- The Company posted net loss for the third quarter of 2018 amounted to THB 311 million which higher than last year quarter by THB 376 million mainly due to HRC selling price is stable whilst the cost for import scraps is continuous increase. However, in the third quarter of 2018, the Company had the sale revenues and sale volumes increased in significantly, which can summarized as follow:
 - Sale volumes (Coil tons) and production volumes in the third quarter of 2018 were significantly higher than last year quarter due to the Company entered the Tolling agreement with G Steel for producing of HRC to increase the normal capacity during off peak power usage commencing in 4th Quarter of 2017 till to present which can demonstrate as the following:

| | 3rd Quarter 2018 | | | 3rd Quarter 2017 | | |

- Increasing of HRC price: the average selling price of HRC in 3rd Quarter of 2018 was THB 20,715/ton, increased by 15% as compared with last year quarter (THB 18,079/ton) according to HRC market price worldwide trend.
- HRC cash margin (excluding depreciation) in 3rd Quarter of 2018 was achieved at THB 482/ton, lower by 66% from last year due to the increase in the cash conversion cost which has increased by 316% from the same quarter of last year which are mainly caused by the increasing price of graphite electrode and higher repair and maintenance cost and the proportionate of an increased in raw material cost is greater than an increased in HRC market price.

2. Business Outlook on Q4/2018

The company expects the lower of production and sales due to the slowdown of Tolling during Q4/18. The company therefore will maximize our own capacity by producing up to 17hours per day in order to compensate the lower volume of Tolling. The market demand is not yet picking up to the same level as Q4/17 due to the delay of Government spending of Infrastructure project. In addition, the influx of Galvanized products from China and Vietnam also affect to HRC market as well. To cope up with the aforesaid issue, we try to find new export market and also expedite the new products in order to serve the new market segments i.e. Gas cylinder.

Though the HRC price is soften in ASEAN of which affected from Trade War between China and USA, some of the excess HRC try to commute to Thailand and our neighbor countries. This resulting in the soften of HRC price but the scrap price is also soften as well. As such, the company is still positive to see an improving of metal spread comparing to Q4/18.

3. Management's Message

The main raw materials (Pig iron, shredded scrap) the price movement of the main raw materials, i.e. scraps and pig iron, had more fluctuated since the first quarter of 2016, by increasing in the first and the second quarters of 2016 and then decreased in the third quarter of 2016 but then turn back increasing continuously until the first quarter of 2018. For second quarter to third quarter of 2018, the price of pig iron remained stable at the same level while the price of scrap started to fall continuously. Thus it will become more challenging for the global steel industry participants in all the regions. Careful estimation for raw material purchasing and production cost management is seriously needed in order to cope with the more dynamic business environment.

The raw material reference prices on the world market are that the HMS 1&2 (80:20 ratio) scrap USA export price of the third quarter of 2018 was averaged at USD 312/mt. FOB, decreased from the previous quarter at USD 342/mt. FOB, and pig iron Russia export price of the third quarter of 2018 averaged at USD 393/mt. FOB, dropped a little bit from USD 394/mt. from the previous quarter.
