Report of the Board of Director

In 2022, wood base panel market conditions showed improvement compared to the previous year, as the global situation surrounding the COVID-19 pandemic began to improve, resulting in an overall economic recovery. However, political tensions between countries and concerns about inflation led to a temporary drop in demand that gradually returned to normal by the end of the year. Despite the many factors contributing to volatility, the company successfully analyzed, prevented, and addressed such challenges, resulting in sustained profitability.

The company remains committed to operating its business in line with its overarching goals, encompassing the economic, environmental, social, and governance aspects that are fundamental to achieving sustainable growth and generating returns for all stakeholders. The company places great emphasis on studying and refining its production processes, quality control measures, and product performance through collaboration with its subsidiaries to explore new products. Additionally, the company is dedicated to supporting personnel development and maintaining consistent environmental management standards. As a result, the company has consistently earned recognition and approval from both domestic and foreign partners.

Last year, the company received the SET Awards 2022 for Business Excellence in the category of Best Company Performance Awards among companies listed on the Stock Exchange of Thailand (SET) with a market capitalization of more than 3,000 million baht but not more than 10,000 million baht. This recognition is a source of great pride for our company and confirms the results of the determination and dedication of the employees, executives, committees, and all departments. Additionally, the company are honored to have been nominated for the CEO Awards category of companies listed on the Stock Exchange of Thailand (SET).

Finally, as a representative of the Board of Directors, I would like to express my appreciation for all these support and motivation to the company. These have driven us to search for a good quality product and keep improve our service continually, which help us grow repeatedly with confidence. I would like to express my gratitude to all interested person, shareholder, partner, executive officer, employee, and including financial institutions that always trusted and supported us. And please rest assured that we will always committing to operate this company with integrity and ethic, under the concept of good governance for the most benefit for all parties. And we hope that the company will receive a great support from everyone forever and ever.

-Suvit thaniyavarn-

Dr.Suvit thaniyavarn

Chairman of the Board of Directors

Message from the Managing Director

At the start of 2022, various policies aimed at controlling the spread of COVID-19 continued to impact the global economy. These measures included lockdowns and increased scrutiny of imported products in many countries, which had a negative impact on demand for products and international transportation. However, the situation gradually improved over the course of the year. On the other hand, there were instances of political tension between countries, which coupled with concerns about inflation, led to fluctuations in the prices of raw materials and chemicals used in the company's production. As a result, demand for the products decreased temporarily, but began to return to normal by the end of the year.

All factors present management challenges for the year 2022. The company has assessed the situation and is closely monitoring, ready to adjust our strategies and plans for various areas including management, production, sales, and marketing in response to the rapidly changing situation. Moreover, the company place great importance on studying and developing the production processes, products, and cost management to minimize any potential impacts on the company and all stakeholders. The company are committed to maintaining financial stability and consistent performance.

The company values and supports the professional growth of the personnel, enabling them to develop their knowledge, abilities, and skills in various fields continually. The company has communicated the anti-corruption policy and guidelines to the personnel to acknowledge the importance of strict compliance. The company operates by adhering to the principles of good governance, responsible management, and a sustainable society, community, and environment. Consequently, that overall performance for 2022 will continue to generate profits.

In 2022, the company has sales revenue of 4,174.96 million Baht, decreased from the year 2021 equal to 5.45 million Baht or 0.13%. The cost of sales for the year 2022 is 2,495.41 million Baht, increased 163.98 million Baht or 59.77% of sales revenue and the net profit is 682.39 million Baht, decreased from the year 2021 equal to 94.30 million Baht or 12.14%.

Moreover, the company subsidiary, S.Kleber Chemical Co., Ltd., contributes to business by supplying cost-effective glue raw materials and is a valuable source for research and development to improve product properties. Additionally, the company other subsidiary, SKN Kraft and Paper Co., Ltd., is involved in selling and distributing pulp from recycled paper, which will increase the variety of products in the future. These projects mark important steps for the company to increase competitiveness and drive us towards achieving the company's vision.

Lastly, I would like to express my gratitude to the Board of Directors, Executives, customers, shareholders, and partners who confide in our company operations, including our employees who perform duties and assignments with their responsibility. We are committed to utilizing our experiences and proficiency in working in the wood industry for over 30 years and adhering to transparency and good governance, including the Principles of Corporate Governance to drive the Company to grow steadily and sustainable together with the nature, community, and environment.

- Vichai Sangwongkit -

Mr. Vichai Sangwongkit
Managing Director

Part 1

Business Operations and Performance

1. Structure and Operations of the Company

1.1 Policy and business Operation overview

S.Kijichai Enterprise Public Company Limited was originally founded in 2010 under name as S.Kijichai MDF Company Limited. The company's main business activities are to manufacture and distribute MDF boards. In 2016, the company transformed into the public limited company. In 2017, the company has registered itself in the Stock Exchange of Thailand with paid-up capital of 800 million baht. The company operates under policy that focuses on creating quality products with international standards and managing in accordance with the good corporate governance as well as having responsibility to all stakeholders.

1.1.1 Vision, Mission, Goals, and Business operational strategies

Vision

The organization is determined to be one of leaders in manufacturer of wood-based panel in Southeast Asia. The company aimed to create the highest value to customer and related parties under good governance management principle. Additionally, the aim is for to obtain production standard that is high in quality for the sustainability of nature, environment, and society.

Mission

To achieve vision of the organization, the company have mission as follow:

- 1) Manufacture quality products under based on International for standardization
- 2) Aim to develop products focusing on added-value to natural substitution materials
- 3) Respond to the highest customer satisfaction in all aspects
- 4) Promote good management and business operation, develop employee to obtain moral and ethical principle as well as responsibility to society and environment as well as all related parties

Goals and Business operational strategies

With over 30 years of experiences and expertise in wood processed industry, the organization possesses an in-depth understanding of wood processed product. The business begins to expand by using wood resource and added-value from wood bits to wood-based panel. The company use new machine with advance technology for the manufacture process and imported directly from Germany. There is a strict manufacture quality control in every process. The company operates under policy that focuses in creating quality products from international standards. The company also determine to develop manufacture process to be shorter and control the amount used of raw materials to be utmost efficient. This is aim to achieve high quality MDF board that responds to needs of domestic and international clients. Moreover, the company also promote the development of employees to obtain knowledge, moral and ethical principles as well as responsibility toward society and environment.

1.1.2 Significant changes and development

Significant developments of the Company regarding business operation from the date of incorporation are as follow:

- 2010 : The company registered with registered capital of 600.00 million baht to operate in business to manufacture and distribute MDF board. The company began its operation in construction of factory and machine installment to manufacture MDF board at Klaeng District, Rayong province.
- 2011 : Received investment promotion certificate from the Board of Investment (BOI) and receive tax rights and other rights in related business to MDF manufacture business as stated in Investment Promotion Certificate.
- 2012 : Completed the process of machine installment and begins the test run.
- 2013 : Completed test run as the company began to operate commercially in manufacture and distribution of MDF board, the company starts to distribute to customer domestically and began to export to other countries.
 - : Certified with MDF board manufacturing standard and Thin MDF also received MUTU Certification International that is based on California Code of Regulation 93120.
- 2014 : Extraordinary session of shareholders 12/2014, the company has reached resolution to grant registered capital from 600.00 million baht to 720.00 million baht. The company agreed to release additional 1.20 million common shares with the nominal amount of 100.00 baht to propose to shareholders based on shares holdings.
 - : Received International Standardization ISO 9001:2008 which is the Quality Management System standards.
- 2015 : At the extraordinary session 4/2015, the company reached resolution to reduce paid-in capital from 720.00 million baht to 600.00 million baht.
- 2016 : Received International Standardization ISO 14001:2004 which is the Environmental Management System standards.
 - : At the extraordinary session 1/2016, the company reached resolution to incorporate the company as a public limited company and change the name to S.Kijchai Enterprise Public Company Limited. It is also registered from company limited to public company limited on 14 September, 2016.
 - : In addition, during the same extraordinary session, shareholders also reach resolution to increase registered capital from 600.00 million baht to 800.00 million baht. It also changes the nominal amount of shares from 100.00 baht to 1.00 baht. The release of 200.00 million more common shares with the nominal amount of 1.00 baht to propose to the common public for the first time and obtain common share of the company to registered in Stock Exchange of Thailand.
- 2017 : Received investment promotion certificate from the Board of Investment (BOI) for the second product line and receive tax rights and other rights in related business to MDF manufacture business as stated in Investment Promotion Certificate.

- : The company registered and began trade in Stock Exchange of Thailand for real estate and construction group in construction materials section to expand its production operation. It is also to pay a long-term loan and to use as working capital in business operations.
- : Received International Standardization ISO 9001:2015 which is the Quality Management System standards.
- 2018 : Received International Standardization of United States Environmental Protection Agency: US EPA which is the reduce Formaldehyde Emission from Composite Wood Product from MUTU Certification International.
- : Registered subsidiary company “S.Kleber Chemical Company Limited” with registered capital of 100.00 million baht to manufacture and distribute glue and chemical. The Common shares worth 10.00 baht per share with 100.00 million baht paid in capital. SKN is 100.00 percent shareholder.
- : Received International Standardization ISO 14001:2015 which is the Environmental Management System standards.
- : Completed installation and began the test run for second production line.
- : Started commercial production and distribution of MDF board from second production line
- 2019 : At the Board of Directors of 1/2019, approved “Solar Roof” Investment Project to generate electricity for use within the factory and the Company has signed Solar Roof Investment Project Agreement on 27 July 2019.
- : Received Green Industry Level 3 (Green System) standards. which is Systematic environmental management standards including monitoring, assessment, and review for continuous improvement.
- : Received FSC-COC (Chain of Custody) standards. Which is the Company’s Product are manufactured from wood of the responsible forest management.
- 2020 : The solar roof project completed installation of solar rooftop panels, started its operation and generate electricity to the system.
- 2021 : S. Kleber Chemical Company Limited (subsidiary) started commercial production of glue and chemicals.
- : Establishment of SKN Kraft and Paper Company Limited (subsidiary) to operate the business of recycle waste paper by separating the plastic and metal out, refining and drying to make recycled pulp and paper with the registered capital of 500 million baht, divided into 50,000,000 ordinary shares, at the par value of 10 Baht per share. SKN is 100 percent shareholder.
- 2022 : Received the SET Awards 2022 in the group of Business Excellence Awards, Best Company Performance Awards of company listed on the Stock Exchange of Thailand (SET) with a market capitalization of over 3,000 million baht but no more than 10,000 million baht and nominated outstanding CEO Awards of CEO of company listed on the Stock Exchange of Thailand (SET).

1.1.3 Whether the usage of fund received from the offering is in compliance with the purposes specified in the filing / the offer for sale of equity or debt instruments

The Company used the money in accordance with the notified purposes. The Company has not conducted fund raising or offered any other securities or instruments after the initial public offering

1.1.4 Pledge of Securities in the Registration Statement Form and/or Approval Criteria (if any) and/or Criteria to list securities of SET

- None -

1.2 Nature of business

S.Kijchai Enterprise Public Company Limited previously name as S.Kijchai MDF Company Limited registered as a company on 28 September 2010 by S.Kijchai group and Sahakij group and has registered as a public company on 14 September 2016. In 2017, the company has registered itself in the Stock Exchange of Thailand on 31 December 2018 with paid-in capital of 800 million baht. The main product of the company is Medium Density Fiber Board of MDF board.

1.2.1 Revenue structures

Main revenue of the Company is from proceeds of sales which is equivalent to 99 percent of the overall earnings. Approximately 95-98 percent of the proceeds of sales are export earnings. However, domestic earning is only 2-5 percent of the Company. The revenue structures for 2020 - 2022 are display in the table below.

Total revenue for 2020 – 2022

list of items	For the fiscal year ended December 31					
	2020		2021		2022	
	Million baht	Percentage	Million baht	Percentage	Million baht	Percentage
Revenue from sales	2,466.93	99.51	4,180.40	99.71	4,174.95	99.69
- Export	2,359.57	95.18	4,037.46	96.30	4,017.88	95.94
- Domestic	107.36	4.33	142.95	3.41	157.07	3.75
Other revenues	12.18	0.49	12.04	0.29	13.02	0.31
Total revenue	2,479.11	100.00	4,192.44	100.00	4,187.97	100.00

1.2.2 Product Information

1. Types of products and services

The Company manufactures and distributes Medium Density Fiber Board or MDF Board which is a Wood-based Panel in the type of Fiber Board. It is produced from using rubber wood fiber combining with binder substance which is Urea Formaldehyde Resin Chemical glue and compound into one board.

Wood-based Panel is a product that has been apply from knowledge and technology in making wood by enables the use of different parts of wood that cannot be use and press into a wooden board. This is to substitute for the use of natural wood which is difficult to find and high price in the present day. Types of popular Wood-based panel in the furniture industry can be divided into 3 main types 1) Plywood 2) Particle Board and 3) Fiber Board. MDF which is the main product of the company is considering a Fiber Board.

Fiber Board is made by using branches or tips of tree with high floss and grind into fiber and use the fiber to press into board with high heat. Chemical glue will help to bind wood into a board. Fiber Board can be divided into 2 types based on the density which are 1) Medium Density Fiber Board or MDF and 2) High Density Fiber Board). Both types of Fiber Board have different density so the strength in term of flexibility in angles may differ. Nevertheless, these two types of fiber board use the same production process. Thus, the machine of the Company will be able to adjust accordingly to manufacture both types of wood.

Medium Density Fiber Board or MDF is a Wood-based Panel with the quality close to the nature and can be applied in different purposes. This is especially with the manufacture of furniture such as cupboard, bed or office equipment. It can also be used in construction works, decoration works and kitchen utensils such as window frame, door frame, or wall.

High Density Fiber Board or HDF is a Wood-based Panel as well as MDF board, it has a dense texture and high strength, suitable for applications that require strong or impact resistant. It can also be used in construction, decoration, and kitchen utensils such as floor, partition wall, door, window, etc.

Thus, the characteristic of MDF and HDF as manufactured by the Company are as follow.

- Size of product : The size of product that can be manufactured by the Company is 8 feet width and 24 feet height and can be cut into smaller pieces based on customer purchasing orders.
- Product : The Company can adjust the thickness level of product from 1.0 millimeters to 30.0 millimeters. The groups of thickness are as follow.
- **Super thin board** has thickness from 1.0 millimeters to 2.4 millimeters
 - **Thin board** has thickness from 2.5 millimeters to 4.0 millimeters
 - **Medium board** has thickness from 4.1 millimeters to 9.0 millimeters
 - **Thick board** has thickness from 9.1 millimeters to 25.0 millimeters
 - **Super thick board** has thickness from 25.1 millimeters to 30.0 millimeters
- Special properties of the product: : The Company manufactures and distributes the special properties of the product as follows.
- High Moisture Resistant MDF/HDF Board
 - FSC MDF/HDF Board
 - Fire Retardant MDF/HDF Board (FR)
- Product safety standards : The Company uses Urea Formaldehyde Resin chemical glue which is a binder substance to compound fiber of the wood. The types of Urea Formaldehyde Resin that the Company use for its manufacture is categorize based on the standard in quantity measurement and the evaporation of Formaldehyde in the product based on environment standard for furniture products. There are 3 types of substance that cover the market almost around the globe as follow.
- European standards
 - E1 : Formaldehyde \leq 8 milligrams per 100 grams of board
 - E2 : Formaldehyde $>$ 8 milligrams but $<$ 30 milligrams per 100 grams of board
 - USA standards
 - CARB P2 : thickness \leq 8 millimetres, Formaldehyde \leq 0.13 ppm
 - CARB P2 : thickness $>$ 8 millimetres, Formaldehyde $<$ 0.11 ppm

Standards/certification and interests of the Company

The Company operates according to the policy that aim to create quality in products and sustainable working standards as well as development in international standard process as certified by several institutes to respond to the needs of domestic and international customers as follow.

Standards/Certifications

MUTU Certification International First certified on April 2013	Received production standards for Medium Density Fiber Board based on California Code of Regulation 93120 standards
MUTU Certification International First certified on April 2013	Received production standards for Thin Medium Density Fiber Board based on California Code of Regulation 93120 standards
ISO 9001:2015 First certified on December 2017	Received Quality Management System standards
MUTU Certification International First certified on March 2018	Received International Standardization of United States Environmental Protection Agency: US EPA from MUTU Certification International.
ISO 14001:2015 First certified on July 2018	Received Environmental Management System standards
Green Industry First certified on March 2019	Received Green Industry Level 3 (Green System) standards.
Bureau Veritas Certification First certified on August 2019	Received FSC-COC (Chain of Custody) standards.

Investment Promotion Certificate from the Board of Investment (BOI)

Investment Promotion Certificate Reference 60-0836-1-00-1-0 from the Board of Investment for the second production line.	The Company received Investment Promotion since 4 July 2017 and has received tax rights which consist of exemption of import duty for machine and juristic person income tax exemption with the total value of no more than 1,928,000,000 baht for 3 years from the start of the revenue from business and The Company also has been allowed to not acquire dividend from the business received from the Investment Promotion Certificate to calculate and pay for income tax for the whole period of the certificate juristic person income tax exemption. Thus, the Company received extension of tax rights for the second production line for additional 5 years after the first session of tax right has expired. Which received the right for 8 years since the start of revenue from business.
---	---

Innovation Development

The company places great importance on product quality and creating value for all stakeholders, conduct studies and develop our production processes for maximum efficiency to ensure that our acquired resources are used effectively. The company is continuously developing products to meet the needs and applications of customers. We also collaborate with government agencies and private sectors in research and development of by-products from our production process for the benefit of the community. Furthermore, the company conduct joint research and development of glue with the company's subsidiary to increase the efficiency of our production.

2. Market and competition

In 2022, the Company's marketing activities aim to operate in accordance with the vision and mission by focusing on sell products with special thickness or properties, increase the sale ratio of customer in new regions and the ratio of direct sales channels. Additionally, the Company also keeps monitoring the changing situation, or any situations that may affect sales and marketing both directly and indirectly. Including keep contact with customers through various channels according to the situation for a timely response.

Types of customer and target customers

The Company is determined to expand its customer base to cover all regions in the global stage by focusing on creating the highest value to customers in all aspects with good service and quality products from international standards. Most of the products of the Company are a Custom Made Order with small number of products that is manufacture for Made to Stock. The ratio of the import earning is equivalent to 95 - 98 of total earnings of the Company.

The ratio of the revenue from overseas sales and domestics sales for 2021 – 2022

The target group of the Company domestically and internationally can be divided into 3 main groups as follow.

1. **Wholesalers / Distributors** This group of customers will have their own customer base which could be large scale wholesalers who will works as an agent in importing and expand MDF board and other construction materials to their own customer base. This group of customers usually purchase high volume and purchase consistently.
2. **Furniture manufacturers and construction companies** will purchase MDF board as a raw material to produce products or use as materials for manufacture of furniture, interior decoration or as part of Built-in furniture.
3. **Wood laminate factory** will purchase MDF board to operate in additional production process by adding to wood surface with Veneers wood or Melamine board before distribute to furniture factory, construction companies, or other distributors.

Main group of the Company's customers are international clients especially in Asia Pacific region including Southeast Asia and the Middle East. Thus, for general international customers, the Company will set prices in 2 types which are. This is according to the needs of the customers.

- 1) **Free on Board Loading Port (FOB)** price which is price of products in the case that the Company will be responsible for shipping expenses until the freight
- 2) **Cost and Freight (CFR)** price which is price of products that including freightage.
- 3) **Other selling price** include Ex Works (EXW) and Free Alongside Ship (FAS)

The ratio of revenue from sale divided by incoterm for 2021 - 2022

Distribution channels

Distribution channels of the Company can be divided into 2 main channels which are through agents or direct sales to the customers. The ratio of distribution channel through agents and direct sales to customers is equivalent to 57 percent and 43 percent from overall earnings, respectively.

Thus, the Company has a strategic plan for sales and marketing activities by focusing on direct sales to both existing customers and new market through different distribution channels. The Company also continually studies and develop products to respond the various needs of customers. Including study new market in other countries or regions to seek for growing potential market of the MDF board product. As a result, in 2022 the sales in new regions have increased accordingly to the plan.

However, in 2020 and 2022, the Company did not sales through any agents more than 30 percent of the overall sales. The details are shown in topic 2 “Risk Management”, sub-topic 2.2.9 “Risk from dependency of major agents.”

The ratio of revenue from sale divided by Sale channel for 2021 - 2022

The ratio of revenue from sale divided by Country Distribution for 2021 - 2022

Competition strategy

With experiences and high expertise in wood-panel industry for more than 30 years, the Company has an in-depth understanding with wood-based panel manufacture. The Company uses new imported machine from Germany whom are leader in wood-based panel technology with advance and modern machine, strictly control in all productions process as well as determine to develop production process to be short and precise. The Company also controls the use of raw materials to be utmost effective and product development to increase competitiveness resulting in the Company ability to manufacture quality MDF board, delivers to the customers on time, and there're products to responds the various needs of customers, continues to maintain trading relations.

The company has arranged customer satisfaction assessment to use such information to improve products and services to respond the utmost needs of customers. In 2020, the Company has a good response from customers both in quality, delivery, packing, and service. This will ensure that the Company able to manufacture products and services to respond the needs of customers and create utmost value for customers.

Industry conditions

Wood-based panel industry

Wood-based panel is a raw material that can be used in different industries. The main industries are furniture industry and construction materials industry. For the construction materials, it will be used as floor, pillar structures, doorframe, and window frame. In general, wood-based panel is divided into 2 types based on the types of products which are Sawn timber and wood-based panel.

- 1) **Sawn Timber** is using large trunk to cut into an appropriate size and quality and press as well as coated with chemical solutions to maintain the quality before distribution. Sawn Timber produced from several types of perennial plants which is a hardwood; teak, Burma Padauk, rosewood, and Siamese Rosewood. The example of soft wood is rubber wood.
- 2) **Wood-based Panel** is a product that applied from knowledge and technology by using different minor parts of tree from the wood-based process such as wood bits and pieces that are too small to use as sawn timber including branches and tips to adjust into wood-based panel. This will be a substitute product as large piece of trunk is rare and has high price in the present day.

MDF industry

MDF board raises its popularity to manufacture furniture and decorations as it has closest quality to the natural wood with lower price when comparing to others natural wood. In 2022, the global situation surrounding the COVID-19 pandemic began to show signs of improvement, resulting in an overall economic recovery and increased liquidity. Despite the sustained high demand for MDF wood from 2021, there were negative factors such as prolonged international political tensions and inflation concerns. As a result, demand for MDF boards in the global market experienced a gradual decline in the latter half of the year, eventually returning to normal by year-end.

Competitive situations

The competition in MDF board industry is mainly a competition in the international market. This is because important markets of the Company as well as other manufacturers in Thailand are international customers. Thailand is also one of the key manufacturers and distributors of MDF in the global stages for several years.

MDF manufacturers in Thailand

Thailand is considered one of the leading countries for MDF board manufacturer to distribute in Southeast Asia and in the global stage. The main export markets for major manufacturers in Thailand are countries in the Middle East, Vietnam, Taiwan and United States of America.

According to the statistic collected and disclosed in website, it showed the amount of MDF board manufacture in Thailand that has continuously grow. As main factories of MDF manufacturers in the country usually will locate in the South or Eastern part of Thailand. This is because it is located near important rubber plantation. In the present day, the production capacity of 9 major distributors in the year of 2022 is equivalent to 5.19 million cubic meters per year. If taking into consideration of the highest production capacity of the Company that is equivalent to 500,000 cubic meters per year, it will be equivalent to 9.64 percent of the country's production capacity. Thus, the Company is a medium scale manufacturer in the industry. However, although the Company's production capacity is not high when compared to the major manufacturers of the country, but the company keeps developing competitiveness in order to produce quality products to responds the utmost needs of customers.

The production capacity of major MDF board manufacturers in Thailand

Company	Location	Highest manufacture volume in MDF production (cubic meter per year)
Vanachai Public Company Limited	Chonburi Saraburi Suratthani	1,380,000
Metro M.D.F Company Limited	Nonthaburi Kanchanaburi	1,200,000
Panel Plus Company Limited	Songkhla	670,000
Siam Fiber Board Company Limited	Songkhla	570,000
S.Kijchai Enterprise Public Company Limited (“the Company”)	Rayong	500,000
Seangsiri Parawood Company Limited	Surat Thani	270,000
Rayong MDF Company Limited	Rayong	256,700
Wise wood Company Limited	Phetchaburi	240,000
Agro Fiber Company Limited	Prachinburi	100,000
Total		5,186,700

3. Products and services acquisition

Production base and production capacity

At present, the Company has one MDF board factory which is located at Klaeng district, Rayong province with the total area of 211-2-11.6 rai. The factory production operation on a daily basis for 24 hours which consist of two production line.

1st Production line: The highest capacity of first production line is approximately 20,000 cubic meters per month.

2nd Production line: The highest production capacity is approximately 21,600 cubic meters per month.

In 2022, both of production lines used approximately over 90 percent of highest production capacity.

The main machine of the Company is import from Germany who is the leader in machine manufacturer of different types of Wood-based panel that is widely accepted globally. The machine of the Company is an automatic continuous process that uses advanced technology in production and control all command with computers. In addition, the machine manufacturer also has assistance team that supports for any issues or errors of the machine through 24 hours online system.

Previously, the Company prioritizes the quality and efficiency of the production process. There is also an improvement of machine and factory efficiency. It focuses on maintenance of the machine, security system and preventive maintenance. Additionally, the Company also continuously improve the production process by obtain production data in the past to analyze and improve production formula. This is so it will be suitable for the machine and products in each work and plan production by specify types of machine and types of raw material to create consistency to prevent the loss during production process and shorten the time of production process.

Production processes

The first step in the fiber board production process starts from preparing the raw material by bringing wood raw material in to Debarker machine to be left only the trunk. The trunk will be cut into chips and will be deliver to the steamed process to soften the wood and grind it to fiber. Urea Formaldehyde will be injected to bind wood fiber together as it will enter the process of Dryer as well as contaminant segregation process. This will reduce other contaminants to dry the wood fiber and reduce contaminant. Next step is to put into wood forming machine and to the process of pressing the wood with high pressure and heat. This will transform the wood fiber into a hard board (Master Board), then waiting for the board to cool down and harden. The next process will be sanding and cutting the board. There will be a quality control for the entire production process. The product that has passed quality control will be packed and store in a warehouse for further shipment.

Raw materials acquisition for production

The main raw materials that use to manufacturer MDF board are divided into 3 main types which are 1) rubber wood materials 2) chemical glue in the form of Urea Formaldehyde Resin and 3) other chemical substances such as Ammonium Chloride (adhesives agent), Urea substance and wax. The main materials of the Company such as raw materials, rubber wood, chemical glue and other substances can be found from resources in the country. The acquisitions for each type of raw materials are as follow.

1. Rubber wood materials

At present, almost every wood material of the Company for the manufacture of MDF board comes from branches and tips of rubber wood as well as other parts of rubber wood with the diameters between 2-6 inches. Additionally, beside rubber wood, other wood with high fiber including eucalyptus is also use to manufacture MDF board. Since rubber wood is an economic plant with high volume of planting in the country as well as in the Eastern region of the country, where the factory of the Company is located, the Company decided to use rubber wood as the main material in production.

The main source of rubber wood materials of the Company came from the rubber plantation in the Eastern part of the country. The area will cover from Rayong, Chantaburi, Trat, Prachinburi, Chachoeongsao, and Sra Kaeo. In addition, the Company also purchase rubber wood materials from other regions of Thailand to diversify the Company's raw material sources. At present, the Company is also open for purchase of wood branches and rubber wood tips from minor wholesalers, wood agents or sawmills. These groups will mainly take rubber plantation in each area and distribute to the Company. The process of purchase will be based on the policy in wood materials purchase which will take into consideration from the market price in the purchase of wood and the amount of production needs in each period.

2. Chemical glue materials

Urea Formaldehyde Resin is an important raw material for the production process of the Company. It is use as a fiber binder substance to press into a board. At present, there are several types of Urea Formaldehyde that the Company purchased for its production process. Each type will differ in term of Formaldehyde substance and other ratio of chemical solutions mix in the chemical glue. Glue is an important raw material and the quality of the chemical glue will affect directly to the efficiency and quality of the product. The present, the Company purchases Urea Formaldehyde Resin from S.Kleber Chemical Company Limited, the subsidiary. This is regarded as the Company's major supplier of chemical glue that can ensure the quality of chemical glue materials used in its production. In addition, the Company continues to purchase chemical glue materials from other major domestic manufacturers that have their own factories and has passed the quality control test. However, the factors that the Company uses to select the distributors will depend on the type of chemical glue that the Company need to purchase and the proposed price in each time. Each types of chemical glue is different and the purchase from different distributors will be store in a different places to prevent the chemical to be confound which may result in the quality of the glue and products.

3. Other chemical materials

There is a small ratio in production process for other chemical substances when comparing to wood raw material and chemical glue materials. The main materials are Urea and wax. Other materials that the Company uses can also be resource within the country. Nevertheless, the Company will have contact lists for each of distributors for each types of chemical substance. The Company will consistently compare the price and quality before making a purchase. Most chemical substances can be purchase from distributors in the country. Only some types of substance will need to be purchase from abroad which will also depends on the proposed price in comparison.

In 2022, the Company purchased chemical glue material from small group of large-scale manufacturer. There was a purchase of more than 30 percent from the overall purchases to some of the distributor. The Company may encounter the risk of distributor dependency for chemical glue. This can be shown in the details in topic 2 “Risk Management”, sub-topic 2.2.2 “Risk result from the deterioration of chemical glue materials and risk from the dependency on small groups of chemical glue distributors”. Beside glue material, the Company also depends on any supplier for wood materials equivalent to more than 30 percent of the overall purchases. This could result in the Company to encounter risk in dependency on small number of wood distributors. Additionally, the Company will also encounter other risks related to wood materials such as sufficiency of wood materials, price fluctuation, and product deterioration as shown in topic 2 “Risk Management”, sub-topic 2.2.1 “Risk factors related to wood materials.”

4. Assets Used in Business Operations

Main Fixed Assets and intangible assets in Business Operations of the Company and the subsidiaries

S.Kijchai Enterprise Public Company Limited

As of 31 December 2022, the Company has total the main fixed assets and intangible assets in the Company's operation shown as follows:

Item	Characteristics of Ownership	Net value (Million Bath)	Obligations
Land and Structures	The Company is owner	567.75	-
Machine and Equipment	The Company is owner	1,687.94	-
Total main fixed assets		2,255.69	
Intangible assets		14.67	

S.Kleber Chemical Company Limited

As of 31 December 2022, S.Kleber Chemical Company Limited has total the main fixed assets and intangible assets in the company's operation shown as follows:

Item	Characteristics of Ownership	Net value (Million Bath)	Obligations
Land and Structures	The subsidiary is owner	131.67	Collateral for loans from financial institutions
Machine and Equipment	The subsidiary is owner	175.74	Collateral for loans from financial institutions
Total main fixed assets		307.41	
Intangible assets		14.62	

SKN Kraft and Paper Company Limited

As of 31 December 2022, SKN Kraft and Paper Company Limited does not have total fixed asset and intangible asset.

Investment in subsidiaries and joint venture company Policy

The Company has the policy to invest in any subsidiaries and associates having relevant objectives of business operations or any entities supporting the Company's short- and long-term business operations and focuses on investment in any entities having growth potential and generating satisfying investment returns. For any investment in subsidiaries or associates, the Company has to take into account the necessity, suitability and benefit of the Company and its shareholders.

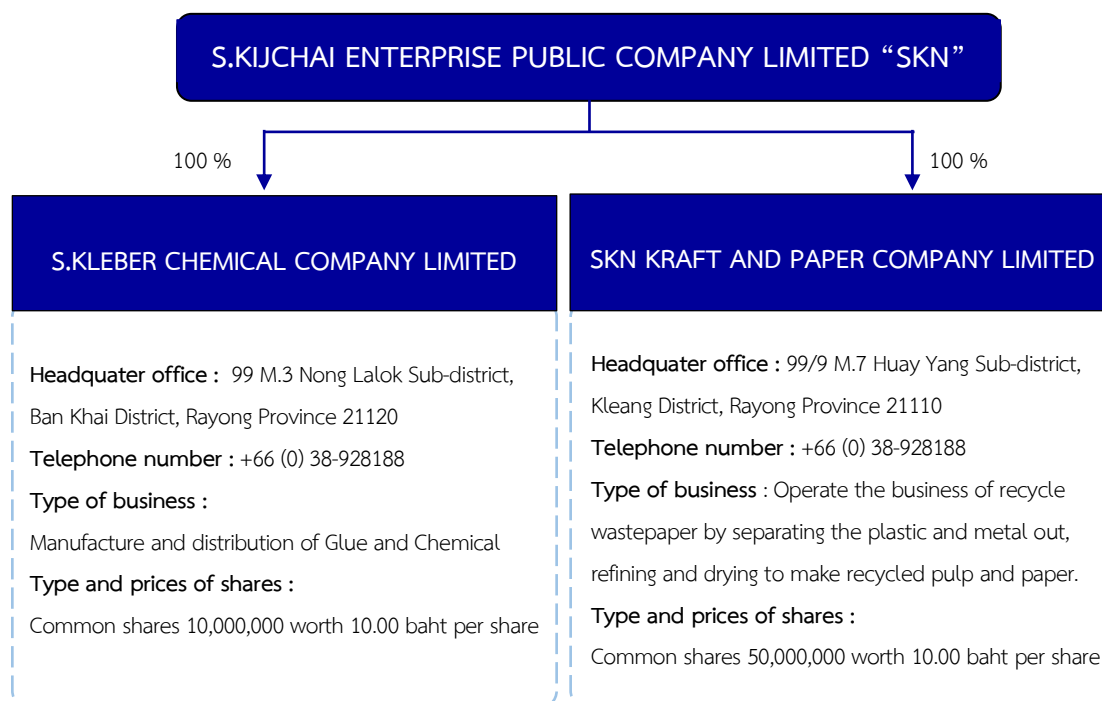

5. Incomplete Delivery

- None -

1.3 Shareholder Structure of the Group

1.3.1 Shareholder Structure of the Group

On 31 December 2022, the group company has the shareholder structure is as follow:

1.3.2 Person with potential conflicts who holds more than 10% of the shares are entitled to vote in subsidiary companies.

- None -

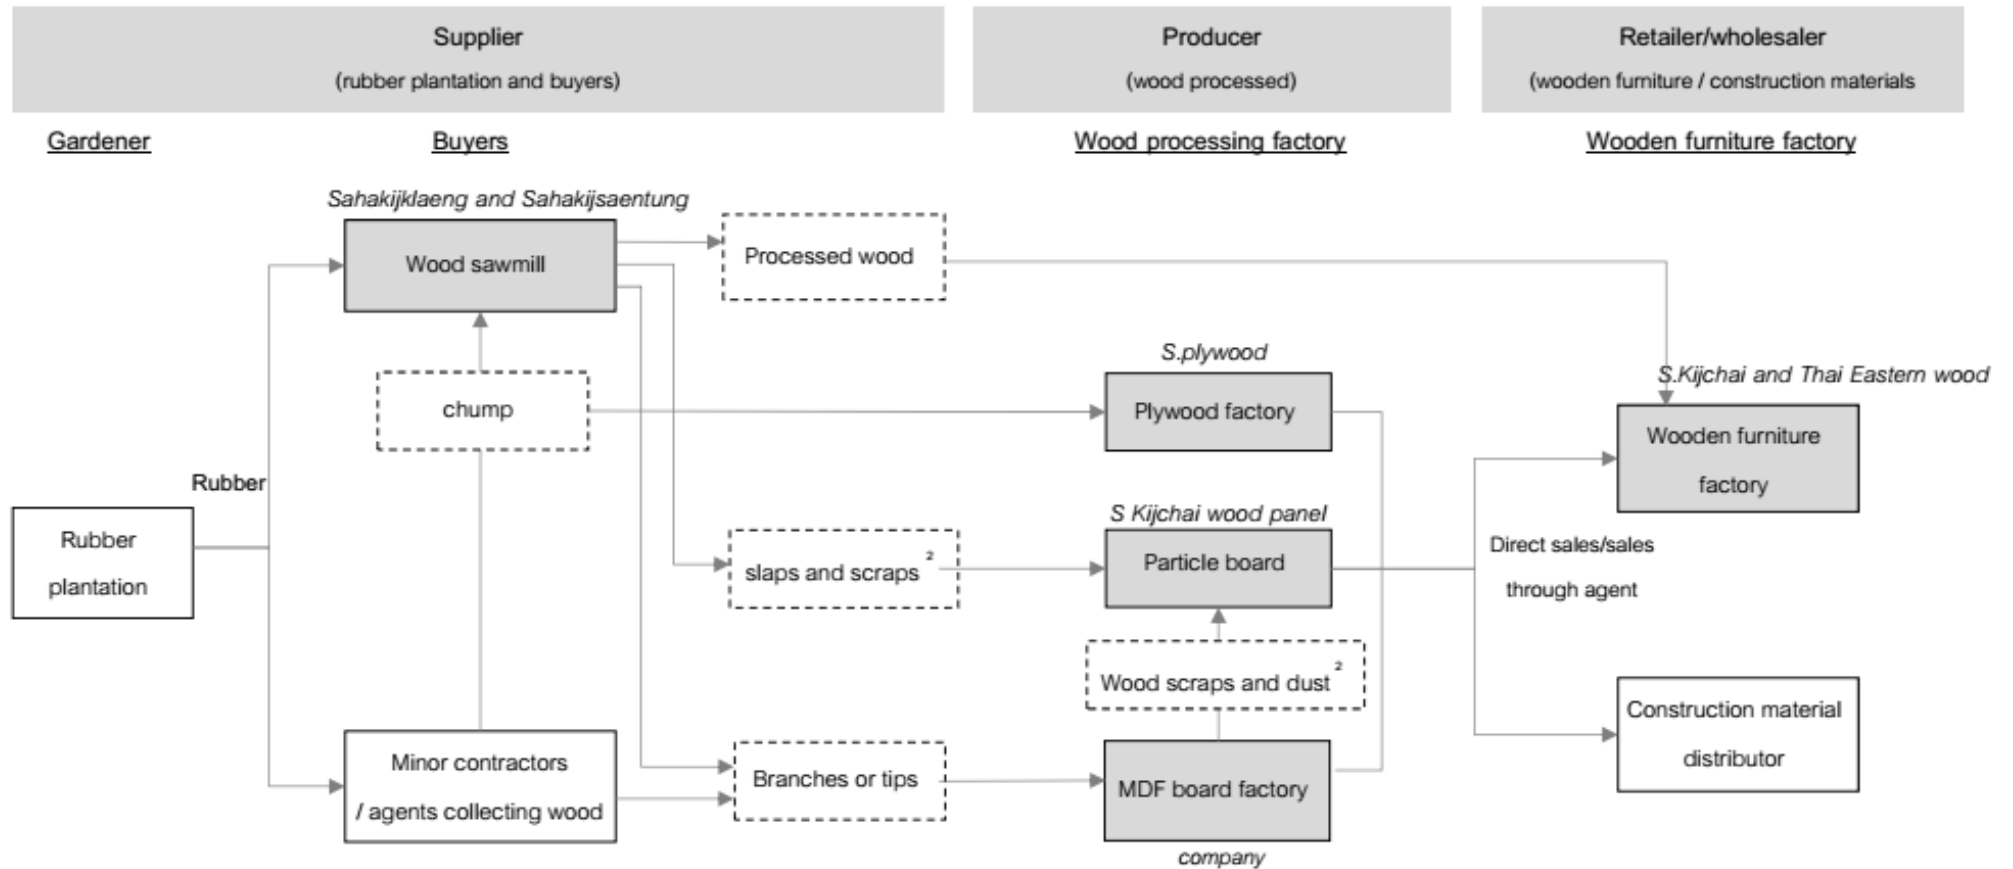

1.3.3 Major shareholder relations

Two main shareholder groups are S.Kijchai Group and Sahakij group. Thus, the details of each company that possess shares by S.Kijchai and Sahakij as well as rubber wood business operations in industry can be conclude as follow.

Company name	Year of establish	Type of business	Provinces	Shareholders (%)		
				S.Kijchai Group	Sahakij Group	Others
S.Kijchai Co., Ltd.	1981	Furniture manufacture and distribution	Rayong	100.00	-	-
Sahakijklaeng Co., Ltd.	1992	Rubber wood sawmill	Rayong	-	100.00	-
Thai Eastern Wood (1987) Co., Ltd.	1994	Furniture manufacture and distribution	Rayong	84.22	15.78	-
S.Kijchai Wood Panel Co., Ltd.	1997	Manufacture and distribution of Particle board and fuel briquettes	Rayong	100.00	-	-
S.E.P Worldwide Co., Ltd.	2002	Rubber wood sawmill	Phang Nga	33.33	-	66.67
Sahakij Saentung Co., Ltd.	2003	Rubber wood sawmill	Trat	-	100.00	-
S.Plywood Co., Ltd.	2004	Manufacture and distribution of plywood	Rayong	50.00	50.00	-
Klaeng Packing Wood Co., Ltd.	2004	Manufacture and distribution of pallet wood	Rayong	-	40.00	60.00
S.Kijchai Enterprise PCL. “the Company” ^{1/}	2010	Manufacture and distribution of MDF board	Rayong	52.90	25.75	21.36
S.Kijchai Bueng Kan Co., Ltd.	2015	Rubber wood sawmill	Bueng Kan	100.00	-	-
Sahakij Trat Co., Ltd	2016	Rubber wood sawmill	Trat	-	100.00	-

^{1/} Information of shareholding proportion as at 3 January 2023

Supply Chain diagram for rubber wood processing industry and S.Kijchai group and Sahakij group within the chain

Remark:

¹ Sawmills that contract directly from rubber plantation owner mainly will be a large scale sawmills. However, a smaller scale sawmills will mainly use the method of purchasing chump from minor contractors or agents.

² Wood scraps and bits are by-product of wood processed from sawmills and wood bits and dust is by-product of MDF board manufacture process.

This means current operated business that consists of company that obtain shares by S.Kijchai Group and/or Sahakij Group

1. Relations between company and shareholders group with related business operations

Two shareholders groups are S.Kijchai group and Sahakij group, both possess high experiences and expertise in different business related to rubber wood industry for over 30 years. Both groups operated wood sawmill business, which consist of, procure rubber plantation to eliminate rubber plant and segregate each part of rubber wood. The next process is to deliver raw materials to wood panel factory under the operation of company's shareholders that operate business in manufacture and distribution of plywood board, particleboard, and MDF board. The product received from wood panel factory will be further use as materials for furniture manufacture factory.

Business operations of Sahakij Klaeng and Sahakij Saentung consist of related business transactions

These two companies operated in business that interrelated by purchasing wood raw materials from Sahakij Klaeng and Sahakij Saentung. All two companies operated wood sawmill business by purchasing rubber plantation. They will use large trunks to use as raw materials for sawmill and use the other remnants such as branches and tips to distribute to the company. This is to prevent the conflict of interest between business transactions to other shareholder companies. S.Kijchai group and Sahakij group compile interrelate policy to use as a practical approach as well as processes to maintain and operate to ensure the confident that the business relations of companies under both groups will be transparent with clarity.

The company also compile policy regarding the purchase of wood raw materials to specify standardized method. This is to set standard price to every sellers without taking into consideration whether the seller is third party or company under the operation of third party or related companies. However, it is aim to consider the adequacy of raw materials and most importantly, benefits to the company.

Business operations and product line of S.Kijchai Wood Panel and S.Plywood possess some similarities

S.Kijchai Wood Panel and S.Plywood operate business that is similar to those of the company. Each company manufacture and distribute Wood-based panel in different types. The products of S.Kijchai Wood panel, S.Plywood and the company are particleboard, plywood board, and MDF board, respectively. Each product is often use in decoration and construction industry as well as furniture manufacture industry.

Nevertheless, if evaluate from the basis of business operations from both companies, it can be seen that in the future they might build business in manufacture and distribute MDF board to compete with the company. However, this has lower possibility that it could lead in the conflict of interest because each type of machine and type of board process differs. Thus, if S.Kijchai Wood Panel and S. Plywood begins operate MDF board business, they will need to install new machine, which will use high cost of investment. Moreover, S.Kijchai Wood Panel have cease production of particleboard since February 2016 and still do not have plan to re-manufacture particleboard. Additionally, S.Kijchai Group and Sahakij have policy to expand business and distribute fiber board through the company investment.

The company has created policy on Non-Competition Agreement with shareholders and board of every S.Plywood and S.Kijchai Wood Panel as well as parties in Sahakij Group whom are not part of shareholders as well as board members of S.Plywood and S.Kijchai Wood Panel. This is to show the intention in not operate or create business transaction in the future that will be compete against the company. The types of business are MDF board business, fiberboard business, and particleboard business. This is to prevent business competition, which could arise in the future.

2. Relations between the company and its related parties toward other companies that also obtain the name of ‘S.Kijchai’ similar to the name of the company.

The major shareholders of the company operate different types of business related to rubber wood panel for a long period. The company was established to operate on related business in several companies. Companies that S.Kijchai took parts in and became the major shareholder will consist of “S.Kijchai” after the name of the shareholder. Thus, the related companies will consist of “S.Kijchai” similar to the company that operate in the business regarding rubber wood panel industry: 1) S.Kijchai Co., Ltd. 2) S.Kijchai Wood Panel Co., Ltd. and 3) S.Kijchai Bueng Kan Co., Ltd.

However, although the name of three companies consist of “S.Kijchai” similar to the company but the relation of the stated company will be through the major shareholder and joint board members as well as interrelate business only. This is the regular business transaction of the company and it does not have further relation as a subsidiary or joint venture of the company.

Thus in 2022, the transactions achieved by the company toward related parties have rationale and necessity for specific transactions. The details are shown in topic 9 “Internal Control and Connected Transactions”, sub-topic 2.1 “Connected transactions between companies/related parties”.

1.3.4 Shareholders

1. Shareholder Structure

As of 31 December 2022, the company’s share distribution is as show in the following table.

Shareholders	Number of shares	% shares
Paid-up registered capital	800,000,000	100.00
Thai shareholders	794,869,200	99.36
- Juristic persons	411,091,302	51.39
- Natural persons	383,777,898	47.97
Non-Thai shareholders	5,130,800	0.64
- Juristic persons	5,107,700	0.64
- Natural persons	23,100	0.00

2. Name lists of the major shareholders

1. Name lists and acquired shares of the top 10 highest shareholder on Record Date on 3 January 2023

No.	Shareholders	Acquired shares	%
1	S.Kijchai Capital Co.,Ltd	400,800,000	50.100

20	Mr. Vichien Saengwongkij	20,000	2.00
Total		1,000,000	100.00

3. The Shareholding agreement

The Shareholding agreement between major shareholders and the Company will affect the Offerings or the management of the Company. The agreement consists of the cosigner companies.

- Name of contract : - Agreement on First Right of Refusal dated on 20 October 2016
- The agreement for First Right of Refusal will end on 18 November 2016
- The revision of agreement on First Right of Refusal on 18 November 2016
- Types of contract : Agreement on First Right of Refusal regarding the purchase of rubber wood

Partners of contract : - S.Kijchai Enterprise PCL. (“the Company”)

- Sahakijklaeng Co., Ltd
- Sahakij Saentung Co., Ltd
- SahakijTrad Co., Ltd *

(*The related cosigner agreed to have SahakijTrad Co., Ltd to end its role as a cosigner in the First Right of Refusal agreement. It is considered void and ineffective as a cosigner to SahakijTrad Co., Ltd, according to the end of cosigner agreement of First Right of Refusal agreement, dated 18 November 2016)

Types of relation : (1) Some of major shareholders within the Company is also a shareholder and/or board member of Sahakijklaeng Co., Ltd

(2) Some of major shareholders within the Company is also a shareholder and/or board member of Sahakij Saentung Co., Ltd

1.4 Registered Capital and Paid-up capital

The company has a registered capital of 800,000,000 baht and a paid-up capital of 800,000,000 baht, divided into ordinary shares 800,000,000 shares at the par value of 1 Baht per share, listed on the Stock Exchange of Thailand.

1.5 Issuance of other securities

The company did not Issuance of other securities

1.6 Dividend payment policy

The dividend payment policy of the Company and subsidiaries

The company and subsidiary company have a policy to pay dividend in the rate that is not less than 40 percent of net profit from specific business financial budget. This is after the tax deduction from juristic person and any substitution deduction based on the law. It is also base on the regulation of the company. Nevertheless, the rate in paying dividend from the policy can be change accordingly basing on business turnover, investment plan, future business expansion, market condition, suitability, and other factors related to business transaction as see fit by the board members. This will be under the condition that company will possess adequate amount of capital for business operation. In addition, that the operation will be utmost beneficial to the shareholders as see fit by company board members and/or company shareholders.

List of items	Year 2020	Year 2021	Year 2022
Earning per share	0.22	0.97	0.90
Dividend (Baht/share)	0.1687	0.28	0.36
- Interim Dividend Payment (Baht/share)	0.1687	-	-
- Annual Dividend Payment (Baht/share)	-	0.28	-
Dividend payout ratio (%)	80.86	30.00	40.10

2. Risk Management

2.1 Risk Management Policy and Plans

Realize the importance of the corporate governance code to drive the organization for stability and sustainable growth. Therefore, the Company deems reasonable to implement the risk management system in accordance with the operational scope and risk management procedures conforming with the criteria of the Committee of Sponsoring Organizations of the Treadway Commission (COSO), which is an international standard, so that related parties will have more understanding in the principles of risk management and properly apply them. The Risk Management Policy is determined as follows:

1. Determine risk management as the responsibility of employees at all levels who have to realize possible operational risks in both their own department and overall organization and also the importance of risk management to an adequate and proper level
2. Require all departments to have the duty of risk assessment, determination of risk indicators, risk prevention and mitigation or possible loss, regular monitoring and evaluation of risk management results and preparation of reports concerning risks according to the operational scope and risk management procedures
3. Determine risk management process as a part of decision-making and planning of strategies, plans and operations of the Company
4. When any employee found or knew about any risk possibly affecting the Company, he/she shall immediately report such risk to related parties in order to deal with it
5. Determined to continually support and promote knowledge and understanding in risk management process and approaches among executives and employees in order to encourage personal at all levels to realize the importance and participation in the organization's risk management

The Company is committed to preventing and reducing risks that may occur for the time being as well as in the future. The Company has analyzed, evaluated, prioritized, and reviewing risk factors that may affect Company's business operations in all aspects including setting up guidelines and monitoring risk management. In order to ensure that risk management is appropriate and adequate, the Company has hired an internal auditor to follow up and monitor the results.

2.2 Risk factor in business operations

2.2.1 Risk related to wood materials

Rubber wood is the main material of the company. It is agricultural products that use time to plant as well as log process. The collection of large number of wood to use as a raw material of the Company will need to use agent to collect wood. It will also need to use sawmill to seek and collect wood materials. The price of the wood materials may fluctuate depend on different factors from each period. Thus, the company will have risks related to wood material as follow

1) The sufficiency of wood materials

From the research, it is found that in the present day, the quantity of rubber wood material and the amount of log in an average per year in Eastern part of Thailand is sufficient. It will respond to an increasing demand of production. Additionally, in the neighboring region also grows rubber wood plantation that is high in volume and can be a secondary resource of raw materials in the future.

2) The dependency of small number of major wood materials supplier

In 2022, there is over 30 percent of wood materials purchase from any supplier combined from the overall purchase orders. The purchase is considered as a dependency on small number of major suppliers that could affect business turnover significantly. Nevertheless, the Company has contact additional large scale wood material supplier consistently. There is also a distinct regulation in the operation of purchase of wood materials as well as a memorandum on 'Right of First Refusal' to both suppliers. This is a measurement that will offer right to the Company to purchase wood materials from both suppliers first. This is to ensure that the Company will be able to continuously seek wood raw materials.

3) Related party wood supplier could result in disorder 'Arm's Length basis' if company have inefficient internal control

Nevertheless, the purchase of woods from all distributors will based on regulations for wood materials purchase to be fair and appropriate. There is also an appointed of wood purchase committee to investigate the process of wood materials purchase and report to board members in every quarter.

4) The fluctuation of wood materials price

The Company always following up with the situation regarding wood material price and the Company will set the price to purchase wood based on the information from wood materials market survey. The Company will also take into consideration the amount of wood that the Company need so the Company will be able to control the material cost to be appropriate and based on the market conditions. The Company will also adjust sales strategic to correspond to the fluctuation of conditions in material cost.

5) The deterioration of wood materials if kept for long period of time

Wood material is a type of material that circulate all the time as the Company also uses and manage in the 'First in First Out' method. Additionally, the Company also plans in advance; this is so the Company will acknowledge the amount of needed wood material to efficiently engage in Company's wood purchase plan.

2.2.2 Risk result from the deterioration of chemical glue materials and risk from the dependency on small groups of chemical glue distributors

The Company uses Urea-formaldehyde chemical glue as one of the main raw material to produce MDF board. The chemical glue has high risk to deteriorate if kept for long period of time. The Company also tends to purchase chemical glue from small groups of large manufacturers. This is due to the fact that the manufacturers occupy their own chemical glue factories so they will be able to distribute chemical glue certainly and in a short period. They also have an effective production plan result in the fact that the Company will be able to plan the purchase to correspond to the usage without storing high volume of chemical glue. However, S.Kleber Chemical Company Limited (subsidiary) is one of the chemical glue manufacturers capable of providing services glue raw materials according to the company's requirements. This ensure

that the Company will receive quality chemical glue and help to reduce the risk from few amount of chemical glue distributors dependency.

2.2.3 Risk results on dependency of export market that may concentrated only in some region

Main revenue of the Company derived from exporting product to abroad. The main export market of the Company is the Middle East. Thus, the Company will encounter risk if there is any incident that could affect the regional market to cancel or reduce the quantity of purchase orders from the Company or occurs the situation that unable to export products to those countries. Nevertheless, the Company has a market strategic plan to focuses on expand the sales to other countries and aimed to expand market in new countries to reduce the risk of dependency on export to certain countries.

2.2.4 Risk related to currencies exchange

Main revenue of the Company is from the export which will use US dollars as a main payment currency for the product. The capital cost and main expenses of the Company is in Thai baht. The Company will encounter risk from currency mismatch between revenue, capital, and expenses. Nevertheless, the Company uses several financial tools to manage the risk. The Company will also encounter risk if the currency exchange of the competitor countries of US dollars depreciates when comparing to Thai baht to US dollars. This will result in the exporter of certain country to have advantage from setting price based on the depreciation of the currency. This will affect the business operation of the company. Nevertheless, the Company also consistently following up with the currency exchange fluctuation, this will enables the Company to adjust to sales plan accordingly.

2.2.5 Risk from the expiration of tax right of Investment Promotion Certificate from the Board of Investment (BOI)

The Company receives tax right from the Board of Investment which is the tax exemption from juristic person. For the net profit from business turnover of the production line 2 for the total of 3 years, it expired on 30 September 2021. It values at no more than 1,928.00 million baht. In the present, the Company received extension of tax rights for additional 5 years after the first session of tax right has expired. Thus, if the Company completed the full amount of tax rights or the Investment Promotion Certificate has expired, this will result in the Company increased in tax expenses. It will also affect the net profit of the Company.

2.2.6 Risk from fires

One of the main material for production of the Company are wood and chemical glue as well as the product of the company is MDF board. This is a combustible material. Thus, the Company will encounter a risk of fire. Nevertheless, the Company has control measures for hot work and installed fire prevention system within its production line as well as install fire extinguishers in each area of the factory. There are also basic fire fighting training and consistent fire safety training. The Company also acquires a property damage insurance.

2.2.7 Risk from consumers use other wood substitution product

MDF board is part of Wood-based Panel which has a quality similar to sawn timber but in a lower price when in comparison. In the future, if there is a development in production technology that can produce product with similar quality as to MDF board in a price and capital cost that is lower. The Company could encounter risk from consumers to use other wood-based panel substitution product. This will result in the negative effect toward purchasing orders and the Company

business turnover. Nevertheless, MDF board has been research and developed for over 30 years and is prefer to use to manufacture furniture continuously. If the consumers prefer to use other substitution, the Company sees that the change will not be instant and the Company predicts that it will be able to adjust to correspond to the trend and direction of the industry.

2.2.8 Risk from ‘Countervailing Duty’ from countries that imported products of the company

At present, the import countries of MDF board announce a Countervailing Duty. India announces a Countervailing Duty for the Fiberboards import transactions from countries that export Fiberboards to India including Indonesia, Malaysia, Sri Lanka, Thailand, and Vietnam. Which the announcement of such measures has resulted in the importer of MDF have a chance to encounter a higher capital cost from additional tax. The Company will encounter risk from the importer from India that could cancel or reduce the amount of purchasing order from the Company. Nevertheless, the Company export to India in a ratio that is insignificant. Thus, the Company has joined to review on Countervailing Duty as above, which the Company is in the process of review according to such measure. So the company believes it will be able to reduce negative effect and able to manage the risk and will not significantly affect business operations of the Company.

2.2.9 Global Conflict Risk

Based on current international conflict situation, this heavily results in volatility and economic uncertainty which affects overall economy in terms of increasing energy costs and inflation. The Company is therefore at risk of being affected by such increase in production and transportation costs, as well as, negotiating with business partners to seek out guidelines various operations making it consistent with the situation in order that the Company can manage such risks in a timely manner and reduce the impact that may occur towards Company's operations.

2.2.10 Climate Change Risk

Climate change, in which the world's temperature is constantly rising, has resulted in a volatility and the severity of natural disasters increases including floods and droughts which may affect the production operations of the company, supply of raw materials and transportation-related activities. The Company has provided an emphasis and set out guidelines helping to achieve the goal of reducing greenhouse gas emissions both in terms of energy saving and alternative energy resources, and using innovative machinery and equipment that are friendly to the environment, etc.

2.2.11 Cyber Threat Risk

Nowadays, the advance in information technology has come with associated security risks arising from the complexity of systems and cyber-attacks in several diverse forms. Through business model and competitive environment, the company is required to use technology to increase work efficiency, and if the Company has insufficient or incomplete protection and security auditing systems, it may cause cyber threats that damage the Company and affect the confidence of its stakeholders. The Company has developed the security of the information technology system. In order to use the information system or network effectively, it is necessary to monitor and be aware of the new threats which include an information technology emergency incident plan, raising awareness of cyber security with all levels of employee in a continuous manner.

2.3 Risk in management

2.3.1 Risk from company structures that could lead to the conflict of interest

Two major shareholders are S.Kijchai group and Sahakij group also have a wood-based panel factors with a business operations similar to the Company which are 1) S.Kijchai Wood Panel and 2) S. Plywood. Each of the company manufactures and distributes different types of Wood-based Panel. However, business of both companies differs from the Company in several areas; for example, raw material, and production process, usage, and target groups. Additionally, the Company also has a Non-Competition Agreement to prevent competition in business that could arise in the future.

2.3.2 Risk from investment of shareholders

The Company could encounter risk from the fact that the Company has 2 groups of major shareholders which are S Kijchai group (hold shares in the name of S.Kijchai Capital) and Sahakij group. Both have combined shares more than 75 percent of the overall purchasable shares. Minor shareholder could encounter risk from the fact that major shareholders will be able to control the resolution of the shareholder meeting. Therefore, even though other shareholders attend the meeting with the right to vote, they will not be able to collect enough votes to result in a different resolution. Nevertheless, the Company has set organization structure to enable the investigation and weight the balance of power for the board members who are stakeholders. There is also an appointed audit committee to investigate the work and management of the Company in representative of the minor shareholders to prevent any risk that may occur.

3. Driving Business for Sustainability

3.1 Sustainability Management Policy and Targets

The Company operates its business based on awareness and accentuation on sustainable development by determining the approaches to achieve sustainable business development based on the vision, mission, goals, and business strategies covering economy, society, and environment under the principles of good corporate governance. For our business operations, we always adhere to transparency, safety and hygiene standards, peaceful coexistence with communities and maintenance and conservation of natural resources and environment. Hence, the Company determines the organization's sustainable development approaches as follows:

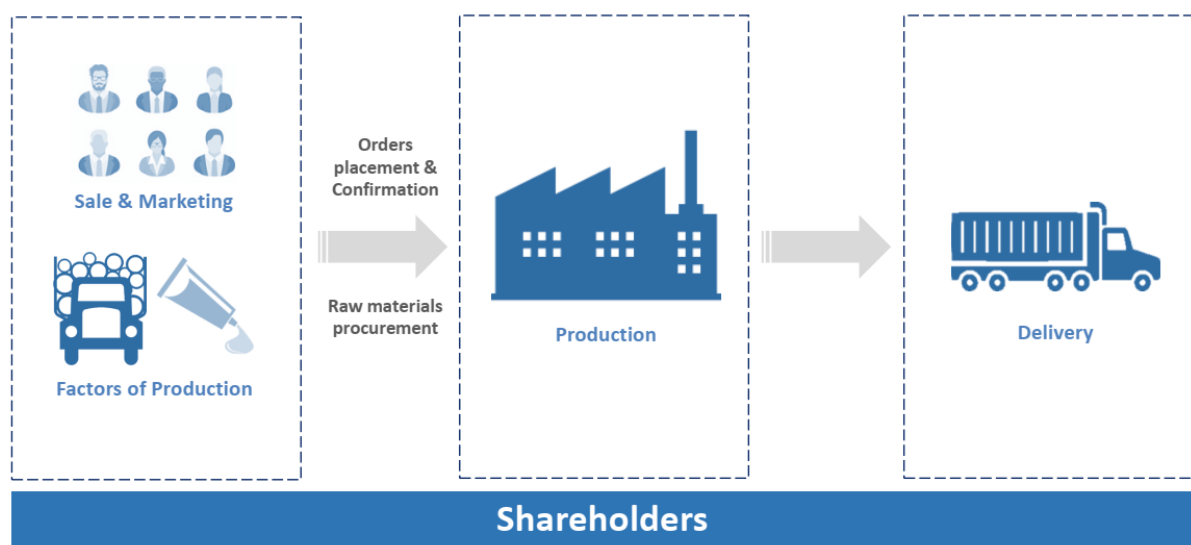

- Determined to enhance effectiveness of business operations for sustainable growth under the principles of good corporate governance
- Determined to achieve balanced business operations in terms of economy, society and environment as well as all stakeholders related to our business operations
- Determined to develop every process of business operation with social and environmental responsibility through efficient resource management and effective social and environmental impact management
- Determined to promote participation of stakeholders across all sectors by taking in account the human rights principles based on the sustainable development approaches

All executives and employees of the Company and subsidiaries are obliged to support, encourage and comply with the defined business development policy and framework for sustainability.

Industry, Innovation, and Infrastructure

- To encourage the industry to effectively use resources in a clean and environmentally friendly manner
- To use new, state-of-the-art machines for quality production to serve customer demands both domestically and internationally

Responsible Consumption and Production

- To effectively and sustainably manage and use natural resources
- Green Industry Level 3
- FSC-COC (Chain of Custody) The Company's products are made of woods that are responsibly managed in accordance with the FSC standard
- Waste reduction based on the 3Rs

Climate action

- Promote and campaign to reduce greenhouse gas emissions in the company's production process.

3.3 Sustainability Management in Environmental Dimensions

3.3.1 Environmental Policy and Practices Guidelines

The Company has the environmental policy and practices that have been properly implemented and maintained in consistent with the organization's goals and contexts and in support of the direction of the organization's strategy. The Company strictly complies with the legal requirements, improves and develops the production management system based on the awareness in environmental conservation, promotes and encourages all personnel to protect environment, efficiently use natural resources and serve society, reduces waste and pollution, continually prevents environmental impact, develops manufacturing process and products that have as least environment impact as possible and always maintains quality products.

3.3.2 Environmental Operating Results

The Company accentuates development of the quality of life of communities, society and environment in a sustainable manner by emphasizing on continuous development and improvement of manufacturing process and environmental management with social responsibility for both internal and external aspects. The objective of these operations is to ensure that the industry sector can sustainably cohabits with society, communities and the people. They include:

1. Energy Management

The Company ensures effective energy management through energy promotion or support programs such as solar rooftop project, use of LEDs, application of state-of-the-art production technology and energy efficiency campaigns such as switching off lights during lunch time and turning off computer monitors when not in use.

2. Water Resource Management

The Company always realizes and accentuates the importance of water resources to ensure the maximum efficiency of water resource consumption. We perform water resource management in according to the 3R principle (Reuse, Reduce, Recycle) and provide the control system to minimize possible impact on water sources and nearby communities by not releasing wastewater generated from production processes and various activities, including wastewater that has passed the company's wastewater treatment process, to outside the factory. We put in place a quality wastewater treatment system and install the Reverse Osmosis (RO) filtration system for water reuse.

3. Garbage, Waste and Pollution Management

The Company places importance on waste management from the production process to reduce waste and waste from the production process by reusing waste from the production process, such as reusing wood scraps, sawdust, and dust to use as fuel in production, etc. For non-recyclable waste, the company has managed by collecting and disposing properly and appropriately by using the services of legitimate carriers and disposers as required by law. In addition, the company studies and supports application of advanced production technologies to control and avoid generation of waste or pollution that may affect communities and environment. We regularly communicate the policy to all employees and ask for their cooperation.

4. Greenhouse gas emissions

The Company places high priority on managing and reducing greenhouse gas emissions resulting from its business activities. To this end, the company has developed an operational plan to gather data on its organization's greenhouse gas emissions. Beginning in 2024, the company will commence the process of data collection and calculation of its greenhouse gas emissions, with the aim of disclosing this information by 2025. The company is currently studying and preparing for the necessary actions to achieve this goal.

In addition, the Company has been accredited for ISO 14001:2015 (Environmental Management System) certification which is part of ISO 14000 Environmental Management Standard that provides organizations or divisions with the management guidelines to achieve the target of their own environmental policy. Moreover, the Company has been accredited for FSC-COC (Chain of Custody) standard which certifies that the Company is able to manufacture products made of woods that are responsibly managed in accordance with the FSC standard. The Company has also been accredited for the Green Industry Level 3 (Green System) certification by the Ministry of Industry which confirms that the Company has the systematic environmental management and regularly performs monitoring and review for continuous improvement. However, up until now, the Company has never been charged with any case concerning environmental pollution.

3.4 Sustainability Management in Social Dimension

3.4.1 Social Policy and Practices Guidelines

The Company is dedicated to sustainably develop our business along with social responsibility. Consequently, based on the Company's sustainable business development practices, the Board of Directors determines the Corporate Social Responsibility (CSR) Policy that requires the Company to operate its business under the principles of corporate governance and code of ethics along with environmental and social protection and responsibility by taking into consideration all related internal and external stakeholders, including shareholders, employees, customers, communities and overall society. The Company determines the corporate social responsibility practices as follows:

4. Management Discussion and Analysis: MD&A

4.1 Analysis of Financial Position and Operating Results

4.1.1 Overview of Operating Results

According to the performance in the year 2022, the Company has total revenue of 4,187.97 million baht, decreased of 4.47 million baht or 0.11% from the year 2021 mainly due to a decrease in sales volume and an increase in sales volume of products under FOB terms. Almost all of the Company's total revenue is sales revenue, which is 99.69% of the total revenue.

4.1.2 Analysis of operating results according to revenue structure

1. Revenues from Sales

Revenue structure from overseas and domestic sales for 2021 and 2022

Description	For the fiscal year ended December 31			
	2021		2022	
	Mil. Bt.	%	Mil. Bt.	%
Revenue from MDF Board				
- Revenue from overseas sales	4,037.46	96.58	4,017.88	96.24
- Revenue from domestic sales	142.95	3.42	157.07	3.76
Total revenue from sales	4,180.40	100.00	4,174.95	100.00

The Company has 4,174.95 million baht and 4,180.40 million baht of revenue from sales of the fiscal year 2022 and 2021 respectively, representing a decrease of 0.13% mainly due to a decrease in sales volume and an increase in sales volume of products under FOB terms. The Company's sales revenue can be divided into international sales and domestic sales revenue.

Most of sales revenue of the company comes from sales of MDF boards to overseas customers. In 2022 and 2021, the proportion of sales of MDF boards to foreign countries accounted for 96.24% and 96.58% of total sales revenue respectively. As the overseas MDF Board markets are much larger than the domestic market, therefore, the company place greater emphasis on conducting sales and marketing in overseas countries. The company has customer base across many regions around the world, including the Middle East and Asia.

Regarding domestic sales revenue, in 2022 and 2021, the company reported revenue of 157.07 million baht and 142.95 million baht from sales of MDF boards in Thailand, accounted for 3.76% and 3.42% of the total sales revenue of the company, respectively. This is also because the company focuses on marketing and distribution in international markets. As a result, the percentage of revenue from sales in the country was relatively small when compared with the overseas sales of MDF Board.

2. Other revenues

The company has other incomes from profit from electricity sales, revenues from deposit interest, revenues from sales of by-products from production and revenues from scrap sales. In 2022 and 2021, the company reported other income of 13.02 million baht and 12.04 million baht respectively. The transactions incurred as the company sold excess electric power to nearby related companies, revenues from deposit interest, revenues from scrap sales and sales of by-products from production such as sawdust.

3. Costs and expenses

Costs and Expenses for 2021 and 2022

Description	For the fiscal year ended December 31			
	2021		2022	
	Mil. Bt.	%	Mil. Bt.	%
Cost of sales	(2,331.44)	70.60	(2,495.41)	72.35
Selling expenses	(792.46)	24.00	(778.82)	22.58
Administrative expenses	(166.68)	5.05	(171.11)	4.96
Financial costs	(11.79)	0.36	(3.93)	0.11
Total costs	(3,302.37)	100.00	(3,449.27)	100.00

The Company's cost of goods sold for the fiscal year 2022 is 2,495.41 million baht, which is an increase of 163.97 million baht, representing 7.03% of increase cost of goods sold. This was mainly due to an increase in the prices of the main raw materials used in production.

In 2022, the selling expenses is 778.82 million baht, which is a decrease of 13.64 million baht, representing a decrease of 1.72% when compared to the previous year. This was mainly due to the volume of sales according to FOB conditions increased, along with decreased sea freight prices. As a result, the selling expenses decreased when compared to the previous year.

In 2022, the administrative expenses is 171.11 million baht, which is an increase from the previous year of 4.43 million baht, representing 2.66%. This was mainly due to foreign currency exchange losses, which increased from the previous year.

In 2022, the financial cost is 3.93 million baht, which is a decrease from the previous year of 7.86 million baht, representing a decrease of 66.66% when compared to the previous year. This was mainly due to the company has payment of principal made per schedule.

4.1.3 Financial position

1. Total assets

The company's major assets as at December 31, 2021 and 2022

Description	at December 31			
	2021		2022	
	Mil. Bt.	%	Mil. Bt.	%
Cash and cash equivalents	484.15	11.76	1,151.62	26.01
Trade and other receivables	284.49	6.91	81.14	1.83
Inventories – net	284.50	6.91	296.93	6.71
Property, plant and equipment – net	2,954.19	71.74	2,750.50	62.11
Other assets	110.86	2.69	147.89	3.33
Total assets	4,118.19	100.00	4,428.08	100.00

As at December 31, 2022 and 2021, the company had total assets of 4,428.08 million baht and 4,118.19 million baht respectively, representing an increase of 7.52%. The company's total assets comprised of property, plant and equipment, which accounted for approximately 62.11% and 71.74% of the total assets of the Company in 2022 and 2021 respectively. Significant changes in total assets were as follows:

1. The majority of the Company's cash and cash equivalents are bank deposits and in-transit payment transfer for the goods of international customers.
2. Trade receivables accounted for 88 % of total trade and other receivables. Meanwhile, other receivables of the company such as accrued revenue from electricity sales, representing about 12 % of total trade and other receivables. Trade and other receivables of 2022 decreased from 2021, accounting for 250.62% This results from product delivery cycle and goods payment during the year.
3. Inventories – net of the company consist of finished products, work in process, raw materials, spare parts and supplies. When 2022 is compared with 2021, regarding the inventory, there have been slightly increasing changes, resulting from increasing spare parts and supplies mainly.
4. The company's net property, plant and equipment are decrease primarily due to depreciation in the value of the aforementioned assets.
5. Other assets in 2022 have increased from the ones in 2021, accounting for 33.40%. The main reason is due to the subsidiary company which is S.Kleber Chemical Co., Ltd has deferred tax assets from setting tax losses for exercising tax deduction rights according to the conditions of the Revenue Department.

2. Total liabilities

he company's major liabilities as at December 31, 2021 and 2022

Description	at December 31			
	2021		2022	
	Mil. Bt.	%	Mil. Bt.	%
Current liabilities				
Short-term loans from financial institutions	27.32	2.86	37.15	4.59
Trade and other payables	468.61	49.01	379.38	46.90

Liabilities due within one year	66.04	6.91	40.99	5.07
Other current liabilities	16.06	1.67	8.36	1.02
Total current liabilities	699.65	73.17	570.98	70.58
Non-current liabilities				
Long-term loans from financial institutions	93.88	9.82	52.97	6.55
Long-term leases liabilities	0.33	0.03	0.23	0.03
Deferred income tax liabilities	157.88	16.51	177.06	21.89
Employee benefits obligation	4.32	0.45	7.71	0.95
Non-current liabilities	256.41	26.82	237.97	29.42
Total liabilities	956.06	100.00	808.95	100.00

As at December 31, 2022 and 2021, the Company posted total liabilities of 808.95 million baht and 956.06 million baht, representing a decrease of 15.39%. Most of the company's liabilities in 2022 is trade and other payables or about 46.90% of total liabilities. Significant changes in total liabilities were as follows:

1. The short-term loan from financial institutions of 2022 has increased from the previous year. The main reason is due to the subsidiary company which is S.Kleber Chemical Co., Ltd has used the short-term loan from financial institutions as circulating funds for operation.
2. Trade and other payables of 2022 have decreased from the previous year due to the due debt payment made according to the payment term mainly.
3. Advance payment for goods received in the fiscal year 2022 decreased, mainly due to payment conditions and product delivery cycle
4. Liabilities due within one year and long-term loans from financial institutions in the fiscal year 2022 have decreased from the previous year of 65.96 million baht, representing 41.25%. Mainly due to the loan payment per schedule made by the company.

3. Shareholders' equity

Shareholders' equity of the company as at December 31, 2021 and 2022

Description (Unit: Mil. Bt.)	at December 31	
	2021	2022
Share capital		
Registered capital	800.00	800.00
Issued and paid-up share capital	800.00	800.00
Premium on share capital	1,225.98	1,225.98
Retained earnings		
Appropriated - legal reserve	80.00	80.00
Unappropriated	1,056.15	1,513.15
Total shareholders' Equity	3,162.13	3,619.13

As at December 31, 2022 and 2021, the Company had total shareholders' equity of 3,619.13 million baht and 3,162.13 million baht respectively, representing an increase of 14.45%. The main reason was increased in retained earnings from the performance of 2022 resulted in an increase in unappropriated retained earnings from the previous year.

4. Liquidity

1) Cash flow

Description (Unit: Mil. Bt.)	For the year ended December 31	
	2021	2022
Cash and cash equivalents at the beginning of the year	113.53	484.15
Net cash provided by operating activities	1,073.84	977.59
Net cash used in investing activities	(147.02)	(25.80)
Net cash used in financing activities	(556.20)	(284.32)
Cash and cash equivalents at the end of the year	484.15	1,151.62

The company's net cash flows provided by operating activities for the years ended December 31, 2022 and 2021 was 977.59 million baht and 1,073.84 million baht respectively. Change of cash flow from the above mentioned activities decreased mainly due to decrease in profit from business activities in 2022.

The company has the net cash flows used in investing activities of 25.80 million baht and 147.02 million baht for the years ended December 31, 2022 and 2021 respectively. Changes of cash flow used in the investment activity decreased from 2021, mainly due to S.Kleber Chemical Co., Ltd., has completed construction in first half of 2021. This resulted in decreased of net cash flow used in investing activities of the year 2022.

The Company has the net cash flows used in financing activities for the year ended 31 December 2022 and 2021, accounting for 284.32 million Baht and 556.20 million Baht respectively. Changes of the mentioned cash flow were mainly due to the fact that in 2022, the Company had decreased obligations to pay back the loan borrowed from financial institutions. As a result, the total loan repayment has been decreased.

2) Liquidity Ratio

Description	2021	2022	Increase/ Decrease
Liquidity Ratio			
Liquidity ratio (times)	1.61	2.86	1.25
Quick ratio (times)	1.10	2.16	1.06
Cash flow liquidity ratio (times)	1.23	1.54	0.30

As of 31 December 2022 and 2021, the company's liquidity ratio and quick ratio have increased compared to the year 2021 due to cash and cash-equivalent increased and trade and other payables decreased from debt payment made according to the payment term, while an increase slightly in cashflow liquidity ratio when compared to the previous year was primarily caused by decrease in average current liabilities from repayment for long-term loans from financial institutions due within one year.

3) Other important ratios

Profitability ratio and efficiency ratio

รายการ	2564	2565	เพิ่มขึ้น/ลดลง
Profitability Ratio			
Gross profit margin (%)	44.23	40.23	(4.00)
Operating profit margin (%)	21.51	17.73	(3.78)
Net profit margin (%)	18.53	16.29	(2.23)
Return on equity (%)	28.00	20.13	(7.88)
Efficiency Ratio			
Return on assets (%)	20.05	15.97	(4.08)
Return on fixed assets (%)	32.33	31.05	(1.28)

Profitability Ratio

- Gross profit margin, Operating profit margin and Net profit margin decreased by 9.04%, 17.57% and 12.03% respectively, mainly due to a decrease in gross profit, operating profit and net profit.
- Return on Equity Ratio decreased mainly due to a decrease of net profit in 2022.

Efficiency Ratio

- Return on asset ratio and return on fixed asset ratio decreased due to the Company's net profit decreased from the previous year.

Financial Policy Ratio

Description	2021	2022	Increase/ Decrease
Financial Policy Ratio			
Debt to equity ratio (times)	0.30	0.22	(0.08)
Interest coverage ratio (times)	94.27	272.41	178.14
Coverage ratio (times)	2.63	3.06	0.42
Dividend payout ratio	29.87	42.20	12.34

- Debt to equity ratio decreased mainly due to decrease in trade and other payables and long-term liabilities from financial institutions, while shareholders' equity increased from increase in Unappropriated retained earnings in 2022. Hence, it resulted in a decrease in debt to equity.
- Interest coverage ratio has increased mainly due to the interest expenses of 2022 decreasing significantly from the previous year, resulting from paying back the principal by the company according to the repayment schedule.
- Coverage ratio has increased because in 2022 the company made an investment through property purchase reduced from the previous year. This is mainly due to the subsidiary company which is S.Kleber Chemical Co., Ltd completed the construction work at the beginning of 2021 and the company had decreased obligations to repayment for long-term loan from financial institutions.
- Regarding dividend payout ratio, the Board of Directors' meeting held on 27 February 2023 resolved to the dividend payment at the rate of 0.36 baht per share, totaling 288.00 million baht, representing dividend payout ratio of 42.20%.

4.1.4 Remuneration to Auditors

The company has paid the following remunerations to auditors:

(Unit: Million Baht)				
Fiscal Year	Audit Office	Audit fees	Other service fees	Total
2021	EY Audit Co., Ltd.	1.82	0.04	1.86
2021	EY Audit Co., Ltd.	2.23	0.05	2.28

4.1.5 Investment expenses in 2022

Regarding the project of investment in the subsidiary to produce pulp and paper from used paper, the project value accounts for 1,500 million Baht. The task of finding a location for building the factory and suppliers has been carried out. The project is in the process of applying for a related license in order to operate according to the framework.

Sources of investment

1. Loans from financial institutions.
2. Investment fund from the Parent company.

4.1.6 Long-term debt

As of 31 December 2022 and 2021, the Company had long-term loans from financial institutions (including the amount due within one year) equal to 93.96 million baht and 159.92 million baht respectively. The long-term loans from financial institutions have decreased due to repayment per schedule.

4.2 Factors affecting future operating results

As most of the company's sales revenue comes from overseas markets, therefore, the important factors affecting the change of the company's sales are as follows: 1) Sales volume of MDF Board in various regions, which are major markets including the Middle East and Asia may increase or decrease according to the demand for MDF boards at different periods. 2) Selling prices are in US dollar which is the main currency used by the company. Prices in US dollars are varied from market to market, depending on the demand for MDF Boards and competition among MDF board exporters and manufacturers in different countries. As well as the global political and commercial situation that may impact the demand for the product. 3) Exchange rate, as most of the company's sales came from exports to overseas countries, almost all of the company's sales are in US dollars. Therefore, assume that prices in the world market remain unchanged, if Thai baht has depreciated against the US dollar, the company's sales revenue in Thai baht would increase. On the other hand, if Thai baht has appreciated against the US dollar, the company's sales revenue in Thai baht would decrease. 4) Trade measures regulated by the countries of MDF board importers, such as Anti-Dumping, Countervailing Duty etc., which may result in an increase of import duties in MDF boards to Thailand. This will affect the competitiveness of Thai manufacturers in the global market.

Prices of raw materials used in production, such as wood, adhesives and other chemicals etc. are costs which are major factors affecting increase or decrease of production costs. The prices of such costs are in line with market demand and fluctuations in global oil prices which may lead to higher raw material costs and cost of sales accordingly. Nonetheless, the company can effectively manage production costs and implement raw material utilization plan in order to maintain operating results of the company to be in satisfactory level.

4.3 Highlight of financial performance

4.3.1 Financial budget

Thus, the board of directors will specify practice approach to ensure confident that shareholders will have protection of their basic rights. The example is the Company will consistently notify all shareholders the progress of business operation by notify the shareholders directly or through the Stock Exchange of Thailand or other channels.

Shareholders meeting

The Company will hold common meeting for shareholders within 120 days from the date of the closing account of the Company. For other shareholder meeting which known as the common meeting, the Company will hold additional meetings based on necessity and suitability. The Company allowed shareholders to submit proposal of agendas and nomination of director candidates prior to the meeting. Which be informed through the Stock Exchange of Thailand channels and company’s website. Thus, the Company will also have legal advisor with a responsibility to provide legal opinions and works as agent in inspecting vote throughout the meeting. The Company will also have meeting agenda on complicated transactions, which the Company will invite financial advisor to take part of the meeting. This is to notify information to the meeting and answer questions from the shareholders.

In addition, the Company assigned Thailand Securities Depository Co., Ltd. (TSD) as a securities registration of the Company to distribute meeting invitations to shareholders. The Company will post invitation and meeting documents on company's website thirty days prior to the meeting date and also publish invitation on a newspaper not less than three consecutive days prior to the meeting date, so the shareholders can study an information in advance. The meeting invitation will mention a venue, date, time, meeting agendas, related information, objectives, and reasons of each proposed agenda and also include board of directors' opinion in all agendas.

Meeting operations

The Company will open registration for shareholders two hours before the meeting and will open for registration until prior to the discussion of the last meeting items. The Company will appointed staff to welcome the shareholders as well as facilitate shareholders throughout the meeting. Before the meeting, the Company will provide suggestions to board of directors, executive committee, financial auditors, legal advisor and will notify shareholders of their rights based on the regulation of the Company. The meeting will consist of voting process and rights to vote according to types of share. After meeting items information has been provide, the Chairman of the meeting will open opportunity for shareholders to give opinions and ask questions to the meeting based on that particular meeting item equally with appropriate time for a discussion. For voting item, the board member of the Company will appoint shareholders to vote for individual board members.

Minute of Meeting and disclosure of shareholders meeting resolutions

The meeting minute of shareholder will be compiling with accurately and completely so the shareholders can verify the information. The meeting minute will consist of name list for board members who attend the meeting as well as board members who are absent from the meeting. It will also notify voting process and approaches to display voting scores to the meeting before continue the meeting as well as details of meeting resolution. It will also consist of conform votes and dissent votes and abstention. In all meeting items, there will be voting as well as conclude of opinions, questions and answers that is main point that is relating to each meeting item. The Company will publish voting results of each meeting items of the meeting through company website or through the Stock Exchange of Thailand.

In the 2022 Annual General Meeting of Shareholders, the company has given the opportunity to the shareholders to propose the agendas and nominate candidates to be elected as directors of the Company in advance from 1 October 2021 to 31 December 2021. The Company held the Annual General Meeting of Shareholders on 26 April 2022 at 14.00 hrs., through Electronic Meeting (E-AGM), which in accordance with criteria specified in the laws on electronic meeting from the registration process, vote counting, question submission, and data processing to ensure clarity, transparency, and auditability.

2. Equitable Treatment of Shareholders

The Company is aware of equal and fair treatments for all shareholders, whether they are major shareholders, institutional shareholders, foreign investors, or minor shareholders in order to supports fair and equal treatment to all shareholders and specifies guideline as follow.

Provide agenda before the meeting

The Company prepares the invitation and related documents in both Thai and English versions and distribute to shareholders. The said documents are also published on the Company's website prior to the meeting in accordance with the period as required by the relevant laws and rules. Thus, the Company will notify shareholders the meeting rules and voting rights prior to the meeting, following the details based on the topic "rights of shareholders"

Protect rights of minor shareholders

The Company offers opportunity for minor shareholders to have their rights in proposing meeting items as well as proposing name of the board members for election of Nominating and Compensation Committee prior to the date of ordinary meeting of shareholders in accordance with the criteria, conditions, and methods determined by the Company and/or the related laws. In this regard, the criteria, channels, period, and result of proposal are announced in the Company's website and that of SET. Additionally, in a case where shareholders could not attend the meeting in person, the shareholder can appoint other person and/or the Company's Independent Director to attend the meeting and cast vote on his/her behalf. The Company provides along with the invitation the Letter of Proxy in a format that the shareholders can instruct vote casting. In addition, required documents and evidence as well as proxy authorization process are clearly explained for shareholders to ensure the right documents are prepared. The Company invited independent parties to participate in the audit of vote casting in the meeting of shareholders and disclosed in the minutes of meeting of shareholders.

Protection of internal information

In order to the directors, executives and employees of the company compliance with the regulations and articles of The Securities and Exchange Commission, Thailand (SEC). The Company focuses on development of employee knowledge, ability and skills and thoroughly and consistently provide opportunity of all employees. We strictly comply with the applicable laws and regulations concerning employees.

6. Employee Practice Policy

All employees shall perform their duties with determination, integrity, transparency and accountability. They shall refrain from giving any high-value gift to their superior or accepting any gift from their subordinate. The superior shall respectfully behave towards other employees and employees shall not do any act in a way that is disrespectful against their superior. All employees shall respect the rights of other employees and management, always be disciplined and comply with the Company's rules and regulations and morality, whether specified in writing or not. They should create and maintain harmony and solidarity among employees and avoid doing any act that may affect the Company's reputation and image or cause subsequent problems against the Company.

7. Employee Compensation Policy

Determination of employee compensation is based on the compensation and benefit calculation systems under the business standard. Similarly, employee skill development and motivation of employee morale are conducted to ensure effectiveness and efficiency of employee performance. In addition, the Company enables all employees to provide their opinions on operational improvement and encourages strong relationship among the organization's departments.

8. Relevance of Practices and Laws

Any practice of the Company shall be properly improved to conform with the applicable laws.

9. Customers

The Company is determined to deliver quality products and services that meet or exceed customer expectations under the fair conditions and provide customers with accurate, adequate and update product and service information without any exaggeration that misleads customers about the quality of such products or services. We always keep customers' confidentiality and do not improperly use such confidential information for our own or related parties' interest. We communicate with our customers in a polite, effective and trusted manner and rapidly respond to customer demand. We provide the system and channels that enable customers to effectively submit their complaints on the quality and safety of products and services.

10. Conflict of Interest

The directors, executives and employees shall avoid doing any act causing the conflict of interest against the Company. The Company shall control and prevent any conflict of interest among related parties. Any executive or employee shall not be entitled to do any act contrary to the applicable laws and the Company's practices. Any act and decision of the Company's executives or employees shall always have the first regard to the stakeholders' interest than their own interest. In this case, if there is any conflict of interest or when any director, executive and employee involve in any situation leading to the conflict of interest, such person shall notify the superior or related department in order to resolve the situation in a fair and transparent manner.

11. Internal Information of the Company

All employees of the Company shall comply with the practices of using internal information.

12. Competition

The Company is determined to operate the business and perform business competition freely and fairly. In any business negotiation, the directors, executives and employees shall refrain from asking, accepting or paying any improper benefit from and to the suppliers and/or creditors.

13. Public Relations

There will be no distortion, concealment and/ or misrepresentation in any public dissemination or advertisement. The Company's disclosure will be in accordance with relevant laws.

14. Social and Environmental Roles

All directors, executives and employees of the Company are encouraged to have participation and become part of society. Activities aiming at creating desirable society, community and environment are regularly carried out

in a bid to improve the quality of life of communities. They are carried out both by the Company and in collaboration with the government and communities. The Company realizes that participation in social activities will help develop overall economy and society and eventually result in the Company's success. In addition, we have the policy to promote activities concerning natural protection and conservation as well as local customs and traditions.

15. Giving or Accepting Gifts or Entertainment

All directors, executives and employees of the Company shall not ask, accept or agree to accept money, objects or any other benefit from any persons associated with the Company. However, directors, executives and employees may traditionally accept or give any gifts. Gift acceptance shall not influence any business decision making of the recipient and made transparently or openly with accountability.

16. Internal Control, Internal Audit and Finance Reporting

The Company's management is responsible for preparing accurate, complete and update financial reports, covering yearly and quarterly statements, in accordance with the generally accepted accounting standards. In addition, the internal control and audit systems are put in place to ensure that the Company strictly complies with relevant standards and laws under supervision of the internal auditor and review of the Audit Committee.

17. Monitoring of Observance, Notification and Disclosure of Offences

There are 5 principles as follows:

1. The Company determines that it is the duty and responsibility of all directors, executives and employees to acknowledge, understand and strictly comply with the code of conduct.

They should also have qualification according to the Securities and Exchange Act as announced by the Securities and Stock Exchange Commission, Capital Market Supervisory Board or announcement from the Stock Exchange of Thailand with other announcements, rules and/or regulations related to present to board members and/or shareholders to consider for further approval. The Company has specified criteria and approaches which can conclude into key points as follow.

1. The board members will consist of at least 5 but not exceeding 2 members and at least no less than half of the total members will need to residence in Thailand. The board members will also need to be qualified and should not possess incompatibility based on Public Company limited law and other related laws.
2. The election for the board members will be held at shareholders meeting by using the majority votes based on criteria and approaches as follow.
 - 2.1 One shareholder has one vote per one share. The shareholders can use all votes to select one individual or several nominees as a board member but cannot divided votes accordingly.
 - 2.2 Shareholders make a vote for the election of board members individually.
 - 2.3 In case there are many nominees to elect for the board members, the person with the highest vote received will be elected as a board member equivalent to number of needed member or elected at that time. In case that the next nominee have the same votes equivalent or more than members of the meeting, the Chairman of the meeting will be the one making final decisions.
3. For the common shareholder meetings that occur annually, one out of 3 members needs to resign from the position at that time. If the number of board members cannot be directly divide into three portions, the number of resignation should be closest to 1 out of 3 board members that need to resign from the position in the first year and second year that the Company is registered and to draw lots as to who would resign. For other years, the longest board member in the position shall resign. Thus, the board members who resign from their terms could be re-electing to the position.
4. In case of one or another board members plan to resign from the position, he/she must send resignation letter to the Company. The resignation will be affective as soon as the letter arrived at the Company. The board members who resign can also notify their resignations with the registrar.
5. In the case that the position of the board member become available due to other reasons beside resignation from terms, the board members may choose to select qualified individual without any incompatibility of law regarding Public Company Limited and law based on asset and Stock Exchange to be acting member for the next board member meeting. However, if the board member has less than 2 months term the person who will be acting board member may be in the position of board member equal to the remaining term of the member. The resolution of the board members needs to consist of at least 3 out of 4 votes from the remaining board members.
6. At the meeting, the shareholder may vote one or other board members to resign from the position before the term with at least three out of four votes proportion from the entire attendance of the shareholders with the right to votes. There should be a total shares no less than half of the shareholders that attend the meeting with the right to vote.
7. The board member may select one member as the Chairman of the executive board and in case that the board members need to consider to select one or more member, the other member will be selected as a vice chairman of the board.

The nomination of Audit Committee members

9. Internal control and Related Party Transactions

9.1 Internal control

9.1.1 Sufficient and reasonable for internal control system

In the meeting of the Board of Director no. 1/2023 held on 27 February 2023, the board members of the Company have taken into consideration and assess the sufficiency of the Company internal audit. It was completed through data collection from executives, related sectors and KPMG Phoomchai Business Advisory Co.,Ltd (“Internal auditors”) referring to the internal auditors report and monitoring of improvement for internal auditor report dated on 27 February 2023 as well as annual internal audit project for Year 2022. It can be concluded regarding the result for the internal assessment of the Company in 5 areas as follow:

1. Control Environment

The Board of Directors are knowledgeable and highly specialized in business, whose roles and responsibilities are clearly separated from Management. Roles and responsibilities of Board of Directors and sub-committees are defined in Charter or each group of Directors. Approval authority is clearly separated as well to ensure that Directors can operate efficiently with integrity and fairness, in compliance with laws, regulations, good governance, and Company’s code of business conducts. The Company also develops performance review and evaluation process by hiring external independent specialist to continuously audit process and report to directors. The Company sets out process for people recruitment and development by selecting candidates based on Company’s policies and qualifications of each position, developing success plan for key position to ensure business continuity, and arranging annual training plans available in various courses in order to enhance people’s capabilities in alignment with business strategy. Furthermore, the Company develops process to evaluate employees’ performance by defining valid evaluation criteria and keep employees informed.

2. Risk Assessment

The Company develops risk management policy and appoints risk management team which include management team and employees. The team works in collaboration with internal control department to obtain reports, in which such teams have reviewed risk of organization, risk management scope, opportunities and effects of each situation to prioritize risks and identify risk management measures or plans to ensure proper and acceptable risk level. Furthermore, the Company also hires external independent specialist to continuously audit process and report to the Audit Committee.

3. Control Activities

The Company develops approval authorization and regulations and review such process to ensure alignment with recent business situations based on job description, job scope, responsibility, and authorized credit of each management level and properly allocate job functions. Core functions of Company will be reviewed by external parties such as internal auditors and/or quality control staffs to audit control mechanism, improve efficiency, identify regulations and guidelines for those who are appointed Directors of subsidiary and associates in order to define guidelines for business operation for directors or executives of the subsidiary to comply. This is to regulate affiliates in compliance with Company’s policies, laws of public companies, securities and exchange laws, and related announcement, rules, and regulations. The Company assign authorized representatives to be directors and executives of affiliates based on share ownership proportion. Moreover, The Company

conveys important messages to all stakeholders through Company's website based on good governance and related regulations. The directors and executives are obliged to share stake-holding information of their own or related persons' for considering transactions that cause conflict of interest, in which stakeholders are not involved in considering such transactions. The Company identifies regulations of connected transactions that require approval in compliance with related rules and regulations of The Securities and Exchange Commission, Thailand (SEC) and The Stock Exchange of Thailand (SET).

4. Information & Communication

The Company provide timely, adequate the important data, financial, and other important information for the Board of Directors to use in decision making and communicating to the Board of Directors and/or related sub-committees to acknowledge before the meeting date, at least within the minimum period required by law. In addition, the Company arrange for internal and external communication channels via e-mail and the Company's website for those interested in receiving information about the Company. Including, whistleblowing channels for reporting information or clues about corruption to the Company are also in place. Also, Investors Relations Department is responsible for regularly communicating with shareholders or investors. The Company's important documents are also stored and categorized systematically.

5. Monitoring

Operational auditing with suggestions for constant and continuous improvement of the internal control system has been carried out. The Company hired a consulting company to be internal auditors which are independent, report the audit results, and follow up to ensure that the findings are corrected appropriately and timely by reporting directly to the Audit Committee on a quarterly basis. In addition, the Company has also anti-corruption policy for combating fraud and corruption have been implemented as a guideline for directors, executives, and employees at all levels to use as a direction for business operations, not neglecting or ignoring upon discovering actions that are considered fraud to the Company, which is contemplated as a duty to notify the supervisor or the person in charge. Also, the Executive Committee has a duty to report the Board of Directors immediately upon discovering or suspected of fraud.

In 2022, KPMG Phoomchai Business Advisory Co.,Ltd ("Internal auditors") operated internal audit for the year of 2022 by inspect 4 processes as follows;

1. Purchase and payment process
2. Fixed asset management process
3. Revenue process
4. Account closing process and financial reporting

There are 16 remarks which are low importance for the total of 8 processes and medium importance for the total of 2 processes and also 6 suggestions. From following up the improvement based on the internal audit in first quarter to third quarter in 2022, it is found that the Company has improved internal control systems according to the internal auditors are 11 stated issues, and is in process 2 issue, that the company will improve the stated issue completely and appropriately. Additionally, for the remarks that are found in fourth quarter of 2022 that include 1 process with low importance, and also 2 suggestions, the internal auditors will inspect for further follow up in first quarter of 2023.

Thus, the Board of Directors concurred with the audit committee that the Company internal control system is sufficient and appropriate to the size of the business and current business conditions. The Company has sufficient employees to operate systematically and effectively. There is also an adequate amount of transaction with competitive and related parties. For other topics of internal control system, the board members considered that the Company also has a sufficient internal control.

9.1.2 Information of the internal audit chief

The Company has hired internal auditors from external sectors which is KPMG Phoomchai Business Advisory Co., Ltd to inspect internal control system of the Company. The internal auditors have assigned board members to inspect internal control system of the Company.

The Audit Committee has taken into consideration qualifications of assigned board member that they are suitable as they are independent agency and have high experiences in internal audit for reasonable amount of times. The details are in attachment 3 “Information of Head of Internal Audit and Head of Compliance”

Thus, the Audit Committee will be the people who consider the independent of internal auditor agency as well as approve in appoint, removal, or dismissed of internal auditors chief or other responsible sector related to the Company internal audit.

S.Kijchai Enterprise Public Company Limited and its subsidiaries
Report and consolidated financial statements
31 December 2022

Independent Auditor's Report

To the Shareholders of S.Kijchai Enterprise Public Company Limited

Opinion

I have audited the accompanying consolidated financial statements of S.Kijchai Enterprise Public Company Limited and its subsidiaries (the Group), which comprise the consolidated statement of financial position as at 31 December 2022, and the related consolidated statements of comprehensive income, changes in shareholders' equity and cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies, and have also audited the separate financial statements of S.Kijchai Enterprise Public Company Limited for the same period.

In my opinion, the financial statements referred to above present fairly, in all material respects, the financial position of S.Kijchai Enterprise Public Company Limited and its subsidiaries and of S.Kijchai Enterprise Public Company Limited as at 31 December 2022, their financial performance and cash flows for the year then ended in accordance with Thai Financial Reporting Standards.

Basis for Opinion

I conducted my audit in accordance with Thai Standards on Auditing. My responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of my report. I am independent of the Group in accordance with the *Code of Ethics for Professional Accountants including Independence Standards* issued by the Federation of Accounting Professions (Code of Ethics for Professional Accountants) that are relevant to my audit of the financial statements, and I have fulfilled my other ethical responsibilities in accordance with the Code of Ethics for Professional Accountants. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key Audit Matters

Key audit matters are those matters that, in my professional judgement, were of most significance in my audit of the financial statements of the current period. These matters were addressed in the context of my audit of the financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on these matters.

I have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of my report, including in relation to these matters. Accordingly, my audit included the performance of procedures designed to respond to my assessment of the risks of material misstatement of the financial statements. The results of my audit procedures, including the procedures performed to address the matters below, provide the basis for my audit opinion on the accompanying financial statements as a whole.

Key audit matters and how audit procedures respond to each matter are described below.

Revenue recognition for sales of goods

Revenue from sales of goods is one of the Group's key accounts because the amounts recorded directly affect the Group's profit or loss. Moreover, the Group has a large number of customers and various terms and conditions. I therefore focused on the Group's recognition of revenues from sales of goods, especially the timing of revenue recognition.

I examined the revenue recognition of the Group by assessing and testing the Group's internal controls with respect to the revenue cycle. On a sampling basis, I also examined supporting documents for sales transactions occurring during the year and near the end of the accounting period. In addition, I reviewed credit notes that the Group issued after the period-end and performed analytical procedures on sales account.

Other Information

Management is responsible for the other information. The other information comprise the information included in annual report of the Group, but does not include the financial statements and my auditor's report thereon. The annual report of the Group is expected to be made available to me after the date of this auditor's report.

My opinion on the financial statements does not cover the other information and I do not express any form of assurance conclusion thereon.

In connection with my audit of the financial statements, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained in the audit or otherwise appears to be materially misstated.

When I read the annual report of the Group, if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance for correction of the misstatement.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Thai Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Thai Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Thai Standards on Auditing, I exercise professional judgement and maintain professional skepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. I am responsible for the direction, supervision and performance of the group audit. I remain solely responsible for my audit opinion.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide those charged with governance with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, I determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

I am responsible for the audit resulting in this independent auditor's report.

The accompanying notes are an integral part of the financial statements.

S.Kijchai Enterprise Public Company Limited and its subsidiaries

Notes to consolidated financial statements

For the year ended 31 December 2022

1. General information

S.Kijchai Enterprise Public Company Limited ("the Company") is a public company incorporated and domiciled in Thailand. Its major shareholder is S.Kijchai Capital Company Limited, which was incorporated in Thailand. The Company is principally engaged in the manufacture and distribution of Medium Density Fiber Board ("MDF"). The registered office of the Company is at 99/9 Moo 7, Huay-yang, Klaeng, Rayong.

2. Basis of preparation

- 2.1 The financial statements have been prepared in accordance with Thai Financial Reporting Standards enunciated under the Accounting Professions Act B.E. 2547 and their presentation has been made in compliance with the stipulations of the Notification of the Department of Business Development, issued under the Accounting Act B.E. 2543.

The financial statements in Thai language are the official statutory financial statements of the Company. The financial statements in English language have been translated from the Thai language financial statements.

The financial statements have been prepared on a historical cost basis except where otherwise disclosed in the accounting policies.

2.2 Basis of consolidation

- a) The consolidated financial statements include the financial statements of S.Kijchai Enterprise Public Company Limited ("the Company") and the following subsidiary companies ("the subsidiaries") (collectively referred to as "the Group"):

Company's name	Nature of business	Country of incorporation	Percentage of shareholding	
			<u>2022</u>	<u>2021</u>
			Percent	Percent
S.Kleber Chemical Co., Ltd.	Manufacture of glue and chemical	Thailand	100	100
SKN Kraft and Paper Co., Ltd.	Manufacture of paper pulp and paper through recycling of wastepaper (operation not yet commenced)	Thailand	100	100

- b) The Company is deemed to have control over an investee or subsidiaries if it has rights, or is exposed, to variable returns from its involvement with the investee, and it has the ability to direct the activities that affect the amount of its returns.

- c) Subsidiaries are fully consolidated, being the date on which the Company obtains control, and continue to be consolidated until the date when such control ceases.
 - d) The financial statements of the subsidiaries are prepared using the same significant accounting policies as the Company.
 - e) Material balances and transactions between the Group have been eliminated from the consolidated financial statements.
- 2.3 The separate financial statements present investments in subsidiaries under the cost method.

3. New financial reporting standards

a) Financial reporting standards that became effective in the current year

During the year, the Group has adopted the revised financial reporting standards and interpretations which are effective for fiscal years beginning on or after 1 January 2022. These financial reporting standards were aimed at alignment with the corresponding International Financial Reporting Standards with most of the changes directed towards clarifying accounting treatment and providing accounting guidance for users of the standards.

The adoption of these financial reporting standards does not have any significant impact on the Group's financial statements.

b) Financial reporting standards that became effective for fiscal years beginning on or after 1 January 2023

The Federation of Accounting Professions issued a number of revised financial reporting standards, which are effective for fiscal years beginning on or after 1 January 2023. These financial reporting standards were aimed at alignment with the corresponding International Financial Reporting Standards with most of the changes directed towards clarifying accounting treatment and providing accounting guidance for users of the standards.

The management of the Group believes that adoption of these amendments will not have any significant impact on the Group's financial statements.

4. Significant accounting policies

4.1 Revenue and expense recognition

Sales of goods

Revenue from sale of goods is recognised at the point in time when control of the asset is transferred to the customer, generally upon delivery of the goods. Revenue is measured at the amount of the consideration received or receivable, excluding value added tax, of goods supplied after deducting returns and discounts.

The obligation to transfer goods to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer is presented under the caption of "Advances received" in the statement of financial position which are recognised as revenue when the Group performs under the contract.

Rendering of services

The Group recognised services revenue over the contract period. Such recognition is on a straight-line basis according to the proportion of the rendered services over the contract period.

Interest income

Interest income is calculated using the effective interest method and recognised on an accrual basis.

Finance cost

Interest expense from financial liabilities at amortised cost is calculated using the effective interest method and recognised on an accrual basis.

4.2 Cash and cash equivalents

Cash and cash equivalents consist of cash in hand and at banks, and all highly liquid investments with an original maturity of three months or less and not subject to withdrawal restrictions.

4.3 Inventories

Finished goods and work in process are valued at the lower of cost under the first-in, first-out method and net realisable value. The cost of inventories includes all production costs and attributable factory overheads.

Raw materials, spare parts and supplies are valued at the lower of cost under the first-in, first-out method and net realisable value and are charged to production costs whenever consumed.

4.4 Investments in subsidiaries

Investments in subsidiaries are accounted for in the separate financial statements using the cost method.

4.5 Property, plant and equipment/Depreciation

Land is stated at cost. Buildings and equipment are stated at cost less accumulated depreciation and allowance for loss on impairment of assets (if any).

Depreciation of plant and equipment is calculated by reference to their costs, on the straight-line basis over the following estimated useful lives:

Buildings	5 - 30 years
Utility system	5 - 25 years
Machinery and factory equipment	2 - 25 years
Office equipment	3 - 5 years
Motor vehicles	5 - 12 years

Depreciation is included in determining income.

No depreciation is provided on land and assets under installation.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on disposal of an asset is included in profit or loss when the asset is derecognised.

4.6 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective assets. All other borrowing costs are expensed in the period they are incurred. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

4.7 Intangible assets

Intangible assets with finite lives are amortised on the straight-line basis over the economic useful life and tested for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method of such intangible assets are reviewed at least at each financial year end. The amortisation expense is charged to profit or loss.

A summary of the intangible assets with finite useful lives is as follows:

Computer software	3 - 10 years
-------------------	--------------

4.8 Related party transactions

Related parties comprise individuals or enterprises that control, or are controlled by, the Group, whether directly or indirectly, or which are under common control with the Group.

They also include associates, and individuals or enterprises which directly or indirectly own a voting interest in the Group that gives them significant influence over the Group, key management personnel, directors, and officers with authority in the planning and direction of the Group's operations.

4.9 Foreign currencies

The consolidated and separate financial statements are presented in Baht, which is also the Group's functional currency.

Transactions in foreign currencies are translated into Baht at the exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into Baht at the exchange rate ruling at the end of reporting period.

Gains and losses on exchange are included in determining income.

4.10 Impairment of non-financial assets

At the end of each reporting period, the Group performs impairment reviews in respect of the property, plant and equipment and other intangible assets whenever events or changes in circumstances indicate that an asset may be impaired. An impairment loss is recognised when the recoverable amount of an asset, which is the higher of the asset's fair value less costs to sell and its value in use, is less than the carrying amount.

An impairment loss is recognised in profit or loss.

4.11 Employee benefits

Short-term employee benefits

Salaries, wages, bonuses and contributions to the social security fund are recognised as expenses when incurred.

Post-employment benefits

Defined contribution plans

The Group and its employees have jointly established a provident fund. The fund is monthly contributed by employees and by the Group. The fund's assets are held in a separate trust fund and the Group's contributions are recognised as expenses when incurred.

Defined benefit plans

The Group has obligations in respect of the severance payments it must make to employees upon retirement under labor law. The Group treats these severance payment obligations as a defined benefit plan.

The obligation under the defined benefit plan is determined by a professionally qualified independent actuary based on actuarial techniques, using the projected unit credit method.

Actuarial gains and losses arising from defined benefit plans are recognised immediately in other comprehensive income.

4.12 Provisions

Provisions are recognised when the Group has a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

4.13 Income tax

Income tax expense represents the sum of corporate income tax currently payable and deferred tax.

Current tax

Current income tax is provided in the accounts at the amount expected to be paid to the taxation authorities, based on taxable profits determined in accordance with tax legislation.

Deferred tax

Deferred income tax is provided on temporary differences between the tax bases of assets and liabilities and their carrying amounts at the end of each reporting period, using the tax rates enacted at the end of the reporting period.

The Group recognises deferred tax liabilities for all taxable temporary differences while it recognises deferred tax assets for all deductible temporary differences and tax losses carried forward to the extent that it is probable that future taxable profit will be available against which such deductible temporary differences and tax losses carried forward can be utilised.

At each reporting date, the Group reviews and reduces the carrying amount of deferred tax assets to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

The Group records deferred tax directly to shareholders' equity if the tax relates to items that are recorded directly to shareholders' equity.

4.14 Financial instruments

The Group initially measures financial assets at its fair value plus, in the case of financial assets that are not measured at fair value through profit or loss, transaction costs. However, trade receivables, that do not contain a significant financing component, are measured at the transaction price as disclosed in the accounting policy relating to revenue recognition.

Classification and measurement of financial assets

Financial assets are classified, at initial recognition, as to be subsequently measured at amortised cost or fair value through profit or loss ("FVTPL"). The classification of financial assets at initial recognition is driven by the Group's business model for managing the financial assets and the contractual cash flows characteristics of the financial assets.

Financial assets at amortised cost

The Group measures financial assets at amortised cost if the financial asset is held in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortised cost are subsequently measured using the effective interest rate ("EIR") method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

Financial assets at FVTPL

Financial assets measured at FVTPL are carried in the statement of financial position at fair value with net changes in fair value recognised in profit or loss.

These financial assets include derivatives.

Classification and measurement of financial liabilities

Except for derivative liabilities, at initial recognition the Group's financial liabilities are recognised at fair value net of transaction costs and classified as liabilities to be subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process. In determining amortised cost, the Group takes into account any fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance costs in profit or loss.

Derecognition of financial instruments

A financial asset is primarily derecognised when the rights to receive cash flows from the asset have expired or have been transferred and either the Group has transferred substantially all the risks and rewards of the asset, or the Group has transferred control of the asset.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in profit or loss.

Impairment of financial assets

The Group recognises an allowance for expected credit losses ("ECLs") for all debt instruments not held at FVTPL. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate.

For trade receivables, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date.

ECL are calculated based on its historical credit loss experience and adjusted for forward-looking factors specific to the debtors and the economic environment.

A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Offsetting of financial instruments

Financial assets and financial liabilities are offset, and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

4.15 Derivatives

The Group uses derivatives i.e. foreign currency forward contracts, to hedge its foreign currency risks.

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. The subsequent changes are recognised in profit or loss. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Derivatives are presented as current assets or current liabilities if the remaining maturity of the instrument is less than 12 months and it is due to be realised or settled within 12 months. Other derivatives are presented as non-current assets or non-current liabilities.

4.16 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between buyer and seller (market participants) at the measurement date. The Group applies a quoted market price in an active market to measure their assets and liabilities that are required to be measured at fair value by relevant financial reporting standards. Except in case of no active market of an identical asset or liability or when a quoted market price is not available, the Group measures fair value using valuation technique that are appropriate in the circumstances and maximises the use of relevant observable inputs related to assets and liabilities that are required to be measured at fair value.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy into three levels based on categorise of input to be used in fair value measurement as follows:

Level 1 - Use of quoted market prices in an active market for such assets or liabilities

Level 2 - Use of other observable inputs for such assets or liabilities, whether directly or indirectly

Level 3 - Use of unobservable inputs such as estimates of future cash flows

At the end of each reporting period, the Group determines whether transfers have occurred between levels within the fair value hierarchy for assets and liabilities held at the end of the reporting period that are measured at fair value on a recurring basis.

5. Significant of accounting judgements and estimates

The preparation of financial statements in conformity with financial reporting standards at times requires management to make subjective judgements and estimates regarding matters that are inherently uncertain. These judgements and estimates affect reported amounts and disclosures; and actual results could differ from these estimates. Significant judgements and estimates are as follows:

Property, plant and equipment/Depreciation

In determining depreciation of plant and equipment, the management is required to make estimates of the useful lives and residual values of the plant and equipment and to review estimate useful lives and residual values when there are any changes.

In addition, the management is required to review property, plant and equipment for impairment on a periodical basis and record impairment losses when it is determined that their recoverable amount is lower than the carrying amount. This requires judgements regarding forecast of future revenues and expenses relating to the assets subject to the review.

6. Related party transactions

During the years, the Group had significant business transactions with related parties. Such transactions, which are summarised below, arose in the ordinary course of business and were concluded on commercial terms and bases agreed upon between the Group and those related parties.

(Unit: Million Baht)

	Consolidated		Separate		
	financial statements		financial statements		Transfer pricing policy
	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>	
<u>Transactions with subsidiary</u>					
(eliminated from the consolidated financial statements)					
Interest income	-	-	4	4	Refer to commercial bank's interest rate
Purchase of goods	-	-	549	369	Similar to market price
Research and development expenses	-	-	35	-	Conditions specified in the BOI certificate
<u>Transactions with related companies</u>					
Sales of goods	17	11	17	11	Similar to market price
Sales of electricity ⁽¹⁾	63	46	63	46	Similar to market price
Purchase of goods	91	108	91	108	Similar to market price
Other expenses	12	16	12	16	Mutual agreement

⁽¹⁾ The revenue from sales of electricity is the gross amount before net-off related costs. However, such revenue is presented in the statement of comprehensive income under "Other income" with its net amount determined from sales of electricity less related costs.

As at 31 December 2022 and 2021, the balances of the accounts between the Group and those related companies are as follows:

	(Unit: Thousand Baht)			
	Consolidated		Separate	
	financial statements		financial statements	
	2022	2021	2022	2021
<u>Trade and other receivables - related parties (Note 8)</u>				
Subsidiary	-	-	13	90
Related companies (common shareholder and/or director)	7,775	4,919	7,775	4,604
Total	7,775	4,919	7,788	4,694
<u>Trade and other payables - related parties (Note 15)</u>				
Subsidiary	-	-	35,581	38,802
Related companies (common shareholder and/or director)	12,059	15,057	12,050	15,057

Loans to related party

As at 31 December 2022 and 2021, the balances of loans between the Company and the related company and the movement in loans are as follows:

		(Unit: Thousand Baht)			
		Separate financial statements			
Loans to	Related by	Balance as at	Increase	Decrease	Balance as at
		31 December 2021	during the year	during the year	31 December 2022
S.Kleber Chemical Co., Ltd.	Subsidiary				
Short-term loans		-	42,700	-	42,700
Long-term loans		186,200	-	-	186,200
Total		186,200	42,700	-	228,900

Such loans are unsecured loans and carry interest based on the commercial bank's interest rate.

Long-term loans have a monthly principal repayment which will start in January 2024.

Directors and management's benefits

During the years ended 31 December 2022 and 2021, the Group had employee benefit expenses payable to their directors and management as below.

	(Unit: Thousand Baht)	
	Consolidated / Separate financial statements	
	<u>2022</u>	<u>2021</u>
Short-term employee benefits	92,870	93,252

9. Inventories

(Unit: Thousand Baht)

	Consolidated financial statements					
	Cost		Reduce cost to net realisable value		Inventories - net	
	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>
Finished goods	67,692	102,375	(5,033)	(12,282)	62,659	90,093
Work in process	27,045	24,327	(145)	-	26,900	24,327
Raw materials	49,502	53,469	-	-	49,502	53,469
Spare parts and supplies	157,869	116,612	-	-	157,869	116,612
Total	302,108	296,783	(5,178)	(12,282)	296,930	284,501

(Unit: Thousand Baht)

	Separate financial statements					
	Cost		Reduce cost to net realisable value		Inventories - net	
	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>
Finished goods	59,699	94,099	(5,033)	(12,282)	54,666	81,817
Work in process	25,318	21,427	(145)	-	25,173	21,427
Raw materials	33,244	31,617	-	-	33,244	31,617
Spare parts and supplies	149,165	104,393	-	-	149,165	104,393
Total	267,426	251,536	(5,178)	(12,282)	262,248	239,254

During the year 2022, the Group reversed the write-down of cost of inventories by Baht 7 million (the Company only: Baht 7 million), and reduced the amount of inventories recognised as expenses during the year.

During the year 2021, the Group reduced cost of inventories by Baht 6 million (the Company only: Baht 6 million), to reflect the net realisable value. This was included in cost of sales.

10. Restricted bank deposits

These represent fixed deposits pledged with the bank to secure credit facilities.

As at 31 December 2022, fixed deposits carried interest at 0.15 percent per annum (2021: 0.15 percent per annum).

11. Investments in subsidiaries

Details of investments in subsidiaries as presented in separate financial statements are as follows.

(Unit: Thousand Baht)

Company's name	Paid-up capital		Shareholding percentage		Cost	
	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>
			(%)	(%)		
S.Kleber Chemical Co., Ltd.	100,000	100,000	100	100	100,000	100,000
SKN Kraft and Paper Co., Ltd.	200,000	200,000	100	100	200,000	200,000
					<u>300,000</u>	<u>300,000</u>

SKN Kraft and Paper Company Limited

As at 31 December 2022, the Company had commitment amounting to Baht 300 million for payments of subsidiary's registered share capital which has not been called-up.

12. Property, plant and equipment

Movements of the property, plant and equipment account during the year ended 31 December 2022 and 2021 are summarised below.

	Consolidated financial statements							(Unit: Thousand Baht)
	Land and land improvements	Buildings	Utility system	Machinery and factory equipment	Office equipment	Motor vehicles	Assets under installation

16. Long-term loans

(Unit: Thousand Baht)						
Loan	Interest rate	Repayment schedule of principal	Consolidated		Separate	
			financial statements		financial statements	
			<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>
1	Refer to MLR	Monthly repayment of Baht 18 million per month, with the final installment to be made in February 2022	-	25,292	-	25,292
2	Refer to MLR	Monthly repayment of Baht 3 million per month, with the final installment to be made in April 2025	94,002	134,910	-	-
Total			94,002	160,202	-	25,292
Less: Deferred expenses relating to borrowings			(124)	(280)	-	(156)
Net			93,878	159,922	-	25,136
Less: Current portion			(40,908)	(66,044)	-	(25,136)
Long-term loans, net of current portion			52,970	93,878	-	-

Movement of the long-term loan account during the year ended 31 December 2022 are summarised below:

	(Unit: Thousand Baht)	
	Consolidated	Separate
	financial statements	financial statements
Balance as at 1 January 2022	160,202	25,292
Less: Repayment	(66,200)	(25,292)
Balance as at 31 December 2022	94,002	-

The loans are secured by the mortgage of the subsidiary's certain land and structures thereon and certain machinery.

The loan agreements contain several covenants which, among other things, require the Group to maintain debt-to-equity ratio and debt service coverage ratio at the rate prescribed in the agreements.

17. Provision for long-term employee benefits

Provision for long-term employee benefits, which represents compensation payable to employees after they retire, was as follows

	(Unit: Thousand Baht)			
	Consolidated		Separate	
	financial statements		financial statements	
	2022	2021	2022	2021
Provision for long-term employee benefits				
at beginning of year	4,317	3,584	4,317	3,584
Included in profit or loss:				
Current service cost	869	679	869	679
Interest cost	70	54	70	54
Past service cost and gains or loss on settlement	707	-	-	-
Included in other comprehensive income:				
Actuarial loss arising from				
Demographic assumptions changes	111	-	111	-
Financial assumptions changes	282	-	282	-
Experience adjustment	1,357	-	1,357	-
Provision for long-term employee benefits				
at end of year	7,713	4,317	7,006	4,317

As at 31 December 2022, the weighted average duration of the liabilities for long-term employee benefit are 28 - 33 years (2021: 28 year).

Significant actuarial assumptions are summarised below:

	(Unit: percent per annum)			
	Consolidated financial statements		Separate financial statements	
	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>
Discount rate	2.7, 2.9	2.3	2.9	2.3
Salary increase rate	2.5, 4.3	3.0	4.3	3.0
Turnover rate	0.0 - 37.0	0.0 - 24.0	0.0 - 37.0	0.0 - 24.0

The result of sensitivity analysis for significant assumptions that affect the present value of the long-term employee benefit obligation as at 31 December 2022 and 2021 are summarised below:

	(Unit: Thousand Baht)			
	2022			
	Consolidated financial statements		Separate financial statements	
	<u>Increase 0.5%</u>	<u>Decrease 0.5%</u>	<u>Increase 0.5%</u>	<u>Decrease 0.5%</u>

	<u>Increase 1%</u>	<u>Decrease 1%</u>	<u>Increase 1%</u>	<u>Decrease 1%</u>
Turnover rate	(214)	257	(207)	249

	(Unit: Thousand Baht)	
	2021	
	Consolidated / Separate financial statements	
	<u>Increase 1%</u>	<u>Decrease 1%</u>
Discount rate	(282)	323
Salary increase rate	408	(357)
Turnover rate	(303)	96

18. Statutory reserve

Pursuant to Section 116 of the Public Limited Companies Act B.E. 2535, the Company is required to set aside a statutory reserve at least 5 percent of its net profit after deducting accumulated deficit brought forward (if any), until the reserve reaches 10 percent of the registered capital. The statutory reserve is not available for dividend distribution. At present, the statutory reserve has fully been set aside.

19. Expenses by nature

Significant expenses classified by nature are as follows:

	Consolidated		(Unit: Thousand Baht)	
			Separate	
	financial statements		financial statements	
	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>
Purchase of raw materials and supplies	1,806,151	1,629,215	1,820,520	1,730,648
Changes in inventories of finished goods and work in progress	31,745	35,635	30,508	46,812
Employee benefit expenses and utility expenses	629,448	590,054	608,061	566,573
Depreciation and amortisation	206,273	203,531	178,915	183,057
Transportation expenses	727,110	745,266	722,350	740,553
Advertising and promotion expenses	37,458	33,338	37,444	33,323

20. Income tax

Income tax expenses for the years ended 31 December 2022 and 2021 are made up as follows:

	Consolidated		(Unit: Thousand Baht)	
			Separate	
	financial statements		financial statements	
	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>

As at 31 December 2022, the subsidiaries have deductible temporary differences and unused tax losses totaling Baht 8 million (2021: Baht 4 million), on which deferred tax assets have not been recognised as the Company believes future taxable profits may not be sufficient to allow utilisation of the temporary differences and unused tax losses.

As at 31 December 2022, the unused tax losses amounting to Baht 61 million (2021: Baht 15 million) will expire by 2029.

21. Promotional privileges

The Group is entitled to promotional privileges from the Board of Investment for the manufacture of Medium Density Fiberboard and the manufacture of chemical for industry. Subject to certain imposed conditions, the privileges include an exemption from corporate income tax from the date the promoted operations commenced generating revenues. Tax exemption amount will be adjusted according to the investment under the specified conditions. The details are as follows:

Certificate No.	Dated	Period of exemption from corporate income tax
The Company		
1364(2)/2554	24 March 2011	8 years until 6 January 2021
60-0836-1-00-1-0	31 July 2017	8 years until 30 September 2026
The subsidiary		
62-0816-1-00-1-0	25 July 2019	4 years until 19 January 2025

The Group's operating revenues for the years ended 31 December 2022 and 2021, divided between promoted and non-promoted operations, are summarised below.

(Unit: Thousand Baht)

	Consolidated / Separate financial statements					
	Promoted operations		Non-promoted operations		Total	
	2022	2021	2022	2021	2022	2021
Sales						
Domestic	96,022	41,995	61,050	100,951	157,072	142,946
Export	2,270,174	2,012,155	1,747,705	2,025,301	4,017,879	4,037,456
Total	2,366,196	2,054,150	1,808,755	2,126,252	4,174,951	4,180,402

22. Earnings per share

Basic earnings per share is calculated by dividing profit for the year attributable to equity holders of the Company (excluding other comprehensive income) by the weighted average number of ordinary shares in issue during the year.

23. Segment information

Operating segment information is reported in a manner consistent with the internal reports that are regularly reviewed by the chief operating decision maker in order to make decisions about the allocation of resources to the segment and assess its performance.

The Group is principally engaged in the manufacture and distribution of Medium Density Fiber Board ("MDF"). Its operations are carried on only in Thailand. Segment performance is measured based on operating profit or loss, on a basis consistent with that used to measure operating profit or loss in the financial statements. As a result, all of the revenues, operating profits and assets as reflected in these financial statements pertain exclusively to the aforementioned reportable operating segment and geographical area.

Revenue from external customers is based on locations of the customers presented in the Note 21 to the financial statements.

For the year 2022, the Group has revenue from two major customers in amount of Baht 985 million (2021: Baht 675 million derived from two major customers).

24. Provident fund

The Group and its employees have jointly established a provident fund in accordance with the Provident Fund Act B.E. 2530. Both employees and the Group contribute to the fund monthly at the rate between 2 percent and 15 percent of basic salary. The fund, which is managed by Krungthai Asset Management Public Company Limited, will be paid to employees upon termination in accordance with the fund rules. The contributions for the year 2022 amounting to approximately Baht 0.4 million (2021: Baht 0.3 million) were recognised as expenses.

25. Dividends

On 26 April 2022, the Annual General Meeting of the Company's shareholders passed a resolution to pay a dividend of Baht 0.28 per share, or a total of Baht 224 million to its shareholders. The dividend was paid and recorded in May 2022.

26. Commitments and contingent liabilities

26.1 Capital commitments

As at 31 December 2022, the Group had capital commitments of approximately Baht 9 million (2021: Baht 22 million) (the Company only: Baht 4 million, 2021: nil), relating to the construction of factory buildings and acquisition of machinery.

26.2 Letters of credit

As at 31 December 2022, the Group had commitments under letters of credit with overseas suppliers amounting to approximately USD 0.1 million (2021: USD 0.9 million).

26.3 Guarantees

As at 31 December 2022 and 2021, there were outstanding bank guarantees issued by banks on behalf of the Group in respect of certain performance bonds as required in the normal course of its business. These included letters of guarantee to guarantee as follows:

	(Unit: Million Baht)			
	Consolidated financial statements		Separate financial statements	
	<u>2022</u>	<u>2021</u>	<u>2022</u>	<u>2021</u>
Guarantee electricity use	40	40	39	39

27. Financial instruments

27.1 Derivatives - foreign currency forward contracts

Derivatives not designated as hedging instruments

The Group uses foreign currency forward contracts to manage some of its transaction exposures. The contracts are entered into for periods consistent with foreign currency exposure of the underlying transactions, generally mature within one year.

As at 31 December 2022, the Group had foreign currency-denominated trade receivables of USD 2 million (2021: USD 8 million) and had outstanding foreign currency forward contracts as follows:

	Consolidated / Separate financial statements			
	Amount	Contractual exchange rate	Maturity date	Fair value
				Gain (loss)
	(Million)	(Baht per 1 foreign currency unit)		(Million Baht)
<u>31 December 2022</u>				
To sell				
US dollars	7	33.86 - 36.42	February - July 2023	5

Consolidated / Separate financial statements				
	Amount	Contractual exchange rate	Maturity date	Fair value
				Gain (loss)
	(Million)	(Baht per 1 foreign currency unit)		(Million Baht)
<u>31 December 2021</u>				
To sell				
US dollars	10	32.00 - 33.90	January - July 2022	(4)

The fair value measurement of derivatives was categorised within Level 2 of the fair value hierarchy, using other observable inputs for assets, either directly or indirectly. During the current year, there were no transfers within the fair value hierarchy.

27.2 Financial risk management objectives and policies

The Group's financial instruments principally comprise cash and cash equivalents, trade receivables, loans to related party, trade and other payables and short-term and long-term loans. The financial risks associated with these financial instruments and how they are managed is described below.

Credit risk

The Group is exposed to credit risk primarily with respect to trade receivables and loans. The maximum exposure to credit risk is limited to the carrying amounts as stated in the statement of financial position.

The Group manages the risk by adopting appropriate credit control policies and procedures and analysing the financial position of customers and counter parties as an ongoing basis. Therefore, the Group does not expect to incur material financial losses.

The Group determines the impairment of trade receivables basing on an expected credit loss model which the Group have established and maintain an appropriate credit loss model. The risk management department periodically reviews the parameters and the data used in the credit loss model.

Market risk

Foreign currency risk

The Group's exposure to the foreign currency risk relates primarily to its sale transactions that are denominated in foreign currencies. The Group seeks to reduce this risk by entering into foreign currency forward contracts when it considers appropriate as described in Note 27.1 to the financial statements.

Interest rate risk

The Group's exposure to interest rate risk relates primarily to its loans to related party, short-term and long-term loans which bear floating interest rates or fixed interest rates which are close to the market rate. Moreover, most of other financial assets and liabilities bear non-interest. The Group do not use derivatives to manage its interest rate risk.

As at 31 December 2022 and 2021, significant financial assets and liabilities classified by type of interest rate are summarised in the table below, with those financial assets and liabilities that carry fixed interest rates further classified based on the maturity date, or the repricing date if this occurs before the maturity date.

(Unit: Million Baht)

	2022				
	Fixed	Floating	Non-interest		Effective
Consolidated financial statements	interest rates	interest rate	bearing	Total	interest rate

Liquidity risk

The Group monitors the risk of liquidity shortage which could arise from the use of short-term loans from financial institutions. As at 31 December 2022, the Group has a certain amount of undrawn short-term credit facilities, and the Group therefore has sufficient working capital.

27.3 Fair values of financial instruments

Since the majority of the Group's financial instruments are short-term in nature or carrying interest at rates close to the market interest rates, their fair value is not expected to be materially different from the amounts presented in the statement of financial position.

28. Capital management

The primary objective of the Group's capital management is to ensure that it has appropriate capital structure in order to support its business and maximise shareholder value. As at 31 December 2022, the Group's debt-to-equity ratio was 0.22:1 (2021: 0.30:1) and the Company's was 0.17:1 (2021: 0.24:1).

29. Event after the reporting period

On 27 February 2023, the Company's Board of Directors passed a resolution to propose the payment of a dividend of Baht 0.36 per share, or a total of Baht 288 million to its shareholders. The dividend will be paid and recorded after being approved by the Annual General Meeting of the shareholders.

30. Approval of financial statements

These financial statements were authorised for issue by the Company's Board of Directors on 27 February 2023.

Part 4

Data Authentication

Data Authentication

The Company reviewed data shown in the 56-1 One Report with due care and hereby certifies that such data is complete, accurate and true and does not mislead or lack any material facts that should have been stated. The Company further certifies that

- (1) Financial statements and financial data summarized in the 56-1 One Report properly and completely presented material information on financial position, operating results and cash flow of the Company and its subsidiaries
- (2) The Company provided the effective data disclosure system to ensure that we properly and completely disclosed material information and also monitored observance of the system
- (3) The Company provided the effective internal control system and monitored observance of the system. The Company notified the auditor and the Audit Committee of the evaluation results of the internal control system as of 31 December 2022, which covered defects and significant changes of the internal control system as well as improper acts that may affect preparation of financial statements of the Company and its subsidiaries

In this regard of all documents are the same authenticated by the Company, the Company hereby authorizes Miss Kanokporn Arayaprakarn or Miss Orawan Sangwongkit to affix signature to every page of the documents. Any document not bearing signature of Miss Kanokporn Arayaprakarn or Miss Orawan Sangwongkit is not deemed such information authenticated by the Company.

1.2 Duties and Responsibilities of the Company's Secretary

The Company's secretary shall perform the duty as stipulated in Section 89/15 and Section 89/16 of the Securities and Exchange Act (No. 4), B.E. 2551 (2008) that came into force on 31 August 2008 with the responsibility, due care and integrity as well as compliance with the applicable laws and the company's objectives and Articles of Association, the resolutions of the Board of Directors and the resolutions of the shareholders' meetings. Legal duties of the company's secretary are as follows:

- (1) To provide information, instructions and communication concerning legislations, practices specified in the government criteria, rules and regulations of the Company, relevant rules and regulations of the Securities and Exchange Commission (SEC) and the Stock Exchange of Thailand; to provide knowledge and understanding in the corporate governance for directors and relevant units; to oversee proper and consistent compliance of the Company, directors and executives and to report any significant changes to directors
- (2) To coordinate and notify information on the company's directors and executives to the Stock Exchange of Thailand and the Securities and Exchange Commission (SEC)
- (3) To prepare agendas and invitation letters for meetings, annual report, supporting documents for shareholders' meetings and the Board of Directors' meetings
- (4) To organize shareholders' meetings and the Board of Directors' meetings in accordance with the applicable laws, the Company's regulations and best practices
- (5) To coordinate with shareholders concerning suggestions and propose for the management and executives' consideration
- (6) To prepare the sequence of shareholders' meetings for the Chairman of the meetings
- (7) To attend shareholders' meetings and ensure smooth running of the meetings in accordance with the applicable laws
- (8) To keep minutes of shareholders' meetings and the Board of Directors' meetings and monitor observance of the resolutions of shareholders' meetings and the Board of Directors' meetings
- (9) To prepare and keep a register of directors, an annual report of the company, notices calling shareholder meeting and the Board of Directors' meeting, minutes of shareholders' meeting and the Board of Directors' meeting
- (10) To keep complete and accurate records of policies and regulations of the company approved by the Board of Directors for accountability
- (11) To ensure disclosure of data and information in the scope of responsibility to any authorities regulating the company in accordance with the government's rules and requirements
- (12) To provide directors and executives with information and advices concerning preparation of reports as required by the applicable laws or regulations to be disclosed to the public for transparency such as report of securities holding
- (13) To require directors and executives to prepare a report on their interest or related person's interest in relation to management of the company or any subsidiary pursuant to Section 89/14 of the Securities and Exchange Act, B.E. 2535 (1992) (as amended) (the "Securities Act")

- (14) To keep reports on interest of directors or executives and submit copies of such reports prepared by directors or executives pursuant to Section 89/14 to the Chairman of the Board of Directors and the Audit Committee Chairman within seven working days from the date that the company received such reports
- (15) To arrange a retention system of documents and evidence concerning the following information and ensure complete and accurate retention and accountability of such documents or evidence for a period of not less than five years from the date of preparing such documents or evidence. Retention of such documents and evidence includes storage in computer system or any other systems that are available in a read-only mode without any modification
 - (1) Provision of information in support of seeking a resolution of shareholders' meeting
 - (2) Financial statements and reports concerning the financial position and the business operation of the company or any other reports required to be disclosed under Section 56, Section 57, Section 58 or Section 199 of the Securities Act
 - (3) An opinion of the company when a person makes the general tender offer to purchase shares from shareholders
 - (4) Provision of information or any other reports in relation to the business prepared by the company for the purpose of disclosure to shareholders or public as specified in the notification of the Capital Market Supervisory Board
- (16) To perform other acts as specified in the notification of the Capital Market Supervisory Board
- (17) To contact and coordinate with other relevant agencies on behalf of the Board of Directors and perform any other acts as assigned by the Board of Directors
- (18) To perform the duty with responsibility, due care and integrity and comply with the applicable laws, objectives and regulations of the company, the resolutions of the Board of Directors and shareholders' meetings and not do any act significantly contrary to the company's interest
- (19) To perform the duty with responsibility and due care as a reasonable person would have done in the same circumstances

Report of the Audit Committee

The Audit Committee of S.Kijchai Enterprise Public Company Limited consists of 3 independent Audit Committee members who are competent and possess all qualifications as per the regulations stipulated by The Stock Exchange of Thailand. These 3 Audit Committee members include;

- | | |
|----------------------------------|---------------------------------|
| 1. Mr. Tarate Poshyananda | Chairman of the Audit committee |
| 2. Pol.Lt.Gen. Sunchai Chaamporn | Audit committee |
| 3. Mr. Tiwat Rattanakate | Audit committee |

The Audit Committee abide by the responsibilities appointed by the Board of Directors of the Company and pursuant to the Audit Committee Charter, which is consistent with the best practice of the Securities and Exchange Commission by reviewing and ensuring the Company to follow the principles of good corporate governance, establish sufficient risk management and internal control and conduct internal control efficiently and effectively, where the Company shall give priority to defining systematic structure and work process, operating as a transparent organization and enhancing the quality of the Company's internal audit for sustainable improvement.

In the 2022 accounting year, the Audit Committee arranged 4 meetings in total, in which the whole members of the Audit Committee participated and discussed with the internal auditor and auditor. The summary of main points on responsibilities is as follows:

1. Reviewing the Company's financial reports

Members of the Audit Committee reviewed the Company's quarterly and annual financial statements and financial reports, including related transaction together with the certified public accountant . They questioned the auditor on the accuracy and completeness of the financial statements, important adjusting general ledger entries, including accounting forecasting which affects the financial statements, key audit matters, adequacy and appropriateness of bookkeeping and scope of review, accurate, complete and adequate information disclosure and independence of auditor in order to ensure that the financial statements shall be in compliance with laws and generally accepted accounting standards, credible and provided in a timely manner. Moreover, the information shall be disclosed sufficiently and beneficial for users of financial statements.

2. Reviewing Risk Management

The Audit Committee reviewed efficiency and appropriateness of risk management process, which could occur by internal and external factors, including risk management policy, plan and guidelines on risks affecting the Company's performance together with recommendations for improvement in order to promptly support in case of unexpected events.

3. Reviewing Internal Control

The Audit Committee prioritized the compliance with laws, related regulations and management focusing on professional and systematic operations by reviewing internal control system with the internal auditor on a quarterly basis in order to ensure the proper, sufficient and efficient internal control system. The Audit Committee considered the evaluation form of adequacy of the Company's internal control system according to the Stock Exchange of Thailand and Securities and Exchange Commission. The internal auditor and the Audit Committee had the agreed opinions that no major issues or flaws was detected and deemed that the internal control system is sufficient and suitable for the Company's current situation.

4. Reviewing transactions involving related or potential conflicts of interest

The Audit Committee reviewed and prioritized the consideration of processing transactions involving related or potential conflicts of interest between the Company, subsidiary, and related companies or parties in accordance with laws and regulations stipulated by the Stock Exchange of Thailand on a quarterly basis. The Audit Committee appointed the internal auditor to preliminarily monitor and review the accuracy and the auditor to regularly review. The Audit Committee was of the opinion that the Related Parties transactions were conducted in the general trading conditions, reasonable and provides the utmost benefit to the Company and accurate and complete information disclosure.

5. Reviewing compliance with securities and stock exchange regulations

The Audit Committee reviewed the Company's compliance with securities and stock exchange regulations, requirements of the Stock Exchange of Thailand or laws related with the Company's business. The Audit Committee deemed that the Company did not act against the relevant laws and regulations.

6. Appointment of the Auditor as of 2022 accounting year

The Audit Committee scrutinized and agreed to EY Office Co.,Ltd. ,where the auditor are Ms. Siraporn Ouaanunkun, certify public accountant no. 3844 and/or Ms. Sumesa Tungyoosuk, certify public accountant no. 7627 and/or Mr. Chatchai Kasemsrithanawat, certify public accountant no. 5813 the Company's and its subsidiary's auditor. The appointed auditor is independent and has no any interests which may cause a conflict of interest. The appointed auditor was proposed to the Company's Board of Directors for consideration and approval, as well as to the shareholder meeting of the year 2021 for further consideration and approval.

In conclusion, the Audit Committee has fulfilled the obligations and responsibilities as specified in the Audit Committee Charter, with their knowledge and abilities, carefulness, thoroughness, adequately independence. Moreover, they provided productive opinions and recommendations in favor of stakeholders equally. The Audit Committee scrutinized that the Company's financial reports are accurate, credible and in compliance with generally accepted accounting standards. The Company has managed an operation that is consistent with laws, obligations related to the business operations, including the good corporate governance system, adequate risk management and appropriate and efficient internal control system.
