After six months, investors may sell up to 25 percent of the total number of shares that are subject to the restrictions in accordance with the requirements under the Notification of the Stock Exchange of Thailand re: Requirements, Conditions and Methods of Considering an Application to List Ordinary or Preferred Shares.

Shareholding percentage of investors in the Company following the issuance and offering of newly issued ordinary shares to the specific investors (Private Placement) must not cause the investors to have the obligation to make a mandatory tender offer required under the Notification of the Capital Market Supervisory Board re: Requirements, Conditions and Methods of Takeover including relevant rules and announcements or cause a breach of the foreign shareholding limit as provided under the Company's Articles of Association, which is currently at 49 percent of the total number of issued shares of the Company.

The Company anticipates that the targeted transaction will be completed by November 30, 2022.

3. The potential impacts on the existing shareholders

3.1 The effect on the dilution of shares (Control Dilution)

The effect on the dilution of shares (Control Dilution) after the issuance and offering of newly issued ordinary shares will depend on the number of newly issued shares to be offered to the specific investors in the private placement. In the event that the Company offers all of the newly issued ordinary shares to the specific investors, it will affect the reduction of shareholding (Control Dilution) as follows:

$$= \frac{\text{Number of new ordinary shares offered to the specific investors}}{\text{Number of Paid-Up Shares} + \text{Number of new ordinary shares offered to the specific investors}}$$

$$= \frac{1,500,000,000}{11,906,404,956 + 1,500,000,000}$$

$$= 11.19\%$$

3.2 Price Dilution

$$= \frac{\text{Market price before the offering} - \text{Market price after the offering}}{\text{Market price before the offering}}$$

The issuance of shares to the specific investors (Private Placement) has not yet determined the offering price. Therefore, the Price Dilution could not yet be calculated.

3.3 Earnings per share dilution: EPS

$$\begin{aligned} \text{EPS Dilution} &= \frac{\text{EPS before the offering} - \text{EPS after the offering}}{\text{EPS before the offering}} \\ &= \frac{0.24481 - 0.21742}{0.24481} \\ &= 11.19\% \\ \\ \text{EPS before the offering} &= \frac{\text{Net profit (LTM)}}{\text{Number of paid-up shares before capital increase}} \\ &= \frac{2,914,825,748}{11,906,404,956} \\ &= 0.24481 \text{ THB per share} \\ \\ \text{EPS after the offering} &= \frac{\text{Net profit (LTM)}}{\text{Number of paid-up shares after capital increase}} \\ &= \frac{2,914,825,748}{13,406,404,956} \\ &= 0.21742 \text{ THB per share} \end{aligned}$$

Note: Earnings per share before the offering and after the offering calculated by using net profit of the Company for the last 12 months to March 31, 2022 based on the Company's consolidated financial statements which have been audited and reviewed by a certified public accountant.

3.4 The value to the shareholders compared to the impact on their share of profits or their voting rights

Entering into such business does not affect the characteristics and policies of the Company's core business. It is, in fact, an extension and expansion into businesses related to EV and charging solutions. The Company expects that the Proposed Transaction will benefit the Company and the shareholders as follows:

- (1) Highly complementary product portfolio of the Target provides business opportunities to expand into related automotive and EV wire and cable businesses which are highly

demanded globally, and to become a leading wire and cable manufacturer in the region and globally.

- (2) Market knowledge, customer relationships and R&D capabilities sharing of the Target enhances the Company's product performance, market penetration and customer reach.
- (3) Financial benefits from the Target Companies to improve the Company's financial status, which have strong historical performance, including improvement in performance and an increase in earnings per share (EPS accretive) which will be driven by EV market growth trends.

4.6 Reasons and necessities of allocation of shares to the Private Placement investors for newly issued ordinary shares of the Company

The Company is able to raise funds in a short period of time and alleviate some investment burdens of existing shareholders in this capital increase. A public offering of securities involves lengthy process of preparation and approvals from relevant authorities for uncertain period of time beyond control of the Company. Therefore, the Board of Directors considers it is an appropriate approach to raise funds through the issuance and offering of the newly issued ordinary shares to the Private Placement investors who have financial potentials and firm financial positions and who are prepared in paying price to increase the capital. The approach is appropriate and corresponds with the Company's objectives in fundraising. The Company will receive funds in an immediate term and can mitigate possible risks associated with fundraising amidst current economic volatility. This capital increase will enable the Company to invest in the Target Companies, resulting in efficient operation of the Company for future growth.
