Factors which may adversely impact to the performance

Credit Risk

With the nature of factoring credit transactions, this may face the same credit risk as other types of loans. But the factoring transaction is a credit after the delivery of goods and services to the buyer and due to the purchase and reduction of trade receivables, resulting in the right to claim under the law, together with the company has a strict policy and credit control procedures. With a credit consideration process (Underwriting) and monitoring (credit quality) from various data analysis, both for customers and trade receivables, before and after loan approval as well as establishing credit policies as a standard for assessing credit risk. Require credit review for customer and debtors at least once a year, as well as monitoring and improving the credit process all the time to adjust the process to be efficient and suitable for the economic conditions in each period by using technology and database for risk management. Therefore, the quality of credit

Interest Rate Risk

management is at a good level in the past.

The Company's exposure to interest rate risk relates primarily to its cash at banks, factoring receivables, loans receivable, other receivables, bank overdrafts and short-term loans from financial institutions. The Company mitigates this risk by matching the sources of borrowings with factoring receivables to ensure that the Company maintains an accumulated average spread of interest under the Company's policy. Moreover, the Company analyses the term of interest rate movement of factoring receivables, borrowings and the Company adjusts the interest rate charge to receivables when the interest rate changes. Thus, the Company is flexible in its response to interest rate fluctuations. In addition, since most of the Company's financial assets and liabilities bear floating interest rates or fixed interest rates which are close to the market rate, the interest rate risk is expected to be minimal.

Liquidity Risk

Liquidity risk is the. risk due to the company cannot change assets to cash or unable to provide sufficient funds as needed in a timely manner. However, in the past, the company having liquidity management and receiving sufficient and continuous financial support from financial institutions and business partners. Makes it able to support business operations and expand business in the future effectively as well as having a suitable liquidity management between costs and returns Bring continuous good results.

Please be informed accordingly.
