Revenue from contracts with customers for this quarter was Baht 207 million, a decrease of Baht 141 million or 41% compared to the same quarter last year. This decline is due to the reduction in the size of current projects compared to the previous year.

Gross profit for this quarter was Baht 23 million, a decrease of Baht 54 million or 11% compared to the same quarter last year. This is a result of large projects that drove sales in the previous year, which were projects with high profit margins.

Selling and administrative expenses amounted to Baht 31 million, an increase of Baht 7 million or 29% compared to the same quarter last year. This increase was mainly due to the Company recording accrued annual bonuses for the year 2024.

The Company had an operating loss of Baht 4 million this quarter, representing a loss margin of 2%, down from a profit margin of 17% in the same period last year. This decline is due to the decrease in revenue from contracts with customers and gross profit, as well as the increase in selling and administrative expenses for the reasons mentioned above.

Sincerely yours,

Ms. Kamolchanok Sridonchan Chief Financial Officer
