However, for the year 2018, the Company had the sale revenues and sale volumes increased in significantly, which can summarized as follow:
  - Sale volumes (Coil tons) and production volumes in year 2018 were significantly higher than last year due to the Company entered the Tolling agreement with G Steel for producing of HRC to increase the normal capacity during off peak power usage commencing in 4<sup>th</sup> Quarter of 2017 till to present which can demonstrate as the following:

- Increasing of HRC price: the average selling price of HRC in year 2018 was THB 20,663/ton, increased by 11% as compared with last year (THB 18,690/ton) according to HRC market price worldwide trend.
- HRC cash margin (excluding depreciation) in year 2018 was achieved at THB 886/ton, lower by 58% from last year due to the increase in the cash conversion cost which has increased by 18% from the last year which are mainly caused by the increasing price of graphite electrode and higher repair and maintenance cost and the proportionate of an increased in raw material cost is greater than an increased in HRC market price.

#### 2. Business Outlook on Q1/2019

The company terminated the Tolling Contract in January due to unfavorable market sentiment. From February onwards, the Company has to increase their production volume within their capacity of the facility. The production volume in Q1/19 hence reduce comparing to Q1/18. HRC price is quite stable in Q1/19 though the Safe Guard of Alloy HRC was terminated in February. This does not affect HRC price as we still foresee that other measures i.e. Anti-Dumping is still valid until 2020. Recently the Anti-Circumvention law is just approved and will be effective in the next 6 months. This will be the first law that going to protect steel industry. The good point of Anti-Circumvention law is no expiring date, unlike other measures i.e. Anti-Dumping, Safe Guard.

The consumption of this quarter is considered low especially the government project as the public is still waiting for the national election on 24 March 19. As such, the Company do not foresee

Management's Discussion and Analysis (MD&A) for year 2018 (Revised)

any improving of the consumption of steel in this quarter. In addition, the Company has move the annual shut down early to February due to the slowdown of the market. Hence, there Q1/19 production will be low comparing to other quarter.

## 3. Management's Message

## **Executive Summary**

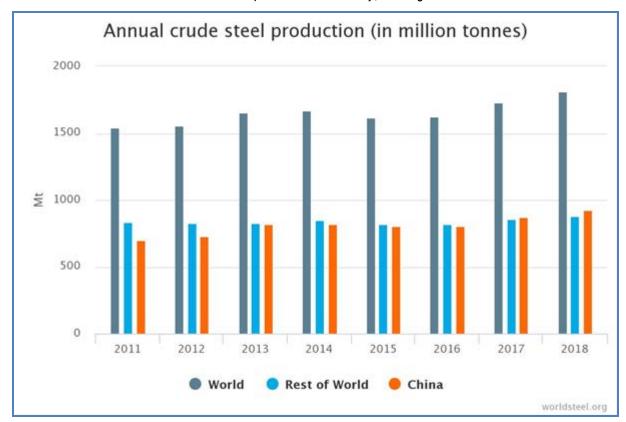

The company's operating results in the year 2018 has significantly increased both sales revenue and volume of hot rolled coil (HRC) in which sales revenue rose from Baht 15,178 million from 2017 to Baht 29,910 million in 2018, also the HRC volume surged from 812,113 tons in 2017 to be 1,447,472 tons in 2018. The huge increase was came from tolling activity that the Company hired G Steel Plc to produce HRC during G Steel has been in the debt restructuring process and try to obtain new funding for its own production. This is to maintain market share and to meet demand for HRC local customers. However, the domestic steel industry has been affected by a trade war between China and the United States, caused slowdown of the global economic growth and resulted to the narrow of metallic spread. The company's gross profit margin fell from 5.7 percent in 2017 to just 0.9 percent in 2018 which not able to cover selling and administrations expenses of the Company. In addition, in 2017 the company had realized gain from debt restructuring by converting major portion of trade debts into equity and gain form exchange rate which those non-cash revenues were high at Baht 1,045 million while this year the company has such non-cash gain only Baht 225 million.

From the above reason, the Company has incurred a net loss of Baht 836 million in 2018, compared with the year 2017 with a net profit of Baht 990 million, however, the Company's EBITDA was still remain positive at Baht 612 million in 2018.

Such the situation showed that global crude steel production continues to increase and was moving in line with the world economy which related to global steel consumption increased. Therefore, the steel product is expected to recover together with the liberalization of international trade begins to effective; rely on the time frame that each party has made a long-term agreement. It is forecasted that the demand and supply of steel will increase in the future.

#### Remarks:

1. For antitrust reasons, worldsteel no longer produces a monthly global capacity utilisation ratio. Information on capacity can be found on the OECD website.

The main raw materials (Pig iron, shredded scrap) the price movement of the main raw materials, i.e. scraps and pig iron, had more fluctuated since the first quarter of 2016, by increasing in the first and the second quarters of 2016 and then decreased in the third quarter of 2016 but then turn back increasing continuously until the first quarter of 2018. For second quarter to fourth quarter of 2018, the price of pig iron and the price of scrap started to fall continuously. Thus it will become more challenging for the global steel industry participants in all the regions. Careful estimation for raw material purchasing and production cost management is seriously needed in order to cope with the more dynamic business environment.

The raw material reference prices on the world market are that the HMS 1&2 (80:20 ratio) scrap USA export price of the fourth quarter of 2018 was averaged at USD 303/mt. FOB, decreased from the previous quarter at USD 312/mt. FOB, and pig iron Russia export price of the fourth quarter of 2018 averaged at USD 372/mt. FOB, dropped from USD 393/mt. from the previous quarter.

Hot Rolled the prices for hot-rolled coil on the world market during the first quarter of 2016 to fourth quarter of 2018 had more fluctuated by moving from the lowest point in the first quarter of 2016 then rebounded in the second quarter, and fell again in the third quarter and then turn back increasing continuously from fourth quarter of 2016 to first quarter of 2017 and decreased again in the second quarter then rebounded quickly until first quarter of 2018 and dropped continuously from second quarter to fourth quarter of 2018.

The reference prices for hot-rolled coil on the world market are that China export price average for fourth quarter of 2018 was USD 527/mt, FOB, dropped from the previous quarter at USD 584/mt. Meanwhile, Russia export price average was dropped from USD 564/mt. FOB, to 497/mt.
