management (Cont'd)

5.1 Financial risk factors (Cont'd)

5.1.2 Credit risk (Cont'd)

While cash and cash equivalents are also subject to the expected credit loss requirements of TFRS 9, the identified impairment loss was immaterial.

The Group applies the TFRS 9 simplified approach to measure expected credit loss which uses a lifetime expected loss allowance for all trade and other receivables. To measure the expected credit losses, trade and other receivables have been grouped based on shared credit risk characteristics and the days past due. The details of expected credit loss are in Note 10.

5.1.3 Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to manage the risk. Due to the dynamic nature of the underlying business, the Group aims at maintaining flexibility in funding by keeping committed credit lines available.

Maturity of financial liabilities

The tables below analyse the maturity of financial liabilities grouping based on their contractual maturities. The amounts disclosed are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant. For interest rate swaps, the cash flows have been estimated using forward interest rates applicable at the end of the reporting period.

6. Critical accounting estimates, assumptions, and judgements

Estimates, assumptions, and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are outlined below.

6.1 Estimated impairment of intangible assets, and prepaid royalty fees

The Group tests annually whether impairment of intangible assets and prepaid royalty fees when indicators of impairment exist, which are in accordance with the accounting policy stated in Note 4.8. The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. These calculations require the use of estimates.

6.2 Equipment and intangible assets

Management determines the estimated useful life and residual values for the equipment and intangible assets of which are mainly considered by technical ability and economic useful life. The management will revise the depreciation charge where useful life and residual values are significantly different to previously estimated, or it will write-off or technically obsolete on assets that have been abandoned.

6.3 Expected credit losses

The Group maintains an expected credit losses for doubtful accounts to reflect impairment of trade receivables and loans including interest receivables relating to estimated losses resulting from the default or inability of customers to make required payments. The expected credit losses is based on consideration of historical collection experience, known and aging of outstanding debt of each customer. The management will fully set up allowance for long outstanding amounts and without any collateral.

6.4 Employee benefit obligations

The present value of the employee benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the pensions include the discount rate. Any changes in these assumptions will have an impact on the carrying amount of employee benefit obligations.

The Group determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the Group considers that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related employee benefit liability.

Other key assumptions for employee benefit obligations are based in part on current market conditions. Additional information is disclosed in Note 25.

7. Capital risk management

The Group's objective in managing its capital is to maintain the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

8. Operating segments

Board of Directors is the Group's chief operating decision-maker. Management has determined the operating segments based on the information reviewed by Board of Directors for the purposes of allocating resources and assessing performance.

Board of Directors considers the business from both a geographic and product and service perspective. Geographically, management considers the performance in Thailand, Singapore, Malaysia, Philippines and other countries. From service perspective, management separately considers the publishing online game services and distribution activities in these geographies. The Group derives their revenue primarily from the publishing online game services.

Board of Directors assesses the performance of the operating segments based on a measure of adjusted EBIT. This measurement basis excludes discontinued operations and the effects of non-recurring expenditure from the operating segments such as restructuring costs, legal expenses, and goodwill impairments when the impairment is the result of an isolated, non-recurring event. The measure also excludes the effects of equity-settled share-based payments and unrealised gains/losses on financial instruments. Financial income and expenditure are not allocated to segments, as this type of activity is driven by the central treasury function, which manages the cash position of the Group.

Sales between segments are carried out at arm's length. The revenue from external parties reported to the Board of Directors is measured in a manner consistent with that in profit or loss.

Operating segment information is reported in a manner consistent with the internal reports that are regularly reviewed by the chief operating decision maker in order to make decision about the allocation of resource to the segment and assess its performance. The chief operating decision maker has been identified as the Board of Directors.

For management purposes, the Company and its subsidiaries are organised into business units based on its services and have 2 reportable segments as follows:

- The online game segment is a business segment which provides publishing online game services through the internet that perform based on the agreement of publisher with the game developer.
- The distribution segment is a business which provides payment channel services.

8. Operating segments (Cont'd)

The chief operating decision maker monitors the operating results of the business units separately for the purpose of making decisions about resource allocation and assessing performance. Segment performance is measured based on operating profit or loss and total assets and on a basis consistent with that used to measure operating profit or loss and total assets in the financial information.

The basis of accounting for any transactions between reportable segments is consistent with that for third party transactions .

Sensitivity analysis for each significant actuarial assumption:

	Consolidated		Separate	
	financial statements		financial statements	
	2023	2022	2023	2022
Impact on defined benefit obligations:	Thousand Baht	Thousand Baht	Thousand Baht	Thousand Baht
Discount rate				
Decrease 1%	1,594	1,594	494	494
Increase 1%	1,398	1,389	433	433
Salary increase rate				
Decrease 1%	1,358	1,358	421	421
Increase 1%	1,513	1,513	469	469
Resignation rate				
Decrease 1%	126	126	39	39
Increase 1%	102	102	32	32

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method has been applied as when calculating the liability recognised in the statement of financial position.

Expected maturity analysis of undiscounted retirement benefits:

32. Earnings per share

Basic earnings per share attributable to shareholders of the parent is calculated by dividing net earnings attributable to shareholders of the parent by the weighted average number of paid-up ordinary shares in issue during the year.

The diluted earnings per share attributable to shareholders of the parent is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares.

The Company has issued and offered warrants to directors and employees (AS-WB) of the Company and its subsidiaries. The warrants have no offered price and their terms do not exceed 3 years from the issued date (the issued date is 14 August 2020) at a maximum of 20,493,850 units. The exercise price is at Baht 0.86 per share. The exercise ratio is one warrant to one ordinary share. The warrants can be exercised on every 6 months, which will be on 16 - 20 March and 16 - 20 September throughout the term of warrants. The first exercise date will be on 16 - 20 September 2020.

The outstanding warrants as at 31 December 2023 which consist of warrant issued and offered to directors and employees of the Company and its subsidiaries (AS-WB) and warrants to the Company's existing shareholders (AS-W2) affect the diluted earnings per share since the exercise price of the outstanding warrants is lower than the average market price of the Company's shares during the period ended 31 December 2023.

The basic earnings per share are calculated as follows:

	Consolidated		Separate	
	financial statements		financial statements	
	2023	2022	2023	2022

CORPORATE GOVERNANCE POLICY

The Board is aware of its role, duties, and responsibilities towards the Company and its shareholders, and has already approved written policies pertaining to supervision and monitoring of its operations. Criteria and operating guidelines have been set, in line with Principles of Good Corporate Governance of the SET to support the Good Corporate Governance in practice. Moreover, the Company must comply with the various rules and regulations prescribed by the SEC and the SET in every respect, and review its governance policies and evaluate the result pursuant to those policies at least once a year.

On 20 June 2007, the Board of Directors Meeting No.1/2007 resolved to create policies on the supervision of its operations, which will be used as guidelines. They can be divided into 5 sections, as follows :

1. The Rights of Shareholders

The rights of shareholders covers a variety of rights such as the right to purchase, sell, or transfer shares, the right to share in the Company's profits, the right to attend shareholder meetings, and the right to express an opinion and to participate in making important decisions in the Company. Such decisions include the selection of directors, approval of major transactions with a potential impact on the Company's direction, and revisions of the Company's Memorandum and Articles of Association.

It is the Company's policy to promote and facilitate the shareholders' exercise of their various rights, by such means as follows :

- Distribute information concerning shareholder meetings on the Company's website before sending out paper documents, and elaborating on the rights of shareholders in attending the meeting and voting.
- Where a shareholder cannot attend the meeting in person, he or she is given the opportunity to appoint an independent director or any individual as his or her proxy at the meeting by using any of the forms of proxy sent by the Company together with the convening notice for the meeting.
- Before a scheduled meeting date, shareholders are given the opportunity to send their opinions, recommendations, and questions by e-mail to the Investment Relations Officer or the Board Secretary.
- The Company will arrange an appropriate time-slot for shareholders to make their comments and recommendation or raise questions freely on any agenda item before a resolution is adopted on that item. Adequate information has already been provided to shareholders for these meetings and the Company will arrange to have available staff who are well informed in each area under question, under the Board's supervision, to respond to any questions or doubts raised from the floor.
- All directors will attend the meeting so that shareholders may ask for further details or information on any relevant issues.

2. Equitable Treatment of Shareholders

It is the Company's policy to treat all shareholders equally and protect their rights in the interest of strengthening equitable treatment particularly for minority shareholders. For instance :

- Shareholders will be given equal opportunities and facilities. No action will be taken that will limit, violate or diminish their rights.
- The right to vote at meetings will be determined by the number of shares held by each shareholder at the rate of one vote for one share.
- Independent directors are assigned to take care of minority shareholders who may make recommendations, comments, or complaints to them. These independent directors will give appropriate consideration to each issue. For example, in the case of complaints, they will establish the facts and decide a suitable remedy. In the case that the independent directors consider that the recommendation has a significant

impact on those with vested interests or on the Company's operations in general, that issue will then be submitted to the shareholder meeting for the shareholders' consideration.

- Shareholders will be encouraged to exercise their rights. For example, minority shareholders will be given the opportunity to add agenda items before the scheduled meeting date or to nominate directors. The agenda, however, may not be expanded without prior notice to shareholders.
- The Board has taken measures against insider trading by relevant parties including directors, executives, employees, and employees of the Company involved with that information (including the spouses and non sui juris children of those individuals).

3. Role towards Stakeholders

The Company takes seriously the rights of all stakeholders such as customers, suppliers, employees, or shareholders as well as the public and society overall. They will be treated by the Board in accordance with their rights, conditions, legal requirements, and various related rules and regulations. Action will also be taken for co-operation between these various stakeholders according to their roles and duties to ensure smooth operations with stability and equitable returns for all parties.

To ensure that stakeholders receive their due, the Company has established an operating guideline in its Code of Conduct for Employees. The Code of Conduct has been distributed on the Company's website and internal communications media such as the Intranet and the PR Board. The directors, executives and employees at every level must adhere closely to the Code of Conduct in their work. In addition, channels have been opened for stakeholders to communicate with, and comment or provide information to the Board through independent directors.

- Shareholders : In its determination to achieve good performance, stable growth, and competitiveness for the Company in the face of current and future risks, and to create added value for its shareholders in the long-term, it is the Company's duty to disclose information for the sake of equity and transparency such that it will endeavor to protect the Company's property and to preserve its good reputation to the best of its ability.
- The Company's Board of Directors : The Board is aware of the rights of all stakeholders and the action to be taken to treat all fairly and equitably.
- Employees : Employees are a valuable asset of the Company. Therefore the Company recruits people with the relevant skills and experience to ensure the Company's growth and satisfy its requirements. Human resource development is ongoing to ensure that staff competencies are maintained at a high level and that staff are appropriately and competitively compensated vis-a-vis leading companies. Moreover, the Company is focused on building up and reinforcing a good working culture and environment and treating its employees fairly on an equal basis. The Company looks after employees' security and welfare through its Provident Funds and its provision of loans to employees, arrangements for fire-drills, provision of safety/security systems, etc.
- Customers : The Company focuses on customer satisfaction with its workforce of quality staff and excellent service together with its readiness to meet their demands. Customers are treated respectfully and responsibly and care is taken to keep information from them confidential. Customer feedback is encouraged with staff specifically assigned to receive complaints.
- Suppliers : The Company takes care to treat its suppliers in line with commercial terms and contractual obligations. Action is taken within a framework of fair competition avoiding cheating behavior.
- Competitors : The Company functions within a framework of fair competition and has always avoided dishonest measures that try to eliminate competitors.
- Communities, Society, and the Environment : The Company fully cognizant of its role as a part of society with a commitment for its well-being, public activities are supported in the interest of developing communities and the Environment. Our online game services are provided with a serious commitment to Society as it

is the Company's policy to provide games with suitable content without violence and with appropriate warnings in its games and advertisements. Seminars are arranged to encourage players to spend their time appropriately and to play their games properly. The Company is the first online games operator in Thailand to provide an age-classification for each game in accordance with the State's age-classification policy. It also makes a Game Master available for each game in order to check and monitor gamers' various activities in the games and to ensure that no violence, gambling or other inappropriate activity is involved. Moreover, its online games services help to build gamers' computer skills and expand the internet usage and internet network infrastructure, enabling the public to easily access data and various information. In addition, online games developed by the Company have contributed to the development of Thailand's R&D in software and animation.

4. Disclosure and Transparency

Besides making complete and timely financial disclosure or disclosure of other information to the public via various channels in strict compliance with the law, the Company shall also make the following disclosures to show the transparency of its operations :

- Disclosure of information concerning performance by various sub-committees such as the frequency of their meetings.
- Disclosure of guidelines in recruiting directors, relevant evaluation guidelines and evaluation of the Board's performance.
- Disclosure of remuneration policies for directors and high-level executives as well as the form, manner, and amount of remuneration received by each member of the various sub-committees.
- Disclosure of policies created for protection of the environment and in support of society, and the results of their implementation.
- Report on policies of corporate governance and their implementation.
- Opportunity for the public to raise any concern/query via the Investment Relations Officer.

5. Responsibilities of the Board, its Structure and Various Sub-committees

The Board's Structure

The vision outlined by the Company is that : "We are determined to maintain our leadership in Online Entertainment Services involving online games in the Southeast Asian region, with a focus on providing efficient services, developing our personnel to support the services and expanding investment to other high potential countries in the region, under a transparent and accountable management pursuant to the principles of Good Corporate Governance". To realize this vision, the Board strives to maintain the highest ethical standards within the framework of the law, the Company's objectives, and its Charter as well as resolutions adopted at shareholder meetings with commitment, honesty, integrity, and prudence in line with good operating practice so as to deliver highest economic value to the Company and maximum stability to shareholders.

The Company's Board of Directors comprises people who have knowledge, skills, and experience drawn from a variety of professions in the areas of PC games, online business, finance, marketing, law, management, IT, and other fields beneficial to the Company's work. The Board is free to decide in the best interests of the Company and its shareholders overall. This Board has played a part in determining (or approving) the Company's Vision, Mission, Strategies, Targets, Business Plans, and Budgets as well as supervising the performance of its management to ensure effective implementation of the Business Plans and Budgets for the greatest economic benefit for the Company and maximum stability for the shareholders. Action has also been taken to ensure that there is a process for regular evaluation of the adequacy of internal control, internal audit, risk management, financial reporting, and follow-up of performance.

Currently, the Company's Board of Directors comprises 6 members, 1 of whom is executive and 5 are non-executive. Three members of the Board are independent directors which, therefore, exceeds one-third of the

Board thereby giving an appropriate balance vis-a-vis executive directors. The Board has set up 2 sub-committees to help supervise operations of the Company, i.e. the Executive Committee and the Audit Committee which consists of 3 independent directors with a term of office of up to 3 years. The duties and responsibilities of those Committees have been expressly defined at previous shareholder meetings.

The Company has clearly separated the duties and responsibilities of its Board and senior executives. While the Board's duty is to establish policies and supervise the performance of high-level executives pursuant to those policies, it is the duty of high-level executives to administer the Company's affairs in various areas to ensure that these policies are implemented appropriately. The Chairman of the Board and the Chief Executive Officer must be two different individuals to ensure that there is a clear separation between the determining of supervisory policies and the administration of regular affairs. However, both of them will be representatives of majority shareholder groups, albeit different groups, which together constitute the Company's founders.

Remuneration for Directors and Executives

The Company has a policy of determining remuneration for its directors, both in monetary and non-monetary terms, openly and transparently. The remuneration shall be submitted for approval to the annual general meeting of shareholders. Criteria governing remuneration of directors are as follows :

- Appropriate and commensurate with the duties and responsibilities of each director.
- At a level capable of attracting and retaining quality directors with suitable ability and knowledge.
- Clear, transparent and easily comprehensible.
- Comparable to the remuneration of directors in the same or similar industry(ies).

The remuneration for executives will be determined by the Board, both in monetary and non-monetary terms, in line with the Company's performance and each executive's performance. They will be set at such rates as are adequately attractive to retain quality senior executives and shall be comparable to rates of other companies in the same grade or operating in the same line of business.

Board Meetings

Board meetings will be convened and conducted pursuant to the Company's Charter, the laws governing public companies, and the rules and regulations of the SET with special meetings to be convened, where necessary. The Chairman of the Board, as chairman of the meeting, will support the exercise of prudent discretion and will allow enough time for the meeting to ensure that major problems may be submitted and discussed by management with due diligence. An invitation to the meeting, together with the agenda items and supporting documents, will be sent to the Board at least 3 days before the meeting. All directors will be required to attend every Board meeting except in the case of an emergency. Minutes of the meeting will be properly and correctly recorded by the Company and will be accessible by shareholders for verification.

Report from the Board of Directors

The Board will be responsible for preparing the Company's financial statements including the Consolidated Financial Statements for the Company and its subsidiaries and the Financial Information to be presented in the Annual Report. Those financial statements will be prepared pursuant to the accounting standard generally accepted in Thailand based on appropriate, acceptable and consistent accounting policies. Discretion and care will be exercised to ensure that the Notes to the Financial Statements disclose adequate vital information.

Self-evaluation by the Board/Committee Members

To enhance the efficiency of performance by its various Committees, arrangements are made by the Company to have members of each Committee evaluate their own overall performance so that they can together appraise and look at their performance and problems. Following this evaluation, the Board will analyze their performance and determine measures which will improve the Committees' efficacy.

Development of Directors and Executives

The Company will support the attendance of its Board and senior executives at training courses which will be beneficial to their performance and will enable them to exchange opinions, on a regular basis, with Board members and senior executives of other organizations. Such courses include those arranged by the Company's employee training unit, units under the State's jurisdiction, and independent entities such as Thai Institution of Directors. It is an SEC requirement that directors of listed companies attend at least one of these courses, e.g. Director Certification Program (DCP), Director Accreditation Program (DAP) and Audit Committee Program (ACP) so that knowledge and experience gained can be used for the Company's further development.

Investor Relations

The Board takes care that adequate information is disclosed to its shareholders, investors, and other relevant parties. That disclosure must be correct, complete, transparent, comprehensive, and on-time pursuant to Good Corporate Governance principles. It must include financial reports, operating results, and other related information as well as information which may have an impact on the pricing of its securities. Information and various newsletters will be distributed, through channels set up by the SET and the SEC including the Company's own website (www.asphere.co), and will help ensure that investors, shareholders, and related parties can use the information in their investment decisions. The Company plans to set up an Investor Relations Unit to monitor and provide information and newsletters, and to answer queries raised by shareholders, investors, analysts, and the public in general.

Recruitment of Directors and Top Executives

Currently, the Company has no Nominating Committee for selecting directors. This matter is therefore left to the Board, which will select individuals and propose them to the shareholders based on a variety of factors such as their educational background, competencies, and business experience. They must also be qualified under the Public Limited Companies Act, B.E. 2535, Notification of the SEC and other relevant laws. Director selection will be made by majority vote at shareholder meetings in accordance with the following criteria and procedure :

1. A shareholder will be entitled to one vote for each share.
2. The vote to select directors will be done on an individual basis.
3. The person with the most votes will be selected as a director. If there is more than one vacancy, the persons with the most votes in descending order will be selected as directors. Where there is a tie, the Chair of the shareholder meeting has a casting vote.

Directors will be in office for a term of 3 years. At each Annual General Shareholders Meeting, one-third of the Board will retire with those who have been longest in office retiring first. A retiring director may be reappointed for another term.

For selection of Top Executives, the Board will consider and nominate the Top Executives by considering a variety of factors such as their educational background, competencies, business experience, and their work responsibilities.

Subsidiaries and Affiliates Governance

The Company has sent the representatives to be director in subsidiaries and affiliates according to the proportion of shareholding of the Company. Such representatives have the right to control the material transaction that is any material agreement or contract of subsidiaries or affiliates shall be signed by the director who is the representative of the Company. The representative of the Company who is nominated to be directors of subsidiaries or affiliates has the duty to do for the best benefit of such subsidiaries or affiliates.

In addition, in case of the subsidiaries, the representatives of the Company who is nominated to be director of subsidiaries shall manage subsidiaries to keep the information and accounting records in order for the Company to verify and collect such information to prepare the consolidated financial statements in time.

The Board of Directors' Meeting No. 6/2023 has consequently established a policy to oversee the operations of subsidiaries and associated companies. The details appear in Chapter 6, Corporate Governance Policy, Section 6.1.12 policy to oversee the operations of subsidiaries and associates.

Monitoring the Use of Inside Information

The Company has introduced a policy and measures to prevent the use of inside information which has not yet been disclosed to the public, for personal gain and securities trading :

1. Directors, executives, employees, and workers within the Company must keep Company information and other inside information confidential.

2. Directors, executives, employees, and employees within the Company may not disclose any confidential information or other inside information about the Company, or use it for their own gains or those of others, whether directly or indirectly, and whether or not it is for compensation.

3. Directors, executives, employees, and workers within the Company may not buy or sell, transfer or accept the transfer of the Company's securities through the use of confidential or inside information about the Company, or take any other action using that confidential or inside information which would cause the Company to suffer a loss, whether directly or indirectly.

Directors, executives, employees, and workers of the Company who work in a unit which has acquired inside information should avoid buying or selling the Company's securities for 1 month before disclosure of its financial statements to the public. This provision includes the spouses and non sui juris children of directors, employees and workers of the Company. It is a serious offense to breach this provision.

4. Directors and executives are required to report to the SEC any change in their holding of securities or that of their spouses and non sui juris children.

The Company will take disciplinary action against any of its directors, executives, employees, and workers who breaches or fails to comply with the Company policy. The disciplinary action begins with a written notice and is followed by salary cut(s), unpaid temporary suspension from work, and dismissal from employment, depending on the severity of the offense and the provisions in the Company's Charter informing all directors, executives, employees, and workers of the disciplinary action.

Moreover, each director and executive has acknowledged in writing his or her duty to report his or her holding of the Company's securities and those held by his or her spouses and non sui juris children and to report any change in such holdings to the SEC and the SET pursuant to section 59 and the penalty prescribed by section 275 of the Securities and Exchange Act, B.E. 2535.

On the subject of providing supporting data to its affiliates, the Company has prescribed procedures to prevent information leaking, such as requesting a signed Confidentiality Agreement and a ban against photocopying of documents without authorization.

Anti-Corruption

The Company realized the importance of doing business under governance by adhering to business activities with honesty, integrity, transparency, fairness, responsibility, and being cautious under the laws, regulations, rules, and relevant standards of Thailand. The Company has initiated operations and continued development as follows :

In 2021, to show the spirit and determination against corruption in all forms, the Company, therefore, signed a declaration of intent joining "Thai Private Sector Coalition Against Corruption" and by conducting business with transparency and strictly adhere to the policy guidelines. On 30 December 2021, Thai Private Sector Collective Action Coalition (CAC) issued an official announcement that Asiasoft Corporation Public Company Limited has been certified as a member with effect from 30 September 2021.

To review and examine guidelines and practices regarding anti-corruption. In the Board of Directors' meeting No. 8/2023, the anti-corruption policy was reviewed, which is considered appropriate and in line with changes in related laws and regulations. The new mobile game Action RPG "Black Moon" officially launched its Closed Beta Test on 12 - 16 October 2023, in Southeast Asia. The CBT campaign was promoted through KOLs and local media across more than 40 channels to recruit users.

PlayPark Thailand participated in the biggest gaming event of the year, the "Thailand Game Show 2023," held from 20-22 October 2023, at the Queen Sirikit National Convention Center, Exhibition Hall 3 - 4. The event attracted gamers, casters, influencers, cosplayers, artists, and idols who joined for 3 days, with more than 181,350 attendees. This year, PlayPark joined the event with the concept of FUNNIVERSE, which consisted of 4 FUNs: FUN with Games (featuring Immortal Kingdoms, Samkok Tactic, and Black Moon), FUN with KOLs (Key Opinion Leaders), FUN with Friends (featuring Audition

and Yulgang), and FUN with Missions. In addition to the enjoyment, participants also had the opportunity to take home various rewards.

In November 2023, Audition collaborated with the renowned Thailand Art Toy designer behind the brand "Poriin," well-known in Thailand, Taiwan, and China. This collaboration aimed to increase awareness and revenue through a premium gacha, offering limited new designs from the acclaimed art toy designer, which led to elevated sales.

To boost brand awareness and attract new players, Samkok Tactics organized a livestream awareness campaign featuring "Kit," the popular singer from the band Three Man Down (with 401K followers). During the stream, Kit reviewed an exclusive box set from the Samkok Tactics game. The campaign was further

amplified through partnerships with 8 top gaming media channels, which promoted the event and encouraged viewers to participate in a like & share activity for a chance to win gadget prizes.

Immortal Kingdoms updated with a new character, "REAPER," allowing players to choose their own gender. Alongside this update, there were plenty of events offering free items.

PlayPark organized the 12.12 promotion, offering great deals to wrap up the year. Players found special-priced items from games like Audition, Yulgang, Samkok Tactics, Immortal Kingdoms, Real Yulgang Mobile, TS Online Mobile, and StreetBallers.

Real Yulgang Mobile opened a new server, S22-พรหมลิขิต (Destiny), along with a special event to celebrate the server's opening. Players had the opportunity to create characters to receive S-grade costumes and participate in special activities to win permanent weapon skins, along with many other exciting events.

MapleStorySEA worked with Hakken! and BUGCAT CAPOO as part of their recent round of brand collaborations. Leading anime novelty store Hakken! and MapleStorySEA dressed up physical stores with cherry blossom motifs just in time for the season, and launched a social media campaign that encouraged customers to post photos of the decor using the hashtag #MapleSEAxHakken to get a chance to win lucky draws. The BUGCAT CAPOO collaboration was done in-game, with the cute DOGDOG joining the Maple World. New and returning MapleStorySEA players were able to get rewards, special items, and extra buffs during the event period as well as limited outfits and weapons in the cash shop.

The MapleStorySEA SAVIOR patch arrived on 31 May 2023, bringing a plethora of exciting new features. Highlights included the introduction of the new class Khali, along with the Midnight Chaser content, Wonstaurant event, and more! The patch also included various improvements to the overall growth experience, the Star Force system, and several skill changes. To enhance the leveling process, MapleStorySEA introduced the Hyper Burning event, allowing players to accelerate their character's progression up to Level 250. Additionally, players could obtain level achievement rewards during this event, adding an extra layer of excitement and gratification. With the SAVIOR patch, MapleStorySEA continued to evolve, providing its players with a fresh and engaging gaming experience.

MapleStorySEA recently hosted 2 consecutive events. The first took place from 3 - 6 August 2023, at Marina Square, Singapore, followed by another event from 24 - 27 August 2023, at Sunway Pyramid in Kuala Lumpur, Malaysia. These events marked the joyous celebration of the game's 18 years of service in both countries.

A highlight of the Singapore event was the special guest appearance by Director Kang Won-ki, who has been at the helm of Nexon's 'MapleStory' for the past 8 years. The fan meeting session with Director Kang left players elated and thrilled to meet the creative mind behind the game they cherish.

This year's anniversary theme, "Miracle Moments," symbolized MapleStorySEA's transition to adulthood as it turned 18. The events and activities were designed to evoke cherished childhood memories. The event grounds were abuzz with a variety of entertaining activities, including carnival games such as Giant Jenga, Cornhole, and Gachapon. Additionally, players had the opportunity to participate in stage games, where they could compete for exclusive MapleStorySEA merchandise. The grand birthday celebration and thrilling lucky draws were among the event's highlights. Eighteen lucky winners from each country walked away with exciting prizes, including rare in-game items, merchandise, and gaming peripherals, making this anniversary celebration truly remarkable.

As we tread into the festive season once again, let's kick 12/12 off with MapleStorySEA's annual tradition: The 12.12 KNOCKOUT sales!. Knock yourselves out with these special rates as you grab a gift for yourself or your

special loved ones and give yourselves a pat in the back getting through year 2023!

The new Mohun server, named 'Huang He', was successfully launched on 8 March 2023 amidst much fanfare. We have also hosted some events for returning players so as to entice them to join the game again.

In MAT2's inaugural participation in the Cambodia SEA Games 2023, our Malaysian MAT2 SEA Games athletes demonstrated their exceptional skills and brought home the prestigious silver medal, making a significant contribution to Malaysia's overall medal sweep! These outstanding athletes were hailed as the heroes of our nation and were honored with a grand welcoming ceremony. The ceremony was graced by the presence of esteemed dignitaries, including the Majlis Sukan Negara, prominent media outlets, the Minister of Youth & Sports of Malaysia, Ms. Hannah Yeoh, and our esteemed Prime Minister, YAB Dato' Anwar Ibrahim.

This remarkable gathering provided a remarkable platform for the MAT2 athletes to showcase the incredible potential of the MAT2 community and promote the rich esports culture in Malaysia.

The remarkable achievement serves as a tremendous boost for MAT2, opening up new horizons and opportunities for our current and aspiring esports players. As we continue to host the annual MAT2 International Championship (MATIC) tournament, the inclusion of SEA Games in the MAT2 calendar and mission adds an additional layer of significance and prestige. This integration showcases the growing influence and recognition of MAT2 within the esports arena, fostering a sense of unity and purpose among the MAT2 community.

The impact of being a SEA game competition title can be keenly felt as we have seen a large influx of players both old and new returning to the game, directly contributing to a 2x growth to our all round statistics. We will continue to use this as a platform to achieve even better results in the future.

The Streetballers patch for 30 August 2023, arrived with the release of a new character, Rose. The new Point Guard was not only talented on the court but also the most fashionable off the court! Rose brought a fresh and unique fashion touch to StreetBallers. With a stunning appearance and stylish costume choices, Rose not only destroyed opponents' defenses but also became the center of attention in every match. In conjunction with Malaysia's National Day, players could

log in and claim freebies as well as complete time-limited tasks for additional rewards.
