**Subject: Report of the Company's Operating Results for the first quarter of FY2024 (April-June 2023)**

Tata Steel (Thailand) Public company Limited ("Company") would like to report the company's operating results for the first quarter of FY2024 (April-June 2023) as under:

## 1. Operating Results

Low domestic demand, coupled with a surge in low-priced wire rod imports into Thailand adversely impacted the deliveries in the current quarter.

### Operating Results compared with previous quarter & previous year

#### 1.1 Revenue from sales and related services

Sales volume in the current quarter at 266 K Ton was lower than the previous quarter and the same quarter previous year by 15% and 14% respectively on account of sluggish domestic demand and lower rebar exports. Most customers are still concerned about the market sentiment that has not improved and future market uncertainties.

Revenue from sales and related services in the current quarter was at 6,202 Mn THB lower than previous quarter and same quarter last year mainly from lower price reflecting the market sentiments and lower sales volume.

#### 1.2 Profit Before Tax

The Company reported a profit before tax of 48 Mn THB in the current quarter against a profit of 108 Mn THB for the previous quarter and a profit of 584 Mn THB in the same quarter last year. The variance is attributable to the lower spread on account of lower price along with lower sales volume.
