The Company will pay the compensation in the form of cash or cashier's check to the contracting party on the same day as the transfer of ownership from the Seller to the Purchase. This will occur after all preceding mandatory

conditions under the land and building purchase agreement have been fulfilled, and various actions have been taken to complete the transaction as specified in the aforementioned contract.

6. Value of Acquired Assets

The value of the assets acquired from the transaction to purchase the land and warehouse buildings will be equal to the total consideration value.

7. Basis of Calculation of the Value of Consideration

The value of the consideration is determined through negotiation and mutual agreement, including the appraisal value of the land and warehouse buildings obtained from independent property appraisers approved by the SEC, totaling 2 evaluations as follows:

- (1) True Valuation Co., Ltd., with [Mr. Suchai Boonchuang as the primary appraiser](#), assessed the total value of the land and warehouse buildings as [THB 132,970,000](#).

8. Expected benefits to the Company

- (1) To enhance competitiveness and expand the company's medical service business

The Company currently operates a cervical cancer screening service in collaboration with the National Health Security Office (NHSO). This expansion aligns with the business plan initiated in 2023. As of February 26, 2024, the Company's laboratory, located at 636/8 Building, covers an area of 369.97 square meters and [can accommodate up to 1,000 tests per day or 300,000 tests per year for cervical cancer screening](#). The tests are gradually processed as they arrive at the lab. The Company anticipates that, if the project is expanded according to the MOUs signed with various regional areas under the NHSO project, approximately 360,000 tests will be conducted in 2024, [fully utilizing the lab's capacity](#). [Currently, the Company has begun signing MOUs with provincial administrative organizations \(PAOs\) in Nakhon Ratchasima, Kamphaeng Phet, Udon Thani, and Kanchanaburi, with tests already being conducted. Negotiations for agreements with other areas are ongoing as part of the Company's 2024 operational plan.](#) However, this does not include the expansion of new laboratory spaces that may occur in the future.

Considering the existing laboratory space is insufficient to accommodate the ongoing expansion plans and future developments, the investment in expanding the laboratory within the warehouse

space to be purchased will help enhance the Company's revenue-generating capabilities. This includes adjusting the layout of the space to comply with the requirements set by the Ministry of Public Health to support the upcoming service provision. In this regard, this investment aims to mitigate business risks in case the current laboratory space encounters interruptions or becomes inoperable due to unforeseen circumstances such as natural disasters or other events. By ensuring continuity of service provision, **the Company can also mitigate the risk of breaching agreements requiring the reporting of screening results within 14 days of receiving the screening kits, under the payment conditions set by the NHSO.**

(2) To mitigate the risk of lease contract termination in the future

Due to the majority of the Company's products are medical devices, solutions, and medical materials that need to be stored under controlled conditions as per regulations, specifications, and clear storage guidelines approved by the relevant governmental agencies. Moreover, they must comply with the conditions set by product manufacturers supplied to the company, having undergone Good Distribution Practice (GDP) inspections from manufacturers abroad, as well as other certifications from international manufacturers such as CERUS and Haemonetics.

Furthermore, the warehouse has been certified with ISO9001:2015 for quality management systems, ISO 13485:2016 for quality management systems specific to medical devices, and stringent safety standards compliant with warehouse standards. Additionally, the warehouse is strategically located near the Company's head office, facilitating ease of management and situated within urban areas, making transportation cost management easier due to proximity to major clients, including leading hospitals and medical facilities. In the event of needing to find new storage space due to lease termination, the Company would require time, resources, and capital to secure new space, including the need to enhance storage safety systems and allocate space in accordance with various regulatory measures, which could potentially disrupt operations.

Investing in the purchase of land and warehouse buildings this time will help mitigate the risk of lease termination in the future due to uncertainty from the Lessor. This will ensure operational stability for the Company.

9. Sources of Funds

Source of funds for entering into the acquisition of land and warehouse buildings transaction will come from borrowing from financial institutions, not exceeding THB 112 million, and the remaining portion will

come from the Company's internal cash flow. For the difference from the total purchase price and various expenses in transferring the ownership, which the contracting parties agreed to share responsibility equally, it will also come from the Company's cash flow.

Furthermore, the debt-to-equity (D/E) ratio as of December 31, 2023, was 0.62. It will increase to 0.71 (calculated from the data as of December 31, 2023, plus increased liabilities minus decreased liabilities according to the lease agreement). Financial institutions have a requirement for the Company to maintain a financial covenant regarding the debt-to-equity ratio not exceeding 2.
