August 14, 2019

Subject Clarification of Q2/2019 Company Performance

To The President of the Stock Exchange of Thailand

Reference MDX Public Company Limited and its Subsidiaries' Financial Statement
as of June 30, 2019

MDX Public Company Limited ("MDX") would like to explain major factors that affect Q2/2019 consolidated operating results as follows:

- There is no land-sale revenue in Q2 of this year.
- The increasing of the cost of consulting service and the administrative expenses in Q2/2019 come mainly from recording of employee benefit of those who worked for a continuous period of 20 years and more to the last 400 days of their wages according to Labour Protection Act (No.7) B.E.2562(2019).
- An increasing participating profit from investment in associated companies in Q2/2019 compared with those in the same period last year, comes mainly from a decrease in electricity generating to the EGAT's system due to the drought.

Please be informed accordingly.

Yours faithfully,

(Mr.Pijayaphong Na Bangxang)

President
