November 14, 2022

Subject: Clarification on Q3/2022 Company Performance

To: The President of the Stock Exchange of Thailand

Reference: MDX Public Company Limited and its Subsidiaries' Financial Statement as of  
September 30, 2022

MDX Public Company Limited ("MDX") would like to explain the major factors that affect Q3/2022 consolidating results as follows:

- In Q3/2022, Damage from the lawsuit is recorded for Baht 210.74 million as the money temporarily seized finally belongs to the state by the Supreme Court's judgment dated September 1, 2022.
- The decreasing share of profit of associates compared to those of the same period of last year is the result of the water amount. Though quite a heavy rainfall this year, the water added up to the reservoir is still less than last year which is the peak period. This, then, makes the revenue from the production and selling of electricity decrease.

Please be informed accordingly.

Yours faithfully,

(Mr.Pijayaphong Na Bangxang)

President
