4.3.2.Competitiveness

4.3.2.1. Product quality

The company is committed to product quality control to ensure that their products meet the requirements of customers. The process starts from the procurement of selected raw materials, the supervision of the production process, and the quality control of finished products

4.3.2.2. Ability to procure raw materials

The company has a database of more than 1,000 suppliers around the world and has good relationships with more than 60 partners. This enables the company to select good quality raw materials at reasonable prices and meet the needs of customers.

4.3.2.3. Benefits from acquiring a BOI Investment Promotion Certificate

4.3.3.Risk Factors

Risks from internal factors

4.3.3.1. Risks from a fluctuation in raw material prices

The plastics industry is affected by oil prices because the plastics industry is directly linked to the petroleum and petrochemical industries. The price of raw materials, therefore, varies with the world oil price and the economic situation. The company is at risk of being unable to control variable production costs which may result in higher costs or lower profits. However, the company manages their risks by regularly following up on related information, and analyzes the information in order to develop strategies, production plans and sales plans. This allows they can manage the purchase of raw materials to ensure maximum efficiency and profitability

4.3.3.2. Risks from dependence on the Chinese market

The company currently exports to the Chinese market as the main market. The Chinese plastics market is the largest plastic pellet export market in Thailand and the largest market size in the plastics industry in the world. The trade transactions with the Chinese market are beneficial to the company in terms of income stability. However, the company has plans to expand the market to other countries

4.3.3.3. Risks from foreign exchange rate

The company trades in foreign currency which is subject to exchange rate fluctuation risk. However, they will have measures to consider entering into foreign currency forward contracts as appropriate in each case to prevent and reduce the impacts of foreign exchange risks.

4.3.3.4. Risks from the inability to collect account receivables

Selling on credit provides the company a variety of benefits; however, the company realizes the risks involved with offering this option. To reduce the risks, they determine appropriate credit control policies and only offer credits to selected customers who have healthy financial status and good relationship.

Risks from external factors

4.3.3.5. Risks from unstable global and domestic economy due to COVID-19

The volatility of the economy is a factor that affects the company's business. In 2020, in spite of the spread of the COVID-19 virus that occurs around the world, they have been able to maintain the revenue and profitability very well.

4.3.3.6. Risks Associated with Law Changes

The company must operate in strict accordance with the policies, requirements and laws, which may affect their operations and business opportunities. Therefore, the company must monitor legal changes closely in order to act properly and to develop suitable strategies.

1.2 Determination of the offering price and the appropriateness of the newly issued share price of the Company

The offering price was determined by appropriate valuations of A.P.W.'s shares using the Discounted Cash Flow Approach which takes into account the potential and profitability of the business in the future. The key considerations and assumptions are past performance, business growth, and current and potential benefits that the Company will be received in the future from the investment in the industry which has a high possibility to obtain stable growth in the future. These assumptions are supported and checked by using information (including Financial, tax, and Legal due diligence) provided by an external independent consultant, namely JR Business Advisory Co., Ltd. Additionally, the offering price is mutually agreed between the Company and A.P.W., a price without a discount of more than 10% from the market price as prescribed in the Notification of the Capital Market Supervisory Board No. Tor Chor. 72/2558, where “market price” means the weighted average price of the past 7 consecutive business days, but not more than 15 consecutive business days prior to that date which the Board of Directors resolved to propose the agenda to the Extraordinary General Meeting of Shareholders No. 1/2021 of the Company with a vote of not less than three-fourths of the total votes of the shareholders attending the meeting and having the right to vote (“Notification of the Capital Market Supervisory Board No. Tor Chor. 72/2015”).

1.3 The determination of the Market Price

Market price means the weighted average price of the past 7 consecutive business days, but not more than 15 consecutive business days prior to that date which the Board of Directors resolved to propose the agenda to the Extraordinary General Meeting of Shareholders No. 1/2021 to request approval for the company. The offering for sale of newly issued ordinary shares is from 13 August – 2 September 2021, which is equal to 0.85 baht (data from SETSMART of Thailand). The offering price of the Company's newly issued ordinary shares for acquiring A.P.W.'s ordinary shares is without a discount of more than 10% from the market price as specified in the Notification of the Capital Market Supervisory Board No. Tor Chor. 72/2015. This is a private placement scheme by using the offering price according to the average market price on a daily basis in the past 7 consecutive business days, but not more than 15 consecutive business days.

If the offering price of the newly issued ordinary shares to the seller is a price with a discount of more than 10% from the market price, PG will not sell all the newly issued ordinary shares within 1 years (Silent Period) starting counting at the date that the shares received by the capital increase are traded on the SET. After the 6 month period, PG's shareholders will be able to gradually sell the prohibited shares in the amount of 25% of the total shares prohibited according to the rules prescribed in the announcement of the Stock Exchange of Thailand Re: Rules, Conditions, and Procedures for Consideration of the Request for Listing of Ordinary Shares or Preferred Shares for the Capital Increase as Listed Securities B.E. 2558 (and as amended)

1.4 Plan Offering

Schedule for issuing newly ordinary shares for the acquisition in A.P.W.'s ordinary shares within the 4th quarter of 2021, but not later than 3 months from the date of approval from the Extraordinary General Meeting of Shareholders for making the transaction. The issuance is under the conditions of entering into the

transaction specified in Clause 10 in the information memorandum regarding the acquisition and connected transactions of the Company

2. Objectives of the issuance of newly issued ordinary shares and plans for the use of proceeds

2.1. Objectives of the issuance of newly issued ordinary shares and plans for the use of funds and project details

The Company will enter into a transaction to accept the transfer of 450,000,000 ordinary shares of A.P.W., representing 100% of the total issued and paid-up shares of A.P.W., totaling Baht 382,500,000 (“A.P.W. ordinary shares”) from Pacific Global Company Limited (“PG”) under the Entire Business Transfer process. This aims to create an opportunity to expand the Company's industrial business and to grow long-term stability which is in line with the vision of the Company. The potential investment will result in the Company 100% A.P.W.'s holds common stocks and is able to recognize all operating results from A.P.W.'s business operations, which will enhance the Company's performance and cash flow in the future. The Company will pay compensation in capitals instead of in cash, which will make the company can reduce the burden of the investment including the burden of incurring debt and to increase liquidity for the company by reserve cash for working capital or expenses in investment projects. Additionally, A.P.W. is a potential producer and distributor of recycled plastic pellets and has high potentials to grow at a stable rate in the future, which will bring about the added value for the Company and shareholders of the Company in the long term, with details as shown in Enclosure 1 Information Memorandum on Acquisition of Asset and connected transaction.

2.2. Opportunity to generate income for the company

The consideration of investing in A.P.W. ordinary shares in the proportion of 100% of the total issued and paid-up shares of A.P.W. will diversify the investment risks of the Company, increase the diversity of business in the industrial sector, and create opportunities for industrial business expansion and increase sources of income. It is an investment in a company that is ready in terms of work and personnel who have experience and expertise in the business of producing and distributing recycled plastic pellets for over 21 years, certified to international standards, received investment promotion from the Office of the Board of Investment, and has high potentials to grow steadily in the future as a result of the awareness of the use of global warming, the promotion of the use of renewable resources, and the supported factors from the government policy, the Bio-Circular-Green Economy (BCG Model) to raise environmental awareness and stimulated demand for recycled materials in the production process.

2.3. Expected impacts in the event of project failure and risks from project implementation

The Company may experience risks in the event that A.P.W.'s revenue and consolidated performance are not as expected, which may occur for a number of reasons, which are:

- Oil price volatility as oil is a volatile commodity and the price of plastic pellets which is A.P.W.'s product, is mainly based on oil price by controlling costs to achieve a reasonable spread
- Production volumes may not meet expectations and sales volumes may not meet expected targets.
- Exchange rate fluctuations

- Law Changes and various rules such as laws related to industry and the environment Laws related to import and export relevant laws of the trading partner country In particular, APW's main income is from exports to China.

However, the Board of Directors and the Company has carefully considered the risks. As most of the risks are general risks in the plastic resin distribution business, the Company believe that they can conduct appropriate risk management to manipulate the potentials of negative impacts to the lowest level.

2.4. The total budget expected to be used initially and the total budget expected to be required for the project to generate income for the Company

The Company will conduct the entire business transfer of PG, including 1,300,000 ordinary shares of APW, with a par value of 100 baht per share, at a purchase price of 294.23 baht per share, representing a total value of 382,500,000 baht by issuing the Company's ordinary shares for the payment. In addition, as A.P.W. has just installed and expanded capacity in 2021 and has no plans to expand additional installed capacity in the next 3 years, so there is no capital expenditure that the Company need to increase in the scope of the operations. The additional budget will be required in a part of the internal control and operational system in order to operate efficiently and achieve the objectives, which cost approximately 800,000 baht. As A.P.W. has sufficient liquidity, the company does not need to find funding sources.

3. Impact of the issuance of newly issued ordinary shares to specific persons under a private placement scheme

3.1. Effects on the Company's share price (Price Dilution)

$$\begin{aligned}
 &= \frac{(\text{Market Price before the offering} - \text{Market Price after the offering})}{\text{Market Price before the offering}} \\
 &= \frac{(0.85 - 0.85)}{0.85} \\
 &= 0 \text{ percent}
 \end{aligned}$$

The market price after the offering is calculated from

$$\begin{aligned}
 &= \frac{((\text{number of paid-up shares} \times \text{market price before offering}) + (\text{number of newly issued shares} \times \text{offering price}))}{(\text{number of paid-up shares} + \text{number of newly-issued shares})} \\
 &= \frac{((889,755,780 \times 0.85) + (450,000,000 \times 0.85))}{(889,755,780 + 450,000,000)} \\
 &= 1 \text{ baht per share}
 \end{aligned}$$

After the offering of newly issued ordinary shares will not result in a price dilution because the offering price is equal to the market price.

3.2. Effects on the shareholders' voting rights (Controlled Dilution)

$$\begin{aligned}
 &= \frac{\text{Number of shares offered in this offering}}{\text{Number of paid-up shares} + \text{Number of shares offered in this offering}} \\
 &= \frac{450,000,000}{(889,755,780 + 450,000,000)} \\
 &= 33.59 \text{ percent}
 \end{aligned}$$

After the issuance of the newly issued ordinary shares will result in a decrease in the shareholding ratio at the rate of 33.59 percent.

3.3. Earnings per Share Dilution

$$\begin{aligned} &= \frac{\text{(Earnings per share before offering – Earnings per share after offering)}}{\text{Earnings per share before offering}} \\ &= 33.59 \text{ percent} \end{aligned}$$

The value to the shareholders compared to the impact on their share of profits or voting rights

Comparing the benefits that shareholders will receive from the offering of new ordinary shares to support the investment in A.P.W.'s ordinary shares with the reduction of shareholding (Control Dilution and the decrease in earnings per share (Earnings per share) as detailed above. The Board of Directors is of the opinion that the offering of new ordinary shares to support the transaction More benefits to shareholders than impacts on the reduction of voting rights for shareholders Since entering into an investment transaction in the ordinary shares of A.P.W. from PG under the Entire Business Transfer will benefit the Company and its shareholders as shown in Clause 3.4 below. The Company also consider the total value of a potential investment opportunity and found that an expected rate of return on investment in A.P.W. (Internal Rate of Return or “IRR”) equal to 17.50% by using 10% of a Weighted Average Cost of Capital (Average Cost of Capital or “WACC”) and has a net present value which is approximately 258 million baht.

3.4. Expected Benefits for the Company

- It is a diversification of investment risks, a development of diversification in the industrial sector, a growth of opportunities to expand the industrial business and an addition of the source of income
- It is an investment in a company that is well equipped in terms of work and personnel who have expertise in the business which has a high tendency to grow significantly in the future
- It is an investment that can recognize financial and operating results from A.P.W., which strengthen the company’s overall operating results and cash flows
- It is an investment that allows The Company to reduce the burden of investment, the burden of incurring debt and to retain the liquidity by reserving cash to use as working capital and paying the investment by issuing new ordinary shares

4. Opinion of the Company’s Board of Directors concerning the transaction as defined under the Notification of the Capital Market Supervisory Board No. TorChor. 73/2558 Re: List in a Notice to Shareholders for Granting of Permission to Offer Newly Issued Shares

The Board of Directors' meeting resolved to propose to the Extraordinary General Meeting of Shareholders No. 1/2021 to consider and approve the Company to acquire the ordinary shares of A.P.W. from PG under the entire business transfer process with 450,000,000 newly issued ordinary shares of the Company with a par value of 0.25 baht per share by setting the offering price of newly issued ordinary shares at a price of 0.85 baht per share, representing a total value 382,500,000.00 baht to PG as compensation instead of paying in cash. The Board of Directors has considered that entering into such transaction is beneficial to the Company in terms of the profitability, liquidity, and growth of the company in the long term.

4.1. The origin of the offering price determination and the appropriateness of the offering price of the newly issued ordinary shares

The Company will conduct the entire business transfer of PG, including 1,300,000 ordinary shares of APW with a par value of 100 baht per share, at a purchase price of 294.23 baht per share, representing a total value of 382,500,000 baht, based on the negotiation between the Company and PG. The Company

The fair value valuation is based on the discounted cash flow method, which results in the value of A.P.W.'s shares in the range of 612.4 – 713.6 baht per share. The assumptions based on A.P.W.'s historical performance can be summarized as follows:

Details	Assumptions 2021-2026
Total income	254.1 – 281.1
Cost of goods sold	129.2 – 175.9
Net profit	64.5 – 109.3
Discount rate	9.5% - 10.5%
A.P.W. share value	612.4 – 713.6

The Board of Directors is of the opinion that the determination of the consideration value and the offering price of the Company's newly issued ordinary shares is appropriate by determining the value of consideration for entering into the transaction with 450,000,000 newly issued ordinary shares of the Company at the weighted average market price of the Company's shares in the Stock Exchange of Thailand for the past 15 consecutive business days prior to the date on which the Board of Directors resolved to propose the agenda to the Extraordinary General Meeting of Shareholders No. 1/2021 between August 13 - September 2, 2021, which is equal to 0.85 baht (data from SETSMART of Thailand) as the offering price of the Company's newly issued ordinary shares without a discount of more than 10 percent from the market price as prescribed in the Notification of the Capital Market Supervisory Board No. Tor Chor. 72/2015 to pay as compensation for the investment in the ordinary shares of A.P.W. to PG equal to 382,500,000 baht.

4.2. Reason and necessity for the issuance of newly issued ordinary shares in the Private Placement

This capital increase is reasonable and brings maximum benefits to the Company concerning on the Company's liquidity and leverage. In different cases, loaning money creates the cost of borrowing as an investment burden or a capital increase to the existing shareholders in proportion (Right Offering) brings a burden on the existing shareholders to pay the capital increase and have a time frame for the operation that is more than the capital increase under a private placement scheme.

4.3. Feasibility of the plan for utilizing proceeds received from the offering

The Board of Directors was of the opinion that the offering of capital increase shares to a private placement is to pay for the acquisition in the ordinary shares of A.P.W. after being approved by the Extraordinary General Meeting of Shareholders No. 1/2021, under the conditions of entering into the transaction specified in Clause 10 in the Information Memorandum regarding acquisition of assets and connected transactions of the Company.

4.4. Reasonability of the increase of the registered capital and the sufficiency of the capital in the case that the capital raised by the offering of shares does not cover all of the budget required for the project operation

The Company considers that the capital increase is appropriate and helps maintain liquidity in the Company's operations. However, if the capital increase does not cover the Company's budget, the Company will raise capital from Strategic investors who are interested in investing in this venture at a reasonable price.

In this case, the Board of Directors will consider the most suitable source of funds taking into account the best interests and benefits of the Company and their shareholders.

4.5. Impact of the business operation, financial status, and overall operation of the Company as a result of the issuance of the newly issued ordinary shares

Considering to invest 100% in A.P.W.'s ordinary shares will create an opportunity to expand the growth of the plastic resin business in the industry that is constantly evolving and growing. This will provide the Company the opportunity to achieve more healthy and stable financial performance as The Company is able to recognize the operating results in the consolidated financial statements and to reduce the cost of business expansion Procurement and training of personnel by offering a private placement instead of paying for shares in cash, which will not affect the working capital of the Company.

5. Warranty of directors

The Board of Directors certifies that the Board of Directors has performed its duty with honesty and has carefully preserved the benefit of the Company in relation to such increase of the registered capital. However, in the case that such performance of duty cause damage to the Company, the shareholders are entitled to file a lawsuit to claim for damages from such director on behalf of the Company as specified in Section 85 of the SEC Act. In addition, if such performance of duty causes a director or his/her related person to obtain undue benefit; the shareholders shall be entitled to file a lawsuit to claim for such benefit from such director on behalf of the Company as specified in Section 89/18 of the SEC Act. Moreover, the Board of Directors certifies that the Board of Directors has exercised due care in the consideration and examination of the information of the Newly Established Private Company A and was of the opinion that the Newly Established Private Company A possess the appropriate qualifications to be the major shareholders of the Company, and have the right to propose 8 candidates to be appointed to the Board of Directors of the Company, as well as the representatives from the Newly Established Private Company A will be nominated to hold the position or management or the person having the controlling power in the Company.

The Board of Directors of the Company is responsible for the information disclosed in this Information Memorandum, and hereby certifies that to the best of the Board of Directors' knowledge and ability, the information contained in this Information Memorandum is correct, complete, and not misleading in any respect.

6. Opinions of the Audit Committee and/or Company Directors which is different from the opinion of the Company's directors

None
