The purpose of the issuance of the newly issued ordinary shares is to be used as a payment for the investment in Inno Precast by way of acquiring and accepting the entire business transfer of Quartz Holding 1, who holds 1,020,000 ordinary shares, representing 51.00% of the total shares of Inno Precast, which the Company will pay for the aforementioned transaction using cash or the newly issued ordinary shares of the Company in the amount of not exceeding 1,572,729,730 shares to Quartz Holding 1 and/or shareholders of Quartz Holding 1 (PSH) by way of private placement.

In the event of a share swap, Quartz Holding 1 and/or shareholders of Quartz Holding 1 will use the entire business of Quartz Holding 1, namely 1,020,000 ordinary shares in Inno Precast (representing 51.00% of the total shares of Inno Precast) with the par value of THB 100, with a total value of THB 581,910,000, to pay for the newly issued ordinary shares of the Company. The payment will be made with other assets instead of cash, therefore, the Company will not receive the payment for the shares and the whole proceed from the payment for the shares will be used for an investment in Inno Precast.

## 3. Potential Impact on Shareholders from the Issuance and Offering of the Newly Issued Ordinary Shares by way of Private Placement

### 3.1 Price Dilution

$$\begin{aligned} &= \frac{\text{The market price before offering} - \text{market price after offering}}{\text{market price before offering}} \\ &= \frac{0.27 - 0.29}{0.27} \\ &= -6.88\% \end{aligned}$$

(Translation)

The market price before offering calculates from the weighted average price for 15 business days before the Board's Meeting No.1/2023 dated 13 January 2023 (during 22 December 2022 – 12 January 2023) (information from website of the SET) which equals THB 0.27/share.

The market price after offering calculates from

$$= \frac{(\text{total paid-up shares} \times \text{market price before offering}) + (\text{total increased shares} \times \text{offering price})}{\text{Total paid-up shares} + \text{total increased shares}}$$

Total paid-up shares + total increased shares

$$= \frac{(7,039,316,435 \times 0.27) + (1,572,729,730 \times 0.37)}{7,039,316,435 + 1,572,729,730}$$

$$= \frac{7,039,316,435 + 1,572,729,730}{7,039,316,435 + 1,572,729,730}$$

$$= 0.29$$

Therefore, after allocation of newly issued shares to the private placement, there will be no price dilution.

### 3.2 Control Dilution

$$= \frac{\text{total increased shares}}{(\text{total paid-up shares} + \text{total increased shares})}$$

$$= \frac{1,572,729,730}{7,039,316,435 + 1,572,729,730}$$

$$= 18.26\%$$

Therefore, after allocation of newly issued shares to the private placement, there will be decrease in control dilution at 18.26%.

### 3.3 Earnings per Share Dilution

$$= \frac{\text{EPS before offering} - \text{EPS after offering}}{\text{EPS before the offering}}$$

EPS before the offering

$$= \frac{1,572,729,730}{7,039,316,435 + 1,572,729,730}$$

$$= 18.26\%$$

EPS before offering calculates from:

(Translation)

$$\begin{aligned} &= \frac{\text{Profit from 4 Quarters (4}^{\text{th}} \text{ Quarter/2021 – 3}^{\text{rd}} \text{ Quarter/2022)}}{\text{Total paid-up shares before capital increase}} \\ &= \frac{-149,377,535.17}{7,039,316,435} \\ &= -0.021 \end{aligned}$$

EPS after offering calculates from:

$$\begin{aligned} &= \frac{\text{Profit from 4 Quarters (4}^{\text{th}} \text{ Quarter/2021 – 3}^{\text{rd}} \text{ Quarter/2022)}}{\text{Total paid-up shares after capital increase}} \\ &= \frac{-149,377,535.17}{(7,039,316,435 + 1,572,729,730)} \\ &= -0.017 \end{aligned}$$

Therefore, after allocation of newly issued shares to the private placement, there will be no Earnings per Share Dilution.

### **3.4 Potential Impact on the Company's Business Operations, Financial Position, and Overall Operating Result due to the Capital Increase**

The purpose of this capital increase is to use as payment for the investment in Inno Precast, which is in accordance with the strategy and main business of the Company group, as Inno Precast has conducted its business by producing and distributing precast, which already generates income for the business. Inno Precast has a production capacity of approximately 4.4 million sq m/year, which will help expand the Company's precast business to achieve a stronger customer base, which will be beneficial to the business of the Company in the long run. Therefore, the Board of Directors believe that this capital increase will not have any negative effect on the business operation of the Company, or the financial position or the results of the business operation of the Company.

Where there has been a further negotiation in relation to agreements as a part of supporting the transaction and being a business partner with the PSH group, the Company agrees not to take any action which will result in the reduction of PSH's shareholding in the Company (Dilution) according to the agreed terms and period, the Company's Board of Directors believes that the agreement will not have a negative impact on the Company, since the company has a variety of funding options, such as the issuance and offering of newly issued ordinary shares in proportion to their shareholding (Rights Offering).

#### **4. Opinion of the Board of Directors**

##### **4.1 Rationale, Necessity, and Reasonableness of the Capital Increase**

This proposal of capital increase and the allocation of the newly issued ordinary shares by way of private placement is necessary as it is one of the conditions of the payment for the investment as agreed with the PSH group. In this regard, the Board of Directors has resolved to propose to the Shareholders' Meeting to consider approving the issuance of newly issued ordinary shares, with the shareholders having a resolution to clearly specify the offering price, which follows the conditions that the Company has agreed with PSH, taking into account the fair value of Inno Precast compared against the fair value of the Company, we believe that the aforementioned offer price is reasonable. In addition, the determination of a clear offering price will help reduce the risk from the dilution effect of all shareholders of the Company in the event that the Company's share price is volatile.

##### **4.2 Possibility of the Plan for Use of Proceeds and the Adequacy of Funding Sources**

The purpose of this capital increase is to support the investment transaction by way of share swap. Therefore, there is no consideration for the plan for use of proceeds and the adequacy of funding sources.

##### **4.3 Reasonableness of the Capital Increase and Plan for Use of Proceeds from the Offering of the Shares**

This capital increase is reasonable as it is a part of the investment plan in Inno Precast, which will be beneficial to the Company in the future.

##### **4.4 Rationale and Necessity for the Offering of the Newly Issued Shares by way of Private Placement**
