Subject Clarification of Q1/2018 Company Performance

To The President of the Stock Exchange of Thailand

Reference MDX Public Company Limited and its Subsidiaries Financial Statement as of March 31, 2018.

MDX Public Company Limited (“MDX”) would like to explain major factors that affect Q1/2018 consolidated operating results as follows:

- An increasing cost of utility services in Q1/2018 compared with those in the same period of 2017, (while utility service income is stable), are attributable to the road and water system repairing cost.
- An increasing participating profit from investment in associated companies and a joint venture in Q1/2018, compared with those in the same period last year, comes mainly from the increase in the amount of water and electricity demand during the period.

Please be informed accordingly.

Yours faithfully,

(Mr. Pijayaphong Na Bangxang)

President
