Subject Clarification of Q1/2020 Company Performance

To The President of the Stock Exchange of Thailand

The decrease in Q1/2020 company performance comparing with those in the same quarter last year comes from the decreasing in the revenue of both electricity generating project as follows:

- Theun - HinBoun hydro-power project : as the drought started so early in November last year, EGAT, then, slows down electricity purchasing in order to retain the water for summer season when electricity demand peaks.
- Bang Bo combined cycle power plant : as the system malfunctioned, so it's temporarily shut down for fixing for about 50 days.

Please be informed accordingly

Yours faithfully,

(Mr.Pijayaphong Na Bangxang)

President
