R

eport of the Board of Directors

Dear Shareholders

2022 was a year in which many industries were volatile due to the Covid-19 epidemic prevention measures. In addition, there was a conflict between Russia and Ukraine started in February and continued throughout the year, creating uncertainty for businesses. This made administration, planning, operations, storage, and distribution quite difficult amid uncertain economic conditions, trade, and investments.

According to the information provided above, the world's steel industry has experienced a total production decrease 4.3% compared to the previous year. Especially noticeable in China, which declined by 9.8% as a result of the Zero Covid measure, causing China's steel consumption to shrink significantly. The average price of almost all types of global steel has declined in 2022. The Iron and Steel Institute of Thailand reported Thailand's total steel consumption has declined by 12.2%.

Despite the uncertainty in the industry, the company still uses management policies to minimize the impact on its operations. By adjusting the production in accordance with demand, as well as diversifying business risks according to the established plan, such as increase new products and customer groups. These actions have begun to show result in the fourth quarter of 2022.

In addition, the company has a continuous proactive improvement and development plan, including the development of personnel at various levels to be an important force in driving the organization in the long run. This includes the use of information technology to enhance efficiency in operations, diversification, especially in the distribution of products. Thanks to the implementation of these policies, the company received the SET Awards 2022 in the Business Excellence category, and the Best Company Performance Awards organized by the Stock Exchange of Thailand, along with the Banking and Money Journal at the end of last year.

The new project, galvanized steel coil, factory is expected to begin production by the end of the year 2023, which is slightly later than the plan because the company respect the hearing participation of communities surrounding the project to avoid impacts on the environment and living conditions. Therefore, the project must be carefully analyzed and evaluated in various aspects, at the very least, it must meet the requirements and guidelines for preparing an Environmental Impact Assessment (EIA) report. Once the project is completed, it will become a major turning point for the company.

On this occasion, on behalf of the management team and Board of Directors, we thank to shareholders, customers, business partners, domestic and international financial institutions, government agencies, the private sector, and all relevant sectors who have always supported the company's operations. We are confident that the company will continue to strive to operate the business in order to have sustainable growth.

Yours sincerely

(Mr. Chusak Yongwongphaiboon)

Managing director

Part 1

Business Operations and Performance

Business structure of the group of companies

Company name	Type of Business	Production Capacity
Asia Metal Public Company Limited	1. Manufacturer of structural steel, mainly pipe types and C-sections. - Steel pipe with O.D. 0.5 inch (12 mm.) to 7 inches (175 mm.) - C-shaped steel structure 2. Procurement of raw materials and structural steel. (Trader) 3. Steel product fabricator - Steel sheet (Sheet) - Slitting Coil	264,000 tons per year 48,000 tons per year 44,000 tons per year 244,000 tons per year
STC Steel Company Limited	Manufacture both round and square steel pipes with a diameter of 1 inch (25 mm.) to 4 inches (100 mm.). At present, STC Steel Co., Ltd. allows Asia Metal Public Company Limited to rent factories and machinery.	-
Grand Asia Steel Co., Ltd. Processing Center Co., Ltd.	Steel service center (Coil Center), sheet cutting and slitting according to the size specified by the customer. Our services include the sale of coiled steel in both hot-rolled (HR) and cold-rolled (CR) varieties, as well as galvanized steel (GI), which is used in the furniture, electrical appliances, and automotive industries	50,000 tons per year
Prime Steel Mill Company Limited	Production of hot rolled steel coils Narrow Face Type (Hot Rolled Narrow Strip In Coil)	600,000 tons per year

Vision

“ To be a service center and manufacturer of quality steel pipes. create satisfaction for customers in all aspects ”

Mission

- Continuously improve and develop the quality of products and service. by improving production efficiency Inspection of raw materials and products and management support using modern information systems and technologies Including the use of available resources for maximum benefit.
- Manage by adhering to the management principles of good governance or good corporate governance. For transparency, equality and fairness to all stakeholders related to the company.
- Manage and maintain good relation with customers in order to formulate policies to achieve maximum customer satisfaction.
- Encourage employees to participate in development, improvement, and efficiency enhancement. to be part of driving force.
- Support or participate in social activities for the benefit of the environment and social anti corruption policy.

Objective

- Increase the number of new customers by 5% by 2024.
- Customer satisfaction not less than 80% by 2023.

Business goals

Vision that we strive to develop a strategy continuously from the concept of a steel service center. With the development of production technology that increases efficiency and controls product standards elevate the competition Caring for the environment and community Personnel training and development Continually develop the organization Conducting business with honesty and transparency and the development of information systems to support management with modern communication networks as well as building good relationships with customers It is an important part in driving business for sustainability.

The company aims to be a quality steel pipe manufacturer. Because the company foresees the importance of the steel pipe industry. which is growing at a very high rate now and in the future from the growth of the construction material industry furniture industry and electrical industry.

From the change in the behavior of consumers who turn to use more coated steel products. The company therefore sees investment opportunities in the galvanized steel coil project, which is expected to start production for sale by the end of 2023, resulting in a variety of products, increasing distribution channels, including expanding the group. It is to diversify the risk of relying on customers to not be too concentrated in specific groups and also to extend the hot-rolled steel products produced by associated companies to create more value-added.

In addition, the company is still committed to complying with the quality development policy to increase credibility in the company's products and services by implementing quality management systems such as ISO 9001:2015 and industrial product standards such as TIS. 107, TIS 1228 and TIS 1479 etc.

Major Changes and Developments

1993	On March 9, 1993, the company was established under the name of Asia Metal Company Limited, registered and paid-up capital of 30 million by group of Mr. Chusak Yongvonghpaiboon, operates a trading business dealing with steel.
2004	On March 9, 2004, the company was transformed into a public limited company. and increase the registered capital from 150 million baht to 200 million baht and change the par value (PAR) from 100 baht per share to 1 baht per share by stipulating that the newly issued shares are offered to the public in the amount of 50 million Stock Operates a full service steel service center business.
2005	The company had increased the registered capital from 200 million baht to 400 million baht to offer to the existing shareholders at a price of 1 baht .
2007	The company has increased its registered capital from 400 million baht to 550 million baht for sale to the general public and existing shareholders. and to support the conversion of warrants (Registered capital 549.97 million baht, paid-up capital 479.94 million baht.
2008	The company expanded its customers and steel products, such as the automotive industry and the electrical appliance group.
2010	The company had further improved the production standards. It is a steel service center that can support the production of steel in the automotive industry. and the electrical appliance industry group and the company received the BEST VENDOR AWARD from Thai Samsung Electronics Co., Ltd.
2011	The company had expanded its factory in Chonburi (Phanat Nikhom) to be a steel service center that can support the production of steel in the automotive industry and electrical appliances industry which is a strategic point for transportation on an area of 100 rai 85 square wa with an investment of more than 83 million baht.
2012	ISO/TS 16949 management system certification to support automotive industry customers.
2014	The company invested in Delong (Thailand) Co., Ltd. registered capital of 1,000 million baht, investment proportion of 15%..
2015	The Company purchased ordinary shares of Delong (Thailand) Co., Ltd. in the amount of 50,000 shares at 100 baht each, representing 5% of the paid-up capital. The purchase of additional shares gives the company a 20% stake in Delong (Thailand) Co., Ltd.
2016	The company invested in a joint venture company, Prime Steel Mill Co., Ltd. (formerly Delong (Thailand) Co., Ltd.), registered capital of 1,000 million baht, with a proportion of 20 %, worth 200 million baht .
2017	The Company has operated a 50 percent shareholding of a subsidiary, Grand Asia Steel Processing Center Company Limited (formerly Asia Metal Fabrication Company Limited)
2017	The company has invested more in Joint Venture Company Prime Steel Mill Company Limited Investment Proportion valued at 70 million baht, with a total shareholding proportion of 30 %, valued at 270 million baht, and invested in building a warehouse Usable area of approximately 8,000 square meters on an area of 12 rai 68 square wa will allow the Company to increase the storage area of approximately 8,000 tons of products to support the expansion according to the needs of customers .
2018	The company has made additional orders for new machines. To replace the old machines and increase production efficiency and the construction of a warehouse building was completed in 2018
2019	The company approved the write-off of investment account in Vientiane Cross-Border Trade Co., Ltd., whereby the company set up an allowance for bad debt from investment in the amount of 6,686,322.89 baht, representing 100 percent of the total investment previously and the company was able to Invested in a joint venture company with Prime Steel Mill Co., Ltd., an increase of 5 %, the total investment amount was 48 million baht, the total stake was 35 %, totaling a total value of 318 million baht. The new machine has been set up automatically. This makes the company's production efficiency faster and better quality.

2020	<p>The Company invested in the installation of a solar power generation system with an investment amount of 28.95 million baht at the factory at Phanat Nikhom branch to improve production efficiency for renewable energy use. The investment was promoted and the installation was completed in November 2020 , and the company contracted to design, develop information systems and install SAP programs with ISA Consulting (Thailand) Co., Ltd., totaling 20.1 million . baht, starting in January 2021</p>
2021	<p>The company has approved the investment in the construction of a galvanized steel coil (GI) factory. worth about 500 million baht, which is expected to be completed around 2023</p> <p>The Company additionally invested in an associated company, Prime Steel Mill Co., Ltd., in the amount of 500,000 shares with a par value of 100 baht, representing 5 percent of the registered capital. From Khun Veerachai Suteerachai (a connected person who is the Chairman of the Board of Asia Metal Public Company Limited and a director of the Company Prime Steel Mill Co., Ltd. The Company will enter into such transaction at a price of 35 million baht.</p> <p>The Company additionally invested in a subsidiary, Grand Asia Steel Processing Center Co., Ltd., in the amount of 99,998 shares at a par value of 100 baht, representing 50 percent of the registered capital. From Khun Veerachai Suteerachai (a connected person who is the Chairman of Asia Metal Public Company Limited and a director of Grand Asia Steel Processing Center Company Limited and from Mr. Somsak Wong Sirisap (Not a connected person of Asia Metal Public Company Limited) where the Company will enter into the transaction at a price of 3.5 million baht</p>
2022	<p>The company asks for approval of the construction project budget. Factory producing galvanized steel coil (GI) From the original value of about 500 million baht to 750 million baht, which is expected to be completed around the end of 2023.</p> <p>On October 28, 2022, the Stock Exchange of Thailand in conjunction with Money and Banking Magazine organized the "SET Award 2022" event , where the company received the Outstanding Company Performance Award Business Excellence and Business Excellence Best Company Performance Awards to honor listed companies with Excellence and outstanding performance from the year 2021</p>

G^eneral information of the company

Company name	: Asia Metal Public Company Limited
Stock symbol	: AMC
Company registration number	: 0107547000176
Company establishment date	: March 9 , 1993
Date of registration as a public limited company	: March 9 , 2004
Trading commencement date on the Stock Exchange of Thailand	: August 13 , 2004
Business type	: Is a steel service center, including the sale of coiled steel (Coiled), both hot-rolled (Hot-Rolled) and cold-rolled (Cold-Rolled), galvanized steel (GI) , including cutting and selling steel sheets (Sheet) and steel coils Slit (Slitting Coil) according to the size of the customer. is a manufacturer and distributor of structural steel, including steel pipes and C-shaped steel structures used in various industries
Registered capital	: 549.97 million baht
Paid-up registered capital	: 480.10 million baht
Par value	: 1 baht

Product information

The Company classifies products and services of the Company and its subsidiaries. Details are as follows:

1. Procurement of steel products

The company provides steel product procurement services in the form of steel service centers, including hot rolled steel coils, etched and oiled hot-rolled steel coils, cold-rolled steel coils, silicon steel sheets, and various types of coated steel sheets, such as galvanized steel sheet (GI), galvanealed steel sheet (GA), and zinc-aluminum coated steel sheet (AZ). These products are sold to steel wholesalers and customers who operate steel factories, and who use them to produce various steel pieces. Additionally, the company offers steel cutting services according to the various sizes requested by their customers.

2. Steel product processing

2.1 Steel pipe products

The company and its subsidiaries produce and sell steel pipes for use in various industries. At present, the company and its subsidiaries have machines for steel pipe production that can produce steel pipes from 12 mm. to 175 mm. According to the specified width, forming and welding steel sheets with high frequency waves, which is a modern and efficient machine in production. Make the steel pipes of the company have quality and are accepted by customers. The company has a production capacity of 264,000 tons per year, which in 2022 the company can use the production capacity of steel pipes at 110,300 tons per year, equal to 42% of the production capacity. The steel pipes produced by the Company and its subsidiaries are round and round. square and rectangle which the company can produce according to the width and length specified by the customer

2.2 C-shaped structural steel products

The company produces and sells C-shaped steel structures. By bringing slit steel coils (Slitting Coil) that are cut to size and forming in a C-shaped manner. which will be used in the construction industry to use as a roof structure The company has machines for producing C-shaped structural steel from 3 inches to 6 inches with a production capacity of 48,000 tons per year. In 2022, the company uses the production capacity of C-shaped steel structures. equal to 21 percent of production capacity

2.3 Slitting Coil

The company provides steel cutting services to be slit steel coils. Which is bringing steel coil (Coil) to cut into small strips according to the width specified by the customer and roll back for sale. The company has a machine for cutting steel into slitting coils (Slitting Coil). . The company has a production capacity of 244,000 tons per year, which in 2022 the company can use the production capacity of slitting in coil at 120,300 tons per year, equal to 49% of the production capacity.

3. Sheet metal fabrication or Steel Service Center (Coil Service Center)

Subsidiaries provide steel sheet cutting services. Which is the use of coil steel to cut into steel sheets according to the width and length specified by the customer. The company can cut steel in width from 600 to 1,500 millimeters and in length from 300 to 6,100 millimeters, with the company having a machine for cutting sheet steel (Cutting Sheet) , which the company has a production capacity of 44,000 tons per year.

Nature of business operations in the past year

In 2022, the company and its subsidiaries are still focused on maintaining their existing customer base while expanding their new customer base. They are also implementing plans to support various situations.

However, at the beginning of the year, the company faced a problem caused by the cancellation of raw material delivery from abroad due to the Ukrainian-Russian war and the lockdown in China that caused a new wave of Covid-19 outbreaks. As a result, the company's production of products for customers was affected.

In response, the company reviewed its working style including monitoring and managing raw material purchases to stay on top of risk assessment and planning for risk management, as well as implementing efficient and timely inventory management to ensure timely delivery as scheduled.

Industry and Competitive Situations

In 2022, the steel industry in Thailand faced the problem of higher costs from energy prices and rising interest rates. China's dumping of steel products around the world undermined trade competitiveness. The Office of Industrial Economics Ministry of Industry expected steel demand in 2022 to be 16.4 million tons, shrinking 12.2% from 2021. Separately, the demand for long steel was reduced by only 5.1% because the government sector remained the main base, although private construction was sluggish. Meanwhile, the demand for flat steel decreased by more than 15% due to the impact of downstream industries and the rate of steel consumption per person per year of Thai people decreased from 281 kg. in 2021 to 254 kg. in 2022.

Due to steel prices in the beginning of 2022, there was a lot of fluctuation and there was a tendency to adjust steel prices down in the middle of the year 2022. The Covid-19 pandemic situation and the Ukrainian-Russian war made it difficult for the company's management decisions in terms of sourcing raw materials, distribution, and planning management.

As for the outlook for 2023, world steel consumption is expected to increase by only 1% to 1,814.7 million tons, with China's steel demand stable at 914 million tonnes, accounting for 50.4% of the world's steel demand. There may be a positive direction if the Chinese government relaxes lockdown measures to prevent COVID, which could lead to steel consumption in Thailand being close to that of 2021 due to positive results in tourism and better services, including government construction that continues to move forward.

Marketing and competition

Thai industrial operators Acknowledging that there are more challenges in the steel production process in Thailand today and in the future under the rapidly changing technology and world trade, and development has been accelerated accordingly. Including the control process and product development to support the growth of the country.

The current steel industry is highly competitive, especially the downstream steel industry. This is because investments in downstream processes such as metal sheet rolling mills, steel sheet cutting plants, and steel frame rolling mills are not as high as other parts of the industry. For businesses with moderate investment, steel pipe factories or cold-formed steel structure manufacturers face fewer operators but still a significant number of competitors. In contrast, for businesses requiring high investment, such as hot-rolled steel production plants and coated steel sheet manufacturers, there are fewer manufacturers and competitors. The company itself has the potential and readiness to invest to gain an advantage in quality control, shorter delivery times, and flexibility in minimum order quantities. This is in line with the behavior of buyers who place smaller orders but with greater frequency and variety of purchases, which is a suitable strategy for the organization.

However, due to the high competition in the steel industry, both directly and indirectly, the company and its affiliates have set strategies in response to the changing market situation as follows:

- **Management**

Improve and develop the management of the company to achieve efficiency, such as personnel management. financial management system and various management tools that the company has utilized for maximum benefits in order to support changes in technology and bring the information that has been analyzed Improve the performance and quality of the company's products.

The company focuses on creating a value-added base in the organization. with the development of personnel knowledge for learning This is an important factor in business driving and managing efficiency in work. resulting in the production process and management within the organization is more efficient and reduce losses from the production process and development of information efficiency to help with management Control the work system and report the results in a timely manner. and efficient

- **Supply of raw materials and products**

The Company has a policy to be a provider of raw material procurement, production and distribution of steel products with the widest range and coverage. to meet the needs of various customers which the company can provide products both in terms of buying and selling Including outsourcing production

- **Price**

1. Determine reasonable prices in line with global steel market price trends and domestic steel market prices. in order to have the ability to compete and continue to maintain and / or increase market share
2. providing information to customers To build a good relationship and confidence in the purchase of the company's products.
3. Improve and develop the efficiency of factories and machines. including existing technology which is part of the control about low production costs

- **Customer**

Build and maintain relationships with customers including listening to customer opinions to study and understand consumer behavior Including continuous improvement and development of products and services of the company.

- **Products and products**

1. The company places importance on product quality to meet standards and acceptance. Explore the needs of diverse customer groups. to improve and develop the company's products
2. Diversify business risks by moving up to produce your own raw materials. The company will benefit in terms of cost management. including knowledge and to increase product groups and increase target customers
3. Arrangement of a clear line of product business groups No need to be number one But there is strength in the overall sense of the organization.
4. Efficiency Development Planning for Business Sustainability As a result, the company has competitiveness and ability to cope with fluctuating situations. The company has an advantage in raw material management from the company's joint venture with a steel coil manufacturer that has sufficient production capacity to meet demand. Increase competitiveness, control production cost stability Product development and production efficiency make the company competitive, able to control production efficiency from upstream to downstream and customize products in various sizes according to customer needs.

- **Marketing**

1. The company has a clear customer group and can respond to the needs of the customer group.
2. The company constantly develops and improves the quality of its products. by investing in machinery Spare parts and production support equipment to reduce production costs increase quality output.
3. Survey and listen to opinions from customers in order to continuously improve and develop the company's products and services.
4. Business expansion and looking for new business opportunities which operates in parallel with the utilization of resources for maximum benefit and the knowledge and expertise that the company already has Reduces wasted time and excessive investment.

- **Service**

1. Procure products to deliver to customers according to customer needs. and specified period Due to the wide variety of products
2. Good inventory management and delivery of products quickly and on time
3. Manage sales and marketing by understanding and observing the behavior of target customers Makes it possible to know the needs of customers and their characteristics very well.
4. Delivered products are of the quality that customers want.
5. The steel products sold by the Company are quality products that have been certified according to acceptable standards.

Business innovation development

The company places great importance on innovation to continuously improve the quality of its products and services. To meet acceptable quality standards, build consumer confidence, and focus on products according to the needs and applications that suit customers or business groups, the company has invested in machinery technology and equipment to improve production. This includes creating opportunities and increasing business competitiveness, such as the coated steel sheet project. The use of modern machinery has resulted in a variety of product types and applications in various forms, strengthening the supply chain at all levels.

Furthermore, the company prioritizes a safe working environment and reducing the environmental impact on society and surrounding communities. It is committed to upholding its social responsibility and creating consumer confidence.

Procurement of raw materials and products

The company and its subsidiaries purchase hot-rolled steel sheet, which is the main raw material for production, mainly from domestic hot-rolled steel manufacturers, specifically the joint venture company, Prime Steel Mill Co., Ltd. Currently, the company purchases coated steel sheets from POSCO Coated Steel (Thailand) Co., Ltd., a major producer of coated steel sheets, and some are imported from abroad. The company closely contacts raw material distributors abroad to stay updated on raw material price information.

In 2022, the company has ordered raw materials from abroad and domestically, which are hot-rolled steel products, cold-rolled steel groups, galvanized steel groups, various steel sections as follows.

(Unit : tons)

Source	Product types	Year 2022	Year 2021	Year 2020
Domestic	Hot rolled coil and	25,625	143,150	18,754
International	Other types of steel products	71,310	129,353	693
Domestic	Narrow steel coil	79,903	106,598	11,135
International		N/A	N/A	N/A

The company and its subsidiaries have a raw material and product procurement policy that considers the quality of raw materials and products, timely service and product delivery, as well as reasonable prices in line with domestic demand situations and appropriate steel price trends.

The main raw material purchase policy, which are which is a product of hot-rolled steel group cold rolled steel Zinc coated steel group various types of steel The company will order raw materials 2-3 months in advance. Approximately 5,000 tons per time at the price and quality agreed in advance with the raw material supplier. In order to have sufficient quantity and quality products to meet the needs of customers within 1 month according to the company's production and inventory management policy. The raw material suppliers will gradually deliver the raw materials until the amount ordered. which the policy to purchase such consistent amounts This allows the company to negotiate more raw material prices with vendors. This helps reduce the company's cost in one way.

In case of payment of goods and/or payment of a deposit in advance Need to check the status of purchase orders and main raw materials. Including risk assessment of various internal and external factors that may affect the delivery-delivery of products as specified in the contract.

Characteristics of customers and target customers

The company still aims to continuously expand and cover various customer groups in order to support distribution. The company focuses on the quality of its products and services by targeting wholesalers, modern trade, and various industrial sectors, such as the electrical appliances industry and construction materials industry. In 2022, the company supported most customer groups in Bangkok and its vicinity.

In 2023, the company remains committed to developing good relationships with existing customers and is determined to increase the distribution volume of its customer base. This includes expanding the new customer base, especially groups of customers who use coated steel sheets. Some of these customers are existing customers who wish to expand into new product groups, while others are new customers who primarily use coated steel products. The company plans to increase the variety of product groups as an alternative for customers

Target customers

The main target customers of the Company and its subsidiaries Details are as follows:

1. Customer group of Asia Metal Public Company Limited consists of
 - Wholesaler, Modern Trade and dealers
 - Groups of industrial plants such as the electrical appliance industry, furniture industry, building material industry
2. Grand Asia Steel Processing Center Company Limited is a steel service center. The customer base is a group of industrial factories such as the electrical appliance industry. furniture industry group, etc.
3. The joint venture company is Prime Steel Mill Co., Ltd. producing narrow black steel coils. Customer groups include pipe manufacturers and industries that use steel coils with a width of not more than 500 millimeters.

Distribution channel

For domestic sales, there are 2 distribution channels of the Company, namely

1. **Distribution through wholesale agents (Wholesaler)**
 - Proceed to sell products through wholesalers, modern trade and dealers to reduce the risk of product cost share credit risk burden
2. **Direct distribution (Direct Sale)**
 - Operates direct sales for customer groups such as steel pipe manufacturers electrical appliance manufacturers automotive parts manufacturers furniture maker construction contractor, etc.

Risk Management Policy and Plan

Risk Management

The Board of Directors attaches great importance to the internal control system and risk management. by assigning the Audit Committee It is responsible for reviewing the internal control system assessment and regularly following up. By focusing on having an internal control system that is sufficient and appropriate for the company's risks. The company has provided enough personnel to operate the system efficiently. able to protect and maintain the Company's assets as well as to prevent any corruption or normal operations in a material manner as well as to provide reasonable assurance that transactions with persons who may have conflicts and connected persons Operations are carried out in accordance with the rules, regulations and company regulations. regulations of the law to prevent damage to the company

Business risks (Marketing and distribution)

- **Risk from Fluctuation of Raw Material Prices**

Price volatility of hot-rolled steel, cold rolled steel, Zinc coated steel group various types of steel affect product cost and product price Normally, the selling price of the Company's products will change in accordance with the purchase price of raw materials Due to the new outbreak of Covid-19 , problems with energy prices and raw materials tend to increase. This will affect production and transportation costs. Including problems in delivering raw materials or products that have already been paid for in advance. thus affecting the import of raw materials. This may cause a shortage of steel raw materials. If steel producers in the country are unable to produce steel as needed or sufficient for consumption.

The Company may be at risk if the product selling price cannot be adjusted to match the raw material purchase price. This will affect the price difference (metal margin) and profitability of the company. Therefore, there may be a risk if the Company Buy raw materials at a high price but cannot sell the company's products at a higher price. The company Materials must be ordered 2-3 months in advance.

The measures to reduce the risk are as follows.

- 1) Follow the movement and assess the price trend situation closely. Compare domestic and international prices and monitor the economic situation and other factors that affect the volatility of raw material prices To engage in purchasing raw materials and controlling production costs
- 2) Focus on planning the purchase of raw materials and production in accordance with the sales policy, driving product distribution and rapid delivery. To control inventory and reduce the impact on prices.
- 3) Track movements and check the status of purchase orders and main raw materials. Including risk assessment of various internal and external factors that may affect the delivery-delivery of products as specified in the contract.

Government policy risks and related regulations

- **The risk of impacts from changes in laws Government policies and related measures**

Due to the amount of steel imported from abroad increased. Affecting the distorted domestic selling price structure. The government has implemented measures to protect domestic manufacturers from dumping. By imposing anti-dumping duties (ANTI-DUMPING) or issuing measures to protect from imports of hot-rolled steel (SAFEGUARD), including the government to review additional standards, thus affecting the import of raw materials. This may cause a shortage of steel raw materials. If steel producers in the country are unable to produce steel as needed or sufficient for consumption The company still uses the policy to maintain inventory levels. And prepare a plan to purchase raw materials about 2-3 months in advance , including monitoring situations related to changes in laws, government policies and related measures. which may affect the business operation both directly and indirectly for competitiveness

In 2022, the company has joined the Metal Tube and Sheet Metal Fabrication Association. Submit a request for review of the imposition of anti-dumping duty under Section 57 in case of tubes and pipes made of iron or steel originating in the People's Republic of China and the Republic of Korea. which is under consideration by the Department of Foreign Trade Ministry of Commerce To alleviate the impact of the steel price situation in the world market at that time. Including preventing the impact of dumped steel products that have spilled into Thailand.

- **Risk from government price control**

Currently, the amount of imports of various types of steel is large. As a result, the production capacity of factories in Thailand is low. As a result, steel is imported in high quantities. This poses risks to domestic industries such as construction, automotive and furniture industries, etc. The company may be affected. Especially in the supply of steel that may be shortage. Until causing the industry to stop Including the volatile imported steel prices. until making it difficult to control production costs

Referring to the announcement of the Ministry of Commerce regarding controlled goods such as steel, etc., the Company therefore has a low risk that it may be suspended from adjusting product prices or asking for cooperation in fixing consumer goods prices (if any) that may affect revenue generation. earning and making profits

In 2022 , the company also cooperates in informing product volume and selling price information in the country but cannot control the domestic steel price mechanism. due to the high volume of imports The company needs to adjust the selling price as appropriate.

Management Risk Management

- **Risk from dependence on management**

Because the business operation relies on good relationships between management, business partners, distributors and raw material procurement and customers, the Company is able to source raw materials at reasonable prices. and know the market situation in order to control the situation of the steel industry and analyze the trend of raw material prices and consumer demand which may affect confidence. If management is unable to control the situation The Company and its subsidiaries therefore attach great importance to employee development to be a part of business driving. Transfer knowledge of situation assessment in the implementation of trade activities.

The company has created a new generation of management team to participate in decision making, with an emphasis on knowledge development work experience to diversify risks in management within the company lead to sustainable development of the organization

Financial risk

- **Customer credit risk**

The Company and its subsidiaries have trade accounts receivable as of December 31 , 2022 in the amount of 810 million baht or 15.00 percent. Of income from sales and services, the company has given importance to the quality of debtors. There is a practice in considering giving credit to all customers equally and equitably. To reduce the risk that may be beneficial to any particular group, that is, consider the history of customers. Financial statements and other supporting information The Company and its subsidiaries also attach importance to monitoring the quality of debtors regularly. To reduce the risk that may arise from the debtor's inability to pay. In addition, the Company and its subsidiaries have a policy to set up an allowance for doubtful accounts for all trade receivables that qualify or are likely to be unable to pay.

- **Interest rate risk**

As of December 31, 2022, the Company and its subsidiaries had current liabilities of 1,435 million baht or 93.91 percent of total liabilities. The aforementioned liabilities are commercial loans in the form of letter of credit trust receipts, promissory notes, etc. The change in market interest rates may affect the Company's financial costs. In 2022, the Company and its subsidiaries had financial costs equal to 12.78 million baht or 0.23 % of revenue. sales and service From such risk situation, the Company focus on debt management

- **Exchange rate risk**

The Company and its subsidiaries purchased goods from abroad accounting for 37.81 % in 2022 of the total purchase value. The Company purchased goods from abroad both in US dollars and euros . domestic economic volatility and abroad As a result, exchange rates fluctuate. However, the Company continues to operate in accordance with the policy set forth in hedging against the risk of exchange rate volatility. by using appropriate financial tools such as foreign currency forward contracts In order to mitigate risks and potential impacts from fluctuations in foreign exchange rates, the Company also considers exchange rate trends. and the overall performance of the company for consideration.

Production Risk

- **Risk from raw material shortage**

The Company and its subsidiaries purchase Coated steel coil both domestically and internationally. by the domestic coated steel sheet group with POSCO Coated Steel (Thailand) Co., Ltd., which manufactures and distributes coated steel. with few domestic producers and the issuance of government measures such as ANTI-DUMPING and amendments to industrial product standards may pose a risk of shortage of goods coupled with increasing domestic demand For good management, the company and its subsidiaries plan to order products in advance. taking into account the trend of prices and demand and taking into account the quality of raw materials and appropriate cost management for the competitive direction and economic conditions

Environmental risks and personnel

- **Risk from production that may cause pollution**

The company is engaged in the production of structural steel. which may cause pollution both in terms of dust contaminated in the air Heavy metals that may contaminate the water The sound pressure level may be higher than the standard. The company has a system to collect dust before releasing it into the air. There is a cooling tower water treatment system before releasing it to the outside.

- **Business risks that may cause insecurity to employees**

The company operates in heavy industry. which employees may be harmed by working in the production area May result in the company having to bear additional expenses, such as damages from those who have been harmed, including fines (if any). However, the company provides group insurance for high-risk employees initially. In addition, the causes of accidents are gathered in order to find solutions to prevent recurrence or reduce the severity of accidents.

General risks

- **The risk of being unable to operate due to uncontrollable factors**

The company may encounter uncontrollable risk factors such as natural disasters. terrorism From sabotage and others. The company has a security system. Have an insurance policy Including having the Board of Directors.

- **Corruption risks**

In 2022, although the company has not yet become a member of the Private Sector Collective Action Coalition Against Corruption (CAC) , the company has hired a certified external agency to audit its internal systems. Both in accounting-finance, information systems and others that cover the structure of the company. In this regard, the working group has prepared a draft anti-corruption policy and other policies. That is in line with the guidelines set out in the self-assessment form to develop an anti-corruption system. The relevant policies will be presented to the Board of Directors' meeting within 2023.

Diving business for sustainability

Sustainability Management Policy and Goals

The company is aware of stakeholders. Financial statements for the year ended
31 December 2022
and
Independent Auditor's Report

Independent Auditor’s Report

To the Shareholders of Asia Metal Public Company Limited

Opinion

I have audited the consolidated and separate financial statements of Asia Metal Public Company Limited and its subsidiaries (the “Group”) and of Asia Metal Public Company Limited (the “Company”), respectively, which comprise the consolidated and separate statements of financial position as at 31 December 2022, the consolidated and separate statements of comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

In my opinion, the accompanying consolidated and separate financial statements present fairly, in all material respects, the financial position of the Group and the Company, respectively, as at 31 December 2022 and their financial performance and cash flows for the year then ended in accordance with Thai Financial Reporting Standards (TFRSs).

Basis for Opinion

I conducted my audit in accordance with Thai Standards on Auditing (TSAs). My responsibilities under those standards are further described in the *Auditor’s Responsibilities for the Audit of the Consolidated and Separate Financial Statements* section of my report. I am independent of the Group and the Company in accordance with the *Code of Ethics for Professional Accountants including Independence Standards* issued by the Federation of Accounting Professions (Code of Ethics for Professional Accountants) that is relevant to my audit of the consolidated and separate financial statements, and I have fulfilled my other ethical responsibilities in accordance with the Code of Ethics for Professional Accountants. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key Audit Matter

Key audit matter is those matters that, in my professional judgment, were of most significance in my audit of the consolidated and separate financial statements of the current period. This matter was addressed in the context of my audit of the consolidated and separate financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on this matter.

Valuation of inventories	
Refer to Notes to the financial statements 3 (g) and 7	
The key audit matter	How the matter was addressed in the audit
<p>The Group's main inventory is processing steels which product price can be highly volatile depending on the demand and supply in the global market. As a result there is a risk that the carrying value of inventories may exceed its net realisable value.</p> <p>Due to materiality of inventory balance and management judgment involved in determining net realisable value of the inventory, I considered this matter as my key audit matter.</p>	<p>My audit procedures included:</p> <ul style="list-style-type: none">• obtained an understanding of the net realisable value of inventories estimating process through inquiry of the management directly responsible in this area, evaluated the design and implement of relevant internal control process;• assessed appropriateness of net realisable value of inventories by tested on sampling basis the selling price less the estimated cost, necessary to make the sale for each group of products with relevant documents;• compared the cost with net realisable value of inventories as at the year end to evaluate whether the inventories stated at the lower of cost and net realisable value and assessed appropriateness of allowance for decline in value of inventories; and• considered adequacy of the disclosure in accordance with the Thai Financial Reporting Standards.

Other Information

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated and separate financial statements and my auditor's report thereon. The annual report is expected to be made available to me after the date of this auditor's report.

My opinion on the consolidated and separate financial statements does not cover the other information and I will not express any form of assurance conclusion thereon.

In connection with my audit of the consolidated and separate financial statements, my responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

When I read the annual report, if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance and request that the correction be made.

Responsibilities of Management and Those Charged with Governance for the Consolidated and Separate Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with TFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, management is responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group and the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's and the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements

My objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgment and maintain professional skepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. I am responsible for the direction, supervision and performance of the group audit. I remain solely responsible for my audit opinion.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide those charged with governance with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, I determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matter. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Notes to the financial statements

For the year ended 31 December 2022

These notes form an integral part of the financial statements.

The financial statements issued for Thai statutory and regulatory reporting purposes are prepared in the Thai language. These English language financial statements have been prepared from the Thai language statutory financial statements, and were approved and authorised for issue by the Board of Directors on 23 February 2023.

1 General information

Asia Metal Public Company Limited, the “Company”, is incorporated in Thailand and was listed on the Stock Exchange of Thailand in August 2004. The Company has its registered head office and branch office as follows:

Head office	: 55, 55/1 Moo 2 Soi Watnamdaeng, Srinakarin Road, Tambol Bangkaew, Amphur Bangplee, Samutprakarn 10540, Thailand.
Branch office	: 90/1 Moo 10, 331 Road, Tambol Srasiliam, Amphur Panusnikom, Chonburi 20140, Thailand.

The Company’s major shareholders during the financial year were Mr. Chusak Yongvongphaiboon and Khunying Patama Leesawatrakul which owned 15.98% and 14.88% respectively of the Company’s share capital as at 31 December 2022.

The principal activities of the Group and the Company are manufacturing and trading of processed steel products and rendering service for manufacturing the processed steel. Details of the subsidiaries and associate as at 31 December 2022 and 2021 are disclosed in notes 8 and 9.

2 Basis of preparation of the financial statements

The financial statements are prepared in accordance with Thai Financial Reporting Standards (“TFRS”), guidelines promulgated by the Federation of Accounting Professions and applicable rules and regulations of the Thai Securities and Exchange Commission. The financial statements are presented in Thai Baht, which is the Company’s functional currency.

The preparation of financial statements in conformity with TFRS requires management to make judgments, estimates and assumptions that affect the application of the Group’s accounting policies. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

3 Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

(a) Basis of consolidation

The consolidated financial statements relate to the Company and its subsidiaries (together referred to as the “Group”) and the Group’s interests in associate.

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

Non-controlling interests

At the acquisition date, the Group measures any non-controlling interest at its proportionate interest in the identifiable net assets of the acquiree. In addition, when there is a change in the Group's interest in a subsidiary that does not result in a loss of control, any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid from the acquisition of the non-controlling interests with no change in control is accounted for as other surplus/deficit in shareholders' equity.

Loss of control

When the Group loses control over a subsidiary, it derecognises the assets and liabilities, any related non-controlling interests and other components of equity of the subsidiary. Any resulting gain or loss is recognised in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

Interests in equity-accounted investee

Associates are those entities in which the Group has significant influence, but not control or joint control, over the financial and operating policies.

The Group recognised investments in associates using the equity method in the consolidated financial statements. They are initially recognised at cost, which includes transaction costs. Subsequent to initial recognition, the consolidated financial statements include the Group's dividend income and share of the profit or loss and other comprehensive income of equity-accounted investees, until the date on which significant influence ceases.

Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income or expenses arising from intra-group transactions, are eliminated on consolidation. Unrealised gains arising from transactions with associates are eliminated against the investment to the extent of the Group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

Business combinations

The Group applies the acquisition method when the Group assess that the acquired set of activities and assets include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create output. The acquisition date is the date on which control is transferred to the Group, other than business combinations with entities under common control. Expenses in connection with a business combination are recognised as incurred.

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

Goodwill is measured as the fair value of the consideration transferred including the recognised amount of any non-controlling interest in the acquiree, less net fair value of the identifiable assets acquired and liabilities assumed. Any gain on bargain purchase is recognised in profit or loss immediately.

Consideration transferred includes assets transferred, liabilities incurred by the Group to the previous owners of the acquiree, any contingent consideration and equity interests issued by the Group.

A contingent liability of the acquiree is assumed in a business combination only if such a liability represents a present obligation and arises from a past event, and its fair value can be measured reliably.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group estimates provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period, or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognised at that date.

When a business combination is achieved in stages, the Group's previously held equity interest in the acquiree is remeasured to its acquisition-date fair value and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are recognised as would be required if that interest were disposed of.

Business combination under common control are accounted for using a method similar to the pooling of interest method, by recognising assets and liabilities of the acquired businesses at their carrying amounts in the consolidated financial statements of the ultimate parent company at the transaction date.

The difference between the carrying amount of the acquired net assets and the consideration transferred is recognised as surplus or deficit from business combinations under common control in shareholder's equity. The surplus or deficit will be written off upon divestment of the businesses acquired. The results from operations of the acquired businesses will be included in the consolidated financial statements of the acquirer from the beginning of the comparative period or the moment the businesses came under common control, whichever date is later, until control ceases.

(b) *Investments in subsidiaries and associate*

Investments in subsidiaries and associate in the separate financial statements are measured at cost less allowance for impairment losses. Dividend income is recognised in profit or loss on the date on which the Group's right to receive payment is established. If the Company disposes of part of its investment, the deemed cost of the part sold is determined using the weighted average method. Gains and losses on disposal of the investments are recognised in profit or loss.

(c) *Foreign currencies*

Transactions in foreign currencies are translated to the respective functional currencies of each entity in the Group at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the exchange rate at the reporting date.

Foreign currency differences are generally recognised in profit or loss.

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

(d) Financial instruments

(d.1) Classification and measurement

Financial assets and financial liabilities (except trade accounts receivables (see note 3 (f)) are initially recognised when the Group becomes a party to the contractual provisions of the instrument, and measured at fair value, taking into account for transaction costs that are directly attributable to its acquisition, except for financial assets and liabilities measured at FVTPL, which are initially and subsequently measured at fair value, and any transaction costs that are directly attributable to its acquisition are recognised in profit or loss.

On initial recognition, a financial asset is classified as measured at: amortised cost; fair value through other comprehensive income (FVOCI); or fair value through profit or loss (FVTPL). Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified prospectively from the reclassification date.

On initial recognition, financial liabilities are classified as measured at amortised cost using the effective interest method. Interest expense are recognised in profit or loss.

Financial assets measured at amortised costs are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by expected credit losses. Interest income, foreign exchange gains and losses, expected credit loss and any gain or loss on derecognition are recognised in profit or loss.

Equity investments measured at FVOCI are subsequently measured at fair value. Dividend income is recognised as income in profit or loss on the date on which the Group's right to receive payment is established, unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

(d.2) Derecognition and offsetting

The Group derecognises a financial asset when the contractual rights to receive the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Group also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

The difference between the carrying amount extinguished and the consideration received or paid is recognised in profit or loss.

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Group currently has a legally enforceable right to set off the amounts and the Group intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

(d.3) Derivatives

Derivative are recognised at fair value and remeasured at fair value at each reporting date. The gain or loss on remeasurement to fair value is recognised immediately in profit or loss.

(d.4) Impairment of financial assets other than trade accounts receivables

The Group recognises allowances for expected credit losses (ECLs) on financial assets measured at amortised cost, lease receivables, and loan commitments issued which are not measured at FVTPL.

The Group recognises ECLs equal to 12-month ECLs unless there has been a significant increase in credit risk of the financial instrument since initial recognition or credit-impaired financial assets, in which case the loss allowance is measured at an amount equal to lifetime ECLs.

ECLs are a probability-weighted estimate of credit losses based on forward-looking and historical experience. Credit losses are measured as the present value of all cash shortfalls discounted by the effective interest rate of the financial asset.

The Group recognises ECLs for low credit risk financial asset as 12-month ECLs.

The Group assumes that the credit risk on a financial asset has increased significantly if it is more than 365 days past due, significant deterioration in credit rating, significant deterioration in the operating results of the debtor and existing or forecast changes in the technological, market, economic or legal environment that have a significant adverse effect on the debtor's ability to meet its obligation to the Group.

The Group considers a financial asset to be in default when:

- the debtor is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- the financial asset is more than 365 days past due.

(d.5) Write offs

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering. Subsequent recoveries of an asset that was previously written off, are recognised as a reversal of impairment in profit or loss in the period in which the recovery occurs.

(d.6) Interest

Interest income and expense is recognised in profit or loss using the effective interest method. In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability.

(d) Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits and highly liquid short-term investments which have a maturities of three months or less from the date of acquisition.

(e) Trade and other receivable

A trade accounts receivable is recognised when the Group has an unconditional right to receive consideration. A trade accounts receivable is measured at transaction price less allowance for expected credit loss. Bad debts are written off when incurred.

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

The Group estimates lifetime expected credit losses (ECLs), using a provision matrix to find the ECLs rates. This method groups the debtors based on shared credit risk characteristics and past due status, taking into account historical credit loss data, adjusted for factors that are specific to the debtors and an assessment of both current economic conditions and forward-looking general economic conditions at the reporting date.

(f) Inventories

Inventories are measured at the lower of cost and net realisable value. Cost is calculated using the weighted average cost principle. Cost includes direct costs incurred in acquiring the inventories. In the case of manufactured inventories and work-in-progress, cost includes an appropriate share of production overheads based on normal operating capacity. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs to complete and to make the sale.

(g) Investment properties

Investment properties are measured at cost less accumulated depreciation and impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the investment property included of self-constructed assets.

Depreciation is calculated on a straight line basis over the estimated useful lives of buildings and buildings improvement of 20 years and recognised in profit or loss. No depreciation is charged on freehold land.

Differences between the proceeds from disposal and the carrying amount of investment property are recognised in profit or loss.

(h) Property, plant and equipment

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses except for land which is measured at its revalued amounts. The revalued amount is the fair value determined on the basis of the property's existing use at the date of revaluation less any subsequent accumulated depreciation and impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the asset, the cost of self-constructed assets, and the costs of dismantling and removing the items and restoring the site on which they are located. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

Differences between the proceeds from disposal and the carrying amount of property, plant and equipment are recognised in profit or loss. When there is a disposal of revalued assets, the amount recognised in revaluation reserve is reclassified to retained earnings.

Revalued assets

Revaluations of assets are performed by independent professional valuers with sufficient regularity to ensure that the carrying amount of these assets does not differ materially from that which would be determined using fair values at the reporting date. Any increase in value, on revaluation, is recognised in other comprehensive income and presented in the "revaluation reserve" in other components of equity unless it offsets a previous decrease in value recognised in profit or loss in respect of the same asset, the increase is recognised in profit or loss. A decrease in value is recognised in profit or loss to the extent it exceeds the revaluation reserve previously recognised in other comprehensive income in respect of the same asset. Upon disposal of a revalued asset, any remaining related revaluation reserve is transferred directly to retained earnings and is not taken into account in calculating the gain or loss on disposal.

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

Subsequent costs

The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item when the future economic benefits embodied within the part will flow to the Group, and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

Depreciation

Depreciation is calculated on a straight line basis over the estimated useful lives of each component of an asset and recognised in profit or loss. No depreciation is provided on freehold land and assets under construction and installation.

The estimated useful lives are as follows:

Land improvement	5 to 20 years
Buildings and buildings improvement	5 and 20 years
Machinery and equipment	5 to 20 years
Furniture, fixtures and office equipment	5 to 20 years
Vehicles	5 years
Utilities systems	3 to 20 years

(i) Goodwill

Goodwill is measured at cost less accumulated impairment losses. In respect of equity-accounted investee, the carrying amount of goodwill is included in the carrying amount of the investment.

(j) Intangible assets

Intangible assets are measured at cost less accumulated amortisation and impairment losses. Subsequent expenditure is capitalised only when it will generate the future economic benefits. Amortisation is calculated on a straight line basis over the estimated useful lives of intangible assets and recognised in profit or loss.

The estimated useful lives are as follows:

Software licences	3 to 10 years
-------------------	---------------

The amortisation of software licences is included in administrative expenses.

(k) Leases

At inception of a contract, the Group assesses that a contract is, or contains, a lease when it conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

As a lessee

At commencement or on modification of a contract, the Group allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices of each component. For the leases of property, the Group has elected not to separate non-lease components and accounted for the lease and non-lease components wholly as a single lease component.

The Group recognises a right-of-use asset and a lease liability at the lease commencement date, except for leases of low-value assets and short-term leases which are recognised as an expenses on a straight line basis over the respective lease terms.

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

Right-of-use asset is measured at cost, less any accumulated depreciation and impairment loss, and adjusted for any remeasurements of lease liability. The cost of right-of-use asset includes the initial amount of the lease liability adjusted for any prepaid lease payments, plus any initial direct costs incurred and an estimate of restoration costs, less any lease incentives received. Depreciation is charged to profit or loss on a straight line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Group by the end of the lease term or the Group will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment.

The lease liability is initially measured at the present value of all lease payments that shall be paid under the lease. The Group uses the Group's incremental borrowing rate to discount the lease payments to the present value. The Group determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in lease term, change in lease payments. When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero. The Group remeasured lease liabilities using the original discount rate and recognised the impact of the change in lease liability in profit or loss.

As a lessor

At inception or on modification of a contract, the Group allocates the consideration in the contract to each component on the basis of their relative standalone selling prices.

At lease inception, the Group considers to classify a lease that transfers substantially all of the risks and rewards incidental to ownership of the underlying asset to lessees as a finance lease. A lease that does not meet this criteria is classified as an operating lease.

The Group recognises finance lease receivables at the net investment of the leases, which includes the present value of the lease payments, and any unguaranteed residual value, discounted using the interest rate implicit in the lease. Finance lease income reflects a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

The Group recognises lease payments received under operating leases in profit or loss on a straight line basis over the lease term as part of other income. Initial direct costs incurred in arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income.

The Group estimates lifetime expected credit losses (ECLs), using a provision matrix to find ECLs rate. This method groups the debtors based on shared credit risk characteristics and past due status, taking into account historical credit loss data, adjusted for factors that are specific to the debtors and an assessment of both current economic conditions and forward-looking general economic conditions at the reporting date. The Group derecognises the lease receivables as disclosed in note 3 (d).

(l) Impairment of non financial assets

The carrying amounts of the Group's assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the assets' recoverable amounts are estimated. For goodwill, the recoverable amount is estimated each year at the same time.

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

An impairment loss is recognised in profit or loss if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount, unless it reverses a previous revaluation credited to equity, in which case it is charged to equity.

The recoverable amount is the greater of the asset's value in use and fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

Impairment losses of assets recognised in prior periods is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss in respect of goodwill is not reversed. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(m) Employee benefits

Defined contribution plan

Obligations for contributions to the Group's provident funds are expensed as the related service is provided.

Defined benefit plans

The Group's net obligation in respect of defined benefit plans is calculated by estimating the amount of future benefit that employees have earned in the current and prior periods. The defined benefit obligations is discounted to the present value, which regularly performed by a qualified actuary using the projected unit credit method.

Remeasurements of the net defined benefit liability, actuarial gain or loss are recognised immediately in OCI. The Group determines the interest expense on the net defined benefit liability for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period, taking into account any changes in the net defined benefit liability during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognised immediately in profit or loss. The Group recognises gains and losses on the settlement of a defined benefit plan when the settlement immediately occurs.

The Group's net obligation in respect of long-term employee benefits is the amount of future benefit that employees have earned in return for their service in the current and prior periods. That benefit is discounted to determine its present value. Remeasurements are recognised in profit or loss in the period in which they arise.

Termination benefits are expensed at the earlier of when the Group can no longer withdraw the offer of those benefits and when the Group recognises costs for a restructuring. If benefits are not expected to be settled wholly within 12 months of the end of the reporting period, then they are discounted.

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(n) Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as a finance cost.

(o) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Group has access at that date. The fair value of a liability reflects its non-performance risk.

When measuring the fair value of an asset or a liability, the Group uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: inputs for the asset or liability that are based on unobservable input.

If an asset or a liability measured at fair value has a bid price and an ask price, then the Group measures assets and asset positions at a bid price and liabilities and liability positions at an ask price.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price - i.e. the fair value of the consideration given or received. If the Group determines that the fair value on initial recognition differs from the transaction price, the financial instrument is initially measured at fair value adjusted for the difference between the fair value on initial recognition and the transaction price and the difference is recognised in profit or loss immediately. However, for the fair value categorised as level 3, such difference is deferred and will be recognised in profit or loss on an appropriate basis over the life of the instrument or until the fair value level is transferred or the transaction is closed out.

(p) Revenue from contracts with customers

Revenue recognition

Revenue is recognised when a customer obtains control of the goods or services in an amount that reflects the consideration to which the Group expects to be entitled, excluding those amounts collected on behalf of third parties, value added tax and is after deduction of any trade discounts and volume rebates.

Revenue from sales of goods is recognised on the date on which the goods are delivered to the customers.

Service income is recognised when the services are provided. The related costs are recognised in profit or loss when they are incurred.

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

(q) Other income

Other operating income is recognised in profit or loss as it accrues.

(r) Income tax

Income tax expense for the year comprises current and deferred tax, which is recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

Current tax is recognised in respect of the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the temporary differences: the initial recognition of goodwill; the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss; and differences relating to investments in subsidiaries and associate to the extent that it is probable that they will not reverse in the foreseeable future.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities, using tax rates enacted or substantively enacted at the reporting date. Current deferred tax assets and liabilities are offset in separate financial statements.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(s) Earnings (loss) per share

Basic earnings (loss) per share is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year.

(t) Segment information

Segment results that are reported to the Group's the chief operating decision maker include items directly attributable to a segment.

4 Related parties

A related party is a person or entity that has direct or indirect control or has significant influence over the financial and managerial decision-making of the Group; a person or entity that are under common control or under the same significant influence as the Group; or the Group has direct or indirect control or has significant influence over the financial and managerial decision-making of a person or entity.

Relationship with subsidiaries and associate are described in notes 8 and 9. Other related parties that the Company had significant transactions with during the year were as follows:

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

Name of parties	Country of incorporation/ nationality	Nature of relationships
G Steel Public Company Limited	Thailand	Major shareholder of the Company is its shareholders and directors
G J Steel Public Company Limited	Thailand	Shareholder held by a related party

Purchase investment in Grand Asia Steel
Processing Center Co., Ltd.

- 3,500

In June 2021, the Company acquired an additional 50% interest in Grand Asia Steel Processing Center Co., Ltd. (“GA”) of Baht 3.5 million, increasing its ownership from 50% to 100%. The carrying amount of GA’s net assets in the consolidated financial statements on the date of the acquisition was Baht 13.8 million. The Group recognised a decrease in non-controlling interests of Baht 13.8 million and surplus on change in ownership interest in subsidiary of Baht 10.3 million to owners of the Group resulting from change in the Group’s ownership interest in GA. The Company fully paid for the shares acquisition in July 2021.

13 Provisions for employee benefits

Defined benefit plan

The Group and the Company operate a defined benefit plan based on the requirement of Thai Labour Protection Act B.E 2541 (1998) to provide retirement benefits to employees based on pensionable remuneration and length of service. The defined benefit plans expose the Company to actuarial risks, such as longevity risk, future salary growth risk, and employee turnover risk.

Present value of the defined benefit obligations	Consolidated financial statements		Separate financial statements	
	2022	2021	2022	2021

For the year ended 31 December 2022

<i>Principal actuarial assumptions</i>	Consolidated financial statements		Separate financial statements	
	2022	2021	2022	2021
			(%)	
Discount rate	1.91 - 2.04	2.04 - 2.66	1.91	2.55
Future salary growth	4.00 - 6.00	4.00 - 6.00	4.00	4.00
Employee turnover	1.91 - 57.30	1.91 - 57.30	4.78 - 57.30	4.78 - 57.30

Assumptions regarding future mortality have been based on published statistics and mortality tables.

At 31 December 2022 and 2021, the weighted-average duration of the defined benefit obligation of the Group was 10 to 21 years and of the Company was 10 years.

Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below.

<i>Effect to the defined benefit obligation</i>	%	Consolidated financial statements			
		increase in assumption		decrease in assumption

14 Legal reserve

Section 116 of the Public Companies Act B.E. 2535 Section 116 requires that a public company shall allocate not less than 5% of its annual net profit, less any accumulated losses brought forward, to a reserve account ("legal reserve"), until this account reaches an amount not less than 10% of the registered authorised capital. The legal reserve is not available for dividend distribution.

Notes to the financial statements
For the year ended 31 December 2022

15 Segment information and disaggregation of revenue

(a) Segment information

The Group's main operations are manufacturing and trading of processed steel products and rendering service for cutting and modifying steels. The Group has only one geographical segment because they operate only in Thailand.

(b) Major customer

Revenues from two customers of the Group and the Company represent approximately Baht 1,343.0 million (2021: Revenues from two customers of the Group and the Company represent approximately Baht 3,368.6 million) of the Group and the Company's total revenue.

(c) Promotional privileges

The Company has been granted promotional certificates for the purpose of production efficiency improvement by the Office of the Board of Investment. The Company has been granted several privileges including exemption and/or reduction from payment of income tax on the net profit derived from promoted operations with certain terms and conditions prescribed in the promotional certificate.

Notes to the financial statements
For the year ended 31 December 2022

Employee benefit expenses

During 2022, the Group and the Company have contributed provident funds for their employees amounting to Baht 0.3 million (2021: Baht 0.3 million), which included in employee benefit expenses.

Write-off advance payment for purchasing of goods

On 17 January 2022, the Company entered into sale contract with the other foreign company ("the party") which the Company had made an advance payment for inventories to the party amounting to Euro 2.8 million, or equivalent to Baht 106.0 million in February 2022. Consequently, the party failed to comply with its delivery obligation under the sale contract, so the Company had action for the recovery of debt and final negotiation of the case. On 30 September 2022 the Company and the party entered into the settlement agreement. The party agree to partial paid advance payment of inventories amounting to Euro 1.1 million, or equivalent to Baht 42.5 million which the Company received the said payment amount in October 2022. In this regard, the Company write-off the remaining advance payment for inventories amounting to Euro 1.7 million, or equivalent to Baht 63.6 million which recorded in administrative expenses account in the consolidate and separate statements of comprehensive income for the year ended 31 December 2022.

Notes to the financial statements

For the year ended 31 December 2022

As at 31 December 2022, the Group and the Company had the tax losses amount of Baht 4.4 million (2021: nil), which will be expired in 2027. The deductible temporary differences do not expire under current tax legislation. The Group and the Company have not been recognised these items as deferred tax assets amount of Baht 0.9 million (2021: nil) because it is not probable that the Group and the Company will have sufficient future taxable profit to utilise the benefits therefrom.

For the year ended 31 December 2022

20 Financial instruments

(a) Carrying amount and fair values

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities measured at amortised cost if the carrying amount is a reasonable approximation of fair value.

	Consolidated/Separate financial statements			Fair value		
	Financial instruments measured at FVTPL	Carrying amount Financial instruments measured at FVOCI	Total (in thousand Baht)	Level 1	Level 2	Level 3
At 31 December 2022

Total	121	3,824	3,945			

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

Financial instruments measured at fair value

Type	Valuation technique
Fixed income fund	The net asset value as of the reporting date.
Forward exchange contract used for hedging	The fair value is determined using quoted forward exchange rates at the reporting date

(b) Financial risk management policies

Risk management framework

The Group's Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework. The Board of Directors has established the risk management committee, which is responsible for developing and monitoring the Group's risk management policies. The committee reports regularly to the Board of Directors on its activities.

The Group's risk management policies are established to identify and analyse the risks faced by the Group's, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Group audit committee oversees how management monitors compliance with the Group's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Group audit committee is assisted in its oversight role by internal audit. Internal audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the audit committee.

(b.1) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers.

(b.1.1) Trade and other receivables

The Group exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may influence the credit risk of its customer base, including the default risk associated with the industry and country in which customers operate.

The Group has established a credit policy under which each new customer is analysed individually for creditworthiness before the Group commercial terms and conditions are offered. The Group's review includes external ratings, if they are available, financial statements, credit agency information, industry information and in some cases bank references. Sales limits are established for each customer. Any sales exceeding those limits require approval from the Board of Directors.

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

The Group limits its exposure to credit risk from trade accounts receivables by establishing a maximum payment period of 3 months. Outstanding trade receivables are regularly monitored by the Group. An impairment analysis is performed by the Group at each reporting date. The provision rates of expected credit loss are based on days past due for groupings of various customer segments with similar credit risks to reflect differences between economic conditions in the past, current conditions and the Group's view of economic conditions over the expected lives of the receivables.

Information relevant to trade and other receivables are disclosed in note 6.

(b.1.2) Cash and cash equivalent and derivatives

The Group's exposure to credit risk arising from cash and cash equivalents and derivative assets is limited because the counterparties are banks and financial institutions which the Group considers to have low credit risk.

(b.1.3) Guarantees

The Group's policy is to provide financial guarantees only for associate's liabilities. At 31 December 2022, the Group has guaranteed for credit facilities of associate (see note 9).

(b.2) Liquidity risk

The Group monitors its liquidity risk and maintains a level of cash and cash equivalents deemed adequate by management to finance the Group's operations and to mitigate the effects of fluctuations in cash flows.

The following table are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted and include contractual interest payments and exclude the impact of netting agreements.

Consolidated financial statements					
Contractual cash flows					
	Carrying amount	1 year or less	More than 1 year but less than 5 years	More than 5 years	Total

(b.3) Market risk

The Group is exposed to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk is as follows:

(b.3.1) Foreign currency risk

The Group is exposed to foreign currency risk relating to purchases and sales which are denominated in foreign currencies. The Group primarily utilises forward exchange contracts with maturities of less than one year. The forward exchange contracts entered into at the reporting date also relate to anticipated purchases and sales, denominated in foreign currencies, for the subsequent period.

Exposure to foreign currency at 31 December	Consolidated/Separate financial statements				
	2022			2021	
	USD	EUR	CNY (in thousand Baht)	USD	EUR
Financial assets	-	-	-	2,139	-
Financial liabilities	(10,600)	(547,933)	-	(523,149)	(126,010)
Net statement of financial position exposure	(10,600)	(547,933)	-	(521,010)	(126,010)
Forward exchange purchase sale contracts	33,104	-	16,995	-	-
Net exposure	<u>22,504</u>	<u>(547,933)</u>	<u>16,995</u>	<u>(521,010)</u>	<u>(126,010)</u>

Asia Metal Public Company Limited and its Subsidiaries
Notes to the financial statements
For the year ended 31 December 2022

Sensitivity analysis

A reasonably possible strengthening (weakening) of Thai Baht against all other foreign currencies at the reporting date would have affected the measurement of financial instruments denominated in a foreign currency. This analysis assumes that all other variables, in particular interest rates, remain constant.

Impact to profit or loss	Consolidated/Separate financial statements		
	Movement (%)	Strengthening (in thousand Baht)	Weakening
At 31 December 2022			
USD	5	(2,319)	1,883
EUR	5	(30,695)	19,563
CNY	8	(1,573)	1,090
At 31 December 2021			
USD	6	(34,072)	28,661
EUR	7	(11,689)	8,789

(b.3.2) Interest rate risk

Interest rate risk is the risk that future movements in market interest rates will affect the results of the Group's operations and its cash flows because borrowings interest rates (see note 12) are mainly fixed. So the Group has low interest rate risk. The sensitivity impact to the increase or decrease in interest expenses from borrowings, as a result of changes in interest rates is immaterial on financial statements of the Group.

21 Capital Management

The Board of Directors' policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Board of Directors regularly monitors the return on capital, by evaluating result from operating activities divided by total shareholders' equity, excluding non-controlling interests and also monitors the level of dividends to ordinary shareholders.

22 Commitments with non-related parties

	Consolidated financial statements		Separate financial statements	
	2022	2021	2022	2021
	<i>(in thousand Baht)</i>			
Capital commitments				
Buildings and other constructions	24,571	-	24,571	-

Business Ethics

The company is committed to conducting business in accordance with good corporate governance principles by adhering to transparent work, obeying the law, taking responsibility for all stakeholders equally, and being socially and environmentally responsible. This includes a focus on the quality of products and services that are good for long-term business. Directors, executives, and employees at all levels are required to strictly adhere to business ethics, as detailed in the ethics and business ethics handbook announced in 2023.

Customer : The company is committed to the concept of Customer Centricity by providing services that meet all your needs, whether it's giving advice, solving problems, or helping in sourcing products. It offers a wide range of options under a comprehensive management system of production and product quality inspection with state-of-the-art technology, including fast delivery, punctual in accordance with the production plan.

Shareholder : The company is determined to expand its business for continuous and sustainable growth until it becomes the leading company in the domestic steel industry. There are risk management measures in place to address significant impact factors. In the long run, the company aims to create confidence and added value for shareholders by providing channels for them to contact and file complaints with independent directors. Additionally, the company has channels for receiving complaints on good governance from employees through the company secretary, which will be compiled and reported to the Audit Committee.

Creditor : The Company complies with the terms of the loan agreement and provide accurate financial information including paying debts on time every time.

Employees : The company aims to develop the potential of its employees to become professionals in the work they do. The potential of employees is one of the most important factors that can turn ideas, imaginations, and plans into reality. This, in turn, creates value and a corporate culture that practices success, credibility, and trust. Simultaneously, the company also establishes a knowledge management system for its employees to share knowledge, exchange ideas, accumulate experience, and continuously learn new things.

Business partners and contractual parties : The company has a policy of building good relationships with business partners, including treating partners fairly according to the trade conditions and/or agreements between them. This is done to develop and maintain a sustainable relationship based on mutual benefits.

Competitors: The company should conduct its business in accordance with the principles of free and fair competition. It is important not to defame or distort information in a way that could cause unlawful damage to commercial competitors. Additionally, social issues should not be used as a competitive advantage.

Community, Society and Environment : The company attaches great importance to development and social responsibility, realizing that for the business to survive, it must be based on a stable and growing society and environment. Therefore, the company supports activities with the objective of developing an environmentally-friendly production, a safe workplace and surrounding communities, and the physical and mental health of employees, including creating socially responsible activities.

Government Sector : The Company is committed to strictly complying with the laws, rules and regulations of the government sector. as well as to cooperate in providing information about the business of the business and participating in various activities as prescribed by government agencies.

Confidentiality : Employees must maintain the confidentiality of information in the performance of their business functions, as well as maintain the confidentiality of customers and partners. Any leakage or disclosure of this information to unauthorized parties may have an impact on the company or other people, and using such information for personal gain, or sharing it with others for their benefit, is strictly prohibited. This obligation remains in effect even after retirement, resignation or termination of employment with the company, unless such disclosure has been duly authorized by the Company or required by law.

Disclosure of inside information : The Company realizes the importance of protecting the Company's internal information for personal benefit. Therefore, there is a policy to keep information that has not yet been disclosed to the public as a secret. by specifying to be toward of only those involved.

Conflicts of Interest and Conflicts of Interest : Directors, executives, and employees should perform their duties in the best interest of the company without being influenced by personal needs or relationships. They should always be aware that they do not have any personal interests or conflicts of interest in the company's operations, including financial gain, assets, or other benefits. Additionally, they should not engage in any business that conflicts with the interests of the company.

Prevention and anti-corruption : Directors, executives and employees should perform their duties with caution. honesty in accordance with the principles of good corporate governance and the requirements of the law strictly. Directors, executives and employees will not participate in corruption. Do not tolerate and oppose the giving or receiving of property, gift, bribe or any other benefit in any form that exceeds traditional necessity and does not do anything to seek unlawful benefits.

Use of Information Technology and Intellectual Property : The Company encourages the use of information technology in business operations and as a communication tool. By taking into account the interests of the company as a priority, directors, executives and employees have duties and responsibilities to perform their duties with prudence. Be careful when using it, respect your rights. Private, does not violate intellectual property or is against good morals as well as complying with the laws, rules, regulations regarding the use of information technology.

Exercise of Political Rights : The Company is politically neutral, directors, executives and employees are able to exercise political rights under the provisions of the Constitution. but must not pretend to be a company employee or bring any assets, equipment, tools of the Company for the benefit of any political action and should avoid the use of political rights or activities that are illegal or create divisions in the workplace and in society.

Human Rights Respect : The Company supports and respects human rights principles. without being involved in human rights violations including not supporting or promoting such human rights violations. Utilization of Resources and Preservation of Company Assets Directors, executives and employees are responsible for using resources and maintaining the best use of the Company's assets. and do not use the Company's resources or assets for personal gain or third parties including misuse.

Internal Control and Internal Audit : The company places importance on internal control systems at both the management and operational levels to ensure efficiency. Therefore, the duties and authority of operators and executives have been clearly defined in writing, with supervision of the use of company assets for the company's benefit, and separation of duties of operators, supervisors, and assessors. The results are separated from each other to create a balance and check between each other appropriately, and there is an internal control related to the financial system. An internal audit unit has been set up to ensure that the main operations and key financial activities of the company are carried out in accordance with established guidelines and efficiency, including monitoring compliance with laws and regulations related to the company (compliance control). The internal audit department is independent to be able to fully perform checks and balances. Therefore, the board requires the internal audit unit to directly report the audit results to the audit committee and receive evaluations from the committee. Additionally, the internal audit unit audits the control system and is very independent.

Ensuring compliance with the Code of Business Conduct : Directors, executives, and employees have a duty to acknowledge, understand, and strictly comply with business ethics. Executives and supervisors must be good role models in complying with these ethics and have a duty to supervise and encourage subordinates to comply as well, according to the strict guidelines of the business ethics. Any waiver from this Code of Conduct must be approved by the Board of Directors.

Reporting non-compliance with the Code of Conduct: Anyone who witnesses a violation or deliberate non-compliance with the Code of Conduct specified in this manual must report it directly to their supervisor or to the supervisor of the department or line of work where the offender is affiliated.

Report of the Board of Directors Responsibilities for the Financial Report Year 2022

The Board of Directors is responsible for the financial reports of Asia Metal Public Company Limited and its subsidiaries, which have been prepared in accordance with financial reporting standards, including accounting guidelines promulgated by the Federation of Accounting Professions, regulations, and relevant announcements of the Securities and Exchange Commission. They consider the selection of appropriate accounting policies and consistently implement them, including adequate disclosure of important information in the notes to the financial statements, which have been reviewed by the auditor. The auditor then audits the financial statements and expresses opinions in the auditor's report, which is shown in the auditor's report for the year 2022 for the benefit of shareholders and investors with transparency.

The Board of Directors is responsible for overseeing and developing good corporate governance and code of conduct as well as

establishing an appropriate internal control system to ensure that accounting information is accurate, complete, timely and sufficient to maintain assets, as well as in order to avoid any dishonesty or any material irregularity. In this regard, the Board of Directors has appointed the Audit Committee, comprising independent directors responsible for overseeing the financial statements. Evaluate the efficiency and effectiveness of the internal control system and internal audit. The opinions of the Audit Committee have already appeared in this year's Audit Committee Report.

The Board of Directors is of the opinion that the Company's internal control and internal audit system can build confidence that the financial statements of Asia Metal Public Company Limited and its subsidiaries show financial position performance and cash flows are correct in essence according to financial reporting standard.

(MR. VEERACHAI SUTHEERACHAI)
